C. Murphy, whose portrait appears on the first page of this issue, was born at Prescott, Ont., Nov. 20, 1865, and entered C.P.R. service in 1883, since when he has been, to 1885, operator; 1885 to 1890, chief operator and dispatcher; 1890 to 1899, chief dispatcher, Ottawa; 1899 to June, 1900, acting Superintendent, and June, 1900, Superintendent, Chapleau, Ont.; 1902 to Nov., 1903, Superintendent, North Bay, Ont.; Nov., 1903, to Feb., 1908, Superintendent, District 2, Ontario Division. He was appointed General Superintendent, Eastern Division, Montreal, in June, 1908, and in the interval, acted as relieving General Superintendent at North Bay, Ont., and Montreal.

W. Marshall, who has been appointed Superintendent C.P.R. Telegraphs, Ontario Division, Toronto, was born at Garden Island, Ont., May 18, 1859, and entered telegraph service July 12, 1876, since when he has been to 1877, in the stores department, Dominion Telegraph Co.; 1877 to 1878, telegraph operator and lineman, same company, St. Catharines, Ont.; 1878 to 1880, foreman of line construction, Canada Mutual Telegraph Co., Toronto; 1880 to 1886, foreman of line construction, Western Union Telegraph Co., Buffalo, N.Y.; Sept. 1, 1886, to July 1, 1906, Inspector of Telegraphs, C.P.R. Ontario Division; July 1, 1906, to Aug., 1909, Superintendent of Construction, C.P.R. Telegraphs, Ontario Division, Toronto.

A. W. Barber, Superintendent of Telegraphs, C.P.R., Ontario Division, whose death was announced in our last issue, was born at Toronto, Feb. 17, 1855, and entered telegraph service in 1871, with the Montreal Telegraph Co. at Toronto, since when, to Aug. 1, 1886, he held various positions as operator with that company at Toronto and Dundas, Ont; as operator Toronto and Nipissing Ry. Toronto; dispatcher Canada Southern Ry., St. Thomas, Ont.; chief operator Dominion Telegraph Co., Toronto; and chief operator Canada Mutual Telegraph Co., Toronto. From Aug. 1, 1886, to Dec. 1, 1899, he was Manager C.P.R. Telegraph office at Toronto, and from Dec. 1, 1899, to the date of his death, was Superintendent of Telegraphs for the C.P.R., Ontario Division. He leaves one son, C. T. Barber, who is Assistant Traffic Chief, C.P.R. Telegraphs.

The Imperial Construction Co., which has just commenced business in Toronto, is composed of John Montgomery and A. M. Grantham. Mr. Montgomery has been actively engaged in building operations for many years, and has for a number of years been engaged with Mackenzie, Mann & Co. in various important works. Mr. Grantham, who is a civil engineer, is also Superintendent of Construction and Purchasing Agent, Toronto Railway. The Imperial Construction Co. has been awarded contracts for the Ca-Hotel at Port Arthur, for the Toronto Ry.'s new car barns, and also for some work in Quebec.

M. J. Butler, Deputy Minister of Railways, left Ottawa Aug. 12 on a trip of inspection over all the railway lines in the West which are subsidized by the Dominion Government.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases from 1908-09, from July 1, 1909:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 843,500	$613,900	$229,600	$26,700
Inc. or Dec.	$ 115,000	$ 88,300	$26,700	.....

Approximate gross earnings for 3 weeks ended Aug. 21, $553,500 against $504,500 for same period 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.

Inc. or Dec.	$4,929,147.24	$3,765,940.36	$1,163,206.88	.....

The net results of the company's operations for the year ended June 30, are as follows:—

Gross earnings	$76,313,321
Working expenses	53,357,748
Net earnings	22,955,573
Net earnings of steamships in excess of amounts included in monthly reports	399,910
Income from other sources	1,906,578
Total net income	$25,262,061
Deduct fixed charges	9,427,033
Surplus	$15,835,028
Deduct amount placed to steamship replacement account	800,000
Deduct contribution to pension fund	80,000
Net revenue available for dividends	$14,955,028
Surplus for year carried forward after payment of all dividends	$3,847,161

Approximate gross earnings for July, $7,004,000, and for 2 weeks ended Aug 14, $3,213,000; against $6,196,000 and $2,890,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross revenue for June, $376,764.03; net revenue, $171,895.62; against $210,774.74 gross revenue, $46,868.37 net revenue, for June, 1908. Aggregate gross revenue for 12 months ended June 30, $2,931,795.50; net revenue, $952,277.43; against $2,921,916.02 gross revenue, $811,148.91 net revenue, for same period, 1907-08. Approximate gross earnings for July, $297,564, and for 2 weeks ended Aug. 14, $149,779, against $230,932 and $109,854 for same periods 1908.

MINERAL RANGE RD.—Gross revenue for June, $70,584.72; net revenue, $5,460.59; against $70,135,67 gross revenue, $10,551.83 net revenue, for June, 1908. Aggregate gross revenue for 12 months ended June 30, $829,424.61; net revenue, $128,391.27; against $810,393.98 gross revenue, $121,529.00 net revenue, for same period 1907-08. Approximate gross earnings for July, $73,257, and for 2 weeks ended Aug. 14, $34,020, against $71,119 and $32,330 for same periods 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for June, $1,072,626.47; net earnings, $478.010.79; against $920,752.83 gross earnings, $377,062.48 net earnings for June, 1908. Aggregate gross earnings for 12 months ended June 30, $12,609,299.17; net earnings, $5,551,582.58; against $11,509,857.32 gross earnings, $4,393,892.41 net earnings, for same period 1907-08. Approximate earnings for July, $998,071, and for 2 weeks ended Aug. 14, $491,563; against $927,145 and $430,180 for same periods 1908.

Grand Trunk Ry. Earnings, Expenses Etc.

Subject to audit, the accounts for the half-year ended June 30, show the following results:

Gross receipts	£2,866,400	
Working expenses	2,079,200	
Net receipts		£ 787,200
Income from rentals, outside operations, and car mileage balance		58,100
Total net revenue		£ 845,300
Net revenue charges for the half year —less credits		498,600
Balance		£ 346,700
Deduct, Canada Atlantic deficiency for the half year	£41,100	
Deduct, Detroit, Grand Haven & Milwaukee deficiency for half year	25,700	66,800
Surplus		£ 279,900

This surplus of £279,900 added to the balance of £12,200 from December, 1908, makes a total of £292,100 available for dividend, which will admit of the payment of the full dividend for the half-year on the 4% Guaranteed Stock, and First Preference Stock, leaving a balance of about £9,900 to be carried forward.

The accounts of the G.T. Western Ry. for the year ended June 30, including the balance brough forward from the previous year, show a surplus sufficient to propille for the interest on the First Mortgage Bonds, and leape a balance of about £18,000.

TRAFFIC RECEIPTS OF THE SYSTEM

Aggregate from July 1;

	1909	1908	Inc.	Decr.
Grand Trunk	£559,037	£517,862	£41,175	.....
Canada Atlantic	30,672	37,446	.....	£6,774
G. T. Western	96,760	96,262	498	.....
D.G.H. & M.	30,898	30,645	253	.....
Total	£717,367	£682,215	£35,512	.....

Approximate earnings for July, $3,491.184, and for 2 weeks ended Aug. 14, $1,700,877; against $3,320,114 and $1,573,498 for same periods 1908.

High Level Bridge in Toronto.

The Board of Railway Commissioners has ordered the erection of a high level bridge across the Don river and the C.P.R., C.N.R. and G.T.R. tracks at Queen St. East, Toronto, on the application of the city of Toronto, as follows:—

That the applicant be authorized to construct a bridge to carry the highway and the Toronto Ry. Co.'s tracks over the C.P.R., G.T.R. and C.N.R. Co.'s tracks where they cross Queen street east, Toronto.

That the applicant submit detail plans of the proposed bridge and approaches, for the approval of an engineer of the board, by Sept. 15, 1909, and construct the bridge ready for traffic by July 1, 1910.

That the cost of the construction of the bridge and approaches, and the land damages, if any, shall be paid as follows:—City of Toronto, 15%; Toronto Ry Co., 15%; C.P.R. Co., 35%; Canadian Northern Ontario Ry. Co., 25%, and the G.T.R. Co. (Belt Line), 10%.

That upon completion the bridge shall be maintained by the applicant. The cost of such maintenance, with the exception of the cost of the maintenance of the roadway and sidewalks on said bridge and approaches, shall be paid as follows:—by City of Toronto, 70%; by C.P.R. Co., 10%; by the Canadian Northern Ontario Ry. Co., 10%, and by the G.T.R. Co., 10%. The cost of the maintenance of the roadway and sidewalks on bridge and approaches shall be borne entirely by the applicant.

Any matter in dispute between any of the parties hereto, with regard to the carrying out of the provisions of the order, shall be determined by the Board's Chief Engineer.

Sir Wm. C. Van Horne, Chairman of the Board, C.P.R., in his evidence at the investigation of the affairs of the Grand Falls Power Co., St. John, N.B., Aug. 10, said the value of the undeveloped power site there was $1,000,000, and added that it was not equalled on the continent.

Canadian Northern Ry. Construction, Etc.

Canadian Northern Quebec Ry.—The Board of Railway Commissioners on July 29 authorised the company to open for traffic the cut-off from Garneau Jct. into Quebec, 78.76 miles, and the line was formally opened for traffic Aug. 22. The new route gives the company a line having a length of 176.5 miles betwee Montreal and Quebec, against 196.5 miles by the old route via Riviere a Pierre, and is only a little over two miles longer than the C.P.R. route between Montreal and Quebec. The work was started in 1906, the contractors being O'Brien and Mullarkey. Some delay took place in carrying on the work owing to the fact that the route selected for the National Transcontinental Railway conflicted with that selected by C.N.Q.R. After some negotiations the difficulty was settled, and a new route surveyed for the line where the two lines previously came together. Starting from Garneau Junction, the line gradually works down to the St. Lawrence River, which is reached near Deschambault, and from that point to Cap Rouge, a distance of about 40 miles, it follows the river. There are concrete and steel bridges over Batiscan, Charest, Ste. Anne, Jacques Cartier, and Portneuf Rivers, while a smaller structure has been erected across the river at Cap Rouge. The line passes under the National Transcontinental Railway viaduct across Cap Rouge valley. The new line has been laid with 80 lb. steel rails, and is well ballasted.

In contemplation of the completion of this line the company has been replacing the 70 lb. rails on the section of the line between Montreal and St. Boniface, the section between St. Boniface and Garneau Jct., having already been relaid.

The grading on the 11 miles of line under construction from St. Jacques to Rawdon, Que., is reported to be well advanced. J. P. Mullarkey, the contractor, stated Aug. 7 that it was expected to have the track laid this fall.

Quebec and Lake St. John Ry.—The Quebec Legislature, at its last session, granted an extension of time for the construction of a number of branch lines. The branch line authorised to be constructed from Roberval to the northwestern boundary of St. Felicien, are to be commenced by July 1 and completed before Jan. 1, 1911.

Canadian Northern Ontario Ry.—The Board of Railway Commissioners has approved of location plans of the line through Gloucester and Nepean tps., Ont.,, from mileage 51.91 to 57.42 west from Hawkesbury. It is expected that the work on the line from Hawkesbury to Ottawa will be completed so as to permit of the operation of trains over it by Oct. 15.

Surveys have been started at Toronto for the company's line to Ottawa on the east, and to Niagara Falls on the west. The survey party started work at East Toronto and is working past Scarboro Heights, almost parallel to, but a quarter of a mile from the G.T.R. tracks along the lake shore. The route gone over will carry the line under the G.T.R. about 7 miles east of the Woodbine. It will then run along the front of the heights to Port Union, where it again goes under the G.T.R. tracks, and then bears off to the northeast. An alternative route is being surveyed up the Don valley, a considerable distance north of the C.P.R. This line is being carried over to Yonge St., so as to avoid the heavy gradient met with on the other line. From Yonge St. it will run easterly along the ridge of land for several miles and then bear away southeasterly towards the lake shore and then will parallel the G.T.R. for a considerable distance. Between Toronto and Niagara Falls the route to be followed runs along the Electrical Development Co.'s right of way of the power line, which terminates at Yonge St., just south of the hill. On the completion of the surveys now being made, a report will be prepared for consideration and the route finally determined upon. It is expected, however, that the northern route will finally be selected.

The Board of Railway Commissioners has approved of plans for the construction of a bridge across the Vermillion River, mileage 26.66 from Sudbury Jct., Ont., on the extension of the line now under construction towards Port Arthur.

A press report recently stated that arrangements had been made by which the company secured trackage rights over the C.P.R. from Sudbury to Port Arthur, but Sir Thos. G. Shaughnessy, President C.P.R., says that the appearance of the report in the papers was the first he had heard of it.

Port Arthur Hotel.—A contract has been let by the C.N.R. Co. to the Imperial Construction Co., Toronto, for the erection of the Prince Arthur Hotel, at Port Arthur. The plans show a palatial building, which will front on Water street overlooking the bay and run back to Cumberland street. The portion now to be erected will be about 213 by 52 ft. and 6 storeys high, and will contain about 125 rooms, with a large number of bath-rooms. The building will be a thoroughly up-to-date one in every respect, and will cost about $250,000.

Canadian Northern Ry.—W. Mackenzie, President, arrived in Port Arthur Aug. 11 on an inspection trip over the line. He was met by M. H. MacLeod, General Manager and Chief Engineer, who accompanied him westward.

The work of relaying the line between Port Arthur and Winnipeg with 80 lb. steel is being rapidly proceeded with. M. H. MacLeod recently stated that about 50 miles of the new steel had been laid, and that in order to expedite the work a fourth gang would be set to work.

Hallboro, the point from which an extension is being constructed through central Manitoba, is a station on the line between Neepawa and Neepawa Jct. Among the sub-contracts let on the Maryfield extension, it is reported that one has been let to Mrs. Bennett. This is said to be the first appearance of a woman in the railway contracting field in Canada.

The Board of Railway Commissioners has approved of location plans for a line through tps. 9 and 10, ranges 30 and 32 west of the principal meridian in Saskatchewan, mileage 0 to 16.09.

J. H. Gordon, a trader from Pas Mission, Sask., arrived in Winnipeg, Aug. 6. He reported that the ballasting on the line from Hudson Bay Jct. to the Pas was completed, and the line in good shape for traffic. The charter does not call for a train service until Jan. 1, 1910, but it is probable that a service will be put on before that time.

Tracklaying on the branch line southerly from Vegreville towards Calgary, Alta., was started July 29, and it is expected to have it completed as far as Camrose early in Sept. Grading has been completed for 85 miles from Vegreville, and the grading gang is working in the vicinity of Stettler.

After inspecting the lines in operation and under construction in the Prairie provinces, President Mackenzie went on to Vancouver, B.C., to deal with questions connected with the extension of the line to the Pacific coast. The route of this extension is under survey, the particular part of the work at present in hand being the location of the route into Vancouver or New Westminster, B.C. The Board of Railway Commissioners has approved of the location of this part of the line as follows; from the west bank of the North Thompson River, northwesterly from Kamloops, following the west bank of the river for a distance of ten miles northerly, and for a further distance of 14 miles to a point five miles beyond the railway belt. (Aug. pg. 595.)

Telephone Dispatching on the C.P.R.—The adoption of the system of dispatching trains by telephone instead of by telegraph, on the C.P.R., has proved that about 50% more traffic can be handled by the former than by the latter. This system has been in use on the company's lines between Montreal and Newport since June, 1908, and it has been found to be very satisfactory. Other circuits have been added from time to time, details of which we have already published. During August, the equipment of the following circuits was completed, on the Western Lines: from Swift Current to Medicine Hat, Alta., 147 miles; from Winnipeg to Brandon, Man., 133 miles; and from White River to Fort William, Ont., 251 miles.

Canada and Gulf Terminal Ry. Co.—The Quebec Legislature at its last session changed the title of the Matane and Gaspe Ry. Co. to the above. The section as to the lines authorised to be constructed contained in the previous acts was repealed, and a new section inserted authorising the company to construct the following lines: from the Intercolonial Ry. near St. Flavie easterly, following as much as possible the maritime road to Matane, along the valley of the Matane River to its headwaters and northeasterly to Mont Louis, Gaspe county, thence to Gaspe Basin; from Matane easterly to Mont Louis, with the right to construct a branch up the valley of the Ste. Anne River to a junction with the first mentioned line; from St. Flavie to the National Transcontinental Ry., in either Temiscouata or Kamouraska county; from St. Flavie westerly to Rimouski, thence southerly to a junction with the last mentioned line. Other sections of the original acts are repealed and new sections inserted. These provide that the capital stock shall be $4,000,000; that the head office shall be in Quebec; and that the company shall have power to issue bonds to the amount of $30,000 a mile. A contract has been entered into between the Department of Railways and the Matane and Gaspe Ry. Co., in respect of the construction, under subsidy, of a line from near St. Flavie, on the Intercolonial Ry., to Matane, in lieu of the subsidy granted by cap. 43, 1906, for 38 miles. (June, pg. 413.)

H & E Patent Ball-Bearing Lifting Jacks

For Railway and Bridge Work, Contractors' and Builders' Use

Foot-Lift

For Convenience, Speed and General Efficiency these Jacks are Unequalled. Are fully guaranteed. Being made of the best grades of Malleable Iron and Steel are strong and durable. Working parts entirely protected insure long wearing qualities. Sizes from 8 to 50 tons now complete. Send for prices and discounts.

Railway Commissioners Traffic Orders.

Summaries of other traffic orders passed are given on another page under the heading of Orders by Railway Commissioners.

BEDLINGTON & NELSON RY. REFUND.

7552. July 7.—Re application of C. P. Riel for order directing Bedlington & Nelson Ry. Co. to refund to applicant $2,007.36, amount of alleged overcharge by the company on shipments of railway ties made by applicant between Jan. 11 and 30, 1908, from Rykerts, B.C., to Portage la Prairie, Man.; upon hearing the application in the presence of counsel for the applicant and the railway company, and what was alleged, and upon the report of the Board's Chief Traffic Officer, the railway company consenting, it is ordered that the railway company be authorized to refund to applicant all freight charges in excess of the rate and minimum weight bases published in the company's tariff, C.P. Ry. C.R.C. A-151, on all railway ties loaded at Rykerts not later than Jan. 31, 1908, and consigned to Portage la Prairie, Man.

PASSENGER RATES ON B.C. STEAMBOATS.

7594. July 23.—Re complaint of F. W. Godsall, of Cowley, Alta., alleging excessive passenger rates on C.P.R. steamboats between ports of call on the Kootenay and Arrow Lakes, B.C., and re complaint of Nelson Board of Trade, in support of said complaint; upon consideration of the applications for an order rescinding order 6619, of March 8, 1909, it is ordered that the said order be rescinded, and the complaint reinstated for hearing.

LUMBER RATES, B.C. TO EDMONTON.

7602. July 23.—Re complaint of Fullerton Lumber & Shingle Co., of Vancouver, B.C., against rate of $10 a car charged in addition to rate to Strathcona, Alta., on lumber shipments from B.C. mills to Edmonton; upon hearing the complaint at the sittings at Edmonton, Vancouver and Ottawa, in the presence of counsel for the applicant, the C.P.R. and the C.N.R. companies, the evidence adduced, and what was alleged, and upon the report and recommendation of the Board's Chief Traffic Officer, it is ordered that the C.P.R. and the C.N.R. companies be directed to publish and file joint class and commodity tariffs of rates on freight traffic in classes 6 to 10, inclusive, of the Canadian Classification, between Edmonton and North Edmonton and all points on the C.P.R. south of and including Red Deer, east of and including Daysland and Tees, and east and west of Calgary and Macleod, via Strathcona Jct., on the basis of 1c. per 100 lbs. over and above the C.P.R. class and commodity rates to or from Strathcona, and that in the division thereof, the C.N.R. be allowed a proportional rate of $10 a carload, regardless of weight, between Strathcona Jct. and any or all sidings in Edmonton, including those owned by the C.P.R. Co., but excepting the Griffin packing house, to or from which the C.N.R. be allowed $12 a carload, regardless of weight, provided that in no case shall the joint rates to or from C.P.R. stations between Red Deer, Daysland and Tees and Strathcona Jct. exceed the joint rates herein prescribed to or from those points, nor the proportion allowed the C.N.R. exceed the joint rates charged for local traffic between Strathcona and Edmonton and North Edmonton aforesaid. Order 6835, of April 6, 1909, is rescinded.

RAILWAY BILLS OF LADING.

7562. July 15.—Re complaint of Canadian Manufacturers' Association, supported by the Bankers' Association and by various boards of trade, merchants, and shippers throughout the Dominion, respecting the terms and conditions of carriage embodied in the bills of lading of railway companies subject to the legislative authority of the Parliament of Canada, and in the matter of sec. 340 of The Railway Act, upon hearing the complaint in the presence of counsel for the complainants and the G.T.R., C.P.R., C.N.R. and M.C.R. Companies, and what was alleged, and upon consideration of the draft forms of bill of lading agreed to by the parties thereto, and submitted for the approval of the Board, it is ordered that the two forms of bill of lading for use in Canada, namely, that for consignments "to order" and that for so termed "straight" consignments, attached hereto and marked "A" and "B," be and they are hereby approved, and it is further ordered that the conditions and limitations to be endorsed upon the said bills of lading shall be the following:—

Owing to lack of space the forms and conditions, etc., above referred to are not reproduced here.

EXCEPTIONS TO RATINGS ON SILVER ORE.

7720. July 28.—Re application of C.P.R. and G.T.R. Companies, through the Advisory Committee of the Canadian Freight Association, under sub-sec. 4 of sec. 321 of The Railway Act, for approval of certain exceptions to the Official Classification of Silver Ore to points in the United States, upon reading what was alleged in the letter of application, and upon the report of the Chief Traffic Officer of the Board, it is ordered that the "exceptions" to the ratings of silver ore of the Official Classification, as incorporated in the G.T.R. freight tariffs C.R.C. E-1599 and 1600, and the C.P.R. freight tariffs C.R.C. E-1422 and 1450, applying from North Bay, Ont., to certain points in the U.S., be approved, subject to any order or direction of the Board herein.

Grace Henderson, employed as cashier Thousand Islands Ry., at Gananoque, Ont., was recently committed for trial on a charge of embezzlement of $500, $96 and $2,620.

H. W. Wills, Superintendent C.P.R. Hotels, Western Lines, while in Victoria recently, is reported to have said that the company is contemplating the establishment of another hotel on the Island, subsidiary to the Empress Hotel.

An action has been entered in the Manitoba courts to recover $100,000 in connection with some land transactions in the neighbourhood of the National Transcontinental Ry. shops at Winnipeg. It is alleged on the part of the defendants that they were induced to go into the deal by statements in regard to the location of the shops and by the fact, which they allege, that C. A. Young, one of the N.T.R. Commissioners, was interested in the sale of the lands.

Railway Charters Granted 1888-1908.

An order was made during the recent session of the House of Commons for the preparation of a statement showing the total mileage of railways authorized to be constructed under charters granted by the Dominion Parliament from 1888 to 1908 inclusive, exclusive of the G.T.R., C.P.R., C.N.R., and G.T.P.R.; the number of miles constructed under the said charters; the number of companies so incorporated; the number of companies that have actually constructed any portion of the railways so authorized; the number of charters that have lapsed and the number which have been granted extensions of time for construction. The return shows that excluding the companies above mentioned, there have been 203 companies incorporated within the years named, with authority to construct 63,809 miles of railway, and that 1073 miles have actually been constructed. Of the 203 companies 35 have constructed portions of the lines authorized; 86 of the charters have lapsed, 88 of the companies have been granted one extension of time for construction, 42 have been granted an extension on two occasions, and 18 have been granted three or more extensions of time. The lapsed charters are as follows:—

Granted in 1888.—Annapolis-Atlantic Ry.; Belleville and Lake Nipissing Ry.; Canada and Michigan Tunnel; Chatham (N.B.) Ry.; Chinook Belt and Peace River Ry.; Collingwood and Bay of Quinte Ry.; New York, St. Lawrence and Ottawa Ry.; Ottawa and Parry Sound Ry.; Western Ontario Ry.

Granted in 1889:—Assiniboia, Edmonton and Nipigon Ry.; Calgary, Alberta and Montana Ry.; Cobourg, Northumberland and Pacific Ry.; Kootenay and Athabasca Ry.; Lac Seul Ry.; Moose Jaw to Edmonton; North-Western Junction and Lake of the Woods Ry.; Ontario, Manitoba and Western Ry.; Saskatchewan Ry. and Mining Co.; Three Rivers and Western Ry.; Union Ry.; Victoria, Saanich and New Westminster Ry.

Granted in 1890:—Moncton and Prince Edward Island Ry. and Ferry Co.; Mount Forest, Markdale and Meaford Ry.; North Canadian Atlantic Ry. and Steamship Co.; Ottawa, Morrisburg and New York Ry.; Owen Sound and Lake Huron Ry.; Sault Ste. Marie and Hudson's Bay Ry.

Granted in 1891:—Atikokan Iron Range Ry.; Brighton, Warkworth and Norwood Ry.; Buffalo Lake and Battleford Ry. Coal and Iron Co.; Burrard Inlet and Westminster Valley Ry.; Chatsworth, Georgian Bay and Lake Huron Ry.; Kingston and Pontiac Ry.; Manitoba and Assiniboia Grand Junction Ry.; Peterborough, Sudbury and Sault Ste. Marie Ry.

Granted in 1892:—Buckingham and Lievre River Ry.; Ottawa Valley Ry.; Winnipeg and Atlantic Ry.

Granted in 1894:—Alberta Southern Ry.; Cariboo Ry.; Duluth, Nipigon and James Bay Ry.; Gleichen, Beaver Lake and Victoria Ry.; Lake Megantic Ry.; Metis, Montana and Gaspe Ry.; Pontiac and Ottawa Ry.

Granted in 1895:—Lindsay, Haliburton and Mattawa Ry.; Ottawa and Aylmer Ry. and Bridge Co. (Electric).

Granted in 1897:—Manitoba and Pacific Ry.; Minden and Muskoka Ry.

Granted in 1898:—Cowichan Valley

MODERN HIGH-CLASS
ROLLING STOCK
Passenger, Freight and Electric Railway
Ruggles' Rotary Snow Plows
CAR CASTINGS, FORGINGS AND REPAIR PARTS

Ry.; Lake Bennett and Klondike Ry.; London and Lake Huron Ry.; Montreal and James Bay Ry.; Toronto and Hudson's Bay Ry.

Granted in 1899:—Arthabaska Ry.; Edmonton and Saskatchewan Ry.; Russell, Dundas and Grenville Counties Ry.; Sudbury and Wahnapitae Ry.; Zenith Mining and Ry. Co.

Granted in 1900:—Lake Superior and Hudson Bay Ry.; Morris and Portage Ry.; Port Dover, Brantford, Berlin and Goderich Ry. (name changed to Grand Valley Ry., 1902, and line being constructed as an electric railway); St. Mary's River Ry. (amalgamated with Alberta Ry. and Irrigation Co.).

Granted in 1901:—Arnprior and Pontiac Ry.; Canada National Ry. and Transport Co.; Fort Qu'Appelle Ry.; Kamloops and Atlin Ry.; Quebec Terminal and Ry. Co.; Similkameen and Keremeos Ry.

Granted in 1902:—Nipissing and Ottawa Ry.; St. Lawrence and Northern Ry.; Velvet (Rossland) Mine Co.; Yukon Pacific Ry.

Granted in 1903:—Brandon, Saskatchewan and Hudson's Bay Ry.; Canadian Yukon Western Ry.; Cardiff Ry.; Coast Yukon Ry.; Hudson's Bay and Occidental Ry.; Huron, Erie and Buffalo Ry.; Joliette and Manuan Colonization Ry.; Nipissing and Pontiac Ry.; St. Chrysostome Ry.

Granted in 1904:—Chicoutimi and Northern Eastern Ry.; Montreal Nipissing and Georgian Bay Ry.; Pontiac and Inter-Provincial Ry. Of these railways there have been constructed the following mileages:—St. Mary's River Ry., 65 miles, the total authorized; Quebec Terminal and Ry. Co., 3 miles out of the 12 authorized; this company was subsequently merged in the Quebec Bridge and Ry. Co., which has since been taken over by the Government; Brandon, Saskatchewan and Hudson's Bay Ry., 70 miles out of the 450 authorized.

Rhodes, Curry Co., Limited.

Rhodes, Curry Co., Ltd., has been incorporated under the Dominion Companies Act, with an authorized capital of $3,000,000, divided into $2,000,000 of 7% preference stock, cumulative and preferred, both as to dividends and assets, participating with the ordinary shares in all dividends after 7%. The incorporation is for the purpose of acquiring the properties and business, or the capital stock of Rhodes, Curry & Co., Ltd., car builders, etc., of Amherst, N.S. An issue of $1,850,000 of the preference stock and $1,000,000 of the common, was underwritten by C. Meredith & Co., Ltd., and the Royal Securities Co., of Montreal, and W. B. Tennant and J. M. Robinson & Son, of St. John, N.B., and as stated in our last issue, it was intended to invite public subscriptions at 92½ for the preferred stock, with a bonus of 20% of common. However, before the prospectus was printed, subscriptions were received for very much in excess of the amount of stock offering, and the prospectus was therefore only issued as a matter of information.

In a letter printed with the prospectus, N. Curry, President of Rhodes, Curry & Co., Ltd., stated among other things, as follows:—"The company manufactures practically everything that goes into the construction of railway and street cars. The Amherst plant consists of wheel, grey iron and malleable iron foundries, axle factory and machine shops, planing and rolling mills, cabinet shops and necessary erecting and painting shops, also the largest wood working factory in the Maritime Provinces. The property covers about 40 acres. The company also has 20,000 acres of timber limits, owned in fee simple, at Little Forks, 16 miles from Amherst, equipped with saw and planing mill, necessary dwellings, stores, etc. At Sydney, the company has a wood working factory, a lumber yard connected with the Intercolonial tracks, and another yard on a valuable wharf property; at Halifax, a lumber yard and warehouse for supplying builders' materials. The location of the plant in the centre of the timber producing provinces of Nova Scotia and New Brunswick, guarantees an unfailing supply of spruce and other local woods required in the works at low prices, while the proximity to tide water on the Bay of Fundy enables the importation of southern pine, oak, and other raw materials at very favorable prices, and from Springhill and Sydney we are able to get our supply of coal, iron and steel at a low cost.

"The company sells rolling stock to practically all the railways in Canada. A large part of the output for the last few years has gone to the Northwest to supply the needs of the Canadian Northern, Canadian Pacific, Grand Trunk Pacific and other western roads. The capacity of the plant in 1893 was about three or four cars per day, while at present time it can turn out 20 freight cars per day and five passenger cars per month. The annual output in 1891 was 331 cars, in 1908 it was 2,044 cars. In addition to the car works, a profitable business is being done in constructing buildings of all classes, and in the manufacture and sale of building materials. The best class of labor is obtained in this vicinity, and is abundant and reasonable. An average of 1,000 men are employed throughout the year, as compared with 250 in 1893, and it is a remarkable fact that in the history of the company no serious trouble of any kind has occurred with its employes."

The company's real estate, buildings, machinery and timber limits at Halifax, Sydney, Athol and Amherst were valued by an appraisal company in March, 1907, at $908,339.90, and the company certified in July, 1909, to an increase of $82,300.72, making a present valuation of $990,640.62. Chartered accountants certify that the current assets of Rhodes, Curry & Company, Ltd., at Dec. 31, 1908, were $1,387,557.94, and the current liabilities at the same date $380,926.97. The value of the real estate, building, plants and timber limits as fixed by the appraisal company, and the current assets of the company as shown by the accountants' report, amount to $2,378,198.56. After deducting the current liabilities, the net assets are $1,997,271.59.

The following statement is also given:

	Profits before charging interest.	Less interest.	Net profits.
1904 ...	$115,591.67	$12,033.60	$103,558.07
1905 ...	103,960.20	17,397.06	86,563.14
1906 ...	220,901.10	19,696.72	201,204.38
1907 ...	274,459.40	44,034.22	230,425.18
1908 ...	331,039.79	28,918.52	302,121.27

An aggregate profit of $923,872.04 for the five years.

We understand that the shareholders of Rhodes, Curry & Co., Ltd., will be largely paid in cash for their interest and that N. Curry has undertaken to continue the management for the new company for three years.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Canadian Pacific Ry.—A statement has been going the round of the daily press to the effect that the retirement of W. Whyte, Second Vice President would, under ordinary circumstances, take place in the near future under the age limit rule, but that his appointment had been extended for two years. We have reason to believe that the whole story originated in some Montreal reporter's brain, and that it is altogether without foundation.

W. Marshall, heretofore Superintendent of Telegraph Construction, Toronto, has been appointed Superintendent of Telegraphs, Ontario Division, vice A. W. Barber, deceased. Office, Toronto.

S. W. Kent has been appointed Ticket Agent, Paris, Ont., vice A. H. Baird, deceased.

W. B. Cronk, heretofore Superintendent District 1, Eastern Division, Farnham, Que., has been appointed Superintendent District 2, Lake Superior Division, White River, Ont., vice A. L. Smith, transferred to Farnham, Que., as reported in our Aug. issue.

D. L. Jones, heretofore Locomotive Foreman, Smith's Falls, Ont., has been appointed District Master Mechanic, District 1, Eastern Division, vice E. W. Campion, assigned to other duties. Office, Farnham, Que.

C. A. Stark, heretofore shop foreman, Carleton Jct., Ont., has been appointed Locomotive Foreman, Smith's Falls, Ont., vice D. L. Jones, promoted.

T. M. Fraser, heretofore Roadmaster, Minnedosa, Man., has been appointed Roadmaster, Souris section and Carman branch, District 2, Central Division, vice P. E. Barry, resigned. Office, Winnipeg.

W. J. Renix was recently appointed acting Locomotive Foreman at Brandon, Man., vice J. H. Wilson, transferred, and has since been succeeded by A. McArthur, who has been appointed Locomotive Foreman.

J. H. Wilson, heretofore Locomotive Foreman at Brandon, Man., has been appointed Locomotive Foreman at Moose Jaw, Sask., vice T. Bates.

J. M. Cameron, heretofore Trainmaster, Grand Forks, B.C., has been appointed Trainmaster District 2, Pacific Division, vice S. L. Prenter resigned. Office, Vancouver, B.C.

F. W. Sadlier, heretofore District Master Mechanic, Moose Jaw, Sask., has been appointed shop foreman at Kamloops, B.C.

H. G. Dring, Assistant General Passenger Agent for Great Britain and Europe, has assumed control of all general and local passenger work, at 62-65 Charing Cross, London, and all correspondence in connection with such matters pertaining to the chief office of the London district are to be addressed to him, the position of London Passenger Agent having been abolished.

D. H. Drakeford, heretofore London Passenger Agent, has been appointed Travelling Passenger Agent for the Southern District, England, reporting to the General Passenger Agent, Liverpool.

G. S. Jones has been appointed London, Eng., City Agent, with control of

G. T. Pearson, heretofore Passenger Agent at Liverpool, has been appointed Travelling Passenger Agent for Ireland, reporting to the General Passenger Agent, Liverpool. Office, Belfast.

Central Vermont Ry.—W. Northgraves has been appointed Roundhouse Foreman, at Brattleboro, Vt., vice J. Pitt.

Government Railways.—W. N. Rippey, heretofore Chief Clerk Superintendent of Car Service office, has been appointed Superintendent of Car Service, vice T. E. Henderson. Office, Moncton, N.B.

T. E. Henderson, heretofore Superintendent of Car Service, has been appointed General Car Tracer. Headquarters, Moncton, N.B.

The new organization provides for a Purchasing Agent, and it is said that one will be appointed in the near future, and that he will probably have his office at Ottawa.

Grand Trunk Pacific Ry.—The offices of E. J. Chamberlin, Vice President and General Manager, and G. U. Ryley, Land Commissioner, have been transferred from Montreal to Winnipeg.

Grand Trunk Ry.—C. A. Saylor has been appointed Locomotive Foreman at Hamilton, Ont., vice W. W. Yeager resigned.

A. J. Nixon, Assistant Superintendent, London, Ont., has resigned, and will leave the service about Sept. 15, to enter the Board of Railway Commissioners' service, Oct. 1.

The following agents have been appointed: Thornton, Ont., D. H. Thompson; Petersburg, Ont., L. K. Fox; Dunnville, Ont., S. Young; Shallow Lake, Ont., Geo. Mann; Alma, Ont., J. A. Scott; Pinkerton, Ont., H. Rose; Ethel, Ont., R. J. Murray; Rockland, Ont., E. H. Pangborn; Carlsbad Springs, Ont., L. G. LeBatt; Arnprior, Ont., F. H. Morrison; Ravensworth, Ont., R. A. Carswell.

Great Northern Ry.—R. J. Smith, heretofore agent at Brandon, Man., has been appointed General Agent, Cincinnati, Ohio, vice W. J. Byrth deceased.

J. Linklater, heretofore agent at Boissevain, Man., has been appointed agent, Brandon, Man., vice R. J. Smith promoted.

Intercolonial Ry.—T. Ryan, heretofore roundhouse foreman at Riviere du Loup, Que., has been appointed acting Division Master Mechanic there, vice F. J. Lozo resigned.

R. E. Perry, heretofore Chief of Tariff Bureau, has also been appointed Assistant General Freight Agent, with charge of the division, Montreal to Dalhousie, N.B., vice W. H. Olive assigned to other duties. Office, Montreal.

W. H. Olive, heretofore Assistant General Freight Agent, Montreal, has been appointed General Travelling Freight Agent, with territory from Dalhousie, N.B., to Belleville, Ont. Office, Montreal.

See also Government railways.

Michigan Central Rd.—J. J. Ross has been appointed Superintendent of Telegraphs, vice E. H. Millington deceased. Office, Detroit, Mich.

Prince Edward Island Ry.—See also Government Railways.

Temiskaming and Northern Ontario Ry.—W. Oldham, heretofore foreman C.P.R. Bridge Department, has been appointed Supervisor of Bridges. Office, North Bay, Ont.

How to be a First Class Trainmaster.

By C. B. Wildman, Trainmaster St. Louis, Iron Mountain and Southern Ry., Van Buren, Ark.

I believe the first duty of a trainmaster to be that of loyalty to his superior officers and to the company which employs him, for without such loyalty he cannot be successful. No matter how well qualified he may be for the position, regardless of his ability as a practical railway man, if in his heart there is not a feeling of absolute loyalty toward his company and his superior officers, he is short a valuable asset, that may eventually prove his downfall. With loyalty must be included truthfulness, not only from a moral standpoint, but from the fact that truth begets confidence, and once the trainmaster has lost or shaken the confidence of his employer, he is to be congratulated if he ever regains it.

As the superintendent is the head of the division, so the trainmaster is his right-hand man, often representing him. As such he should be careful of his personal appearance, bearing in mind that as the representative of the superintendent he would come in contact with the public in such a way that a good personal appearance might, and in all probability would, often result advantageously to the company. He should endeavor so far as possible to closely acquaint himself with the superintendent's ideas and methods of doing business, and as far as practicable conform to those methods.

The trainmaster should keep in close touch with affairs on his territory and should be careful to communicate to the superintendent all information that might prove to be of advantage or interest to him. In other words, he should keep the superintendent thoroughly posted on the little things as well as the more important matters, as it is often the minor things that develop into the important ones. This can usually be accomplished by the trainmaster having access to the superintendent's office; but in case the superintendent is not easy to approach, or the trainmaster does not feel at liberty to speak freely and unreservedly, good results may be obtained by writing the superintendent a weekly letter, setting forth in a brief, concise manner the week's happenings. This should be a newsy letter, but care should be taken to make it as brief as consistent with the disclosures he has to make.

Next in importance is the handling of men. A trainmaster may have every other qualification necessary to his success, but if he lack tact or the ability to properly handle men, he is more or less of a failure. He must be able to inspire the confidence of his men and create among them the feeling of fidelity to the division officers and to the company's interests. On such a feeling depends the successful operation of his particular division. No division can make a creditable showing except by the combined efforts of the officials and the men.

The employing of men should have the trainmaster's personal attention. Care should be taken to employ only men of good habits and character, and of sufficient ability to fill the requirements of the position for which they are selected. He should personally inspect all applications for employment, satisfy himself that the applicant is of legal age, and cause such investigation to be made of his past record as will effectually establish his right to be employed or rejected. He should be kind and considerate, courteous and obliging, but always fair and firm, ever bearing in mind the differences in the mental and physical capacity of different men. He should always try to grant to a worthy employe any reasonable request if within his power to do so. He should study the character and habits of his men and seek to become reasonably familiar with their manner of spending their time when not engaged in the service of the company. It does no harm for a trainmaster to occasionally inquire after the welfare of the employe's family. If it becomes necessary to reprimand an employe it should be done in a quiet, gentlemanly manner, and not in the presence of bystanders.

Here enters the question of enforcing the company's rules and the duty of the trainmaster in this respect. The rules of the railway company are largely for the guidance of the employes toward safe operation. These rules are carefully drafted by the management after a great deal of thought and consideration, each rule covering its own particular point. The trainmaster should carefully impress upon the minds of the employes the extreme importance of a strict observance of all rules. More than ordinary attention should be given to those rules which directly affect the safety of the public, the employes, and the company's property, but the violation of any rule, of whatever significance, should never pass unnoticed by the trainmaster. In other words, he should never turn his back or "wink" at a violation of a rule, no matter how insignificant its violation might seem to be. It is by far the better plan to use every precaution to prevent the violation of any rule rather than to suffer the less important rules to be violated indiscriminately, until an accident occurs, when some drastic action must be taken with the unfortunate employe, of whom an example must be made. One of the best methods of bringing and keeping the rules before the employe is to hold monthly or semi-monthly class meetings for the discussion of rules. It is an easy matter to convince the men that these meetings are not for the purpose of criticising their actions or opinions, but to bring about a clearer understanding of the rules and to impress upon them the importance of strict compliance with the same. It is my experience that employes will speak freely and many good points will be brought out for the betterment of the service.

As a railway derives its principal revenue from the tonnage it hauls, it is of course incumbent upon the trainmaster to see that its tonnage or revenue is protected. He should carefully impress upon station agents and managers of industries the importance of loading cars to

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

American Brake Shoe and Foundry Company

NEW YORK MAHWAH, N.J. CHICACO, ILL.

THE HOLDEN CO., Limited, Agents, 302 St. James St., MONTREAL

their capacity, and by frequent personal inspection satisfy himself that this is being done. With this result obtained, it is essential that each train have its full tonnage over the division. With the cars properly loaded and the train given its tonnage according to the capacity of the engine, there is little to be desired except a reasonably quick movement of the train over the division. In this connection the trainmaster should know, by making tonnage tests on the road, that each engine is being loaded to its capacity, and there should be no failure to handle the maximum tonnage at least one way over the district. He should never lose sight of the fact, that heavy tonnage with the least possible mileage is necessary to successful operation. He should impress this feature upon the chief dispatcher and the dispatchers, and by frequent personal observation satisfy himself that the maximum tonnage is being handled.

The trainmaster should also keep in close touch with the engine mileage, that is the mileage of each engine. to see that a good average is made and the full use of each engine assured.

I believe it is as much the duty of the trainmaster as it is that of the superintendent to know at all times the number of net tons per train. as well as of the net tons per train mile, that is being handled over his territory. This information can be obtained either by estimating from operating sheets of previous periods, or by actual figures compiled from the wheel reports. Conductors may be requested to forward copy of wheel report to trainmaster's office, and from this report it is easy to arrive at the actual net tons per train and per train mile. With this information it is comparatively easy to arrive at a close estimate of the cost of operation, so that one does not need to wait for the operating sheet to know what kind of showing the division has made. Here it may be well to mention a few of the advantages of being furnished with a copy of conductor's wheel report. These reports are especially valuable in tracing the movement of cars, obtaining seal records, etc., and reference to them will often avoid correspondence with conductors, thereby saving time. It also frequently occurs that the car accountant is short wheel reports from conductors for which he will wire the superintendent. Instead of consuming three or four days or a week, and perhaps burdening the wires with a number of telegrams, a copy can be made and forwarded by the trainmaster's clerk. If at first conductors object to making a carbon copy of this report, their objections will be quickly withdrawn when they see the advantages of reduced correspondence about wheel reports.

Among the various duties of the trainmaster, I believe none should stand out more clearly or receive closer attention than that of checking and watching overtime and constructive mileage. Constructive mileage, which to a degree is necessary, will increase to an alarming extent if it is not constantly checked. The trainmaster should satisfy himself as to the exact figure of his necessary or arbitrary constructive mileage and never let it go beyond that figure, without knowing the cause of the increase. Deadheading, which is a form of constructive time, should receive his particular attention. Too much stress cannot be laid upon the importance of watching and of checking overtime. Occasions may arise when overtime is found to be an extremely good investment, that is, for instance, when by paying a certain amount of overtime the company may obtain the equivalent of its value or perhaps avoid paying a greater amount. in mileage. On the other hand, unnecessary overtime means a waste of the company's money. It is so easy to pass beyond the dividing line between desirable and unnecessary overtime, that the constant and unflagging efforts of the trainmaster are required to prevent a leakage that may prove a burden to his company and result disastrously to himself. I have a statement prepared and left on my desk every morning of each hour's overtime made the previous day, and spend a few moments figuring the cost per mile and investigating such delays as may appear unnecessary. An accurate account or record is kept of the overtime for each day for comparison purposes. In this manner the trainmaster may know at all times just what his overtime is costing. This information is of such value to him that too much cannot be said of its benefits.

The distribution of cars is another important feature connected with the duties of the trainmaster. This is particularly true on territory where coal mines or large industries are located. The available empty cars must be properly pro-rated and distributed. Shippers should be urged to load cars with as little delay as possible, and it devolves upon the trainmaster to provide for the movement of such loaded cars promptly.

The trainmaster in passing over the road should make careful note of all foreign cars and take such steps as may be necessary to insure their prompt movement toward home, either loaded or empty, as conditions may warrant.

Especially important is the prompt release of cars under load. The trainmaster should urge upon station agents this particular feature and if necessary visit consignees in an effort to effect the prompt release of such cars. This is of more than ordinary importance during a temporary shortage of equipment or when the load is on a foreign car on which per diem is accruing. The release of cars under load with company material should receive his constant attention. He should personally and frequently check large yards, coal mines and other obscure places, to see that empty cars are not lost sight of or loads unnecessarily delayed. Unbilled loads should be given special attention.

Not the least important of the trainmaster's duties is that of the economical equipment of cabooses. Here is the source of one of the common leakages on some of our most important railways. From personal experience it is known that by careful and constant attention the cost of such supplies can be greatly reduced and a large saving made for the company. In two years the cost of caboose supplies on one division was reduced from three mills to less than one mill per train mile. Train crews should be taught to carefully preserve all scrap or second-hand material with a view of exchanging it for new. Arrangements can be made for a credit to be allowed for second-hand material turned in, and in that way effect a noticeable reduction in the cost of supplies. This practice also contributes to the keeping of such material cleaned up from along the track, which in itself is an advantage.

Another source of loss to a railway company is found in the manner of taking coal on engines from coal chutes. This loss is caused by enginemen calling for more coal than is needed and in some instances when none at all is required. As a result, the tender being unable to accommodate the amount of coal called for, some of it falls to the ground, and while this waste coal may later on be picked up and used, it has incurred an additional expense by reason of its being handled twice. It is a duty of the trainmaster to take such action as may be necessary to improve such a condition.

The trainmaster should frequently pass over his territory and personally visit station agents and should urge upon them the necessity of familiarizing themselves with the rules of the company and conforming to them. Agents should be required to keep their stations and surrounding grounds clean and when necessary keep the station properly heated and lighted. They should be reminded that the company requires them to be courteous and obliging in their intercourse with the public.

The trainmaster should check freight rooms frequently with a view of locating "astray" freight and to satisfy himself that there is no unclaimed perishable freight on hand. He should also insist upon agents keeping oil, oil cans, lamps, lanterns and other inflammables isolated so far as practicable, and that they allow no waste paper, rags, or other trash of an inflammable character to accumulate. This is a necessary precaution against fire. He should see that agents thoroughly understand the proper manner of handling explosives.

The trainmaster should familiarize himself with the methods employed by agents in checking and loading freight and in a general way with their system of reports.

The trainmaster should ride on local freight trains frequently, instructing conductors as to the proper manner of handling freight, sealing cars, keeping seal records, and reporting "over," "short," or "damaged" freight. He should know that no unnecessary time is consumed in switching at stations and that all local work is properly performed.

The question of handling of time and perishable freight is also one that requires its share of the trainmaster's attention. The prompt switching into proper trains and forwarding of such freight to its destination is important; he should see that fast freight schedules are maintained when practicable; and in the event of any time or perishable freight being set out en route by reason of the car being in bad order or from other causes, that it is again forwarded at the first opportunity.

When the main track is obstructed or traffic interrupted by derailments, high water, wash-outs, burned bridges or other causes, the trainmaster should go to that point as quickly as possible and (in the absence of the superintendent) take full charge of opening the track. He should determine as soon as practicable the exact cause of the accident and advise his superior officers of the true conditions, giving full particulars as to the extent of damage to track, equip-

ment, freight, etc., together with his estimate of the time required to open the track for traffic. He should see that there is no unnecessary loss of time in clearing or opening the track, and that the movement of traffic is resumed at the earliest possible moment. He should take steps to insure the protection of the company's property as well as that of any freight which may be involved. In the event of an injury to employes or passengers they should, of course, be given first consideration and it would devolve upon the trainmaster to see that everything possible was done to add to their comfort. Once the track is clear and the movement of traffic resumed, every attention should be given to the prompt clearing away of all debris, so that the track and right-of-way may at once assume its normal appearance.

The trainmaster should promptly and thoroughly investigate the cause of each accident, locate the responsibility if possible, and apply or recommend such discipline as may seem necessary.

It is a very good plan for a trainmaster to know just what the lost tonnage on account of engine failures is costing. This can be quickly figured by taking the total amount of tonnage lost, from which he can estimate the number of trains it would take to move that amount of tonnage, multiply the number of trains by the number of miles they would have to make (usually one freight district) which will give the train miles, this multiplied by the average transportation cost per mile, will give a close estimate in dollars and cents of what the engine failures cost the company. Engine failures should be investigated as to their cause, delay to trains, effect on tonnage, etc.

Passenger service should occupy not a little of the trainmaster's time and thought. He should bear in mind the daily intercourse between the passenger train employe and the traveling public and with that in view endeavor to select for his passenger train employes such men as seem best fitted for that service. The value of neatness and personal appearance should be impressed upon them and they should be shown the advantages the company will enjoy through their courteous manner and gentlemanly conduct.

Close attention should be given passenger coaches to see that they are clean, well ventilated and comfortable. Particularly should the trainmaster insist upon the strict observance of the rules by passenger train employes, for upon this largely depends the safety of the traveling public as well as the protection of the company's property. The attention of enginemen should be called to any rough handling of the train in stopping or starting and if necessary to the observance of speed restrictions through city limits. Special attention should be given to the importance of maintaining the schedules of passenger trains. Trainmen and enginemen as well as station agents should be instructed to take advantage of every move that would facilitate the handling of passengers, baggage and express, so that the delays incidental to the handling of such business could be reduced to the minimum.

On many railways there is at all times scattered along the track more or less scrap material. This feature should be watched closely by the trainmaster, and all concerned should be urged to use every effort to keep such material cleaned up or neatly piled at stations.

Bad order cars are a constant source of annoyance to the trainmaster. This is especially true of bad order cars under load. He should personally keep in touch with the bad order situation, see that all such cars under load are promptly repaired or the contents transferred, and keep the line clear of such cars, having the empty cars moved into regular repair points.

It is seldom a trainmaster's territory can show the best results year after year. Often adverse conditions will arise that may preclude the possibility of making the usual good showing. This may be caused by an unusual number of engine failures or by the power being in poor condition so that it cannot handle its full rating; perhaps a few washouts or a greater number of derailments than usual may have contributed to a congestion of loads. There may have been a large number of empty cars for movement from which no revenue tonnage was derived. These are conditions that any up-to-date trainmaster will strain a point to keep in touch with. He will in all probability keep some kind of log book or memorandum to which he can easily and quickly refer, because the above-mentioned feature will bring about conditions that must sooner or later be explained, and if he has forgotten or has no log book he is put at a disadvantage. I believe a good record of the adverse operating conditions is as essential as some of the important records over which more time is spent.

Immediately preceding and during the periods of light business it is customary to reduce expenses so far as existing conditions will permit. While this feature is usually handled by the superintendent, it is in my opinion good form and excellent training for the trainmaster to assist him to the best of his ability. He should scrutinize the pay rolls often and carefully, inquiring into conditions at points where there is a possibility of reducing expense. The superintendent is usually glad to receive a suggestion that will enable him to accomplish this result.

The foregoing remarks, in my opinion, contain the most vital or important points involved in the duties of the trainmaster. These, added to the innumerable minor duties which are constantly claiming his attention, are calculated to make his life a busy one. He should be on the constant lookout for violations of rules, be quick to observe anything that might be out of line, and endeavor to conduct the business of the company with as much satisfaction to himself as if the property belonged to him. He must be prepared to devote his entire time to his company when necessary.

The conscientious trainmaster will at all times show a willingness to do all he can, and a desire to please his employers. With this in mind the knowledge of his duties will remain with him constantly, and notwithstanding any slight error in judgment he may from time to time exhibit, he will, I believe, have done his best to perform his full duty.

The foregoing paper was awarded first prize by the Railroad Age Gazette, New York, in a competition for the best paper on the subject, to be written by a trainmaster of at least one year's experience in that position within the past three years.

The Canadian Ticket Agents' Association's 23rd annual convention will be held in Buffalo, N.Y., Oct. 5, 6 and 7. The headquarters will be at the hotel Statler. The business meeting will take place on Oct. 5 at 10 a.m., and at 8.30 p.m. there will be a Dutch luncheon and vaudeville entertainment, with a theatre party for the ladies. A programme of entertainment will be arranged for Oct. 6, including an evening theatre party, and Oct. 7 will be spent at Niagara Falls, the International Ry. and the Niagara Gorge Rd. having extended the privileges of their routes. The representatives of Buffalo Terminal Lines will co-operate in making arrangements for the entertainment programme, among others attending being B. P. Fraser, D.P.A., Pennsylvania Rd.; H. Parry, G.A.P.D., New York Central Rd.; W. B. Wheeler, G.W.P.A., Lehigh Valley Rd.; G. B. Wyllie, T.P.A., Illinois Central Rd.; H. M. Morgan, C.P.A. Grand Trunk Ry., and others.

The C.P.R. has been the victim for some time past of considerable thefts of iron and steel from its Angus shops, Montreal. Five employes were recently arrested in that connection.

Sir C. Rivers Wilson, President G.T.R., arrived in Montreal Aug. 3, and subsequently, in company with a number of officers of the company, started out on a special train to make an inspection of the company's lines in Canada and the United States, and to go over the Grand Trunk Pacific Ry. under operation and construction.

The Maritime Board of Trade passed a resolution, Aug. 19, to memorialize the Dominion Government to acquire such branch lines of the Intercolonial Ry. as may be feeders to it and to use every endeavor to encourage existing industries and promote new ones in the country which it controls from the railway standpoint.

A Montreal press dispatch states that the C.P.R. legal department has announced that it has discovered a conspiracy to obtain money from the C.P.R. and other similar companies, by means of false claims for damages for personal injuries received in alleged accidents. It is stated that a regular organization is in existence, with branches at various centres throughout Canada and the U.S. Charges are at present proceeding against three men in Montreal, and it is stated that other arrests will be made shortly.

W. H. Olive, who has been appointed General Travelling Agent, Intercolonial Ry., for the territory between Dalhousie, N.B., and Belleville, Ont., was born at St. John, N.B., Aug. 5, 1837. In 1898 he opened the first western coupon ticket office in St. John, and in 1874 was appointed Intercolonial Ry. city passenger agent there, which position he held until shortly after the change of government in 1878. In 1885 he removed to Montreal and engaged in insurance business and in 1896 was appointed Intercolonial Ry. Eastern Freight and Passenger Agent in Montreal, from which position he was removed while A. H. Harris was in charge of the traffic department. Subsequently he was appointed General Travelling Freight Agent and on J. Hardwell being appointed Chief Traffic Officer of the Board of Railway Commissioners Mr. Olive succeeded him as Assistant General Freight Agent I.C.R., which position he held until Aug. 1, 1909.

Railway Rolling Stock Notes.

The Duluth, South Shore and Atlantic Ry. has ordered one locomotive from the Baldwin Locomotive Works, Philadelphia, Pa.

Between July 14 and Aug. 14, the Canadian Locomotive Co., Ld., Kingston, Ont., delivered 8 mogul locomotives to the G.T.P.R.

The Dominion Car and Foundry Co., Montreal, is completing 7 caboose steel underframes for the Temiskaming and Northern Ontario Ry.

The International Ry. of New Brunswick has the following rolling stock on its line:—4 locomotives, 5 passenger cars, 7 box cars, and 55 flat cars. It will probably order in the near future 25 or 30 large flat cars for logging traffic, similar to those in use on the Halifax and South Western Ry.

Rhodes, Curry Co., Ltd., Amherst, N.S., advise having delivered to Canadian Northern Ry., between June 15 and Aug. 25, 400 box cars, 60,000 lbs. capacity, 5 baggage cars, 3 first-class coaches and 4 conductors' vans; to the Halifax and Southwestern Ry., 2 parlor cars, and to the Colonial Coal Co., 30 mine cars.

The C.P.R., between July 13 and Aug. 14, placed orders for rolling stock as follows: 1 sleeping car, 1 baggage and express car, 2 refrigerator cars, 84 box cars, 15 flat cars, 8 stock cars, 2 ballast cars, 4 coal cars and 1 cinder car at its Angus shops, Montreal; 4 vans at its Farnham shops, Que.; and 4 steel coal cars at the Dominion Car and Foundry Co., Montreal.

The C.P.R. between July 13 and Aug. 14, received the following additions to rolling stock: 5 D10 locomotives, 4 observation cars, 1 sleeping car, 1 baggage and express car, 272 box cars, 37 refrigerator cars, 7 flat cars, 4 stock cars, 2 ballast cars and 1 cinder car from its Angus shops, Montreal; 14 vans from its Farnham shops, Que.; and 79 steel coal cars from the Dominion Car and Foundry Co., Montreal.

The C.N.R., between July 15 and Aug. 15, received the following additions to rolling stock: 100 steel underframe flat cars from the Dominion Car and Foundry Co., Montreal; 2 consolidation locomotives from the Montreal Locomotive Works; 90 box cars from the Crossen Car Manufacturing Co., Cobourg, Ont.; 144 box cars and 3 baggage cars from Rhodes, Curry & Co., Amherst, N.S., and 2 mail and baggage cars.

Following are dimensions and other details of the 100 flat cars which the C.N.R. has ordered from the Dominion Car and Foundry Co., Montreal, as mentioned in our last issue:

Capacity	60,000 lbs.
Length over end sills	37′ 8½″
Length over striking plates	37′ 10″
Length centre to centre of trucks	26′ 10″
Width over side sills	9′ 0¾″
Width over floor	9′ 3¾″
Width over stake pockets	9′ 11⅜″
Height from rail to top of floor	4′ 1⅛″
Height from rail over sill	3′ 11⅜″
Height from rail to top of brake wheel	6′ 4⅜″
Height from rail to centre of drawbars	2′ 10½″
Trucks	Arch bar
Bolsters and brakebeams	Simplex
Couplers	Simplex, side opening
Side bearings	Susemihl frictionless
Brake shoes	Steel back
Axles	Steel
Journal boxes	McCord M.I.
Air brakes	Westinghouse
Springs	M.C.B. class G.

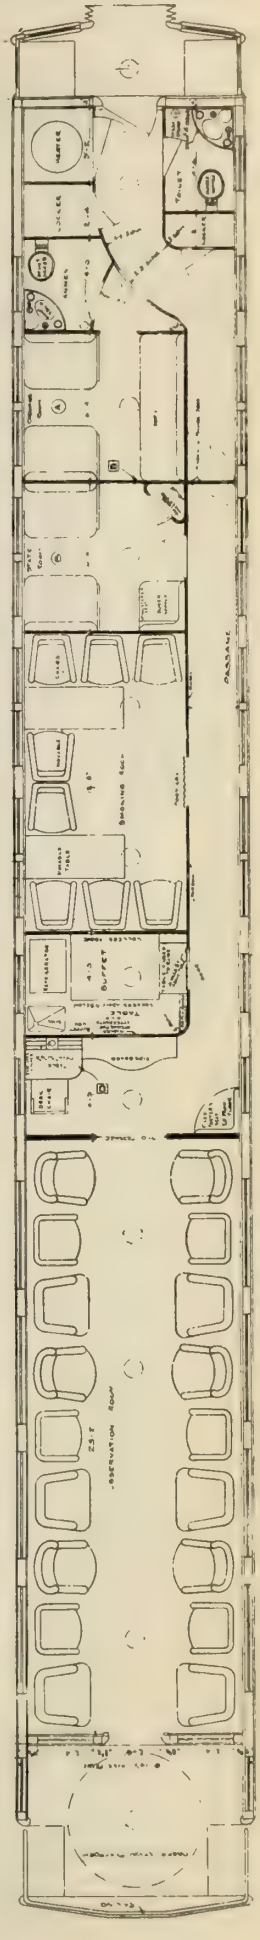
In giving particulars of rolling stock ordered by the C.P.R. at its Angus shops, Montreal, in our last issue, we stated that 10 box cars had been ordered. This should have been 102. Of the rolling stock so ordered, all are being built to the usual specifications, which we have already given, with the exceptions, t' the van under construction at the Farnham shops will have side look-out windows in addition to the cupola, and the following additional particulars for the cars, as mentioned:

STEEL FLAT CARS.

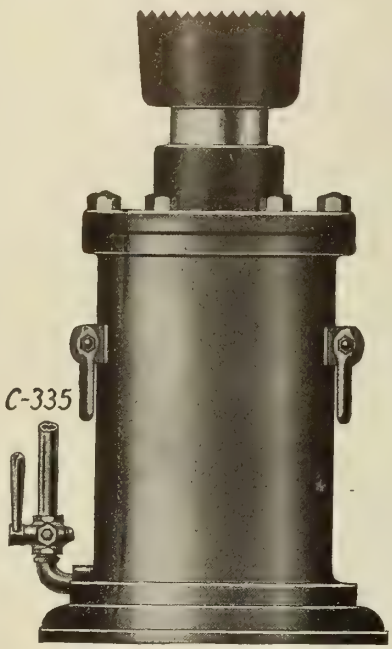
Capacity	40 tons
Type	Steel frame
Length over buffer blocks	42′ 2″
Width over frame	9′ 0″

Canadian Pacific Railway Observation Cars.

In our July and August issues we gave a full description, dimensions, etc., of the 22 observation cars which the C.P.R. has built recently for transcontinental service. The illustration above gives a rear end and side view of one of these cars, and at either side of this page are floor plans of the two types of cars, half of which contain, in addition to the observation room, three staterooms and a drawing-room, the other half having a smoking-room, a stateroom and a drawing-room.



Compressed Air-Jacks



For short lifting around car and repair shops and manufacturing plants.

Rand Jacks are built in several styles from 4 to 30 thousand pounds capacity.

All of the latest construction, fitted with safety check valves for holding the load if the hose becomes detached or burst.

We carry in stock or can make quick delivery of all compressed air appliances and Rand Air Compressors.

Our Signs and Numbers are made of ALUMINUM and riveted with ALUMINUM RIVETS to a BLACK JAPANNED STEEL PLATE. The great benefit of our Numbers and Signs is. that being made of Aluminum they will never CRACK, RUST or TARNISH, and can be seen much better both by day and night than any other manufactured. The Light, Glistening Aluminum Figure standing out on the Black Background makes a PERFECT CONTRAST between the Number and the Plate.

The Great Eastern Railway of England, with one of the largest termini in London and a great suburban traffic, has lost passengers at the rate of 25,000,000 per annum since the advent of the London County Council's electric tramways, and this in spite of a gradual reduction of its fares amounting in some cases to 40%. The council tramways are a municipal undertaking, and while giving good service have been run hitherto at a loss, the deficit being paid out of the rates, so that the railway company, as a large ratepayer, is naturally aggrieved at having to contribute to the support of a successful rival.

The Board of Railway Commissioners has postponed the operating sittings fixed for Ottawa Sept. 7, to Sept. 14, at 10 a.m. The date for the Sept. traffic sittings remains unchanged, and traffic matters will be heard at Ottawa, Sept. 21, at 10 a.m.

Rails, Fastenings and Tie Plates.

A sub-committee of the Canadian Society of Civil Engineers has presented the following report: In view of the importance of the subject, and the wide field for investigation, the sub-committee considered it advisable not to undertake the formulation of a complete report, but to present to the general committee on transportation for its consideration, the present state of rail manufacture with respect to the sections which have been in general use for many years and the contemplated departure from those sections, and as the type of rail is necessarily preliminary to a consideration of the fastenings or the tie plates, the latter items were not considered at this time. It has therefore included in its report natural scale drawings of the following sections:

American Society of C. E.	80	lbs. per yd.
American Society of C. E.	100	" " "
American Railway Ass'n., Type A	80	" " "
American Railway Ass'n., Type A	100	" " "
American Railway Ass'n., Type B	80	" " "
American Railway Ass'n., Type B	100	" " "
Pennsylvania Railroad—Standard	85	" " "
Pennsylvania Railroad—Standard	100	" " "
N.Y.C. & H.R.R.R.—Standard...	85	" " "
N.Y.C. & H.R.R.R.—Standard...	100	" " "
Canadian Pacific Ry.—Standard.	85	" " "

The sections known as the Am. Soc. C.E. Sections were, after several years of consideration, recommended by a committee of that Society in June, 1893, and their adoption has grown until they are now in almost general use on the railways of Canada and the U.S. Since their introduction, certain objections to them have developed, and about a year ago the American Railway Association offered for consideration, through its committee on rails, two new types of section, known as type A and type B, each representing a different thought or principle of design. A study of these sections, as compared with the Am. Soc. C.E. sections, will disclose vital differences. Type A represents a rail in which girder strength is sought as a predominant feature, while endeavoring to conserve the disposition of material in head, web, and base, to secure good mill results. Type B is a rail in which mill results are sought as predominant features, while endeavoring to conserve the girder strength required for modern heavy wheel loading. These sections appear to have secured respectively, the salient features sought, in an advantageous way as compared with the Am. Soc. C.E. sections; and experimental rollings have been made of each section within the past few months, from which it hopes to derive reliable information within the next two years. The section used as standard by the Pennsylvania R.R. might be classed with type B, al-

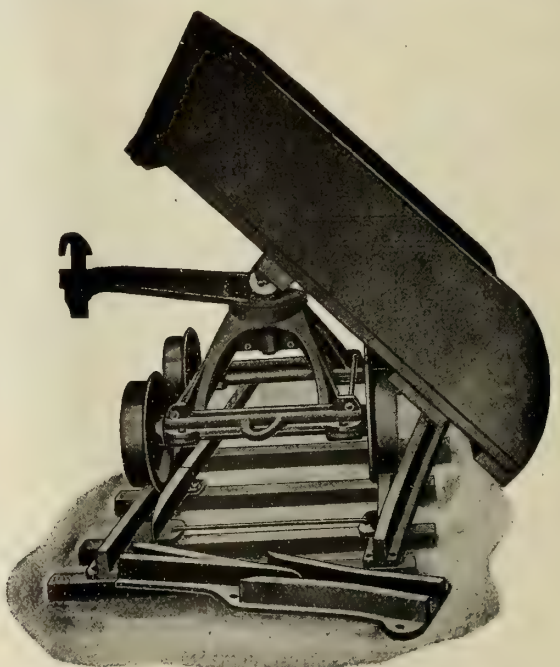
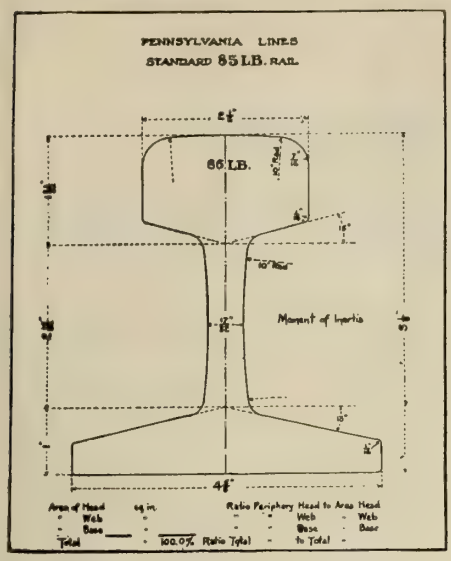
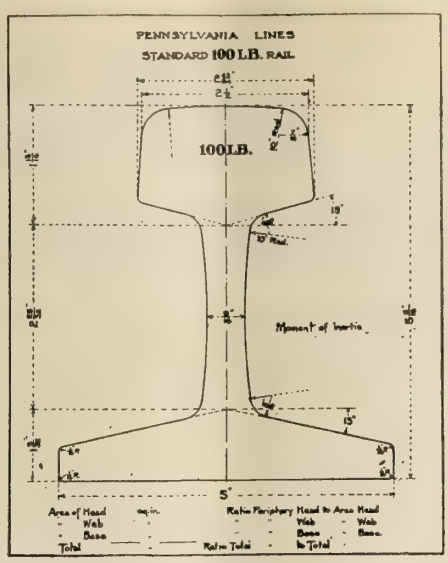
Champion Revolving Dump Car

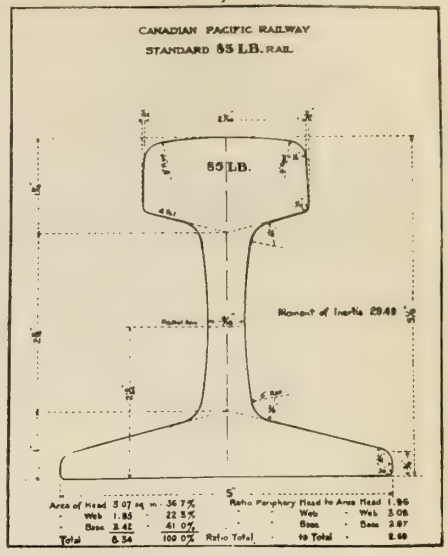


The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

The Canadian Road Machine Co., Limited
HAMILTON, CANADA







though differing in detail; while the section used as standard by the N.Y.C. & H.R.R.R. is clearly of type A. The C.P.R. standard 85-lb. section is between the two typical sections.

It is believed by the sub-committee that a careful study of these sections will prove not only interesting but most instructive, and that it would be inopportune at this time to present for consideration any general specification pertaining to chemical composition or mill practice.

The report is signed by H. G. Kelley, Chairman, the other members of the committee being: D. MacPherson, H. Holgate, H. D. Lumsden, F. P. Gutelius, W. McNab, J. G. Sullivan, T. C. Burpee, A Stansfield, B. B. Kelliher, A. F. Stewart, L. A. Vallee, H. A. Woods, R. McColl.

Board of Railway Commissioners.—A. J. Nixon, at present Assistant Superintendent, G.T.R., London, Ont., has been appointed as the Board's operating officer, his duties to commence Oct. 1.

Mrs. Sykes, wife of S. H. Sykes, C.E., of Mackenzie, Mann & Co.'s engineering staff, died at Toronto, Aug. 25, after a long illness.

When A. J. Nixon, Assistant Superintendent G.T.R., London, Ont., leaves that position about Sept. 15 to become operating officer, Board of Railway Commissioners, at Ottawa, he will probably be succeeded by C. G. Bowker, at present Trainmaster at Stratford, Ont., who will probably be succeeded by J. A. McLar-

Grain Elevator Notes.

The Goose Lake Grain and Lumber Co., is erecting an elevator at Harris, Sask.

The Thunder Bay Elevator Co., Ltd., has increased the number of its directors from three to seven.

The National Elevator Co. is reported to be arranging for the erection of a large elevator at Fort William.

Paulson & Winkler are reported as having decided to build an elevator with capacity for 25,000 bush. at Loreburn, Sask.

The Atlas Elevator Co., Ltd., has been licensed under the Foreign Corporations Acts to carry on business in Manitoba and Saskatchewan.

Contracts have been awarded for the construction of elevators at Bruderheim and Pippin, Alta., for J. Gillespie and J. R. Spier, respectively.

The Claresholm Lumber and Grain Co. is reported to have disposed of its elevators at Granum and Stavely, Alta., to C. Terwilliger, Sioux City, Ia.

The Farmers' Elevator Co. of Killam, Ltd., has been incorporated under the Northwest Territories Companies Ordinance, with office at Killam, Sask.

The interest in the Northern Elevator Co. of N. Bawlf is reported to have been acquired by E. C. Warner, of Minneapolis, Minn. It has been stated that apart from this transfer of interest there will be no change in the name or management of the company. G. R. Crowe, Winnipeg, has been elected President.

The Clanwilliam Farmers' Elevator Co. Ld. has been incorporated under the Manitoba Companies Act, with a capital of $10,000, and office at Clanwilliam, to carry on a general grain warehousing and elevator business. The provisional directors are: W. B. Waddell, W. T. Bielby, R. Greenlaw, C. Averill, H. Woodcock, J. Proven, of Minto, and G. Frazer and H. F. Maulson, Minnedosa, Man.

It is announced that the Brackman-Ker Milling Co. has transferred all its grain elevators in Alberta with the exception of its storage plants at Edmonton and Strathcona, to the Alberta Grain Co., by which they will in future be operated. The elevators transferred are situated at Wetaskiwin, Leduc, Hobbema, Ellerslie, Stoney Plain, St. Albert, Bittern Lake, Fort Saskatchewan and Lamont.

The Dow Cereal and Milling Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $200,000 and office in Winnipeg, to carry on a general milling business, to build and operate grain elevators, and carry on a general elevator business. The provisional directors are: G. Dow, M. L. B. Colquhoun, Pilot Mound, Man.; E. Nicholson, D. H. Bain, G. S. Laing, Winnipeg.

The Standard Elevator Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $250,000, and office at Winnipeg, to deal in wheat, grain and other cereals, and to own, construct or otherwise acquire, and operate elevators, warehouses, etc., for the storage of grain. The provisional directors are W. K. Chandler, E. Lockington, H. Phillips, H. W. Whitla, E. A. Fletcher, Winnipeg.

It was recently reported that the C.P.R. was about to establish a sacking plant at Vancouver, to deal with the shipment of grain at that point. Press reports, however, state that a communication was recently received by C.P.R. officials at Vancouver, from W. Whyte, Second Vice President, to the effect that no decision had been arrived at in the matter of making provision for the handling of grain there.

An extraordinary general meeting of shareholders of the Carlyle Farmers Elevator Co. was held at Carlyle, Sask., Aug. 3, to consider as to whether the proposed elevator should be built on the C.P.R. or the C.N.R. The directors had already decided that it was to be built on the C.P.R., but the shareholders decided, by a majority of 26, that it be built on the C.N.R. Upon the decision becoming known, the President and directors resigned.

Randall, Gee and Mitchell, Ltd., has been incorporated under the Dominion Companies Act, with a capital of $25,000 and office at Winnipeg, to carry on an elevator and warehouse business, and to erect and operate grain elevators, and to build, purchase or otherwise acquire and operate steam and other vessels for the transport of passengers and freight. The provisional directors are F. W. Piche, H. V. Lloyd, C. S. Blanchard, A. Campbell, C. Y. Mackenzie, Winnipeg.

A press report dated Aug. 19 states that the grain elevators at Kingston, Ont., have experienced the smallest grain delivery since 1884, which year had the smallest on record. In 1908 about 15,000,000 bush. were shipped to Kingston, which constituted a record, but this year only about a quarter of that amount has, so far, been received. Though cargoes will be received throughout the fall, it is considered doubtful if more than one-third of last year's figures will be reached.

The Matheson Grain Co., Ltd., has been incorporated under letters patent in Manitoba, with a capital of $100,000 and office at Winnipeg, to buy and lease lands and to erect buildings thereon, and equip same with the necessary machinery for the purpose of receiving, warehousing and delivering grain, etc.,

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

PEERLESS
The Fence that saves Expense

It is the best fence you can buy because it is the cheapest, when measured by the years of good service it will give. PEERLESS FENCING is made of all No. 9 hard, springy wire, which is not easily affected by weather, wear or unruly stock. Just the fence suited to railroads. Neat in appearance—conforms to topography of ground and at the same time upright wires are perpendicular. It will pay you to get the free book we are sending to all who write us. A postal will do.

The
Banwell Hoxie Wire Fence
Company, Limited
Dept. 17 HAMILTON, ONT.
WINNIPEG, MAN.

STRONGER
Than Stock-Weather and Wear

and to take over the elevators owned by T. S. Matheson at Caron, Keeler, Midale, Griffin, Guernsey, Sask., and Stilson, Man. The provisional directors are: T. S. Matheson, Winnipeg; J. S. Matheson, R. M. Matheson, J. McQueen and J. W. Fleming, Brandon, Man.

E. J. Chamberlin, Vice-President and General Manager G.T.P.R., while in Montreal recently, is reported to have said that by the time the crop is ready there will be 102 elevators along the route to Edmonton, with a total capacity of 3,500,000 bush., ready to deal with it. In addition, there will be loading platforms all along the line. He stated that four elevator companies were now operating on the G.T.P.R. Regarding the Fort William elevator, he said that one section with a capacity of 3,800,000 bush. was approaching completion.

Regarding the question of handling wheat at Vancouver for shipment to Europe by the Pacific route, F. F. Busteed, General Superintendent C.P.R. Pacific Division, was reported to have stated recently that press reports to the effect that the C.P.R. was doing nothing in the matter were incorrect. When the time comes the C.P.R. will be ready, and is even now preparing to deal with all the grain that will come forward for shipment from that point. What the preparations were he was not in a position to state, but judging from previous statements on the point, it may be surmised that the method to be adopted will be that of sacking the grain.

The number of cars of grain inspected from Sept. 1 to the close of navigation at Fort William and Port Arthur, Dec. 12, 1908, was 55, 264. Of this number, 35,258 moved over the C.P.R., 15,823 over the C.N.R., 1,296 over the G.T.P.R., and 2,887 over the G.N.R. to Duluth, Minn. The grain inspected was divided as follows: wheat, 46,707 cars, 49,042,350 bush.; oats, 5,316 cars, 9,568,800 bush.; barley, 2,157 cars, 2,588,400 bush.; flax, 1,078 cars, 1,078,000 bush.; rye, 6 cars, 7,200 bush.; a total of 62,284,750 bush. During the same period, grain was received at the points named, as follows: wheat, 39,429,747 bush.; oats, 7,237,431 bush.; barley, 1,903,315 bush.; flax, 895,295 bush.; rye, 1,077 bush.; a total of 49,466,865 bush. The shipments were: wheat, 36,013,617 bush.; oats, 5,953,201 bush.; barley, 1,450,864 bush.; flax, 519,913 bush.; a total of 43,935,595 bush. The difference between the quantity received and the quantity shipped was unloaded at other points or absorbed locally.

Among the Express Companies.

The Canadian Northern Ex. Co. has opened a waybill office at Bowsman, Man.

S. Coates was sentenced to 5 years in the penitentiary, Aug. 5, on his pleading guilty to forging and uttering Dominion Ex. Co.'s money orders, at Montreal.

Complaint is being made in Winnipeg as to the alleged restricted limits, within which express companies deliver matter there. Since the companies first operated in the city, it has grown considerably, but it is claimed that the original limits have been maintained.

Press reports state that express companies operating throughout the Dominion have prepared a new schedule of rates, which will be laid before the Board of Railway Commissioners at its Sept. sittings for approval. The reports probably have reference to joint tariffs governing small packages when carried by two or more express companies. At the close of the hearing in Toronto in June, after argument of counsel, the Chief Railway Commissioner asked counsel if the express companies had considered the question of joint rates on that class of business. It was stated that many complaints had been received of the high charge on a package by express, when it passed over the lines of two companies, and counsel were asked to confer with the express companies to see if they were willing to make any concession in respect of such packages. A conference was held, and later the Board was advised that the companies were willing to make some concession, and the companies are now endeavoring to work out a schedule of charges to govern the traffic referred to, which will be somewhat less than the present charges on the same class of business.

Telegraph and Cable Matters.

The C.P.R. Telegraph Department has announced a reduction in cable rates between Australia and British Columbia, from 18c. to 9c. a word.

Miss M. G. Easson, daughter of R. F. Easson, Press Superintendent, Great Northwestern Telegraph Co., Toronto, was married recently to J. H. Stovel, of Cobalt, Ont.

J. J. Ross, heretofore supervisor of electric signals, M.C.Rd., has been appointed Superintendent of Telegraphs, with office at Detroit, Mich., succeeding the late E. H. Millington, who died recently at St. Thomas, Ont.

An Ottawa press dispatch states that the Department of Marine is considering the question of erecting three additional wireless telegraph stations on the Pacific coast, and that they are to be adapted for commercial purposes as well as for signalling.

J. Kent, Manager, and W. J. Camp, Electrical Engineer C.P.R. Telegraphs, left Montreal, Aug. 10, for an inspection trip over the western lines. B. S. Jenkins, General Superintendent of Telegraphs, Western Lines, joined them at Winnipeg, and the various superintendents were picked up en route through their divisions.

The Marconi wireless telegraph station at Glace Bay, N.S., was destroyed by fire, Aug. 21. The station, which was the only one on this side of the Atlantic capable of dealing with the trans-Atlantic wireless business, was opened in 1907, and arrangements were made at the recent annual meeting of the company in London, Eng., for the duplication of the plant. The business, which had grown to considerable dimensions, is temporarily suspended, but it is understood that the work of getting a new plant into order will be taken in hand at once. The official on the spot is stated to have said that the experience gained in constructing the station just destroyed would enable the company to put up a new one more capable of dealing with amount of work they now had to cope with.

ELECTRIC RAILWAYS

Canadian Street Railway Association

PRESIDENT, D. McDonald, Manager, Montreal St. Ry.; VICE-PRESIDENT, J. Anderson, Manager, Sandwich, Windsor and Amherstburg Ry.; SECRETARY TREASURER, Acton Burrows, Managing Director, Railway and Marine World.

ASSOCIATION'S OFFICE, 157 Bay St., Toronto.

EXECUTIVE COMMITTEE: P. Dubee, Secretary, Montreal St. Ry.; E. A. Evans, General Manager, Quebec Ry. Light and Power Co.; R. J. Fleming, General Manager, Toronto Ry.; H. M. Hopper, Secretary-Treasurer, St. John Ry.; J. E. Hutcheson, Superintendent and Purchasing Agent, Ottawa Electric Ry.; C. B. King, Manager, London St. Ry.

ASSISTANT SECRETARY, Aubrey Acton Burrows, Secretary and Business Manager, Railway and Marine World.

Projects, Construction, Betterments, Etc.

Brandon, Man.—The city council has under consideration the desirability of constructing a system of street railways in the city. A proposal was made by J. H. Ingram, but the council, while it has not rejected it, is more favorably inclined to the construction of a municipal system.

Brantford St. Ry.—The laying of the new tracks and the second track on Colborne Street, Brantford, Ont., has been completed on one section, and the cars began running over it Aug. 10. The relaying and second track work on the rest of the street will be gone on with as soon as the concrete foundations have been laid. The whole of the lines in the city are being relaid with 80-lb steel, which is being supplied by the Algoma Steel Co. The special work is being supplied from England. (June, pg. 447.)

The British Columbia Electric Ry. Co. has made application to the Provincial Government for 30,000 miners inches of water from the Indian River, near Vancouver, and proposes to construct an auxiliary power plant.

Work has been started on the electrification of the line to Cloverdale. The poles being used are double the height of the ordinary poles and will carry both the trolley wires and the high voltage wires that will convey the power to Chilliwack.

Tracklaying has been started on the first section of the line from New Westminster to Chilliwack, which extends to Abbotsford, 38 miles. It is expected that this work will be completed by the end of November. Contracts are reported to have been let for the grading of the remaining mileage to Chilliwack, and for a twelve mile branch to the property of the Puget Sound Ditch and Dredging Co. (Aug., pg. 608.)

Calgary, Alta.—The city council placed in operation Aug. 12, a further section of its municipal street railway. This section extends over the Louise bridge for half a mile to the foot of the hill, where a temporary loop has been placed. The commissioners have filed with the Dominion Government plans for a number of extensions, which it is contemplated to construct in the future. (Aug., pg. 608.)

Dunnville, Wellandport and Beamsville Electric Ry.—The by-laws granting aid to the company for the construction of an electric railway through the townships, have been passed by Moulton and Gainsboro. The two townships have voted $5,000 each. The company pro-

poses to construct a line from Dunnville via Wellandport to Beamsville, Ont., and has already graded some few miles from Dunnville. (Aug., pg. 608.)

Fort William, Ont.—The taxpayers have, by a majority of 632, voted in favor of constructing a second track on the street railway in the city. It is said that the laying of the second track, as well as the constructing of an extension of the existing lines, will be started at an early date. (Aug., pg. 608.)

Hamilton Radial Ry.—The Dominion Power and Transmission Co., which owns this electric railway running from Hamilton to Oakville, Ont., is said to be making arrangements for the extension of its line from Oakville to Toronto. (July, 1908, pg. 509.)

Hamilton Street Ry.—The Dominion Power and Transmission Co., which owns this electric railway, has given notice to the Hamilton city council that it is prepared to go on with the relaying of the tracks on James street, from Herkimer street to the Incline Ry., and to do the paving between the rails at the same time. It is said that the city will repave the other portions of the street at the same time. (June, pg. 447.)

Laval Electric Co. was given power at the Quebec Legislature's last session, to construct tramways, wharves, docks, and other necessary buildings, and to operate steam and other vessels in connection with the businesses which it is authorized by its act of incorporation to carry on.

London and Northwestern Ry.—At a recent meeting of the provisional directors of this company, which was incorporated last session of the Dominion Parliament, held in London, Ont., it was decided to proceed with the sale of shares with the object of raising sufficient funds to engage an engineering staff to make surveys of the proposed route. The route is from London to Sarnia, with a branch from Lobo to Grand Bend. It was also decided that application be made to the different municipalities through which the line will pass for bonuses to aid in the financing of the proposition. Alderman D. A. Stewart, of London, is one of the principal promoters of the company. (Mar., pg. 173.)

Montreal and Southern Counties Ry.—The by-law granting a 20 year franchise to the company for a street railway in St. Lambert municipality, was finally passed Aug. 11. The work of constructing the line through the municipality will be gone on with at once. (June, pg. 523.)

Nipissing Central Ry.—The Board of Railway Commissioners has approved of the route of this electric railway from Cobalt to Haileybury, 5.1 miles. The line starts at Cobalt and runs northerly through Argentite and Port Cobalt to Haileybury. It will serve a population estimated at 25,000. The maximum gradient is 5%, and the maximum curvatures 20 degrees. The line crosses the Temiskaming and Northern Ontario Ry. on an overhead timber trestle 1,200 ft. long. Construction has been in progress for some time, and it is expected that the line will be completed to Haileybury by the end of Oct. We are advised that no contracts for power, electrical equipment or rolling stock have yet been let. The company proposes, upon the com-

Limited
WALKERVILLE, ONTARIO.

pletion of the line into Haileybury, to undertake the construction of an extension to New Liskeard, a further distance of six miles. G. E. Henry is Chief Engineer in charge of construction. (Aug., pg. 609.)

Peoples Ry.—Surveys are being made for this projected line of electric railway. H. B. Stewart is in charge of the surveys, and A. N. Warfield, New Hamburg, Ont., is consulting engineer. The map of the projected lines show a main line running from New Hamburg through Zubrig, Tavistock, Stratford, Sebringville, Mitchell and Dublin to Seaforth. A line runs southerly from New Hamburg through Haysville, Plattsville, and Innerkip to Woodstock, and northerly to Wellesley. From Sebringville, it is proposed to run three branch lines: one northerly through Rostock to Monkton; one southerly through Avonbank and Avonton to St. Marys; and one southwesterly through Carlingford, Russeldale, Fullerton, Farquhar to Exeter. The survey has been completed from New Hamburg to Wellesley. The township of Wellesley on July 14 voted in favor of a by-law to subscribe $15,000 of preference stock in the company by way of bonus. The surveys have been completed from New Hamburg to Stratford, and it is hoped to be able to start construction at an early date. W. A. Bugg, who is active in the promotion of the company, stated recently that it had been decided to move the offices of the company to Stratford. (Aug., pg. 609.)

Quebec and Saguenay Ry.—The Quebec Legislature at its last session, continued and renewed the rights and privileges conferred by the company's act of incorporation. The construction of the railway is to be commenced within two years and completed within five years. R. Forget, W. McL. Walbank, W. G. Ross, Montreal; Hon. E. B. Garneau, Hon. C. Langelier, and Hon. P. A. Choquette, Quebec, are among the promoters. (July, pg. 523.)

Quebec County Ry.—The Quebec Legislature at its last session, directed that the company's powers of construction shall not be exercised over any of the roads under the control of the Quebec North Shore Turnpike Trust, without the consent of that body, nor along the road belonging to a municipality without the consent of such municipality. The company is also given power to lay out pleasure grounds, and to acquire lands for building lots, etc., in connection with its business.

Rainy River Radial Ry.—Application will be made at next session of the Dominion Parliament for an act to incorporate a company with this title to construct and operate a line of railway from the International boundary near Fort Frances to the Lake of the Woods, near the mouth of Big Grassie River, and from that line of railway to the International boundary near Rainy River; to the International boundary near the Long Sault Rapids, on the Rainy River; to the Lake of the Woods near the mouth of the Little Grassie River; to the International boundary near the mouth of Rainy River, and from Fort Frances to the southwest shore of the northwest bay of Rainy Lake. Power will also be sought to carry on the general business of a telephone, express, power, light and heat, shipping, warehousing and forwarding company and general commission merchant; to build and operate hotels, parks and pleasure resorts, coal and ore docks, grain elevators, etc., and to enter into agreements with other railway and transportation companies and municipalities. W. A. Dowler, Fort William, is acting for the applicants.

St. Thomas Street Ry.—The St. Thomas, Ont., city council has had under consideration a report of the commissioners operating the street railway with reference to the repairs which are urgently required. The estimated cost of the repairs which it is considered should be made at once is about $7,000. It was decided to undertake certain of the work at once, and to take up the consideration of the less urgent parts of the work at a time when it could be undertaken without interfering with the earning capacity of the line. (June, pg. 449.)

Toronto and York Radial Ry.—Engineers have been going over the Mimico division with a view of securing a new route at a number of points between Sunnyside and Port Credit, Ont. It is desired to secure a private right of way so as to run faster cars and to be able to handle freight traffic to greater advantage than can be done over the present route, which is almost entirely along the public road. The adoption of a new route would enable the company to cut out the sharp curves, of which there are a number along the line. It is thought probable that a new bridge will be constructed across the Etobicoke River. (June, pg. 449.)

Electric Ry., Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for June, $200,624; operating expenses, $116,025; operating earnings, $84,599; renewal funds, $13,958; net earnings, $70,641; approximate income from investments, $13,550; net income, $84,191; against, $157,727 gross earnings; $96,729 operating expenses; $60,998 operating earnings; $10,750 renewal funds; $50,248 net earnings; $11,036 approximate income from investments; $61,284 net income for June, 1908. Aggregate gross earnings for 12 months ended June 30, $2,298,778; net earnings, $1,027,116; against $1,926,924 gross, and $912,928 net for same period 1907-08.

Calgary St. Ry.—Gross earnings for July, $5,392; expenses, $1,397; net earnings, $3,995.

Halifax Electric Tramway.—Railway receipts for 3 weeks ended Aug. 21, $14,828.54, against $13,519.74 for same period 1908.

Hull Electric Co.—The Quebec Legislature passed an act last session altering the date of the annual meeting to the first Wednesday in Sept. in each year.

London St. Ry.—Gross earnings for July, $24,802.95; operating expenses, $15,767.84; net earnings, $9,035.11; against, $22,062.63 gross earnings; $14,556.24 operating expenses; $7,506.39 net earnings for July, 1908. Aggregate gross earnings for 7 months ended July 31, $135,978.89; operating expenses, $97,176.72; net earnings, $38,802.17; against, $129,054.05 aggregate gross earnings; $95,616.26 operating expenses; $33,437.79 net earnings for same period 1908.

Montreal Central Terminal Co.—A meeting of the shareholders was held Aug. 9, for the purpose of authorizing the issue of first mortgage bonds, and to authorize the making of agreements with other companies. F. E. Came is Secretary.

Montreal St. Ry.—Passenger earnings for July, $334,237.57; miscellaneous earnings, $11,335.99; total earnings, $345,573.56; operating expenses, $180,412.11; net earnings, $165,161.45; city percentage on earnings, $34,945.22; interest on bonds and loans, $14,439.62; rent leased lines, $498.67; total charges, $49,883.51; surplus, $115,277.94; against, $313,353.20 passenger earnings; $13,171.19 miscellaneous earnings; $326,524.39 total earnings; $162,413.90 operating expenses; $164,110.49 net earnings; $32,317.33 city percentage on earnings; $16,583.23 interest on bonds and loans; $444.43 rent leased lines; $49,344.99 total charges; $114,763.50 surplus for July, 1908. Aggregate passenger earnings for 10 months ended July 31, $3,064,270.17; miscellaneous earnings, $73,276.66; total earnings, $3,137,546.83; operating expenses, $1,894,815.41; net earnings, $1,242,731.42; city percentage on earnings, $204,187.00; interest on bonds and loans, $150,763.70; rent leased lines, $4,824.01; total charges, $359,774.71; surplus, $882,956.71; against, $2,939,601,00 aggregate passenger earnings; $59,686.92 miscellaneous earnings; $2,999,287.92 total earnings; $1,184,428.44 operating expenses; $1,184,859.48 net earnings; $188,992.65 city percentage on earnings; $175,785.05 interest on bonds and loans; $4,130.86 rent leased lines; $368,908.56 total charges; $815,950.92 surplus for same period 1907-08.

Port Arthur-Fort William Street Ry.—The total earnings for June were $11,455.94, and the total operating expenses $5,233.37, leaving net earnings of $6,222.57. The car mileage was 38,570; the earnings per mile 29.70; operating per car mile 13.57; net earnings per car mile, $16.13.

South Western Traction Co.—At the annual meeting, Aug. 11, the retiring officers and directors were re-elected. The reports as to earnings were stated to be satisfactory. It was stated that the earnings for every month this year showed an increase, the earnings for July amounting to over $15,000, an increase of $2,000 over those for July, 1908.

It is probable that an order for the sale of the company's line, franchises and other property will shortly be granted by the courts. The business has been managed for some little time past by receivers on behalf of the English bondholders. The financial difficulties of the company arose from handling the floating debt of $100,000 incurred by the adoption of the three-phase system of operation and its necessary abandonment.

Toronto Ry.—Gross earnings for June, $330,608; operating expenses, $157,234; net earnings, $173,374; against, $302,242 gross earnings; $155,221 operating expenses; $147,021 net earnings for June, 1908. Aggregate gross earnings for 6 months ended June 30, $1,814,283; net earnings, $882,744; against $1,675,548 gross and $724,562 net for same period 1908. Gross earnings for July, $329,403.94, against $299,245.75 for July, 1908. The amount of percentage paid to the city for July, was $65,963.91, against

Electric Railway Notes.

The Calgary St. Ry. has received a further 2 semi-convertible cars, from the Ottawa Car Co.

Calgary ratepayers by a majority of 510 decided, Aug. 5, in favor of running cars on the municipal street railway on Sundays.

The Hull Electric Co., has added to its rolling stock, 2 vestibule cars, with 21 ft. bodies, fitted with longitudinal seats, built by the Ottawa Car Co.

D. Lizabel was fined $5 and costs recently at Montreal, for having retained coat buttons, after having left the Montreal St. Ry. service.

The Montreal St. Ry. Mutual Benefit Association's picnic was held at Dominion Park, Montreal, during the week ended Aug. 21 and Aug. 23 and 24.

W. Gillespie, a roadmaster on the Toronto Ry., fell from a car roof while fixing a trolley pole and received considerable injuries July 26.

The Ottawa Electric Co., has recently received 2 additional pay-as-you-enter cars from the Ottawa Car Co. A description of these cars has already been given in a former issue.

The Montreal and Southern Counties Ry. has ordered 8 centre aisle interurban cars, with bodies 49' 4" long, each provided with a smoking compartment, from the Ottawa Car Co.

The Board of Railway Commissioners has approved of Standard Local Passenger Tariff C.R.C. 8, on a basis of 2½c. a mile, for the Quebec Ry., Light and Power Co.'s Montmorency Division.

The request of the Winnipeg Electric Ry., for permission to erect poles on certain streets in the city was referred to the city solicitor, Aug. 3, for advice as to the controlling power on the streets.

The joint board controlling the Fort William and Port Arthur electric railways intends to prohibit smoking on the cars, and it is understood that the smoking compartments on closed cars will be abolished.

The first accident on the Calgary St. Ry., occurred Aug. 6. A letter carrier alighted from a car while it was in motion, passed round the back of the car, and was run down by a car on the other track.

The Winnipeg Electric Ry. is gathering statistics connected with the issues of transfers. A new form of transfer is said to be under consideration, with the view of preventing abuses, which have frequently led to prosecutions.

Geo. Cruickshanks has entered an action against the Winnipeg Electric Ry., claiming $2,000 damages for alleged assault and battery, and for being wrongfully ejected from a street car belonging to the company by one of its servants.

The ratepayers of the municipality of Assiniboia voted July 22 by a majority of 233 in favor of the operation of street cars in the villages of St. Charles and Headingly, near Winnipeg. The by-law was finally adopted at the council's August sitting.

The B.C. Electric Ry. has ordered 2 combination smoking and baggage cars, 55 ft. long over all, and 2 combination passenger and smoking compartment vestibule cars, 55 ft. long over all, for use by the Vancouver Power Co., from the Ottawa Car Co.

Guy Boyer, heretofore Superintendent of Car Construction, Montreal St. Ry. Suburban Lines, has been appointed Superintendent of Construction of the whole system. He has had an efficient training in the motive power department, in which he has served in various capacities.

The Winnipeg Electric Ry. Co. has appealed to the County Judge against the conviction of one of its motormen by the Winnipeg Police Magistrate for not stopping his car when the Ninetieth Rifles were crossing the track on June 1. The appeal will probably be heard in September.

Complaint was made, Aug. 21, to the Brantford city council, that the Brantford St. Ry., was refusing to carry passengers from the north ward to the outside gate of Mohawk Park, Hamilton road, for 5c. The committee having charge of such matters has announced that no person should pay more than 5c.

The wage rate of the carmen on the Fort William and Port Arthur street railways has been increased, for beginners, as follows:—first 6 months, 21c. an hour against 20c.; second 6 months, 23c. against 22½c.; second year, 25c. against 22½c.; third year, 26c against 25c.; and beginning with the fourth year, the maximum rate of 27½c. an hour, which is unchanged.

The Winnipeg Electric Ry. is starting a campaign against the practice of children and young people stealing rides on the vestibule steps while the conductor is collecting fares, jumping on the fender, and holding on to the cars while riding bicycles and on skates. A number of cases have been dealt with in the juvenile court, chiefly with the intention of bringing to notice of parents, the danger involved, which might be avoided by proper control of the children.

The Judicial Committee of the Privy Council has refused the Montreal St. Ry. leave to appeal from the judgment of the Supreme Court of Canada, by which the city's claim for $39,691.80, the amount of assessment for the years 1902 to 1905 inclusive, on the company's poles, wires, rails and motive power, was allowed. The company claimed that the contract with the city, exempted the property from all taxes, excepting the ordinary assessments for real estate, water rates and school taxes.

As the result of the accident which took place July 25, at the corner of Logan and Main streets, Winnipeg, by which the death of two pedestrians was caused, T. C. Taylor, motorman in the employ of the Winnipeg Electric Ry., in charge of the car alleged to be responsible, was committed for trial on a charge of manslaughter, Aug. 5. The magistrate said that while there might not be sufficient evidence to commit, a section of the criminal code gave him discretionary powers, which he was acting upon

The city of Hamilton recently applied to the Ontario Railway and Municipal Board to recover $2,418.45 from the Hamilton St. Ry. for repairs to the asphalt pavement on certain streets and for 2 ft. outside of the rails of its lines, claiming this amount in the nature of damages for breach by the company of its obligation to repair the streets named in the petition. The question arose as to whether or not the city could recover for damages through the intervention of the Board, involving the subject of its jurisdiction, which, in this particular instance, the board did not want to assume unless it was clearly its duty to do so, as it might mean inroads on the jurisdiction of the courts. The board finally decided to adjourn the hearing until after the Court of Appeal has determined the question of its jurisdiction. In filing its opinion the board quoted extensively from the act creating it, and gave the city leave to amend its claim and give particulars.

Buffalo, Lockport and Rochester Railway.

Judge Hasel, of Buffalo, N.Y., appointed receivers for this company, Aug. 5, on the application of the National Bond and Share Co., of Toronto. Counsel for the company admitted its inability to meet its obligations and joined in the application for the receiver. J. M. Campbell, Rochester, N.Y., Manager of the railway company, and M. W. Childs, Medina, N.Y., were appointed receivers. The line is operated between Lockport and Rochester through Medina. It was originally the Albion Street Ry., and was incorporated as the B.L. & R.R. in June, 1905, and formally opened in Sept., 1908. Its mortgage liability is $3,400,000; capital stock, $4,000,000. The bonds were taken by the Lincoln Trust Company, of New York, with the security of a collateral mortgage. The company has failed to meet interest on the bonds and apparently the object of the action by the National Bond & Share Co. is to forestall any attempt by the New York concern to foreclose on the mortgage. The Toronto concern holds 2,340 shares of the railway company's stock, and besides that claims to be a creditor of the company for $28,333.34 advanced Feb. 1, 1909.

The B.L. & R.R. bonds are largely held in Canada, the principal holders being a group of Toronto financial men, among whom are F. Nicholls, E. R. Wood and Sir Henry Pellatt. According to a statement issued by these bondholders the receivership was applied for in order to enable the company's undertaking to be carried on without interference from creditors and other parties until its full earning capacity can be demonstrated.

The company has until recently been unable to obtain an entrance into the city of Rochester, owing to its inability to secure the consent of the Public Service Commission to a level crossing over the New York Central Rd. This has now been secured and the necessary connection will shortly be made.

It is said that the receivers will operate the road until it can be placed on a paying basis. There is no intention of allowing the New York Central Rd. or any other organization to get control of the road. This will remain in Canada.

Weld Frames Without Dismantling

Why go to the bother and expense of taking down a locomotive frame to weld it? Thermit enables you to weld it in place and return your engine to service with the least possible delay. Some shops are making a regular practice of doing the entire job in twelve hours or less. The process is equally advantageous for repairing driving wheel spokes, connecting rods, mud rings, crank shafts and for general repair work.

Write for pamphlet No. 25 N and for "Reactions," the Thermit Quarterly which give full information.

Montreal Harbor Report.

The Commissioners' report for 1908 states that the volume of tonnage exceeds that of 1907, which latter had the largest in the port's history. This result has been attributed to the large quantities of grain which have been attracted to the St. Lawrence route, owing to the additional aids to navigation and to the increased handling facilities in the harbor. During the months that navigation was open, the average depth of water in the ship channel was about 34 ft., the highest stage being in May, when it was 41 ft., and the lowest in Nov., 30.5 ft. During the year, the cost of handling freight was reduced by 22c. a ton, thus effecting a saving of over $90,000. The Commissioners first took over the handling of rail traffic in May, 1907, and during that year about 70,000 cars were received and dispatched, the motive power being rented from the railway companies. In 1908 the number of cars handled was less than in the previous year, but the number of cars loaded and discharged direct into the sheds and vessels exceeded that of 1907 by 10,900, and the handling of them was carried on by the Commissioners' own locomotives. The elevator was worked to its full capacity, the quantity handled being 8,661,350 bush. against 1,078,289 bush. in 1907. The system of grain conveyors connecting the elevator direct to 10 of the new steel sheds so that grain is now delivered to the ships at their own berths without interfering with the general handling of cargo, has been in operation through the season. The question of adding to the facilities and storage space is under consideration. A considerable amount of construction work was completed during 1908, including 14 double deck steel and concrete freight sheds with a floor space of over 1,250,000 sq. ft., the grain conveyor system, new permanent railway tracks throughout the high level harbor, relaying railway tracks throughout the low level wharves, and additional permanent wharf space for the Dominion Coal Co.

The revenue for the year was $386,867.28, a decrease of $17,407.28 from 1907. The decreases were: wharfages on imports, $24,973.70, and wharfages on exports, $1,527.03; total decreases, $26,500.73. The increases were: local wharfages, $1,899.19; rentals, etc., $7,194.26; total increases, $9,093.45; making a net decrease of $17,407.28. The revenue from the grain elevator was $45,351.56, an increase of $38,260.93 over 1907, and the expenditure was $65,104.93. Rentals were received for 7 of the new steel sheds, amounting to $29,500, an increase of $14,900 over 1907. For switching cars on the wharves $68,343.45 was received, a decrease of $3,472.48 from the previous year. The receipts on revenue account from all sources were $530,062.29, an increase of $31,401.17 over 1907, and the disbursements were $651,093.13. Interest on loans amounted to $386,131.16, an increase of $49,853.30. The amount disbursed on capital account was $1,564,297.88, made up as follows:—steel sheds, $779,044.27; harbor improvements, $452,732.96; grain elevator conveyor equipment, $199,246.16; new floating crane, $90,662.17; and locomotives, $42,612.32.

The harbor master reports that 739 sea-going vessels arrived in port during 1908, having a tonnage of 1,958,604 tons, a decrease of 3 vessels and an increase of 32,618 tons over the previous year. Of the vessels 711 were of iron and steel, with a tonnage of 1,995,758 tons, and 28 were built of wood, with a tonnage of 2,851 tons. Of inland vessels, there arrived 12,434, with a tonnage of 3,589,424 tons, a decrease of 1,986 vessels and a tonnage of 31,526 tons.

Wasaga-Paul Collision.

An investigation was held at Montreal, July 24, Aug. 3, 4 and 6, by Capt. L. A. Demers, assisted by Capts. A. Reid and F. Nash, into the circumstances attending the collision on June 30, between the s.s. Wasaga and the tow of the tug J. Paul, on Lake St. Louis, near Chateauguay, when one of the two barges which constituted the tow, was totally destroyed, and the other sustained certain damages. The court having carefully enquired into the circumstances attending the casualty, finds that the cause of the collision was due to the careless navigation of the s.s. Wasaga, by the altering of her course, without any apparent reason, this action being due to the fact that the captain, H. N. Smith, was in a state, if not of inebriety, at least through the results of such, that instead of keeping his course, or stopping, or reversing his engine, in order to avoid a collision, which by the evidence adduced was not apparent, he acted in contravention to articles 19 and 21 of the Rules of the Road, and that the same was done by the wrongful act and default of Captain H. N. Smith of the Wasaga.

In the circumstances disclosed by the evidence that the captain, H. N. Smith, was addicted to strong drink, and that at the time of the casualty he was still under the influence of liquor, and moreover, in view of the fact that he has disregarded all summonses which were duly and lawfully made to him to attend court, thereby showing utter contempt of the court, we think that by allowing him to retain his certificate, he would prove a menace and danger to shipping, the court orders that his certificate, no. 436, be cancelled, but in the event, that after one year from date, he produces satisfactory evidence that he has reformed, the Minister of Marine may return his certificate.

The following is an answer in the recent Ontario schools examinations on history: "British Columbia joined Confederation in 1876, because she was so near the water, and on condition that England should build a bridge across the Pacific Ocean in 10 years."

Vessels Removed from the Register.

The following vessels have been removed from the register, for the causes assigned:—Steam—Boss, New Westminster, B.C., 12 tons, broken up; Campana, Quebec, 1,154 tons, ashore; Carrie, Hamilton, Ont., 2 tons, out of existence; Laprairie, Montreal, 372 tons, burnt; Lytton, New Westminster, B.C., 285 tons, broken up; Ospray, Winnipeg, 14 tons, dismantled; Venture, Victoria, 489 tons, burnt. Sailing—Anna Helen, Chatham, N.B., 12 tons, stranded; Cygnet, Parrsboro, N.S., 77 tons, broken up; Daisy Linden, Digby, N.S., 97 tons, wrecked; Dianthus, Charlottetown, P.E.I., 45 tons, condemned; Drusie, Paspebiac, Que., 99 tons, abandoned; Fleetly, Lunenburg, N.S., 174 tons, transferred to Barbadoes; Gazelle, Weymouth, N.S., 97 tons, broken up; Kate F. Troop, St. John, N.B., 1,097 tons, sold to foreigners; Marcella, Halifax, 32 tons, wrecked; Omega, Charlettetown, P.E.I., 82 tons, wrecked; Serene, Parrsboro, N.S., 54 tons, broken up; Suva, Parrsboro, N.S., 69 tons, condemned; Torato, Lunenburg, N.S., 79 tons, stranded; Viking, Lunenburg, N.S., 95 tons, foundered; W. M. McLauchlan, St. John, N.B., 471 tons, lost.

Notices to Mariners

The Department of Marine has issued the following:—

No. 65. July 23. 163.—Quebec, River St. Lawrence, mouth of the Saguenay River, Prince shoal, lightship placed, gas buoy withdrawn. 164.—Quebec, River St. Lawrence below Quebec, traverse of St. Roche, lower end, lightship no. 7 replaced by lightship no. 17.

No. 66. July 26. 165.—Quebec, River St. Lawrence, Cape Chat, new tower, change in character of light. 166.—Quebec, River St. Lawrence, Goose Cape, hand fog horn at light station.

No. 67. July 28. 167.—Quebec, River St. Lawrence, Riviere du Loup, change in color of light. 168.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Batiscan traverse, change in character of buoy. 169.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Cap Madeleine to Three Rivers, change in character of buoys. 170.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Ile a l'Aigle, change in character of buoy.

No. 68. Aug. 5. 171.—British Columbia, Chatham Sound, Skeena River, middle passage, Kennedy Island, change in color of beacon, change in character of light. 172.—British Columbia, Hecate Strait, Browning entrance, gas and whistling buoy established off northwest end of Banks Island. 173.—Japan, Iyo-nada, Ya-shima, lighthouse established.

No. 69. Aug. 6. 174.—British Columbia, Hecate Strait, southern approach to Edye passage, rocks located, hydrographic notes. 175.—British Columbia, Hecate Strait, western approach to Edye passage, rocks located, hydrographic notes.

No. 70. Aug. 7. 176.—Quebec, River St. Lawrence, Quebec, change in color of front range lighthouse, back range day mark. 177.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Lake St. Peter, curve no. 2, new front range lighthouse.

No. 71. Aug. 7. 178.—Ontario, River

St. Lawrence, Howe Island, Cold Bath shoal, color of gas buoy light. 179.—Ontario, Lake Huron, north channel, Sheguiandah, range lights established. 180.—United States of America, Lake Ontario, Charlotte harbor entrance, Genesee light station, fog syren established.

No. 72. Aug. 11. 181.—Ontario, Lake Huron, north channel, Killarney east, lighthouse rebuilt. 182.—Ontario, Lake Huron, north channel, Killarney west, lighthouse rebuilt. 183.—Ontario, St. Joseph channel, Shoal island, lighthouse rebuilt. 184.—United States of America, Detroit River, wreck, light exhibited. 185.—United States of America, St. Clair River, Fort Gratiot range front light station, new structure.

No. 73. Aug. 16. 186. Nova Scotia, Bay of Fundy, Chignecto channel, Ragged Reef point, bell buoy established. 187. Newfoundland, Notre Dame Bay, Herring Neck, Caplin Cove head, lighthouse established. 188. Newfoundland, Twillingate, wharf light. 189. Newfoundland, south coast, Placentia bay, Marticot island, lighthouse established. 190. Newfoundland, south coast, eastern entrance to Fortune bay, Green island, description of light. 191. Newfoundland, west coast, Port au Port, Long point, lighthouse established. 192. Labrador, Cape North, lighthouse established. 193. Labrador, Packs Harbor, lighthouse established. 194. Labrador, Cutthroat point, lighthouse established.

No. 74. Aug. 19. 195.—Nova Scotia, south coast, Little Liscomb harbor, Redman Head, lighthouse established.

No. 75. Aug. 20. 196.—Ontario, depths in harbors in Lake Ontario and Georgian Bay, hydrographic notes.

No. 76. Aug. 21. 197.—New Brunswick, Chaleur Bay, Restigouche River, Dalhousie harbor, range lights discontinued. 198.—Quebec, Gulf of St. Lawrence, Pointe aux Esquimaux range lights, additional information, corrections.

Among the replies by Ontario pupils in the recent examinations was the following: "Newfoundland joined the Confederation in 1870, and wanted a railway built connecting it with remote places."

The Department of Marine is reported to have awarded the contract for the construction of a steam vessel for hydrographic survey purposes to Swan, Hunter and Wigham Richardson, Newcastle-on-Tyne, Eng. It is stated that the vessel will have twin screws, and be 273 ft. long, the hull to be classed 100 A1 at Lloyds. She is also to be provided with two gasolene launches, each 27 ft. long, and of the latest type.

Dividends for the half-year ended 30th June, 1909, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

A further sum equal to one-half of one per cent. on the Common Stock will be paid thereon at the same time out of interest on the proceeds of land sales.

Warrants for the Common Stock Dividend will be mailed on 30th September next to Shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock Dividend will be paid on Friday, October 1st next, to Shareholders of record at the closing of the Books at the Company's London Office, No. 62 Charing Cross, London, S.W.

The Common Stock Transfer Books will close in Montreal, New York and London, at 3 p.m., on Wednesday, September 1st. The Preference Stock Books will also close at 3 p.m. on Wednesday, September 1st.

All books will be reopened on Thursday, October 7th next.

By order of the Board.

W. R. BAKER,
Secretary.

Montreal, 9th August, 1909.

Improvements in the Navigation of the St. Lawrence.

By Lieut.-Col. Wm. P. Anderson, Chief Engineer Department of Marine and Fisheries, Past President Can. Soc. C.E., M. Inst. C.E., F.R.G.S.

The commercial successes of a country being proportionate to the facilities which exist for the free interchange of products by water with other countries, the immense importance to Canada as a national trade route of a thoroughfare like the River St. Lawrence can be appreciated. This noble river is unique in permitting ocean traffic to penetrate 1,000 miles into the heart of a great and fertile country, where, at the head of ocean navigation, it meets traffic brought from all parts of the great lakes system in smaller vessels over a route extending 1,200 miles farther into the continent. In this paper no attempt will be made to describe the improvements in navigation effected on the great lakes. These have been carried out in great measure by the United States Government, and have been principally for the benefit of shipping; they are worthy of special attention and deserve a special article, but the following details with reference to the improvements made in the navigation of the St. Lawrence, to fit in for the requirements of modern shipping, may prove of interest.

IMPROVEMENT OF CHANNEL.

ABOVE MONTREAL, from Kingston, at the head of the river, to Montreal, a distance of 170 miles, navigation is limited by the capacity of the canals which, originally accommodating vessels of 9 ft. draft only, were, in the autumn of 1899, opened with locks of the same dimensions as those in the Welland canal, having a width of 45 ft., an available depth of 14 ft., and a minimum length of 270 ft. There are in this stretch six canals, aggregating 45 miles in length, having 21 locks, overcoming a fall of 206 ft., connecting navigable stretches of the river, which are all well buoyed and lighted, insuring safe and easy navigation.

ABOVE QUEBEC, from Montreal to Quebec, 160 miles, a ship channel has been dredged where deepening was required, and with the exception of two points, this channel has now a minimum depth of 30 ft., and a minimum width of 450 ft., with easy and wide curves. At Cape a la Roche there is a rock cut which is at present only 27 ft. deep, with a width of 300 ft., but it is expected that this will be improved to standard width and depth during the coming season. St. Augustin bar has also a depth at extreme low water of only 27 feet, but as the range of tide is here some 16 ft., it occasions very little detention to shipping. From this point to Quebec, 16 miles, the river required no improvement.

Originally the depth between Quebec and Montreal was limited by the depth in Lake St. Peter, which reached the minimum of about 10 ft. during the low water of autumn. An improved channel through the lake, as well as an increased depth at all other points, where works undertaken by the Montreal Harbor Commissioners, and the width and depth of the channel were increased from time to time to keep pace with the increase in size of ocean vessels. Up to March 31, 1898, a total of 56,000,000 yards of dredged material had been removed at a cost to the Harbor Commissioners and the Government of $10,000,000. This work was, in 1899, assumed by the Dominion Government as a national work, and the present aim of the Minister of Marine is to secure everywhere a least depth of 30 ft., with a minimum width of 450 ft., at all points between Montreal and the sea.

PLANT.—The dredging plant consists of six large elevator dredges, capable of removing hard pan or even bedded rock, these deliver the material through a side spout into hopper scows; one hydraulic dredge, provided with a cutter head, used for dredging clay, mud, sand and gravel, and washing the dredged material through pipes to an outlet ½ mile from the channel; and two sea going suction dredges, raising the material loosened by a cutting head into their own hoppers and acting on their own lighters. An auxiliary fleet of rock drilling machines, boulder lifters, scows, tugs and tenders is also in use, all of them maintained from a Government shipyard located at Sorel. Each portion of the work as completed is tested by sweeping before vessels are admitted to it.

FROM QUEBEC TO THE SEA.—Below Quebec the river is tidally navigable by any vessel afloat, and at only two points, St. Thomas flats and Beaujeu channel, 40 miles below Quebec, is dredging required to give a depth exceeding 40 ft. at extreme low water. Beaujeu channel has been dredged to a minimum depth of 33 ft., and a minimum width of 1,000 ft. Dredging operations on St. Thomas flats are in progress.

AIDS TO NAVIGATION.

The Dominion Government in the desire to make the navigation of the river and gulf as safe as possible, has bestowed special pains on improving all aids to navigation. These will now be briefly described:—

LIGHTING.—The axes of the several dredged portions of the ship channel, as well as the other tangents between Quebec and Montreal, are marked by pairs of range lights, and in order to establish these above the reach of ice, and of the spring freshets, it has been necessary to build many of them on foundations of extensive concrete monolithic blocks. There are in the river more than 65 pairs of these ranges. Many of the rear range towers are skeleton structures of galvanized steel which can be erected very easily, and sometimes attain a height of 100 ft. We usually surmount them by wooden watchrooms and lanterns. Most of the range light towers are equipped with catoptric apparatus, which has proved the most economical arrangement for projecting a strong beam of light over a restricted are, though for sea coast lights our catoptric installations have nearly all been replaced by dioptric lenses. Below Quebec the usual arrangement of sea coast lights with single towers on headlands is more prevalent, and these are now established on nearly every salient point. There are 71 lights of various descriptions in the river below Quebec.

During the early years of the country, when rigid economy was essential, the lighthouses were somewhat primitive buildings, cheap wooden structures, surmounted by cast iron lanterns, containing catoptric illuminating apparatus. Of late years, as ships have become more valuable, and as speeds have increased, necessitating more powerful and more easily identified aids to navigation, the country has been replacing these primitive structures by more permanent towers, surmounted by gun metal lanterns, with curved glazing, holding modern quick flashing illuminating apparatus. We are dependent upon British and French manufacturers for our illuminating apparatus, but build a large portion of our lanterns ourselves. Our most powerful light is that on Cape Race, a first order dioptric hyperradial light, giving a flash every five seconds from the summit of a reinforced concrete tower 100 ft. high.

It may be stated in general terms that to-day from the northern entrance to the gulf at the strait of Belle Isle and the southern entrance at Cape Race a mariner is scarcely ever out of sight of a light, while in the narrower stretches there are always several lights in sight at once.

LIGHTED BUOYS.—Besides the lighthouses and lightships, gas buoys are extensively used on the River St. Lawrence, there being 21 below Quebec, usually marking isolated dangers, and 71 between Quebec and Montreal, usually marking the curves connecting the tangents that are marked by range lights.

Our first gas buoys were established in 1893 on the Pintsch system. Since 1902 the Pintsch buoys have steadily been replaced by acetylene buoys, on the ground that the acetylene lights are more brilliant and that buoys can be established without any necessity for maintaining a gas producing plant. The first acetylene buoys were filled with the gas under compression, but the buoys now used are designed to carry sufficient carbide to generate their own acetylene for periods running through the whole season of navigation, producing acetylene automatically as it is consumed. There is no question as to the brilliancy of the acetylene light, and as to the convenience of using a buoy that can be charged with an illuminant at a distance from any base of supplies, but the question of relative merit of the Pintsch and acetylene gas systems has not been conclusively settled. Acetylene under compression is undeniably dangerous. Acetylene generated as required without any excessive pressure does not appear open to the same objection, but in practice slight explosions have occurred in refilling the generators with carbide, and no evidence is yet available as to the comparative cost of the two systems.

BUOYS.—In addition to the lighted buoys, dangers and the edges of the channels are marked by large numbers of buoys and spars, including whistling and bell buoys. The whistling buoys are all on the Courtenay principle, which has stood the test of long use, and remains the most reliable automatic signal buoy. In the swifter portions of the river a special arrangement of anchorage of both cans and spars is adopted, ensuring uprightness. The bottom of the buoy is weighted and the mooring chain or wire is fastened to a bridle attached to the buoy at the centre of pressure.

FOG ALARMS are maintained at light stations in the river and gulf of St. Lawrence in the following numbers:—siren, 1; whistles, 4; reed horns, 2; diaphones, 19; and explosive signals, 6.

Offices throughout the Civilized World

Executive Offices:

NOS. 346 and 348 BROADWAY, N. Y. CITY, U. S. A.

The Bradstreet Company gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

The only Hotel that Commands an Unrivalled View of Both Falls.

HOW TO REACH THE CLIFTON HOTEL.

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes. Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make Canada plain in the address.

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	" " "	73.46	" "	180.00

SOLD BY

F. H. HOPKINS & CO. and MUSSENS LIMITED, MONTREAL

The earliest installations were steam whistles, usually 10 inches in diameter. It is claimed that the whistle on Partridge island, at the entrance of St. John harbour, in the Bay of Fundy, established in the early sixties by the colony of New Brunswick, was the first steam fog alarm installed by any country. For the years from 1873 to 1900 the Canadian Government used almost exclusively a reed horn of very simple mechanism, operated with compressed air supplied direct from a single acting steam driven air compressor with the diameter of air cylinder much greater than that of steam cylinder. Defects in this plant were that as air was compressed and a blast given during the upward stroke of the engine, single blasts only could be given and the pitch of the note varied as the air pressure gradually lessened. It was also difficult to keep the reeds in adjustment. Notwithstanding these defects the apparatus was fairly efficient, being easy to operate, and exceedingly economical both in construction and in maintenance. The writer has heard one of these horns for 26 statute miles across a moderate breeze with snow falling.

In 1900 the demands of the larger and faster liners for more powerful fog alarms were met by the installation of a few English and Scotch sirens. One of these, on the south west end of Belle Isle, at the northern approach to the gulf, is operated with air compressed by water power, and this source of energy has proved very satisfactory and economical. Since 1902 all other fog alarms have been supplanted by diaphones, undoubtedly the most powerful sound producing device yet invented. This machine consists essentially of a cylindrical chamber, having parallel slits cut through its walls, and concentrically within the chamber, a cylindrical hollow piston with similar slits and a flange on one end; the whole enclosed in an outer casing. A gas under pressure is admitted to the outside casing and drives the piston rapidly backwards and forwards by opening and closing connection to the back of flange; this permits the main body of gas to escape through the slits in the cylindrical chamber in a series of puffs. The principle is not unlike that of the siren, but the slits being symmetrically spaced all the vibrations are synchronous and the note produced is consequently a pure one. The mechanism is so arranged that the piston's travel is accurately controlled and the note is constant. Air is used at a pressure of 30 lbs. per square inch, which we have found by experience to give the best practical results. The sound is intensified by a resonator properly attuned. In comparative trials of the diaphone with other sound producing devices, we have found that it gives uniformly better results per unit of power. Usually advantage has been taken of the decreased cost of operation to increase the length and frequency of blasts. The diaphone gives its full note from the very beginning to the end of a blast, and responds so quickly to the driving impulse that it is an easy matter to differentiate between different stations by any desired arrangement of Morse or other code. High and low notes could also be introduced by providing differently tuned instruments, as is done with the siren, but this method is cumbersome and unsatisfactory and we have abandoned it. All our diaphones are designed to give the note of F sharp in the middle register, having 180 vibrations per second. The installations most commonly used in our stations have pistons 4¼ in. in diameter, using 11 cub. ft. of air per second of blast, but at important stations like Cape Race a piston 8½ in. in diameter, using 27 cub. ft. per second of blast is installed, and the patentees are now experimenting with a monster instrument having a piston 14 in. in diameter. In practice it is found that 16 h.p. per cubic foot of free air consumed is the gross power required to run a plant.

SUBMARINE BELLS.—Submarine bells have been installed on four lightships in the river St. Lawrence. This system of signalling was invented by A. J. Mundy, of Boston, Mass., and relies for its efficiency on the fact that water, being of a more uniform density than air, will transmit sounds more reliably. Mariners as well as scientists know the distracting and unforeseeable aberrations of ordinary aerial fog signals, and the submarine signal has been developed in the effort to overcome this source of uncertainty. The sounding apparatus is simply a submerged bell, rung either automatically by the motion of the waves, electrically or mechanically. The last named method has proved most satisfactory in practice; blows struck automatically lack force, and electrical connections are difficult to keep insulated under water through long periods of time. The hammers on the lightship bells are operated by compressed air. The receiving apparatus consists of a chamber attached to the skin of a ship, from which the impulses received are transmitted telephonically to ear pieces in the wheelhouse. By placing a receiver on each side of the ship, and comparing the intensity of the sound, the direction of its source is approximately determined, and by swinging the ship until the intensity is equal in the two receivers a ship can be steered for the bell.

From a series of reports made by masters of vessels equipped with receiving apparatus passing a bell operated from a lightship in Lake Erie, it has been determined that loaded vessels found the signals efficient over a radius of five miles, while the range of light vessels was about two miles, or in other words, that when the receivers were well submerged their efficiency was less affected by the noise of the bow wave. The submarine bell is greatly esteemed by those masters who have vessels equipped with receiving apparatus, and the Canadian Government has received cumulative evidence of its utility, but its use is somewhat restricted. The cost of equipping vessels with receiving apparatus is large, and militates against its adoption by small vessels, and moreover it is somewhat expensive to maintain the bell striking mechanism in working order except in situations where it can be lifted frequently for examination and regulation.

Four stations have been established on our Atlantic coast (but not on the St. Lawrence route) where the bell carried on a tripod submerged below wave action is operated through a cable from an electric station on shore. The acting Commissioner of Lights reports that two bells so installed off Chebucto Head in 1907 are yet in commission. The further extension of the system is being watched with interest.

COMMUNICATION.

GOVERNMENT TELEGRAPH.—A serious problem which confronted the Government in connection with navigation in the gulf, for hundreds of miles along a practically uninhabited coast, was the difficulty of securing communication with vessels in case of shipwreck. Soon after Confederation the Dominion Department of Public Works began extending Government telegraph lines along both shores of the gulf and to the outlying islands over territory where a telegraph installation would not pay as a commercial venture. The Government telegraph system now lines both shores of the gulf, the northern line extending to the Strait of Belle Isle. Anticosti, St. Paul Island, and the Magdalen Islands are all connected with existing telegraph systems by cable, and it is a significant fact that since telegraphic communication was extended to Anticosti

that district has become unfashionable as a depository for worn-out ships. At frequent intervals along the Government telegraph line, usually at light stations, marine signal stations have been established from which vessels are reported to Quebec and Montreal. These stations are supplied with the international code of flags, and the principal ones are kept specially informed respecting the state of the ice in the river and gulf during the months of April and May.

TELEPHONE.—During the past season the means of promptly locating vessels in the river have been greatly improved by the installation of a telephone service operated by the Marine Department. Telephone offices are established every few miles between Crane Island and Montreal, from which watchmen report the passing of vessels. In this way a vessel can be timed to arrive at Montreal or Quebec within a very few minutes.

WIRELESS TELEGRAPH.—The Government has entered into a contract with the Marconi Wireless Telegraph Co. whereby it has established stations at 12 points in the river and gulf. These stations are bound to receive messages from ships equipped with any system of wireless apparatus and transmit the same either by wireless or by connecting lines to shipping centres.

STORM SIGNALS.—At most of the ports on the St. Lawrence the Meteorological Service of Canada, under the control of the Marine Department, maintains storm signals, mariners being warned by a code hoisted on conspicuous masts of the probable approach of dangerous gales. Daily weather probabilities are issued from the head office in Toronto and the approach of important depressions is communicated by wireless to vessels at sea. Reports by wireless of the state of the ice and the warnings respecting aids to navigation are also communicated to approaching ships.

SURVEYS.

TIDES.—A survey of the tides and currents in Canadian waters is organized under the control of the Marine Department, and Dr. Dawson, the officer in charge of this survey, has paid particular attention to the St. Lawrence route in view of its commercial importance. Admirable tide tables based on several years' records are published yearly for important points in the river, and tidal differences for intermediate points are referred to these tables. It is yet necessary to increase the number of places for which tidal differences are given, and this list is being extended yearly, as accurate information can be secured.

CURRENTS.—A vessel has also been devoted for several seasons to an examination of the currents, especially in the estuary, and in both entrances to the gulf. The results of these examinations are contained in Government publications and are available to all mariners. There is no question that the results of the work done by the current survey off Cape Race, and off the Gaspe coast, have greatly decreased the number of shipwrecks. The work in the strait of Belle Isle has laid at rest the old fable of a serious influx of the Arctic current through that entrance into the gulf of St. Lawrence.

HYDROGRAPHY.—The charts of the gulf are based upon the admirable surveys of Lieut. (ultimately Admiral) Bayfield, made early in the last century, but the river and all critical parts of the gulf have been resurveyed and recharted by the Admiralty or the Marine Department. The Canadian Government now has a surveying steamer in commission, which this year is working near the mouth of the Saguenay. The narrower portion of the river has all been elaborately surveyed of late years, and large scale charts in color are being published by the Canadian Hydrographic Office, in charge of W. J. Stewart, Chief Hydrographer, a graduate of the Royal Military College, who received his training from Admiralty surveying officers.

ICE.

NAVIGABLE SEASON.—The important element of climate must not be overlooked in any consideration of work done on the St. Lawrence river. During practically five months in every year navigation is closed, and all shipments must be crowded into the seven months of open navigation. From Kingston to Quebec the river freezes over every winter, except at points where the current is unusually rapid. Below Quebec, although there is heavy border ice, the river never freezes over.

ICE CONDITIONS.—The ice problem confronts the engineer at every step, and must be reckoned with in designing terminals, in ship and lighthouse construction, and in buoy maintenance. Large elevators must be provided to store grain over winter; wharves and docks must be made ice proof; lighthouse piers must be heavy enough and high enough to resist ice shoves, and buoys and other floating aids must be rushed into place as soon as the ice has passed down in the spring and hurriedly removed at great risk after the last vessel has gone to sea in the autumn. It is almost impossible for any one not accustomed to ice conditions to realize what a difference all this makes in planning structures, and how it modifies designs and increases cost.

WINTER NAVIGATION.—Efforts have been made to prolong the navigable season by using specially constructed steamers as ice breakers, and it is claimed that the season of navigation could be materially lengthened, and winter floods prevented, by keeping the river open to Montreal. A Government steamer has been devoted to the task for some winters past, and has probably cleared the river of ice somewhat earlier in the spring. Winter ferries are maintained at several points on the river, and operate successfully, though sometimes irregularly. Last winter successful trips were made to the north shore of the gulf, and there seems no reason to doubt that specially built steamers could navigate the St. Lawrence all winter if the trade proved profitable. Only one attempt has been made to cross the gulf to England; this was in the winter of 1898-9, and the venture was unsuccessful, but primarily because a weak and unsuitable vessel was used.

PORTS.

The principal ocean ports on the river are: Quebec, at the head of the estuary; Three Rivers, at the head of tide water; Sorel, at the mouth of the Richelieu river; and Montreal, at the head of ocean navigation. Quebec and Montreal are under the control of Harbor Commissioners, appointed by the Government, and are assisted by the Dominion with guaranteed loans.

QUEBEC.—At Quebec there is a Government graving dock, which has been outgrown by modern steamers, and large wet and tidal docks at the mouth of the St. Charles River. The timber wharves that line the city front, and which a generation ago were thronged by sailing vessels, are forsaken and dilapidated, and the traffic of to-day centres at the more easterly basin.

MONTREAL.—At Montreal extensive new wharves have been built, and here it proved a difficult problem to guard against damage by ice. Soon after the river freezes over each winter, there is a local rise of about 10 ft. in the level of the water in the harbour, caused by restriction of the channel by anchor ice; and in the spring of the year, when the volume of water is augmented, this obstruction leads to a further rise, in 1886 reaching a height of 27 ft. above ordinary low water, and flooding the low parts of the city. To prevent future floods a dyke was in 1887 built along the river front. The old wharves were much below this flood level and were covered every year, necessitating the removal annually of all buildings and goods. To prevent this inconvenience the Commission decided to make the new wharves, built as groynes against a continuous embankment, high level wharves, and they have been so constructed, of concrete, and surmounted by permanent steel sheds provided also with grain conveyors from an immense central elevator. With the material excavated from the deepened harbor a guard pier has been built in front of the whole upstream side of the harbor.

The above paper was read before the British Association for the Advancement of Science, at its meeting in Winnipeg recently.

Grounding of s. s. Inishowen Head.

The formal investigation into the causes of the grounding of the s.s. Inishowen Head at Timons Cove, about 5 miles above Quebec, on Oct. 1, 1908, was held Aug. 2, a preliminary investigation having been held Oct. 12, 1908, when the main facts were elicited. The following judgment was delivered, Aug. 3, by Capt. L. A. Demers, Acting Wreck Commissioner, concurred in by Capt. A. Reid and A. Angers, Pilot, who sat as assessors:

The Court, having carefully inquired into the circumstances attending the above-mentioned casualty, finds that the pilot A. Briere has been guilty of a gross error of judgment, and that the grounding of the ship was caused by his fault; but owing to the fact that this is the first mishap during the 18 years of his service as pilot, and in view of the recommendations as to his capacity, the Court orders that he be fined $50, to be paid in two monthly instalments, the first payment to be made immediately. The captain and crew of the vessel are exonerated from all blame in this casualty.

During June, 5 employes were killed and 16 injured in the course of their work in Canadian navigation. Of the fatalities, 4 were due to drowning and 1 to machinery, while of the non-fatal accidents, 6 were due to falls, 5 to explosions, 2 each to falling material and to machinery and 1 to flying material. In addition to those already mentioned 16 longshoremen were nearly asphyxiated by grain in the hold of a vessel at Montreal.

Atlantic and Pacific Ocean Marine.

Press reports state that the C.P.R. and the Allan Line have come to a working agreement regarding the Atlantic freight business.

The Allan Line s.s. Victorian in arriving at Rimouski, Que., from Liverpool, Eng., in 5 days, 18 hrs., created a new record for vessels of that fleet.

A record passage was made recently by the C.P.R., when passengers from Liverpool, Eng., were landed in Toronto in 6 days, 22 hours, after embarking at Liverpool on the s.s. Empress of Ireland.

The s.s. Crown of Galicia, under charter by the Dominion Iron and Steel Co., sailed from Sydney, N.S., Aug. 17, for Prince Rupert, B.C., by way of the Horn, with 5,000 tons of steel rails for the G.T.P.R.

Elder, Dempster and Co. have commenced their service connecting Montreal with Puerto Mexico, the Atlantic terminus of the Tehuantepec National Ry., in conection with the Canadian-Mexican Pacific Steamship Co.'s service between Salina Cruz, the Pacific terminus, and British Columbia ports.

The s.s. Jeanara, outward bound from Montreal to Buenos Ayres, with lumber, which ran aground at Cranberry Head, near Sydney harbor, N.S., Aug. 13, was floated the following day and taken to Sydney, where a survey was made to ascertain the damage, which was found to be slight. She subsequently proceeded on her voyage.

In response to a question in the British House of Commons, recently, as to whether the all-red scheme had been definitely abandoned, the Prime Minister said, "I am informed that the investigations of the committee which has been enquiring into the scheme have not hitherto succeeded in removing the many difficulties by which it is attended. At the same time, there is no reason to assume that those difficulties will prove insuperable."

Furness Withy & Co. Ld. has declared a dividend of 5% for the past financial year. Sir Christopher Furness said the company's ability to pay a dividend this year was a proof of its stability. The shipping industry of the whole world had labored in the trough of depression during the past year, and the outlook to-day was not all that could be desired. As a result of its general trading the company's profit for the year was in excess of that of the previous year by £16,088 16s. 9d. The past year was the first under the profit sharing scheme which Sir Christopher Furness introduced with a view to the prevention of strikes and other labor difficulties.

The C.P.R. steamships Empress of Britain and Empress of Ireland have been equipped with electric masthead signalling apparatus, similar to the system which was adopted by the British Navy some time ago and which has been pronounced to be a great success. The system comprises an ordinary telegraph keyboard, situated on the bridge, and connected with an electric lantern on the mast head. The Morse system is used; the vessels are thus enabled to keep in communication with shore stations and report ice and weather conditions. This equipment, which is additional to the wireless telegraph installation already on these vessels, places the C.P.R. steamships first among the vessels on the St. Lawrence route as regards means of communication with the land.

On his return from an inspection trip through the St. Lawrence ship channel, G. J. Desbarats, Acting Deputy Minister of Marine, is reported to have said, that of the improvements at present under way, Beaujeu Bank, about 50 miles below Quebec, has been widened 700 ft., with a 30 ft. depth of water at low tide. Dredge 9 is working there, and before the end of the season will have the channel widened to 1,000 ft. Five rock dredges are operating at Cap a la Roche and one dredge is at Champlain, clearing the channel. The work at Cap a la Roche will probably result in finishing the widening of the Grondines range this year and lights will be erected on the new centre line. Hydraulic dredge 7 is in Lake St. Peter, working on the last stretch of the channel widening. This dredge has cut one mile this season, leaving about 4 miles still to be widened.

A special meeting of the Montreal Board of Trade council was held, Aug. 10, to consider the porterage charges, which were made effective July 26, as a result of the recent Canadian North Atlantic conference. T. Robb, Secretary of the conference, pointed out that the charge for master porterage was to cover the cost of handling, sorting and placing of goods on the wharves after they had been discharged from the vessels. Although the rates for carriage only covered delivery from the vessels' tackles, the agents of the steamers had in practice been doing the foregoing work at the expense of the vessel. With the increase in expense of handling cargo on the wharves through higher labor charges, etc., the cost of this work had become a serious item, especially having regard to the moderate rates of freight now charged, that the companies had felt compelled to place at least a portion of this charge on the consignees, who were really entitled to bear it all. The council after listening to the explanation, decided that a special meeting might be called, if desirable, to further discuss the matter.

Maritime Provinces and Newfoundland.

The Dartmouth, N.S., ferry steamer Halifax broke her shaft, Aug. 2, and was taken off the route for repairs.

The Gorton Pew Fisheries Co.'s schooner Orinoco capsized and sank near Sambro, N.S., Aug. 18, only one out of a crew of 12 being saved.

The construction of the new wharf at St. John, N.B., is proceeding rapidly. The fourth crib was sunk in position, Aug. 12. One more crib still remains to be placed.

The Newfoundland schooner Myrtle was driven on the rocks at North Lingan Head, N.S., Aug. 11. The captain and crew of six men are missing. The vessel sailed from North Sydney, Aug. 8.

The steamships Sandsend and Winifred put into Halifax, N.S., Aug. 21, the former damaged through the shifting of cargo during a gale and the latter with bottom damages caused by grounding at Anticosti.

The Halifax and Sheet Harbor Steamship Co.'s s.s. Margaret while en route from Halifax for eastern shore ports struck on Thrum Cap shoal, Aug. 19, in rough weather. The passengers were all landed safely. She was floated later, by tugs, the only apparent damage being the loss of her foremast, to which a tow line had been fastened.

The Dartmouth Steam Fishing and Curing Co., Ld., has been incorporated under the Nova Scotia Companies Act, with a capital of $30,000 and office at Dartmouth, N.S., to conduct a general fishing and curing business, and in connection therewith to own and operate steam and other vessels. R. Christie, W. G. Main, and A. G. Allardyce, Dartmouth, N.S., are among the provisional directors.

The s.s. Turret Bell, which was wrecked on the north shore of Prince Edward Island in the later part of 1906, and which was recently floated, was brought into Charlottetown, P.E.I., under her own steam, Aug. 1, and subsequently was towed to Quebec, where she was docked. At the time of the disaster the vessel was under charter to the Inverness Ry. and Coal Co., and after the wreck she was abandoned to the underwriters, who undertook to float her. She was offered for sale by public tender, Aug. 31,, for the benefit of the underwriters.

At the recent meetings of the Maritime Board of Trade, at Charlottetown, P.E.I., a resolution was adopted, asking the Dominion Government to operate its own ferry across Northumberland Strait all the year round instead of only during the winter months. A resolution was also adopted, requesting that a complete survey be made of the approaches and pier sites on Tatamagouche Bay, and if found feasible, that the Charlottetown-Brule route be adopted instead of the Pictou route as at present, as experience showed that the former was shorter and less blocked than the latter. Some desultory talk took place as to the proposed tunnel with the main land, but it was decided to drop the matter and deal with something that might be considered to be attainable.

The steel steam tug, which the New Burrell-Johnson Co. is building at Yarmouth, N.S., for the Department of Public Works, will be used by the Department for towing, in connection with dredging at various points in the Maritime Provinces. The dimensions of the vessel are: length, over all 100 ft.; breadth, 22 ft.; depth of hold, 11 ft.; draught, 9.6 ft. The hull and deckhouses are built entirely of steel. The propelling machinery consists of triple expansion engines, with cylinders 12, 19 and 30 ins. diam., by 20 ins. stroke, supplied with steam by a horizontal return tubular boiler, 11 ft. by 9' 6", at a working pressure of 180 lbs. It is fitted with the usual auxiliary pumps, including a centrifugal circulating pump. A combined hand and steam windlass is supplied for the convenient handling of the chains and anchors, and steam steering machinery is placed in the pilot house. The boat, which will be classed A1 at Lloyds, will be very powerful. In connection with the construction of this vessel, it has been claimed that it is the first steel vessel to be constructed in Nova Scotia, but we are advised that a steel schooner was built at New Glasgow a few years ago.

NOTICE

The Consolidated Car-Heating Company is the owner of Canadian patent No. 113,350 to James F. McElroy, for Regulating Devices for Steam Heating Systems. This patent covers the system of vapor heat for railway trains. Arrangements have been made for manufacturing this device at Coaticook, Canada, and it is prepared to fill Canadian orders from such manufacture.

Province of Quebec Marine

The Quebec and Levis Ferry Co. recently commenced a car ferry service between the points named.

The name of the barge Belle, no. 96868, registered at Montreal, has been changed by order in council to Coteau.

C. C. Ballantyne, one of the Montreal Harbor Commissioners who has been visiting England, in connection with the proposed construction of a dry dock at Montreal, returned home Aug. 6.

It is reported that the contract with the Quebec and Levis Ferry Co., for the operation of a ferry service between these two points, will be renewed next year, when the present contract expires, on a new basis. The municipalities of Quebec and Levis have each obtained authority from the Legislature to operate a ferry service.

The Canadian Graving-Dock and Ship-Building Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $2,000,000 and office at Montreal, to own, build or otherwise acquire and operate docks, slips, steam and other vessels, and to carry on the business of common carriers on the high seas and the inland waters of Canada. The provisional directors are: M. J. O'Brien, J. A. O'Brien, Renfrew, Ont.; F. W. Rous, G. A. Dillon, Montreal; J. R. Roy, Ottawa.

The traffic returns of the Lachine canal for July show that the following passengers, vessels and merchandise were dealt with:—Passengers, 24,903; Canadian owned vessels, steam 656, barges 500; U.S. owned, steam 43, barges, 43; tonnage of vessels, 464,861; wheat, 1,512,874 bush.; corn, 22,000 bush.; oats, 117,626 bush.; barley, 43,357 bush.; flaxseed, 81,959 bush.; eggs, 1,870 boxes; butter, 465 boxes; cheese, 59,936 boxes; lard, 425 barrels; whiskey, 1,063 hds.; coal, 23,773 tons; lumber, 23,640 tons.

The appeal of the Richelieu and Ontario Navigation Co. against the decisions of the Canadian courts, whereby it was held responsible for the damage caused to the Pittsburg and Erie Coal Co.'s steamboat Havana, about two years ago when its steamboat Prescott broke the lower lock in the Lachine canal, was dismissed by the judicial committee of the Privy Council in London, Eng., recently. The judgment of the Canadian courts was upheld. The owners of the Havana claimed $30,000.

Ontario and the Great Lakes.

The name of the steam tug Eagle, no. 92,304, registered at Collingwood, has been changed, by order in council, to M. Maree.

The Toronto harbormaster issued an order, Aug. 9, to restrain owners of vessels from dumping cinders, etc., in Toronto bay.

The cables operating the lower gates of the Sault Ste. Marie Canadian canal were broken, Aug. 8, the damage, however, was soon repaired.

The Department of Railways and Canals is asking for tenders for the reconstruction of the north pier at the upper entrance to the Canadian canal at Sault Ste. Marie.

It is announced that dock accommodation is to be built at Port Cobalt, with facilities sufficient to accommodate the largest steam vessels that can navigate Lake Temiskaming.

The Upper Lake Navigation Co.'s steamboat Adrelexa caught fire, Aug. 2, while en route to Cobalt from Elk Lake. The passengers, crew and mails were saved.

The steamboat City of Montreal was brought into Toronto, Aug. 7, with a broken piston rod. The repair was speedily made and she continued on her route with no loss of time.

The name of the steamboat A. Weston, no. 126,268, registered at Toronto, and owned by the Conger Coal Co., Toronto, has been changed, by order in council, to Congercoal.

The Merchants' Steamship Co.'s steamboat Mapleton, which recently arrived from England, and which ran ashore at Grave Island shoal, near Detour, was refloated Aug. 5, having received considerable damage to her bows.

The Toronto Ferry Co.'s steamboat John Hanlan, which was sunk by the s.s. H. M. Pellatt recently at Toronto, has been raised for repairs. Her machinery is intact, but she will not be ready for further service until next year.

M. J. Haney, Toronto, has applied to the Governor in council for the approval of plans for the extension of his wharf in front of water lots 22 and 23 according to plan 5A deposited in the Toronto Eastern Division Registry Office.

The Dominion Government is carrying out dredging work at the mouth of the Rainy River. The low water there this year has caused some inconvenience. The Rainy River Navigation Co.'s steamboat Keenora, has been laid up during the whole season.

The Montreal Transportation Co.'s schooner Augustus was towed into Prescott Aug. 13, having struck a rock in coming up the St. Lawrence. She was docked there and temporary repairs made to allow her to proceed to her destination on Lake Ontario.

Orders have been issued for the removal of the wreck of the steamboat Nimick, which came to grief off Whitefish Point in Lake Superior about two years ago. The wreckage has long been considered a menace to navigation in the vicinity.

The Inland Navigation Co.'s steamboat Glenellah, while bound from Montreal to Fort William, Aug. 2, struck the east breakwater at Port Colborne, causing considerable damage to her bows and displacing a portion of the breakwater. It is said that the cause of the trouble was the clogging of the steering gear.

Regarding reports to the effect that the control of the Richelieu and Ontario Navigation Co. was about to pass into other hands, R. Forget, M.P., President, recently said: "I have been approached on the matter, but I do not think that under existing circumstances the directors will let go the control of the company."

The construction of a dam at the foot of Lake Temiskaming is progressing, about 100 men being employed. It is estimated that it will be completed in about two years. It is intended to form a part of the proposed Georgian Bay canal scheme, of which C. R. Coutlee is Engineer in Charge. The contractors are Kerby and Stewart.

The Haileybury Navigation Co.'s steamboat Silverland made her maiden trip, Aug. 6. She is being operated on a half-daily service between Haileybury and South Lorraine. The vessel was built at Haileybury by the Doty Engine Works, Goderich, and is equipped with a fore and aft compound engine, capable of a speed of 15 miles an hour.

It is reported that an estimate of the damage caused by the recent ramming of the lock gates at the Sault Ste. Marie Canadian canal places the cost of repairs to the lock gates at $50,000. A press report states that after an enquiry into the causes of the disaster the license of the second engineer of the Perry G. Walker, who was in charge of the vessel at the time, has been revoked.

The steamboat Glengarry, owned by J. Richardson & Sons, Kingston, struck the pier of the bridge at Montreal, Aug. 14, and sank with her cargo of 20,000 bush. of wheat. She is a screw-driven vessel, with engine of 300 n.h.p., and was built at St. Catharines in 1872, and re-built at Kingston in 1886. Her dimensions are: length, 170 ft.; breadth, 26 ft.; depth, 11.2 ft.; tonnage, 732 gross, 438 register.

The ratepayers of Port Arthur, Aug. 10, ratified a bylaw granting a bonus of $25,000 a year for 10 years and a free site for the construction of a dry dock and ship-building plant there by the Western Drydock and Shipbuilding Co. Ld. The site at Bare Point has been surveyed and soundings taken, and it has been stated that work will be commenced immediately. The cost of the plant has been mentioned as $1,000,000.

The Pioneer Exploration and Development Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $100,000 and office at Ottawa, to carry on the business of a development company, and in connection therewith, to build, purchase or otherwise acquire and operate steam and other vessels. The provisional directors are: J. S. Crawford, W. E. Brown, J. W. Gamble, J. J. Collins, and C. W. Patton, Ottawa.

The U. S. Lake Survey reports the stages of the various lakes for July, in feet above tide water, as follows: Superior, 602.16; Michigan and Huron, 581.12; Erie, 573.03; Ontario, 247.16. It was anticipated that during Aug. Superior would be 1½" higher; Michigan and Huron ¼" lower; Erie, 2" lower, and Ontario 3" lower. Compared with the average stages for the past 10 years, Superior is 9" lower; Michigan and Huron 1¼" lower; Erie, 2½" higher; Ontario, 5½" higher.

The Western Drydock and Shipbuilding Co.'s proposed drydock and shipbuilding plant at Port Arthur, it is said, will cost about $700,000 and be the most complete on the Great Lakes. The Port Arthur city council has agreed to bonus the company to the extent of 100 acres of land and payment of $25,000 a year for 10 years, in addition to which the company will be exempt from taxes for 20 years, with the exception of $2,000 a year for school purposes. The dock which it is proposed to build will be 700 ft. long.

The Turbine Steamship Co.'s s.s. Turbinia caused some little damage to a number of vessels at Charlotte, N.Y., Aug.

15. Owing to some unexplained cause, full steam was applied to the Turbinia, while she was moored to the wharf, and she collided with the Richelieu and Ontario Navigation Co.'s s.s. Kingston, which ran into two other vessels. The damage done was comparatively small, as the vessels named were able to proceed on their trips. Official enquiries will be held by Canadian and U.S. authorities, but in the meantime the second engineer of the s.s. Turbinia, who was in charge, has been dismissed.

The Farrar Transportation Co.'s s.s. Collingwood was sunk in collision with the U.S. s.s. George L. Craig in the Detroit River, Aug. 24. It is stated that the latter vessel rammed the Collingwood, and that the cause of the disaster was probably a misunderstanding of the whistle signals. The Collingwood had a large hole torn in her side, about amidships below the water line. The captain, F. A. Basset, attempted to beach the vessel, but she sank forward when within 100 yards from shore, in 40 ft. of water. She had a cargo of 7,000 tons of coal, and was bound for Fort William. The Collingwood was built at Collingwood in 1907, and was equipped with engine of 163 n.h.p., driving a screw. Her dimensions are: length, 386 ft.; breadth, 50 ft.; depth, 23 ft.; tonnage, 4,529 gross, 3,480 register.

The Dominion Department of Public Works has recognized the need of dredging the shoal at the outlet of the Niagara River. Surveys have been made, and shallow places discovered that are a menace to navigation. About three miles from shore a sand bar has existed for many years, and the constant deposits from the river which were increased by the ice jam last spring, have gradually formed a shoal that demands attention. Vessels have grounded at this point, and at present deep draught boats trading on Lake Ontario to and from the Welland canal could not safely seek shelter in the Niagara River. Even the regular passenger steamers operating between Toronto and Niagara have experienced difficulty, and are obliged to run at reduced speed in crossing the bar. The dredge Quebec is at work upon this shoal and will provide a safe channel, which when completed should be well marked with lighted bell buoys.

On the question of the construction of a dam at the Long Sault Rapids, in connection with a proposed power development scheme, the Minister of Railways and Canals is reported to have said, at Brockville, Aug. 22, that "the proposition will have to be decided from the standpoint of the Canadian people. The plans at first presented to the Government were objected to at once. The engineers of the three departments particularly interested, the Marine, Railways and Canals and Public Works, were named to investigate the proposition, and as a result of their protest several important changes have been made in the plans, which would tend to safeguard Canadian interests. Outside of the objections raised in some quarters on account of the obliteration of the rapids, the effect it would have on the great water carrying trade of Canada must be carefully investigated. The cheap rates of transportation afforded by the St. Lawrence route on which Canada has spent many millions are of such vital importance to the trade of the country that no scheme that would interfere with them could be countenanced."

The freight truckers employed by the C.P.R. at Fort William struck work Aug. 9, without notice, causing some little dislocation of traffic. The men, who are of mixed nationalities, caused some disturbance and a riot ensued during which several of the C.P.R. police were wounded. The introduction of the military quieted things somewhat, and the men returned to work Aug. 16. It is reported that an application has been made to the Minister of Labor to appoint a board of conciliation to enquire into the men's alleged grievances.

Hon. Mackenzie King, Minister of Labor, has received a telgram from F. A. Acland, Deputy Minister, announcing that he left Fort William for Ottawa, Aug. 25, with the report of the board of conciliation which inquired into the difficulties between the C.P.R. and its dock laborers. He reports that the board reached a unanimous finding which is believed to be acceptable to both parties. The work of the board was expeditiously performed, the evidence being taken and the report framed in six days.

Captain Young, of Fort William, was the chairman, Alderman Rankin, of that city, represented the men, and W. J. Christie, of Winnipeg, the company. Mr. Acland was on hand throughout the sittings to give the board the benefit of his advice.

Manitoba, Saskatchewan and Alberta.

The steamboat Orillia arrived at Medicine Hat, Alta., from Saskatoon, Sask., Aug. 14, and it is understood that she left there with the intention of proceeding to Lethbridge.

The Manitoba Beach Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $100,000 and office at Winnipeg, to carry on the business of land improvement company, and in connection therewith to own and operate vessels of all kinds, and do a general transportation business. The provisional directors are: D. C. Cameron, G. J. Lovell, A. L. Serkau, J. Mahood, C. Goodday, Winnipeg.

The British America Mills and Timber Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $25,000 and office at Winnipeg, to carry on a general timber and merchandise business, and in connection therewith to purchase, lease or otherwise acquire and operate all such transportation facilities by land and water as may be necessary for the conduct of such business, and also to carry on the business of general carriers of passengers and freight. The provisional directors are: M. G. Curran, D. McCleave, D. W. McKerchar, W. Wilson, and H. R. Patriarche, Manager Candian Car Service Bureau, Western Lines, and Manager and Secretary-Treasurer Canadian Freight Association Western Lines Freight Inspection Bureau, Winnipeg.

In an interview at Winnipeg, Aug. 12, the Minister of Public Works said: "The possibility of connecting Winnipeg and Edmonton by a water route was brought to my attention again, while in Alberta, and I secured much additional information on the subject, which I deemed worthy of the most careful consideration. The locks at St. Andreys, on which a large sum of money has been spent, will soon be completed, enabling vessels traversing Lake Winnipeg to reach this city. By the expenditure of a reasonable sum it appears that it would be possible to secure water communication by way of the Red River, Lake Winnipeg, and the Saskatchewan River, between Winnipeg and Edmonton. The public benefit resulting from this improvement would be very great. The most serious difficulty in connection with the proposal is created by the rapids between Cedar Lake and Lake Winnipeg at Grand Rapids, on the Saskatchewan. There are very long stretches of navigable water on the Saskatchewan, with only an occasional sandbar, which latter could be readily removed. Further information would be necessary before coming to any conclusion on the matter, but there would seem to be little doubt regarding the practicability of the scheme."

B.C. and Pacific Coast Marine.

F. C. Stratford, Vancouver, has been appointed a Fisheries Protection officer, with the rank of master mariner.

P. Wylie has been appointed shipping master for the port of Vancouver, and H. Dunn has been appointed measuring surveyor of shipping for the port of Prince Rupert.

The New Westminster Pilotage Authority's by-laws have been approved by the Minister of Justice and the Minister of Marine, and have been submitted to the Governor General in council for approval.

The contract for the construction of the hull of the vessel to be operated by the Royal Navigation Co., was placed in New Westminster, Aug. 2. It is expected that the vessel will be completed and on its route, early in November.

The Canada Shipping Act has been amended by order in council, by the addition of clause 50 prohibiting the navigation of the waters of Victoria Arm above Point Ellice bridge, Victoria harbor, by motor boats, at a greater speed than 6 miles an hour.

The Canada Dredging Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $2,500,000, to acquire certain dredging leases, and among other things to build, purchase or otherwise acquire steam and other vessels and conveniences conducive to any of the company's objects.

The Cariboo Navigation and Development Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $500,000, to build, purchase or otherwise acquire and operate steam and other vessels propelled by whatever power the company may desire, for the transportation of passengers and freight on any B.C. waters, and for other purposes.

Reports continue to be circulated by presumably responsible papers to the effect that the G.T.P.R. has placed an order in Newcastle, Eng., for the construction of a fast steamer, to be operated between Victoria, Vancouver and Prince Rupert. We have been officially advised that arrangements relative to the company's proposed Pacific coast service are not sufficiently advanced to warrant the statement mentioned.

Council has decided in favor of the C.P.R. in its appeal against the decision of the Canadian Court, by which the company had to pay damages to the relatives of a number of persons who were drowned as the result of a collision between the company's s.s. Princess Victoria and the s.s. Chehalis in 1906. The judgment of the first Canadian Court in favor of the C.P.R. has been reinstated, with costs.

The C.P.R. has added an electric crane to its equipment at its docks at Vancouver. The crane, which has a capacity of 25 tons, has a beam 16" by 18", and a radius of 78 ft. The mast is 52 ft. high, and 18" by 18", supported by two legs, each 75 ft. by 16" by 16". It is worked by an electric motor, and is also fitted with a hand winch. The boom will project 28 ft. over each side of the wharf, and enable materials to be lifted from cars to the vessel direct.

The Department of Public Works has completed surveys for the proposed improvements in Vancouver harbor. The improvements comprise the widening of the first narrows, the removal of Parthia and Burnaby shoals, the dredging of a mooring basin in Coal harbor and a channel in False Creek about 3 miles long by 300 ft. wide. It is estimated that about 5,000,000 cubic yards of material will have to be moved. G. A. Keefer, Resident Engineer, New Westminster, is in charge of the work.

Capt. H. Glide, an old-time mariner of the Pacific coast, recently celebrated the 56th anniversary of his landing at Victoria. He was one of the first mariners to be identified with that port, and during his career, he performed a feat which will long be remembered in the annals of local seamanship. He shares with Capt. Vancouver, the discoverer of the island, the distinction of having sailed a square-rigged vessel from Victoria, through the Straits of Georgia and round the north end of the island, through the tortuous channels and skirting the numerous islands, without an accident. He was born in 1834 and landed at Victoria in 1853.

The Skeena River Transportation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $25,000, to purchase the steamboat Craigflower from J. J. Sloan and R. J. McDonell, Port Essington, B.C., together with the goodwill and business carried on by them under the name of the Skeena River Transportation Co.; to own and operate steam and other vessels, and to carry on the general business of ship owners and carriers by land and water. The steamboat Craigflower is a paddle wheel steamer with engine of 2 n.h.p., and she was built at Victoria in 1908. Her dimensions are: length, 65 ft.; breadth, 12.3 ft.; depth, 2.8 ft.; tonnage, 21 gross, 12 register.

A steamboat named Argonaut has recently been built at Dawson, Y.T., with a method of propulsion which is somewhat novel. The paddle wheels are placed aft and work in a horizontal position with a vertical lift. The boat has been designed and built for light draught service on the side streams of the Yukon for carrying prospectors and supplies as far into the interior as possible. The propelling machinery is stated to be a modification of the Whiteworth quick return motion, as used on shapers and other tools in machine shop practice, and the experiment has proved entirely satisfactory and has demonstrated the practicability of the application of the present high speed internal combustion or other high speed engines for the propulsion of light draught, stern propelled river boats. The engine utilized was made locally and is naturally somewhat crude. It is of 25 h.p. On an experimental run, she passed over several bars with but 9" of water, and will carry 5 tons of freight on a 13½" draught.

Grain Clearing House at the Dual Ports.

A meeting of the Dominion Marine Association was held at Toronto, Aug. 19, when the establishment of a grain clearing house was discussed. C. Ruttan, secretary Lake Shippers' Clearing House Association, Winnipeg, was present and outlined the purpose of the association, which is to arrange for the loading of vessels at Fort William and Port Arthur, from one or two elevators, instead of at a greater number as at present, thus obviating the delay which now takes place. Those present endorsed the proposed arrangement, and undertook to bear their proportion of the expense in maintaining such a clearing house.

The expense of maintaining this system will be considerable, as there is to be an accounting staff at Winnipeg, as well as an office at Fort William or Port Arthur, where the loads will be adjusted. The charges which have proved acceptable to the shippers, are.

For a load taken at one house only, 30c. per 1,000 b.
" " " two houses....20c " "
" " " three or more houses.....10c. " "

This, it is anticipated, will pay a large proportion of the expense. Under the scheme, shippers at Winnipeg will turn over their railway bills of lading with orders attached, and the clearing house at the shipping port will take them, and all others that may have come in, and rearrange the shipments, with a view to lessening the number of houses at which any vessel will have to call. For example, five shippers may be sending five vessels to five houses each, and the clearing house may be able to so adjust the shipments, that each of the vessels may be able to get her full load at one, two, or at most, three houses. Under the schedule of charges mentioned, the vessel will be under less expense, according as her shipments entail more time and trouble in loading. The matter is now well in hand, and seeing that vessel owners have undertaken a large share of the expense, the scheme should be put on a good working basis very shortly. The Bankers' Association and the owners of the terminal facilities have agreed to the scheme. In carrying out the work, the terminal operators will recognize orders from the clearing house, the shipper having no direct relations with them. An important feature of the scheme is that all shipments will be on this basis, the vessel fee will be collected in cash, and consequently every vessel will be subject to the arrangement, U. S. vessels as well as Canadian. It is understood that the U. S. owners have expressed their concurrence with the arrangements made. The owners of terminal elevators have taken out insurance policies to provide against collapse, and this enables shippers to escape risk of loss in allowing the shuffling of their grain shipments or orders, as other risks are covered.

At the same meeting, it was unanimously resolved to ask that the system of weighing into vessels at these ports under Government supervision be abolished, on the ground that it is not only useless but embarrassing. Hitherto, the Association has asked that the system be extended to the lower ports, and that the Government guarantee the outturns, but this is not considered to be feasible, so it now seeks to have the whole system abolished.

Smithers, reading from a newspaper: "I see that the new ocean liner can steam 26 knots an hour."

His wife: "I suppose they steam the knots so that the poor sailors can untie them more easily."

G. B. Wyllie, Travelling Passenger Agent, Illinois Central Rd., Buffalo, N.Y., born at Toronto, Ont., Oct. 15, 1851.

Great Northern Ry. Lines in Canada

Vancouver, Victoria and Eastern Ry. and Navigation Co.—The route at present adopted for the continuation of this line from Penticton, B.C., towards Vancouver is known as the Coquilalla route. Chief Engineer Kennedy and a survey party are working in the vicinity of Eagle Creek, a tributary of the Tullameen River, with a view of securing a route which will save a considerable amount of heavy construction at the head of Coquilalla pass. From the head of Eagle Creek to Unknown Creek there is a long divide, which, if favorable for tunnelling, will save some mileage in addition to a lot of heavy cutting.

Oroville to Brewster, Wash.—A contract has been let for the construction of a branch line southerly from Oroville, a station on one of the sections of the line known in Canada as the Vancouver, Victoria and Eastern Ry., which crosses over into the State of Washington, to Brewster, a distance of about 70 miles. The new line will tap the semi-arid district which the government is reclaiming in the Pouge Flat country, and will also furnish transportation to a considerable fruit growing area irrigated by private corporations. It is intended ultimately to extend the line from Brewster to a junction with the G.N.R. main line at Wenatchee, Wash.

Vancouver Terminals.—The proposition submitted by the company to the Vancouver city council for the construction of terminal facilities in that city is under consideration. The draft agreement submitted states that the company will erect terminal facilities at or near the intersection of False Creek and Jackson Ave., Dunleavy Ave., Gore Ave., or Park Lane produced. The city is asked to obtain the removal of all governmental restrictions, so as to be able to convey the lands constituting the bed of False Creek. The company will purchase the uplands on the north shore of False Creek from the easterly end of block 118, d.l. 198, over to a point opposite to its terminals, the city, if necessary, to expropriate the lands for the company. The company in turn will convey to the city the present foreshore of these lands, and the city will grant to the company the bed of False Creek further out. The company proposes to fill in the part granted to it within 90 days, and to establish its terminals thereon. They are to be completed within five years, and the Northern Pacific Rd. will join with the G.N.R. in the work, using the terminals for its own purposes. If the city desires, the company will fill in the foreshore adjacent, owned by the city, the latter to provide the bulkheading. The terminals are to be designed for union terminals so that the G.N.R., the N.P.R. and the Grand Trunk Pacific Ry. can all build lines into them. (Sept., pg. 647.)

H. Elliott, President of the N.P.R., spent some time recently in Vancouver, B.C. In an interview he said his company had not yet acquired any interest in the foreshore purchase on the north side of False Creek by the Great Northern Ry., and its entrance into Vancouver would hang entirely upon the outcome of the negotiations going on between the city and the G.N.R. The N.P.R. was anxious to enter Vancouver and the full completion of this project would depend upon the reasonableness of cost with which terminal facilities could be created. For the present the N.PR., if it went in, would run its trains over the G.N.R. line between Sumas and Vancouver, using the B.C. Government bridge over the Fraser River. Present business would not justify the construction of a separate line, and the cost of such a line could be better employed at present in the construction of terminals.

The Intercolonial Railway Shops.

The new I.C.R. shops at Moncton, N.B., having been completed, the whole force of employes have been removed there from the old shops, and the machinery from the latter has also been transferred. Our issue of Sept., 1908, contained a very full account of the new shops by C. F. Bristol, Stud. Can. Soc., C.E., which dealt in considerable detail with the layout, method of construction, etc. Now that the new shops are in operation it may be of interest to reproduce some portions of that article, particularly referring to the layout. Those who wish to have full details of the construction are referred to our Sept., 1908, issue.

The new shops are located about a mile from Moncton station, on the main line to Montreal. The site is on a plateau, about 60′ above sea level, and although nearly flat, slopes gently to the southward in the direction of a small creek. As shown on the accompanying plan, two main sidings, with numerous branches and spurs, facilitate shunting and render ready access to all buildings and yards. The two passenger car shops are long and narrow, and so designed that cars may be placed transversely in each shop. These buildings are parallel

H. D. MACKENZIE,
General Foreman, Locomotive Shops, I.C.R.

to each other and at right angles to the main line, with 18 tracks in each. Cars may be readily transferred from any track in one shop to any track in the car shop. The locomotive shops comprise the machine shop and annex, boiler shop, boiler erecting shop, engine erecting shop, and smith shop, all under one roof. The four latter shops are parallel other by means of the electric transfer table between the two shops. The stores and office building, power house, producer gas house, freight car shop, planing mill, lumber shed, and dry kiln are all laid out parallel to the main line of the railway, and are all served by side track The planing mill is situated convenie to the passenger car shop and freigh to the main line, but at right angles to the machine shop.

A notable feature in connection with the engine erecting shop is the arrangement of the pits. The main pit runs almost the entire length of the shop, while the track is continued across the machine and passenger car shops into the paint shop, where locomotives may be painted should the erecting shop be crowded. The side pits are all laid at an oblique angle to the main pit, and this arrangement provides greater facilities for stripping and repairing engines.

The Freight Car Shop is 134′ 8″ by 362′. Two rows of columns divide the shop into three bays, each 44 ft. wide, and each containing two tracks through the entire length of the shop. In each end are 6 doors, 12 ft. wide by 16 ft. high. In addition to these there are several narrow gauge tracks for small trucks.

The Planing Mill is 81 ft. 10 in. by 202 ft. 8 in., and is constructed practically the same as the freight car repair shop.

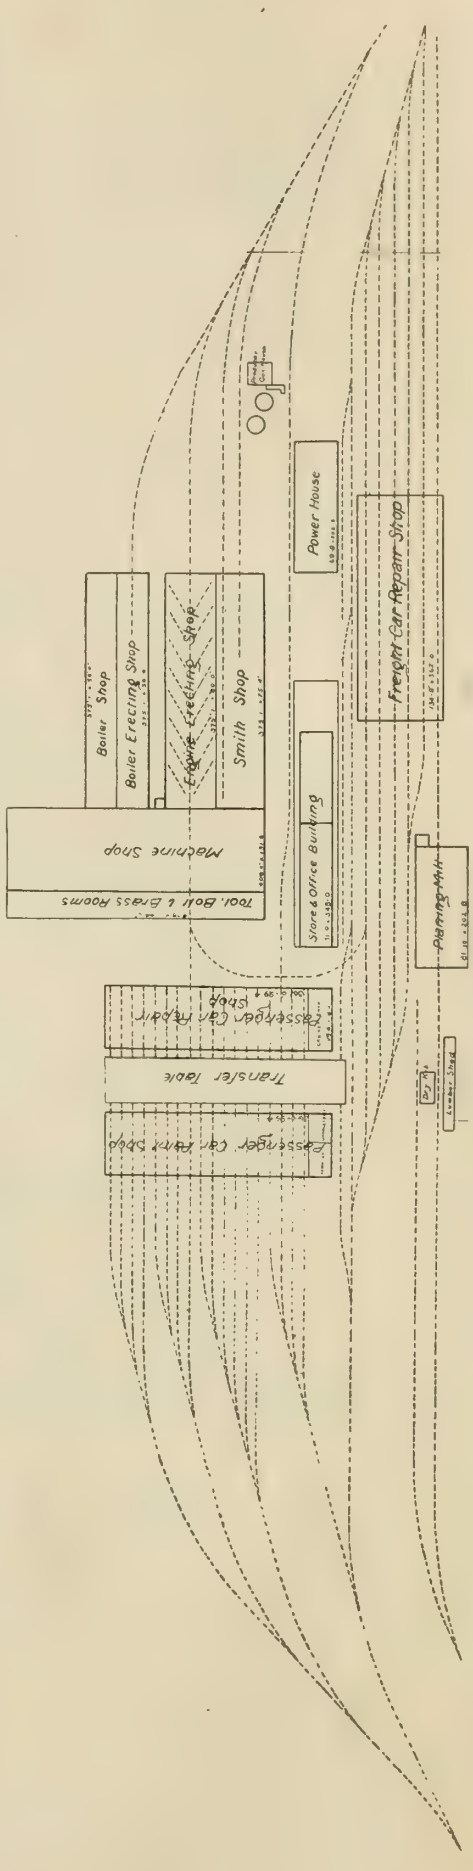
The Passenger Car and Paint Shops are each 361 ft. 8 in. by 100 ft. The cabinet shop is elevated half a story in one end of the passenger car shop, on what is termed the mezzanine floor. In the car paint shop, on a similar floor, are the upholstery and varnish rooms.

Stores and Office Building. The first floor and basement of the stores and office contains the local and general stores department, and the second story, over the western half, is devoted to the offices of the stores department, the Superintendent of Motive Power and staffs.

The Locomotive Plant includes five shops, viz.: the machine shop, 131 ft. 6 in. by 408 ft. by 36 ft. high, divided into two bays by a centre line of columns, each bay being served with an overhead electric travelling crane of ten tons capacity. This shop has an annex 44 ft. by 408 ft. The smith shop, at right angles to the machine shop, is 75 ft. x 375 ft. x 37 ft. high. Water gas is used for the different furnaces. Jib cranes are placed conveniently near the several fires and furnaces, while a track through the centre of the shop permits the handling of heavy work by means of trucks. The engine erecting shop, separated from the smith shop by a partition, is 80 ft. x 375 ft. x 50 ft. high. Two 60-ton electric travelling cranes are installed for moving and placing locomotives. Through the centre runs a surface track with a shallow concrete pit. On each side of this central track are eight side tracks with pits arranged herring-bone style. These side tracks are designed to accommodate engines requiring heavy repairs, and this form of layout provides ample space for overhauling. This leaves the central track free for light repair work, and obviates the necessity of lifting one engine over another. Between the engine erecting house and boiler shop walls is a space 25 ft. wide, which permits of additional side lights. The boiler shop is 100 ft. x 375 ft., divided into two bays by a row of columns down the centre. The bay for boiler erection is ft. high, and the west end of it contains the riveting tower, 25 ft. long by high. A 35-ton electric travelling is installed in this bay, and a 30-crane in the riveting tower to serve riveter. The tool bay is severed by means of a 10-ton electric travelling crane, which traverses the entire length of the shop. In addition to this, jib cranes are placed convenient to the different tools.

The Power House is built on the same principle as the planing mill. The engine room and boiler room are each ft. x 100 ft., and separated by a reinforced concrete wall. The boiler equipment consists of four Babcock & Wilcox water tube boilers of 250 h.p. each, arranged in two batteries, while the necessary space is reserved for a third battery. Two economizers, and a feed water heater and pump, are installed to take care of the feed water. An induced draft plant forms part of the equipment, also a 1,000-gallon u.w. pump. In this room, a fan, direct conected to an auxiliary engine, supplies the heat required in the freight car shop. The coal bins are arranged along the side of the building in front of the boilers.

The engine and generator equipment is as follows: two horizontal double-



Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

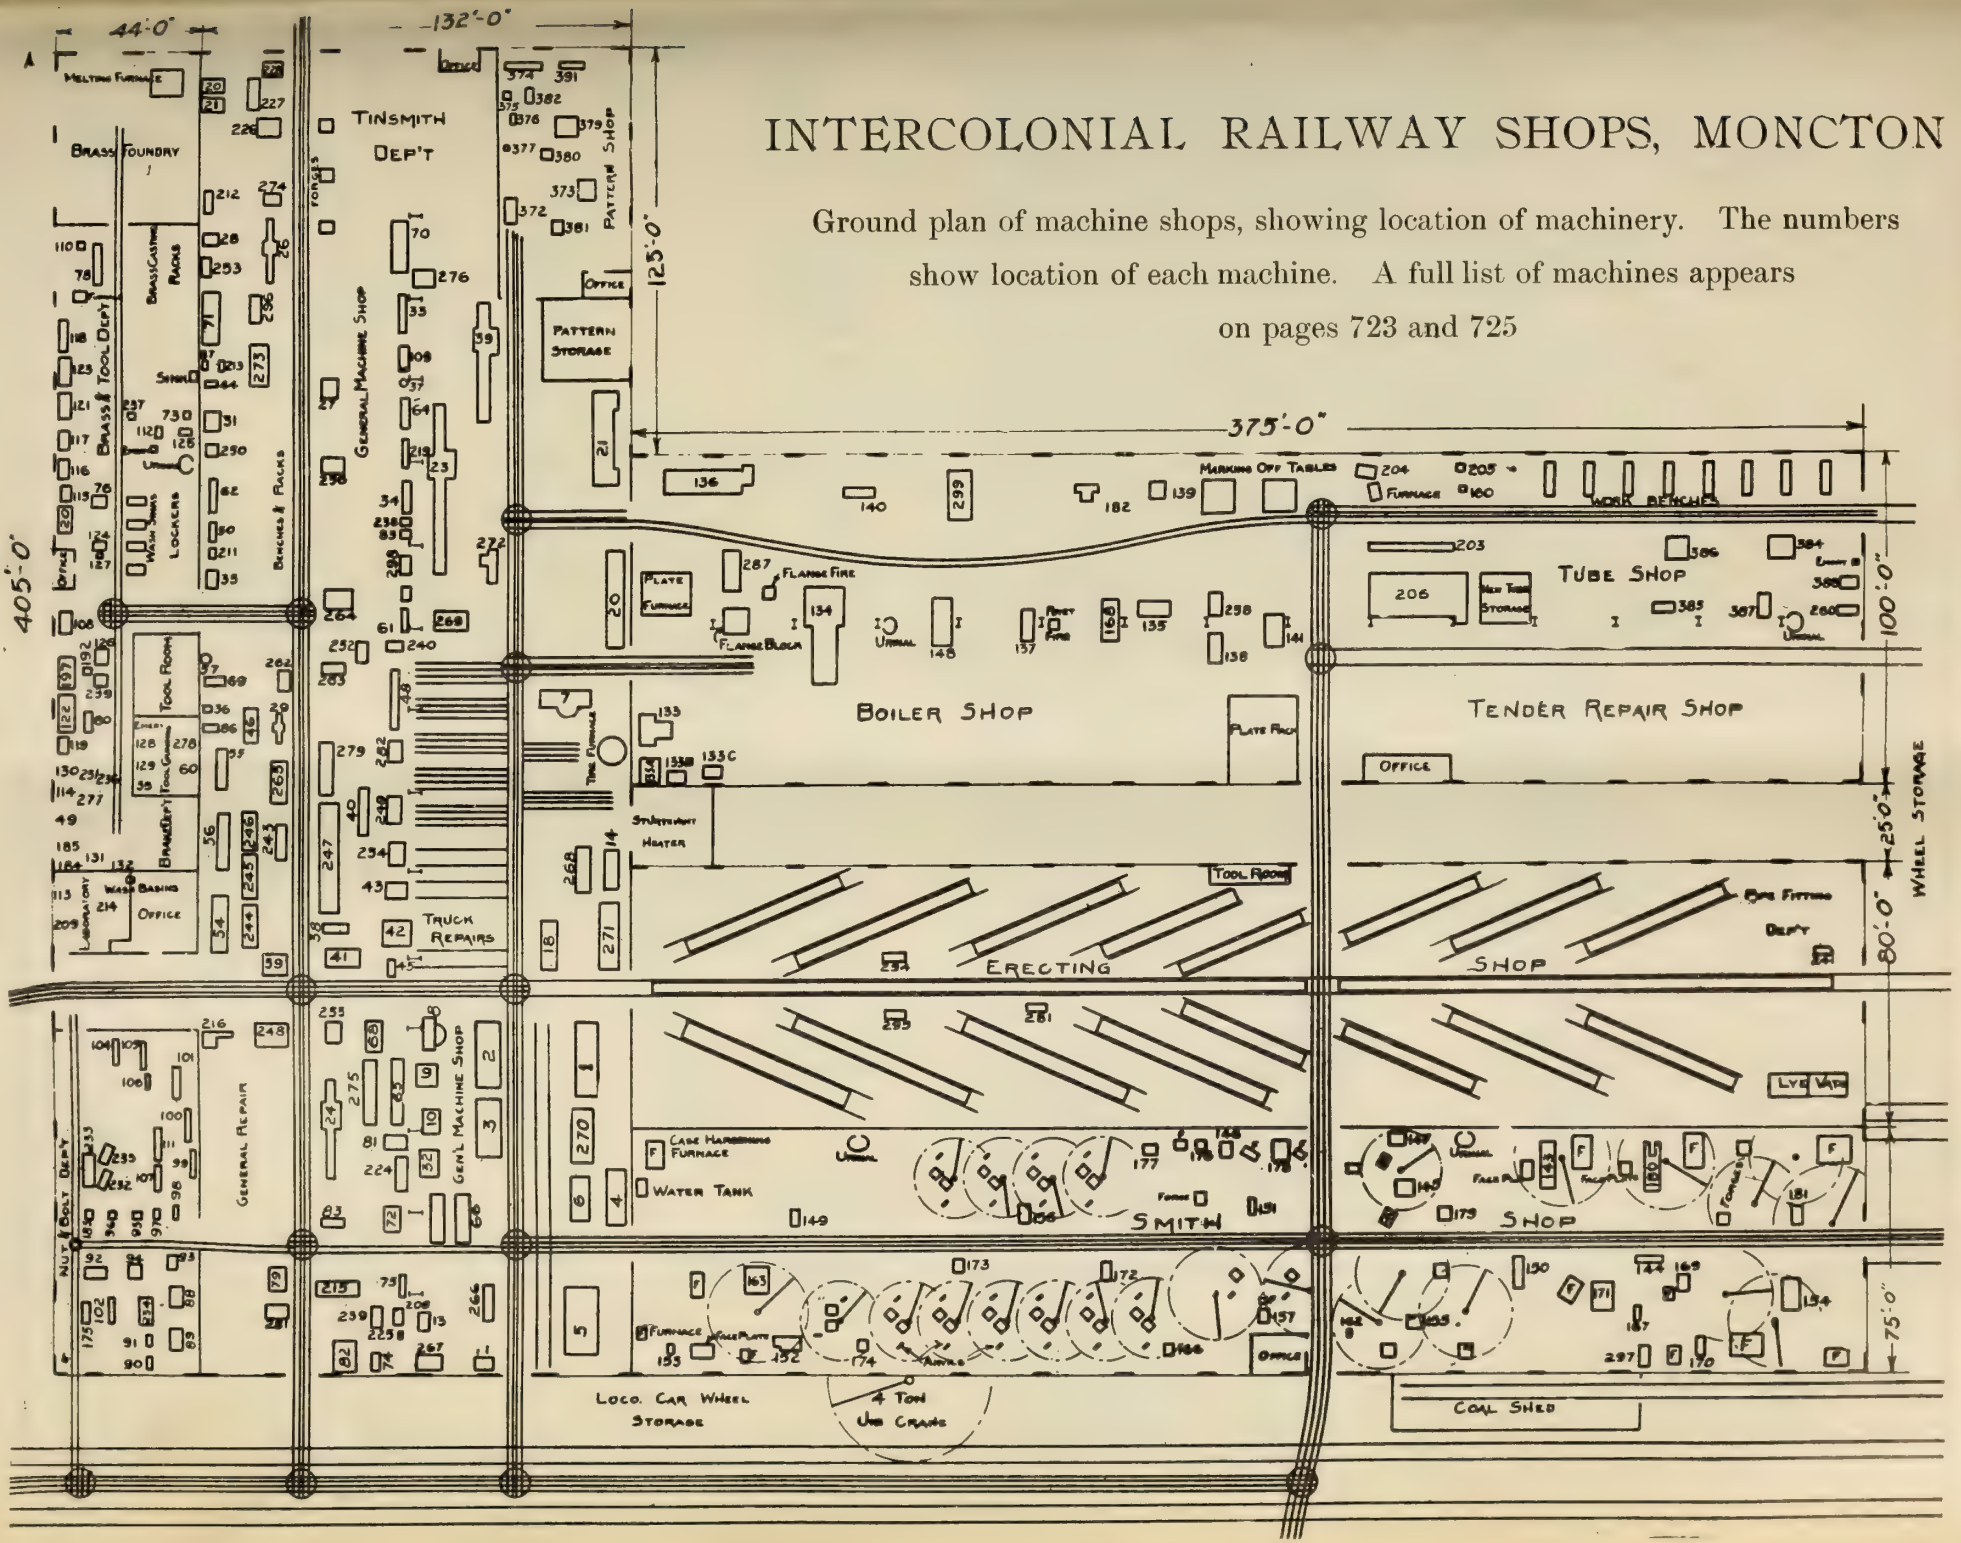
Please write to home office for further particulars.

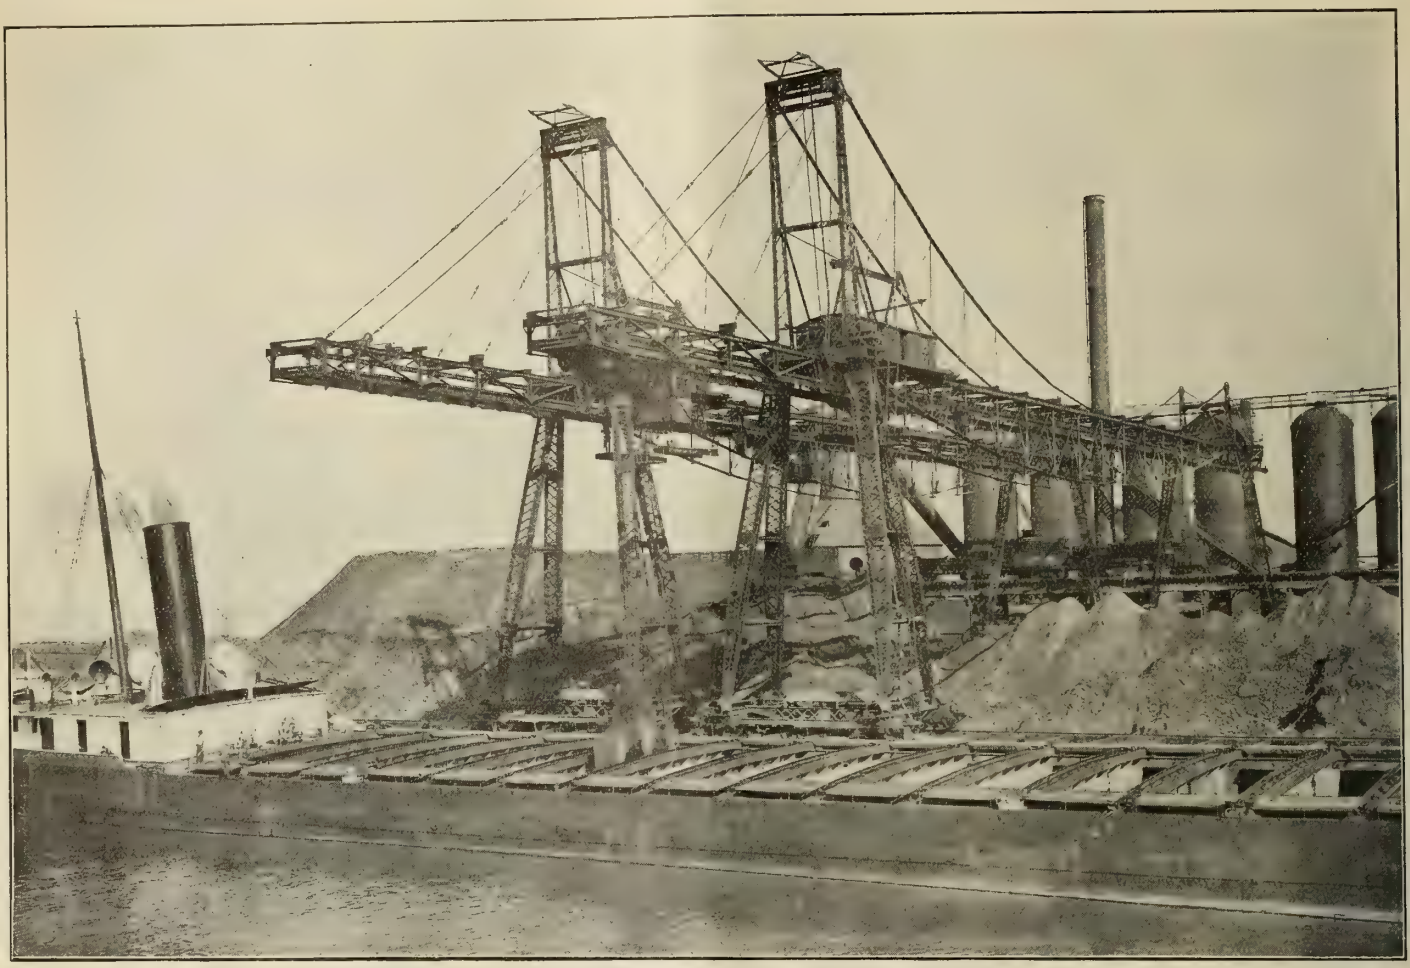
CHARLES MILLER,

PRESIDENT

INTERCOLONIAL RAILWAY SHOPS, MONCTON

Ground plan of machine shops, showing location of machinery. The numbers show location of each machine. A full list of machines appears on pages 723 and 725





FEDERAL FURNACE CO.'S TWO BRIDGE TRAMWAY.

THE BROWN HOISTING MACHINERY CO.

Engineers, designers and builders of hoisting machinery of all descriptions.

Main Office and Works:

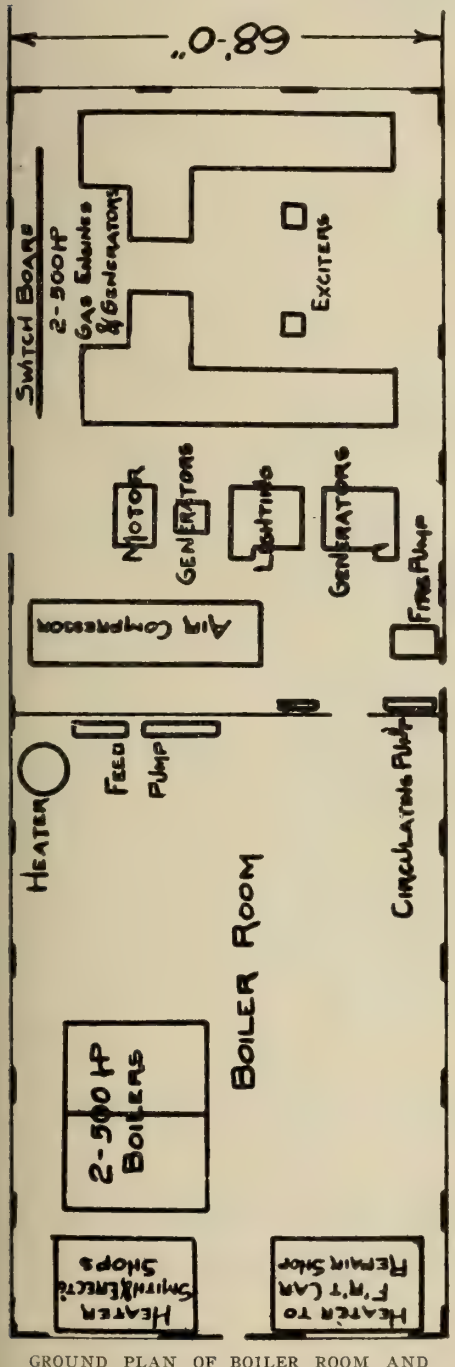
CLEVELAND, OHIO

Branch Offices:

PITTSBURG AND NEW YORK

acting gas engines, normal rating 500 b.h.p. each, adapted to drive two 300 k.w. direct-connected 60-cycle a.c. generators. These generators are three-phase, 1,500 r.p.m., and 220 volts. In addition to these machines there will be two 70 k.w.d.c. belt-driven generators of 250 volts and 875 r.p.m. The gas engines are driven by producer gas, which is to be manufactured in the producer gas house, situated near the power house. The gas for the furnaces in the smith shop will be water gas, also manufactured in the gas house. The gas generators will convert continuously about 1,000 lbs. of coal per hour, generating therefrom about 18 cu. ft. of water gas for the furnaces, and about 55 cu. ft. of producer gas for the engines.

The shops are heated by the hot blast system, using exhaust steam from the auxiliary engines and pumps, supplemented by live steam from the boilers. Fans, direct connected with engines, force the hot air through concrete conduits, furnished with risers in the walls. These risers discharge close to the floor near the windows. The sewerage system is extensive, consisting of one main 2,800 ft. long, emptying into a small creek which flows to the Petitcodiac River.



GROUND PLAN OF BOILER ROOM AND POWER HOUSE.

On page 717 is a ground plan of the machine shop, showing the location of each machine, the numbers placed on the plan corresponding with those given in the list of machinery which follows this article. On pages 719 and 721 are ground plans showing the location of machinery in the boiler room and power house, the planing mill and the passenger car repair shop. Nearly 100 of the machines in use were supplied by the John Bertram & Sons Co., Ltd., Dundas, Ont., this being by far the largest number ordered from any one manufacturer. Allis-Chalmers-Bullock, Ltd., Montreal, supplied 157 motors for the electric drives of the lathes, planers and other machinery of which 43 are direct current, most of them being arranged for variable speed, and 114 are induction motors. The Canadian Westinghouse Co., Ltd., Hamilton, supplied 29 a.c. motors and 16 d.c. motors. Particulars of other electrical apparatus supplies are given in the list of machinery appended to this article.

Following is a complete list of the mechanical staff of the Moncton shops: Superintendent of Motive Power, G. R. Joughins; Assistant to Superintendent of Motive Power, W. U. Appleton; General Foreman Locomotive Shops, H. B. McKenzie; General Foreman Car Shops, A. B. McDonald; Foreman Locomotive Erecting Shops, J. Nugent; Foreman Boiler Shop, J. Joyce; Foreman Blacksmith Shop, A. Stockhall; Foreman Tender Shop, W. H. Chapman; Foreman Freight Car Shop, R. L. Black; Foreman Passenger Car Shop, I. A. Steeves; Foreman Painter, A. S. Coleman.

Uniform Railway Operating Rules.

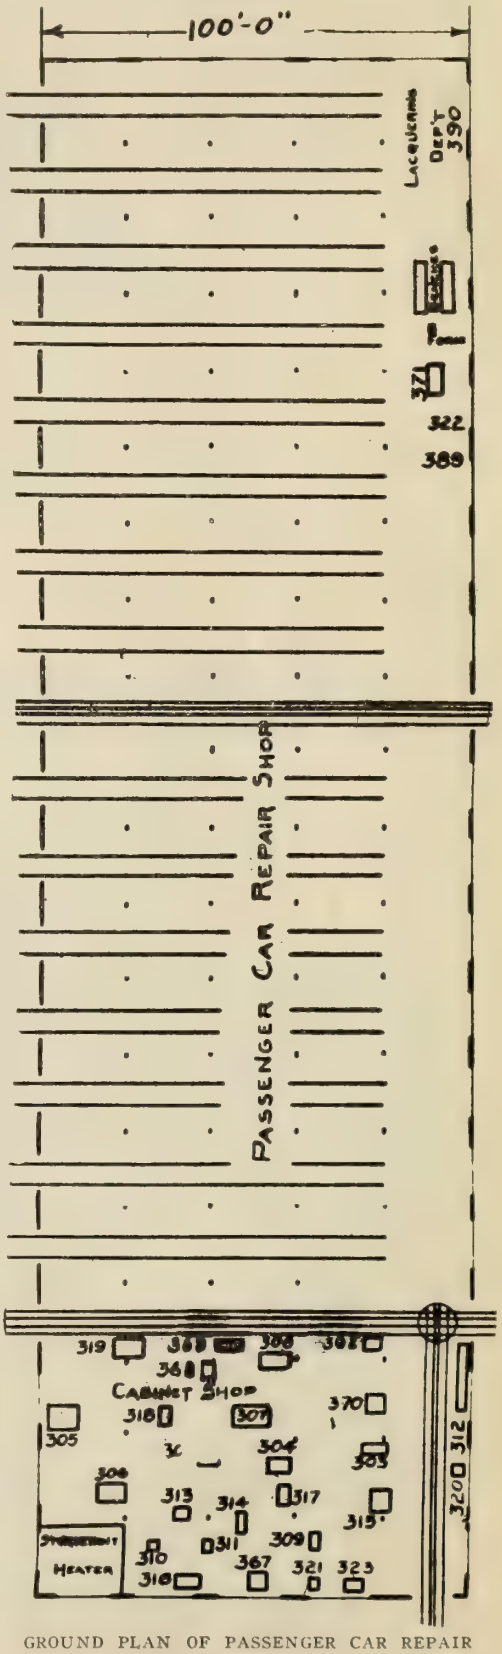
Reference was made in our last issue to the uniform code of operating rules which has been approved by the Board of Railway Commissioners for all railways under its jurisdiction. There are no changes in the basic principles of the new rules as compared with the Standard Code prepared by the American Railway Association. The new rules, however, contain some slight changes in phraseology, and also contain instructions which the leading Canadian railway managements regard as essential in the operation of trains. About the only difference between the rules now being used by the G.T.R. and the C.P.R. is in the color of signals; the G.T.R. using red for stop, green for caution, and white for proceed; the C.P.R. used red for stop, yellow for caution, and green for proceed. The balance of the rules as to movement of trains by train orders, etc., is practically the same. Under the new rules, the color of signals as now used by the C.P.R. has been adopted for all railways under the Board's jurisdiction.

G. T. R. Rates to Michigan Points.

In the case of the Saginaw, Mich., Board of Trade et al vs. the G.T.R. Co. et al, the Interstate Commerce Commission has decided as follows:—The percentage of the Chicago rates, adopted by defendants as a basis for fixing rates from Atlantic coast territory to Saginaw, Flint, and other points in the Saginaw Valley, is not found, under the circumstances of the case, to be too high, when compared with the percentages that fix the rates enjoyed by other groups in adjacent territory.

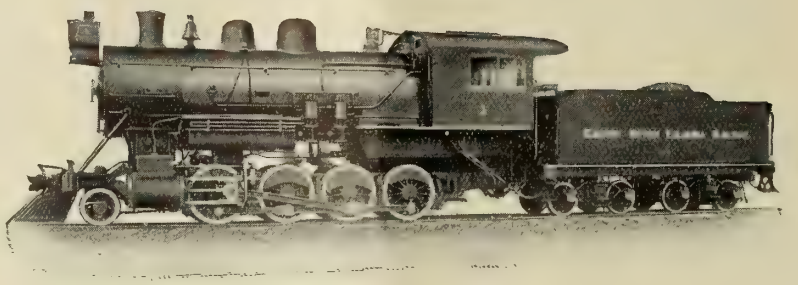
The proximity of Detroit and Toledo to the great channels of through transportation and their location on direct through routes where the density of traffic is very great and the general operating and traffic conditions are favorable, are elements that cannot be ignored by the rate maker and must necessarily tend to lower rates than can be accorded to communities that are removed from these great streams of traffic.

The general foundation upon which rests the whole structure of eastbound and westbound rates in the "percentage-basis" territory is described and discussed in the judgment.



GROUND PLAN OF PASSENGER CAR REPAIR SHOP.

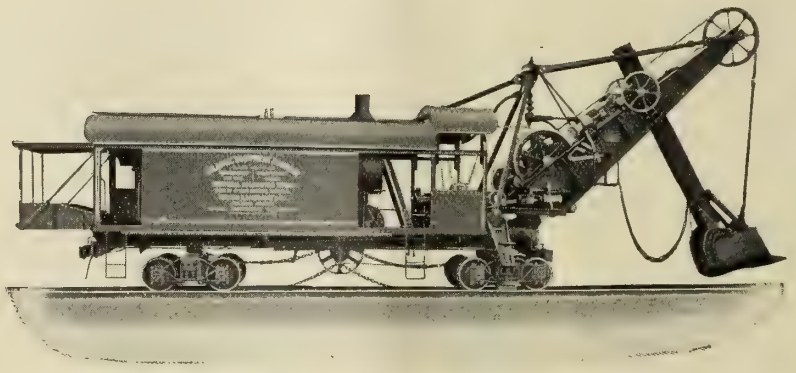
LOCOMOTIVES FOR ALL CLASSES OF SERVICE



Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39,200 pounds.

ATLANTIC STEAM SHOVEL



Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

MONTREAL LOCOMOTIVE WORKS, LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

G.T.R. Betterments, Construction, Etc.

Victoria Jubilee Bridge.—In view of the near completion of the electric railway to St. Lambert the G.T.R. is making some changes there. A new approach is being constructed to the bridge at the Laprairie side so that farmers using the bridge may escape the danger of crossing the tracks, as they do at present; and as the electric cars are to use the lower, or St. Lambert, side of the bridge, vehicles will have to use the upper, or Laprairie side.

Preston St. Bridge, Ottawa.—The company has withdrawn its opposition to the raising and widening of the bridge over which its line crosses Preston St., Ottawa. Some months ago the city secured an order from the Board of Railway Commissioners to raise the bridge on the ground that it constituted an impediment to vehicular traffic. The engineers' estimate of the cost of the work and the necessary grade alteration was $16,000. It was subsequently found that this estimate was below the mark, and the company desired to have the question reopened. The city instructed its solicitor to oppose the application. The company has now withdrawn the application, and the work will be gone on with.

Roundhouse at Lindsay.—We are advised with respect to the reports that a new roundhouse is to be erected at Lindsay, Ont., that the management has no information to make public at present.

Midland Ry. Improvements.—The question of the erection of a new roundhouse at Lindsay is bound up with that of the improvement of the old Midland Ry. In this connection the Board of Railway Commissioners has passed orders authorising the company to construct the following branch lines: (1) From near Tiffin, through Tiny and Tay tps. to the second concession of Tay tp. (2) A branch line from Midland via Penetanguishene to a junction with the Penetang branch. (3) From near Wyeville northerly to the second concession of Tiny tp. We are advised that the management has no information to give out in connection with this matter at present. For some time past there has been a considerable amount of survey work done on various parts of the Midland Ry., and reports have been circulated in different localities as to the company's intentions. The management states in regard to all of them that nothing has been definitely decided. It would appear, therefore, that some general plan is being worked out for the betterment of the Midland Ry., and that no definite statement will be made until this has been adopted.

Toronto.—The company has abandoned its yards at Little York, east of Toronto, for terminal purposes, and concentrated all its work at the Mimico yards, west of Toronto. The Locomotive Foreman has been removed from York to Mimico; the engineers and firemen stationed at York will be moved to Belleville, and it is possible that the conductors and brakemen will be moved there also. Locomotive repair work heretofore done at York will be done at Belleville in future. W. D. Robb, Superintendent of Motive Power, was in Belleville, Sept. 3, making arrangement for the transfer. Trains running between Belleville and Hamilton will take on engines at these two points instead of Toronto as heretofore.

Guelph Station.—The question of the erection of a new station at Guelph has again been put off, and the whole question will be left open until the Neeve St. crossing matter is settled.

London Track Elevation.—The Mayor of London, Ont., had an interview with officials of the company at Montreal recently on the question of track elevation in London. In an interview, on his return, he said the company is still willing that the city should take the matter to the Board of Railway Commissioners, and that the company was willing to consider a bona fide offer from the city to bear a part of the cost of elevating the tracks. The company was opposed to giving consideration to any proposal for the erection of a union station. Third Vice-President Fitzhugh promised to go to the city about the end of Sept. to further discuss the matter with the council.

Windsor Water Front Property.—An offer has been made to the city of Windsor by the company to lease for park purposes the whole or any portion of the G.T.R. property on the river front from Hurley's dock to Piggott's lumber yard. The property, M. H. Cowan, the company's Assistant Solicitor, stated, was not for sale and any attempt to expropriate would be fought to the Privy Council.

Another Detroit River Tunnel.—A Detroit press dispatch says:—"That the G.T.R. will construct a four-track tunnel from the foot of Dequindre St., Detroit, beneath the Detroit River to Walkerville is now said to be practically assured." Among the statements made in support of this report is one to the effect that the company has secured an option for three years of a large area of land three miles back from the river at Walkerville, Ont., and another that nothing will be done to connect the G.T.R. tracks with the tracks of the Michigan Central Rd., which is constructing a tunnel under the river. It is also reported that the Wabash Rd. will join with the G.T.R. in the construction of the tunnel. A. B. Atwater, Assistant to the President, G.T.R., Detroit, stated that it was absurd to think that the G.T.R. would construct a tunnel. It already has one between Sarnia and Port Huron and the construction of a second one is not probable.

The Government Railways Managing Board is issuing a booklet enumerating the advantages offering for the establishment of industrial undertakings in the Maritime Provinces, along the route of the Intercolonial Ry.

POWER HOUSE.

2 300 k.w. generators, 3 phase, 60 cycle, 220 volt, alternating current. Direct connected to

2 500 h.p. gas engines, 150 r.p.m., using producer gas. Both generators and engines are manufactured by Westinghouse Co.

1 200 k.w. motor generator, 220 volt, direct current. Allis-Chalmers Bullock.

1 70 k.w. motor generator, 220 volt, direct current. Westinghouse Co.

2 105 k.w. generators, 3 phase, 60 cycle, 2,200 volts, alternating current. Direct connected to

2 14″×14″ single cylinder steam engines, 257 r.p.m. Robb Engineering Co.

1 2000 cu. ft. Cross compound Corliss steam two stage air compressor. Air cylinders 16″ and 30″; steam cylinders 16″ and 27″ × 36″ stroke. Can. Rand Co.

1 1000 gallon compound duplex steam pump: steam cylinders 12″ and 18½″; water cylinders 10″ × 12″ stroke.

1 300 gallon duplex steam pump. 8″×7″×12″. For providing the circulating water for gas engines and air compressor. Canadian Fairbanks Co.

2 water tube boilers, 5346 sq. ft. heating surface, 160 lbs. pressure; with chain grates. Babcock & Wilcox Ltd.

2 10″×6″×12″ duplex, outside packed plunger pumps for boiler feed equipped with governor in connection with feed water regulators on boilers.

1 vertical water tube feed water heater, 319 sq. ft. heating surface; capacity 21,000 lbs. water per hour. Babcock & Wilcox.

GAS PRODUCER HOUSE.

The producer gas plant has capacity of 1000 lbs. of coal per hour, or 1500 lbs. of coal for not more than three hours. The output is 55 cubic feet of producer gas, and 18 cubic feet of water gas per pound of coal. There is a holder for each kind of gas with a capacity of 10,000 cubic feet each.

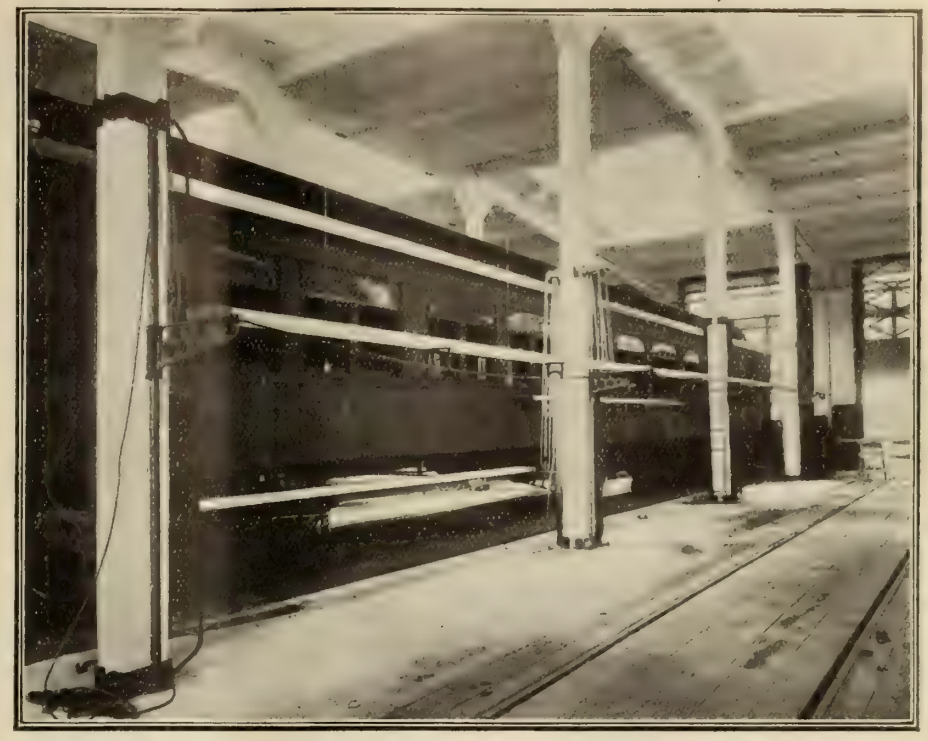
Care and Washing Out of Locomotiv Boilers.

By J. V. Jackson, Boiler Inspector, G.T.R.

Upon consideration of the subject of washing out boilers, it must be admitted that it is a very important part in the successful operation of any plant depending on boilers and steam power, and should, therefore, be given every possible attention by all concerned, to see that the work is done in a proper manner, and at the correct periods of time, or mileage run. This, however, is to be decided by some persons in authority, and governed by the conditions of water in the districts through which the different locomotives work. Before proceeding with the washing out of boilers I will first consider the reasons for requiring to have boilers washed out. It is well known that all waters contain impurities of some kind, more or less. Some of these impurities will settle as soon as they enter the boilers, and will there strongly adhere to the tubes and barrel plates, in this manner causing the barrel and tubes to block up quickly, interfering with the proper circulation of water through the boiler. There are other impurities, which are held in suspension, and will float to the surface of the water, when the water is sufficiently heated, in the form of a scum. Considerable of this matter is kept continually in motion by the circulation of the water inside the boiler, and, in this manner is carried back and forth to all parts of the boiler, and the gradual accumulation of these foreign substances leads to the formation of a coating of scale on practically all parts of the tubes and plates with which the water comes in contact. A very thin scale is considered to be beneficial to a boiler, seeing that it has the effect of preventing the corrossive action of the water upon the plates, tubes, etc., but when it becomes at all thick, the heat-conducting power of the plates to the water is greatly diminished, and it is stated that 1-16 inch thickness of scale calls for an increase of from 10% to 15% in fuel, whereas heavy scale forming on plates which are in direct contact with the flames from the furnace, may become a source of danger, since the heat from the fire is not carried to the water as fast as it should be and the plate does not get the necessary protection of the water, which should absorb this heat. In this manner the plates are liable to become overheated, and to corrugate between the stay bolts, also to start a large number of stays leaking. This result requires sending the boiler to the repair shops, for sheets to be straightened, and all stays to be made tight, which is very expensive, when considered in comparison with the cost of preventing the cause, which is by proper attention to regular washing out.



INTERIOR OF PASSENGER CAR REPAIR SHOP, I.C.R., MONCTON, SHOWING ADJUSTABLE PLATFORM FOR WORK ON OUTSIDE OF CARS.

In many cases where scale is allowed to accumulate heavily against firebox sheets, the sheet will crack out away from the staybolt holes, which sign, when found in the sheets of a firebox, is looked upon as strong evidence of the presence of heavy scale in the water space at this point. This scale should be at once removed, and sheets and blots made clean. If the cracks are bad, the defective portion of plate should be cut out, and a patch put on in place. These patches are usually fastened to the firebox sheets with patch bolts, which protrude through the sheet, and into the water space, from ¼ to ½ inch. These small projections into the water space being close together, act as good collectors of sediment, and often become one solid line of scale around the inside edges of the patch, thus destroying the protection given to the edge of patch by the water, and in a large degree being the cause of patch bolts leaking at the heads, and edges of patches burning and cracking badly, thus showing the necessity of keeping firebox sheets and bolts clean at all times, using the best means possible to accomplish this work, also, as a general rule, knowing where to look for accumulations of sediment, scale, etc. In the first place, we have the crown sheet, which, being directly over the fire, and flames impinging at a direct angle against the plate causes the water to evaporate very rapidly at this point and to disintegrate itself from any suspended matter with which it may then be impregnated; this matter may be precipitated to the sheet or pass towards the front end of the boiler as scum, but in many cases it is found that the staybolts supporting the crown have become coated with this sediment, from the given line of the working level of water down to and on the crown sheet, and, seeing that the crown sheet is the most important part of every locomotive boiler, too much care cannot be taken to seeing that it and all the staybolts supporting it are kept clean from scale and sediment. We also find considerable sediment at the tubes and sides of barrel of boiler, at the point of entrance of feed water from top checks, also along the bottom and sides of barrel to throat sheet, and side water legs, to which it is carried and deposited, due to the circulation of the water, and it will be found heavy at the bottom of the barrel, also

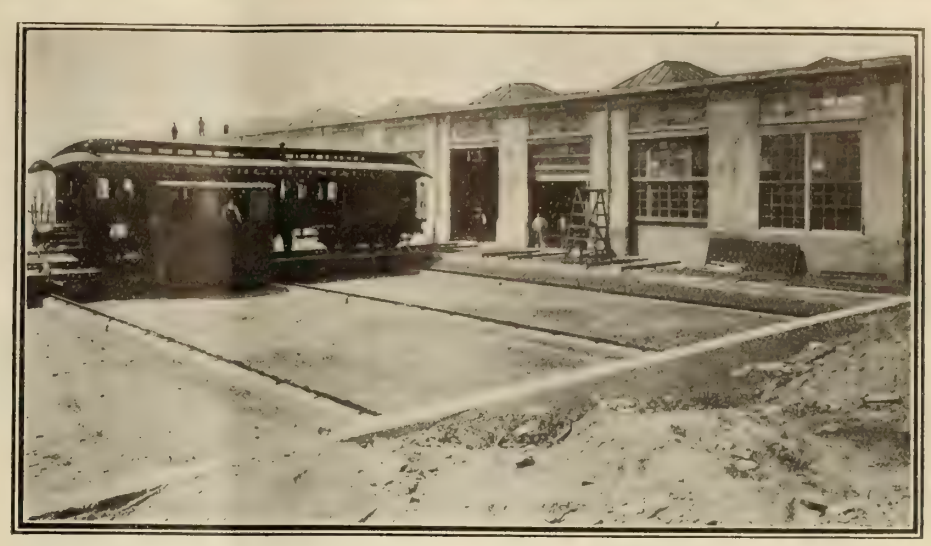
at lowest points in waterlegs, and near blow-off cock. In locomotives which are fitted with arch tubes, it will, in many cases, be found that the circulation, through these tubes, which is from throat sheet water leg to a high point of the door sheet, will carry and deposit scale and sediment on to the top of the fire-hole sleeve, there to be held by the stay-bolts, and to accumulate until the fire-hole seam becomes overheated at the top, and sprung, due to what is rightly termed mud burn. This seam then leaks badly, and is often chipped and caulked by boilermakers, without having the cause of same removed, therefore great care should be taken by those in charge of washing out, to see that no sediment is allowed to remain on top of the fire-hole sleeve to cause trouble. A large amount of scale and sediment is also usually found at the bottom of door sheet water legs and at back ends of side water legs, where the water is more liable to be quiet, and favorable to the settlement of scale. We also find the tubes become heavily coated with scale close to the firebox tube sheet. This is undoubtedly due to the rapid evaporation of the water at this point, and the close formation of the nest of tubes being very favorable to receive the impurities deposited from the water. This adheres strongly to the tubes, generally, as hard scale. We must also watch carefully along the side water spaces at the upper portion of the ogee, at this point the staybolts are irregular, and the water space becomes decidedly narrower, and any large pieces of scale thrown over from the crown or broken off the high part of sides, may become lodged on these bolts and collect sediment quickly, until there is a solid blockage between the sheets which will cause serious trouble.

In mentioning these several points to be carefully watched in locomotive boilers, I do not mean that other parts of the boiler do not become subject to the formation of scale and sediment, but wish to show that all available parts of a locomotive boiler should be thoroughly searched with a suitable light after having been washed out, to ascertain that the work has been properly done, and no scale or sediment is left in the boiler which can be removed. Taking into consideration the disposition of washout holes and means of access to the interior of the boiler for the purpose of washing out, we find it advisable to have several holes on each side of saddle sheet, to wash down the sediment from off the crown sheet, also to turn the water down on to the high part of side water legs, and to break up and remove any scale which may have become lodged amongst the bolts at these high parts; several holes are also required in back head to enable streams of water, and use of cleansing rods in various directions along crown sheet, also to wash down the back water space. Also several washout holes are required in side water legs, and at bottom of each corner. With simple engines there are holes wanted in bottom of front end tube sheet, to enable bottom of barrel being cleaned out, whereas, with the crossover or two cylinder compound locomotives, we find that washout holes in bottom of front end tube sheet cannot well be used to advantage, therefore it is necessary to have washout holes in the bottom of the barrel, there being usually two on each side of the boiler at points where they can be used to the best advantage, and do the best service. These holes are also finding favor, and are being put into boilers of simple locomotives.



TRANSFER TABLE BETWEEN PASSENGER CAR AND PAINT SHOPS, I.C.R., MONCTON.

INTERIOR OF FREIGHT CAR REPAIR SHOP, INTERCOLONIAL RAILWAY, MONCTON.

In washing a locomotive boiler it is advisable to first allow the steam pressure to blow off by blow-off lines from the locomotive, through car-heating steam hose to overhead pipes, which pipes are run from each pit in the locomotive house, to hot water well, where it acts as a heater to the water in the well at that time. This process is to be followed until the pressure in the boiler is reduced to about 10 lbs. gauge pressure, when hose connections from the blow-off cock of boiler to the blow-off pipes in pit can be made, and the hot water allowed to run from the boiler, and into the hot well or settling basin, until the boiler is quite empty, at which time all plugs may be removed from washout holes, and boiler be allowed to cool until a person can barely hold his hand upon the plates of same, or to about 160 degrees, at which time the boiler will be in a condition to be washed out with the water taken from the hot well for washout purposes, which well is kept at a lower temperature than the feed water well; but if this water is too hot for handling by men washing out the boilers, it may be tempered with cold water, by opening the cold water valve to pump, and combining the cold and hot water as required, directly before entering the pump, or the cold water may be turned on directly into the hot water well, until brought to the temperature required, about 130 degrees, for washout purposes, and be pumped from there direct to those washing out the boilers.

In this matter of cooling and washing there is little possibility of the so-called baking process, of turning settling sediment from the water into scale on sheets, when blowing off the water and preparing for washing out; also by washing out with hot water, the plates of the boiler are kept heated, and are thereby in a good condition to receive the hot feed water. This feed water is clean water which has overflowed from the washout hot well, which is, in turn, water that has passed through the settling basin, and over into the hot well for washout purposes, thus ensuring clean water for refilling boilers. But when washing the boilers it is necessary to start at the wash out holes on either side of the saddle sheet, and to clean everything possible in the form of scale and sediment from the crown sheet of firebox, by cleaning rods, and water from washout hose and nozzles, through these

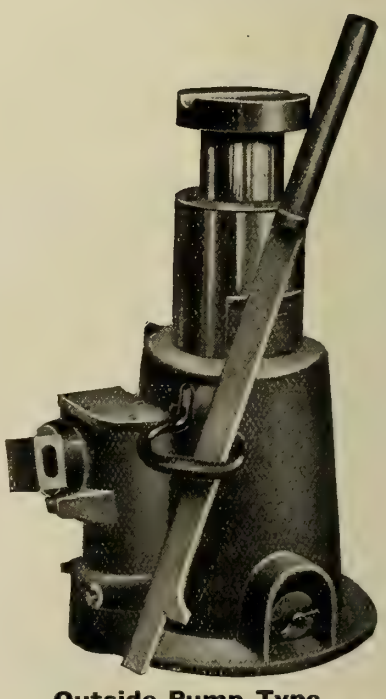
Inside Pump Type

Quick Action Hydraulic Jacks

Joyce-Cridland Hydraulic Jacks have a speeding device whereby they can be run quickly up to load, where the speeding device automatically cuts out, leaving only the power pump in action. This device adds no extra pump or complicated parts to the jack. These jacks are so built that they may be used in any position and the filling liquid will not escape. The outside pump type has a short barrel, adapting it for use in cramped quarters.

Full description and explanation of the working parts of the Joyce-Cridland Hydraulic Jacks are given in Bulletin 33.



Outside Pump Type

A. R. Williams Machinery Co., Limited

Toronto, Winnipeg and Vancouver. WILLIAMS & WILSON, Montreal

side holes, thereby throwing the loose sediment down into the water legs, from whence it can be easily removed, and from these holes the crooked nozzle should be turned down on to the bolts at top of side water spaces, to be sure of this being well cleaned of any loose sediment. The water can also be thrown over on to the tubes to wash the same, from the front holes in saddle sheet. Next get into the cab, to wash and clean crown sheet from the holes in back head sheet, and to turn the water from the crooked nozzle down into the back water-leg to clean the bolts and sheets of any loose sediment. Next go to the front end of barrel, and to barrel holes under the barrel ,and by the proper use of long barrel cleaning rods, and short and long and crooked nozzles, with a continued good pressure of same, say 100 to 150 lbs. to properly clean the barrel of all mud and scale, sending same down into the water legs of boiler. Here at the water leg holes, the sediment should be broken up and cleaned out from the boiler as much as possible with long, short, and bent cleaning rods furnished for this purpose, and then the water should be turned on from the highest holes in water legs first, and bolts, etc., washed in all directions, and from these high holes to gradually work downward at each hole until the lowest point of the boiler has been washed clean, being sure to keep the low holes clear at all times when washing out, to allow the soft mud and sediment to freely escape with the water. At this point it is necessary that the leading boilermaker should examine the inside of the boiler, wherever accessible, with a long search-light to see that no sediment or scale is allowed to remain lodged inside, and to ensure the boiler being properly cleaned before refilling, because any neglect on the part of the washer-out is likely to cause more work for the boilermaker and more expense for the company, therefore the boilermaker should see that the boilers are kept clean. After placing all plugs in washout holes in a proper manner, we will go back to the feed water hot well, and find the water, which is kept from 170 to 200 degrees in the well, is fed by gravity to a feed pump, and from there is forced through a superheater (which is heated by exhaust steam from stationary engines, air compressors and pumps which in turn exhaust into the hot well) and through refilling lines to the boiler, thereby enabling steam to be got up from same in a very short notice, and the boiler is not allowed to get cold. The process of washing out locomotive boilers as stated in this article will take about 90 minutes to blow off and take out plugs, and about four hours on an average from engine arriving on washout pit, to be washed out, refilled, and made ready to be fired up for service.

The foregoing paper was read before the Central Railway and Engineering Club recently.

Ontario Railway & Municipal Board.—The fire at the Parliament Buildings, Toronto, Sept. 1, destroyed a portion of the west wing, in which the Board's offices were located. The offices were not burned, but with their contents were much damaged by water and smoke, and as a considerable portion of the wing will have to be rebuilt, the Board has rented offices in the Manning Block, Queen St. West, and has removed there.

The Mount Royal Construction, Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $20,000 and offices at Montreal, for the purpose of transacting a general contracting business and in connection therewith to carry on a number of allied businesses. The provisional directors are: A. Laurier, L. T. A. Tradeau, Z. Filion, J. P. Laurier, Montreal; L. J. Trudeau, St. Remi, Que.

Railway Rolling Stock Notes.

The Temiskaming and Northern Ontario Ry., between Aug. 12 and Sept. 17, added two switching locomotives to its rolling stock.

The C.P.R., between Aug. 14 and Sept. 10, ordered the following rolling stock: 250 box cars of 30 tons capacity, eight sleeping cars, three flangers and three steel snow plows from its Angus shops, Montreal, and 10 vans from its Farnham shops, Que.

The C.P.R., between Aug. 14 and Sept. 10, received the following additions to rolling stock: 84 box cars, six observation cars, two dining cars, three combination first class and smoking cars, and five D10 locomotives from its Angus shops, Montreal.

The C.N.R., between Aug. 15 and Sept. 15, received the following additions to rolling stock:—101 box cars, 5 first class coaches, 2 baggage cars and 4 cabooses from Rhodes, Curry Co., Amherst N.S.; 300 box cars from the Canada Car Co., Montreal; 40 box cars from Crossen Car Manufacturing Co., Cobourg, Ont.; 2 baggage and mail cars and four combined second class and baggage coaches from Silliker Car Co., Halifax, N.S., and 2 baggage and mail cars.

The Silliker Car Co., Halifax, is building a combination passenger and sleeping coach and 10 flat cars, for the Anglo-Newfoundland Development Co.; and 2 motor cars for the Halifax Electric Tramway Co. Between June 15 and Sept. 18, it delivered 27 box cars, 18 flat cars and one combination passenger and sleeping coach to the Anglo-Newfoundland Development Co., and 2 60 ft. baggage and mail cars, and 4 70 ft. combination second class and baggage cars to the C.N.R.

The G.T.R. has ordered 15 consolidation locomotives from the Montreal Locomotive Works. Following are chief particulars:—

Weight on drivers	184,000 lbs.
Total weight	211,200 lbs.
Cylinders	22½ × 35" and 32";
Drivers, diam.	63"
Boiler type	extended wagon top.
Boiler pressure	210 lbs.
Heating surface, total	2,925.3 sq. ft.
Tubes, no. and diam.	353, 2"
Tubes, length	15 ft.
Firebox	96⅞" × 75¼"
Grate area	50.62 sq. ft.
Capacity, water	7,000 U.S. galls.
Capacity, coal	10 tons.

The G.T.R. has ordered 25 mogul locomotives from the Canadian Locomotive Co., Kingston, Ont., of which the following are general particulars:

Wheel base of engine, rigid	14' 0"
Wheel base of engine, total	22' 7"
Wheel base of engine and tender	50' 3"
Height of engine	14' 8"
Heating surface, firebox	160.2 sq. ft.
Heating surface, tubes	1,551.5 sq. ft.
Driving wheels, diam.	63"
Driving wheel centres	Cast steel
Driving journals	9" by 10"
Cylinders	19" by 26"
Boiler, type—Extended wagon top, radial stayed.	
Boiler, pressure	180 lbs.
Tubes, No. and diam.	266, 2"
Tubes, length	10' 10"
Air brakes	Westinghouse ET.
Weight of tender loaded	130.800 lbs.

In reference to the C.P.R. observation cars, particulars of which appeared in our July, Aug. and Sept. issues, our attention has been called to a feature in which they are said to eclipse all other observation cars on American lines, viz., the extreme height of the observation windows, which gives 34 ins. of clear window between the bottom of the window shade, when raised as far as possible, and the bottom portion of the window. Our correspondent says this is 10 ins. more clear space than he has seen on any other cars in America. He adds: "I have tested the observation room under every condition of light and it is practically perfect as a means of viewing scenery from a train."

National Transcontinental Railway.

The estimates for work done on the N.T.R. in New Brunswick during August amounted to $515,768. The Commissioners have asked for tenders for the supply and erection of steel bridges for the line in New Brunswick as follows: over Cains River, to be completed by Dec. 1; over the South West Miramichi River, to be completed by Mar. 15, 1910; two over the Juniper brook, to be completed by April, 1910; over the Odell Brook, to be completed by April, 1910.

As a result of a meeting on Sept. 7 between the Minister of Railways, the three engineers appointed to design the new Quebec bridge, and the three other engineers appointed lately to consult with them, it was announced that practically all the vital points as to the style of structure, etc., had been decided on, and that the preparation of plans would be gone on with at once. Plans for both cantilever and suspension type of bridge will be prepared simultaneously, and tenders called for both. The general principles already decided upon will make the bridge a much more substantial structure than the fallen one. It will be 150 ft. above high tide, and if the cantilever type is chosen will be of the straight type, without the arch effect of the old structure. It will be 85 ft. wide from centre to centre of trusses, or 24 ft. wider than the old bridge. The increased width will give ample room to accommodate the steam and electric railway tracks, roadway, footpaths, etc. The centre span will be reduced from 1,800 ft. to 1,717 ft. This will be accomplished by the erection of another pier on the Quebec side, 100 ft. from the existing deep water pier. In addition to this, the pier on the south side will be enlarged to allow for the greater width and bearing power required. It has also been decided to use a considerable amount of nickel steel in the construction of the new bridge. The Minister of Railways said he was hopeful of an early start being made with constructon, but he could not say when tenders would be asked.

J. T. Davis, of the contracting firm of M. P. and J. T. Davis, stated Sept. 1 that he had been instructed by the Government engineers to go ahead with the work of construction of the terminal lines at the Sillery end of the Quebec bridge at once. There had been some changes made from the plans as arranged by the old bridge company. There would not be much work done this year, as the rock cutting was very heavy.

J. G. Scott, ex-General Manager of the Quebec and Lake St. John Ry., has recently completed a trip over the lines under construction in the St. Maurice River valley. He says the railway from Hervey Jct., the point of junction with the Canadian Northern Ry., to La Tuque is completed, with the exception of a steel viaduct not far from the latter point. This bridge which is being constructed by the Dominion Bridge Co., will be 3,000 ft. long and 180 ft. high. Approaching La Tuque, some very heavy work, including some tunnels, had to be done in order to retain the limit of 0.4% which the specifications exact as the heaviest gradient allowed against eastbound traffic. The roundhouse, yards and divisional workshops are located about a mile west of the town on account of the gradient. Leaving La Tuque, the line crosses the Bostonnais and Croche Rivers in the next five miles, and then crosses to the west bank of the St. Maurice River. The bridge across the St. Maurice consists of six spans of steel on concrete piers and abutments. The piers are protected by wooden piers a few hundred feet higher up the river so as to break up any ice flowing in the spring. From La Tuque to Vermillion, over 30 miles, the line runs along the west bank of the St. Maurice

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

River at a considerable elevation. The track at present terminates at Vermillion. Beyond this point to Weymontachene, 54 miles, the line is nearly ready for the steel. Leaving the St. Maurice at this point the line strikes westward towards Lake Abitibi, and grading operations are being actively pushed on the first 25 miles. Beyond this point the work being done is confined to engineering and clearing the right of way.

West of Lake Abitibi, it has been announced that the Ontario Government has decided to retain the town sites along the railway, and to dispose of the lands for the benefit of the Provincial Treasury.

The Commissioners have asked for tenders for the supply and erection of the following steel bridges on District D, which extends from Lake Abitibi to beyond the crossing of the Mattagama River: Over Circle River, to be completed by July, 1910; over Low Bush River, to be completed by June, 1910; over Brule Creek, to be completed by April, 1910; over Frederic House River, to be completed by April, 1910; over Buskego River, to be completed by April, 1910; over Driftwood River, to be completed by May, 1910; over Mattagama River, to be completed by June, 1910.

Work on the 75 mile section north of Lake Nipigon is reported to be nearly completed. The contract is mostly muskeg fills, and it is expected that track will be laid by the end of the year. The Nipigon Construction Co. has the contract.

GRAND TRUNK PACIFIC RAILWAY.

On Sept. 7 a regular train service was put on as far as Wainwright, 110 miles west of Scotts, where the service had previously ended. The service through to Edmonton was put on Sept. 15.

The bridge illustrated on this page spans the North Saskatchewan River valley at Clover Bar crossing, on the G.T.P.R. main line, 786.5 miles west of Winnipeg and about 8 miles east of Edmonton. The foundations were made in the usual way by means of open coffer dams and concrete forms, and the noses of the river piers were provided with steel protectors. Five hundred and twelve piles were used only in the foundations of pedestals nos. 2, 3, 4, 5, 18, 19 and 20. The substructure of plain concrete comprises two wing abutments, 14 pairs of pedestals and 4 river piers, and the total amount of concrete used was 22,000 cu. yds. The area at the base of each of the 4 river piers at foundation level is 3,772 sq. ft.; average height 120 ft., each containing about 4,160 cu. yds. of concrete. The superstructure is composed of two 50 ft. end spans, eight 50 ft. and four 40 ft. intermediate spans, resting on 7 steel towers; three 225 ft. deck truss spans resting on piers and two 150 ft. deck truss spans resting on pier and tower. The amount of steel in the superstructure is about 2,100 tons. The total length of bridge between parapets is 1,655.5 ft., and the distance from base of rail to low water is about 136.5 ft. The average height between base of rail and ground line is 87 ft. Work on the substructure was begun Dec., 1906, and the entire structure was completed Jan., 1909.

We are advised that a contract has been awarded to the J. D. McArthur Co., Winnipeg, for the construction this year of a branch line towards Calgary, starting from Tofield, Alta. The length of line to be constructed under the contract is 50 miles. We are further advised that there is no foundation for the report, referred to in our last issue, that it was intended to start work this year on the construction of a branch from Justice to Brandon, Man. (Sept., pg. 653.)

At the Prince Rupert end of the line a cargo of steel rails arrived Sept. 3 from Sydney, N.S., and another is en route. There is reported to be a serious lack of labor in Northern British Columbia, and the contractors and the company are considering the advisability of asking the Dominion Government to permit the importation of Chinese and Japanese labor to enable them to complete the line in time. An Ottawa press despatch, Sept. 15, says it is not likely that anything will be done in regard to this matter until there can be a full meeting of the Cabinet, and further that it is not likely that the Government will grant the request. It is expected to get the first section of the line easterly from Prince Rupert completed this year. Already the contractors who have completed their work have been moving on to the second section, extending from the Copper River to Aldermere, in the Bulkley valley, 135 miles, for which a contract has been let to Foley, Welch & Stewart. E. J. Chamberlin, General Manager, stated Sept. 1 that he expected that a start had then been made on the heaviest work on the whole contract, three tunnels near Kitsalas Canyon. They will be 400, 800 and 1,400 ft. long respectively. Work will be commenced at once on the 2,500 ft. tunnel 19 miles beyond Hazelton. An aerial tramway is being installed at Kitsalas Canyon to handle supplies and material around a dangerous section of the river.

Speaking at Vancouver, at the end of Aug., C. M. Hays, President G.T.P.R., said the G.T.P. would undoubtedly be in Vancouver. There must be railway connection between Vancouver and the north. The people will not be satisfied with a line only to Prince Rupert, but will desire it pushed further on. The G.T.P.R. charter provided that at the proper time it was to be extended to the Yukon.

E. J. Chamberlin, General Manager, who was with the President and the English directors, said that the survey work from Kamloops to Vancouver would be rushed; the work north of Kamloops on the proposed line was nearing completion. It was proposed to reach tidewater through the Fraser River Canyon. In regard to terminals, the President desired to have joint terminals and from that rose his willingness to join forces with the Great Northern Ry.

GRAND TRUNK PACIFIC RAILWAY BRIDGE OVER NORTH SASKATCHEWAN RIVER AT CLOVER BAR, ALTA.

On Sept. 1 it was reported that there were about 40 miles of track to be laid on the line east of Winnipeg to connect up with the Grand Trunk Pacific Ry. Lake Superior branch, and thus give a through connection from beyond Edmonton, Alta., to Fort William, Ont. It is expected that this will not be laid until the beginning of Oct. on account of the scarcity of labor. Tracklaying has been delayed on account of the non-completion of the bridge over the Wabigoon River, north of Dryden. In consequence of this delay in the completion of this section of the line it is reported that the G.T.P.R. has made an arrangement with the Canadian Northern Ry. to carry the grain brought into Winnipeg from the West to Fort William.

The first divisional point on the line east of Winnipeg has been named Redditt. It is situated in Ontario, about 12 miles east of the Winnipeg River, and 122 miles from Winnipeg. A roundhouse and other terminal buildings will be constructed; the work is to be started at an early date. The second divisional point will be at Rowell, directly north of Dryden. The most important of the town sites on this section of the line will be at Superior Jct.

The Commissioners are considering tenders for the excavation and back filling of a pipe line from the Red River to the locomotive shops, etc., east of St. Boniface, Man., the work to be completed by Dec. 31.

The Board of Railway Commissioners passed order 7881, Aug. 27, making regulations for the carriage of explosives by railways. The regulations are the same as those promulgated by the Interstate Commerce Commission, which, in the main, adopted the code prepared by the American Railway Association.

The C.P.R. grade reduction work between Hector and Field, B.C., having been completed, trains have been running over the new line since Aug. 25 and are governed by special rules regarding the electric staff system. The former special rules governing the movement of trains between Hector and Field have been cancelled and the company's standard and air brake rules now apply between those points.

Cameron-Chappelle, Ltd., has been incorporated under the Dominion Companies Act with a capital of $80,000 and offices at Ottawa, Ont., for the purpose of carrying on throughout Canada and elsewhere the business of contractors. The company is authorized to enter into contracts or agreements for the construction of lines of railway, telegraphs, canals, bridges, etc. The provisional directors are: C. S. Cameron, J. W. Chappelle, Port Arthur, Ont.; W. A. Cameron, A. L. McDougall, J. A. Cameron, Ottawa, Ont.

"AMERICAN"

COMBINATION HAND POWER AND GASOLINE POWER SECTION CAR.

A FAIRBANKS MORSE SECTION CAR will prove itself the best investment on the road. The men start to work strong and fresh and will do a better day's work when they know they can rest on the way back. Sections can be lengthened. Speed 15—18 miles an hour. 5 h. p. air cooled gasoline engine.

THE CANADIAN FAIRBANKS CO., LTD.

MONTREAL ST. JOHN, N.B. TORONTO WINNIPEG CALGARY VANCOUVER

C.P.R. Annual Report.

Following is the 28th annual report addressed to the shareholders over the signature of the President, Sir Thos. G. Shaughnesssy:

The accounts for the year ended June 30, 1909, show the following results:

Gross earnings		$76,313,320 96
Working expenses		53,357,748 06
Net earnings		$22,955,572 90
Net earnings of steamships in excess of amount included in monthly reports		399,909 50
Interest on deposits and loans	$545,098 76	
Interest due from Duluth, South Shore and Atlantic Ry. on consolidated bonds held by the Co.	$604,280 00	
Less advanced by company	464,280 00	
	140,000 00	
Interest from Minneapolis, St. Paul & Sault Ste. Marie Ry. on bonds held by company	159,720 00	
Interest from Mineral Range Rd. on bonds held by company	50,160 00	
Interest from Montreal & Atlantic Ry., and on other bonds held by company	58,484 70	
Dividend on St. John Bridge & Ry. Extension Co. stock held by company	50,000 00	
Dividend on Canada North-West Land Co. stock, held by company	28,125 00	
Dividend on Alberta Ry. & Irrigation Co. stock, held by company	69,376 94	
Dividends on Minneapolis, St. Paul & Sault Ste. Marie Ry. preferred and ordinary stocks held by company	805,613 00	
		1,906,578 40
		$25,262,060 80
Deduct fixed charges		9,427,032 74
Surplus		$15,835,028 06
Deduct amount transferred to steamship replacement ac't.	$800,000 00	
Contribution to pension fund	80,000 00	
		880,000 00
		$14,955,028 06
From this there has been charged a ½-yearly dividend on preference stock of 2%, paid April 1, 1909.	$1,053,933 32	
And a ½-yearly dividend on ordinary stock of 3%, paid April 1, 1909	4,500,000 00	
		5,553,933 32
		$9,401,094 74
From this there has been declared a second ½-yearly dividend on preference stock of 2%, payable Oct. 1, 1909	$1,053,933 32	
And a second ½-yearly dividend on ordinary stock of 3%, payable Oct. 1, 1909	4,500,000 00	
		5,553,933 32
Leaving net surplus for year		$ 3,847,161 42

In addition to the above dividends on ordinary stock, 1% was declared from interest on land funds.

The working expenses for the year were 69.92% of the gross earnings, and the net earnings 30.08% as compared with 69.47 and 30.53% respectively in 1908.

Four per cent. consolidated debenture stock to the amount of £2,727,340 was created and sold, and, of the proceeds, £129,848 was used to increase the fleet of steamships on the Pacific coast; £1,861,835 was applied to the construction of branch lines, and the balance, £735,-657, was devoted to the acquisition of the bonds of other railway companies whose lines constitute a portion of the system, the interest on which had been guaranteed by the Company.

Four per cent. preference stock to the amount of £800,000 was created and sold, one-half of the proceeds being used for the purchase of a controlling interest in the shares of the Alberta Ry. and Irrigation Co., and the balance to meet capital expenditures that had previously been sanctioned.

A guarantee of interest was endorsed on 4% consolidated mortgage bonds of the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co. to the amount of $1,600,-000, issued and sold to meet the cost of constructing 80 miles of railway added to that company's system.

The total area of agricultural lands sold during the year was 376,046 acres, at an average price of $13.52 per acre, but this included 69,963 acres of irrigated land that brought an average of $24.71 per acre. If this area be deducted from the total sales, the average price realized from the balance of the lands was $10.96 per acre. The irrigation canals and ditches in what is known as the Western Block, containing approximately 995,000 acres, of which 353,000 acres are irrigable, are now practically finished, and, while the cost of the work was in excess of the original estimate, the Directors are very much gratified by the result. It is now apparent that within the next few months all the lands in this block will have been sold at satisfactory prices, and another season most of the block will be occupied by settlers. Thus you will receive a large volume of traffic from an area on the main line east of Calgary, containing 1500 square miles, that was previously considered unfit for agricultural purposes. The Directors are now considering the desirability of extending the irrigation system to the Central Block of about one million acres.

The Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., having acquired a majority of the outstanding shares of the common stock of the Wisconsin Central Ry. Co., made an agreement for a lease of that company's railway for 99 years, undertaking to pay by way of rental 4% per annum on the preference stock, amounting to $12,500,000, of which $1,232,895 is in the company's treasury. It is evident that this transaction will materially benefit the M.,S.P. & S.S.M. Ry. Co., in which the C.P.R. has such a substantial interest.

In January last the Directors sold in the market the small residue of the last issue of common stock, amounting to $3,984,000. The sale yielded a premium of $2,394,779, which will be used for additions and improvements to the company's property.

The Directors desire approval of the investment of $5,172,900 of the surplus earnings in 34,486 shares of the common stock and 17,243 shares of preferred stock of the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., subscribed for at par when that company increased its capital stock, this being the C.P.R. pro rata proportion of the issue.

The Company has acquired all the capital stock of the Orford Mountain Ry. Co., whose railway connects with its system at Eastman, Que. The Orford Mountain Ry. Co. owns 58½ miles of railway, against which there are outstanding bonds at the rate of $12,000 a mile, or $702,000 in all. The consideration for the transfer of the stock and a lease of the railway for 999 years is the guarantee by the C.P.R. of the payment of the interest on these bonds at the rate of 4% per annum. The lease will be submitted for approval.

In the last three years the C.P.R. system in Canada has been extended 1,101 miles, viz.: from 8,777 to 9,878 miles, and work is progressing on 403 additional miles, most of which will be completed this autumn. A considerable portion of this mileage was constructed through new and sparsely settled districts where railway communication was required to encourage settlement, and, while satisfactory progress is being made, a little time must necessarily elapse before the territory served by the lines will be so developed as to yield the average amount of traffic, but meantime, of course, the additional mileage has increased the fixed charges and operating expenses.

The year was a particularly trying one to those engaged in the steamship trade, and there was a shrinkage in the company's net revenue from that source of over $700,000. Nevertheless the directors decided to appropriate to the steamship replacement fund the same amount as in 1908, namely, $800,000.

The undermentioned directors will retire from office at the approaching annual meeting. They are eligible for re-election: D. McNicoll, C. R. Hosmer, Hon. R. Mackay, J. Dunsmuir.

CONDENSED BALANCE SHEET.

Railway and exquipment		$302,196,637 71

The Daldry Engineering and Construction Co., Ltd., has been incorporated under the Manitoba Companies' Act with a capital of $20,000 and offices in Winnipeg, for the purpose of carrying on the business of contractors of all kinds of work and construction. The provisional directors are: C. G. Stewart, F. A. Tallman, J. E. Robertson, A. H. S. Murray and H. M. Kennedy, Winnipeg.

A party of editors of U.S. agricultural papers, which recently toured the Canadian Northwest, at the invitation of the Canadian Northern Ry., in expressing their appreciation for the courtesies extended to them, state:—"Not only have we viewed a long succession of rich farming districts, with bumper crops of wheat, oats and barley, but also the evidences of one of the most remarkable instances of railway building in history. No such instance of rapid and substantial railway development and opening of vast tracts of agricultural land to the people is on record, even in this day of quick and gigantic accomplishment."

C. P. R. Betterments, Construction, Etc.

Tobique and Campbellton Ry.—At the last session of the New Brunswick Legislature an Act was passed repealing sections 5 and 8 of the act of incorporation, and substituting others therefor. The new section 5 fixes the capital stock at $89,000 and the new section 8 authorizes the company to issue bonds or debentures to the extent of $15,000 a mile of railway to be constructed.

Aroostook Jct., Me.—We are advised that the company has so strengthened its bridges and track north of Woodstock, N.B., that this fall it will be able to run its heavy locomotives to Aroostook Jct., so that instead of running north and south from Woodstock, as at present, they will run through from McAdam to Aroostook Jct. This will cut Woodstock out as a divisional point, simply leaving it a turn-around-point for trains to and from Fredericton over the Gibson branch. At present the company is erecting a 6-stall standard no. 3 locomotive house, putting in a 70 ft. turntable, erecting a bunk house for engineers, a large boarding house for the employes and two double cottages for the accommodation of employes who are to be removed there on the completion of the work. The company is also increasing the yard accommodation at Aroostook Jct. by extending three through sidings, building two new through sidings and two running tracks, and is erecting a standard no. 2 freight shed.

Presque Isle, Me.—A contract has been let to A. E. Hamilton for the erection of a new freight shed, 120 by 30 ft., at Presque Isle, Me.

Sherbrooke, Que.—Work for the new buildings which the company has undertaken to erect at Sherbrooke, Que., is going on rapidly. The first structure to be erected is the coal chute. It is 28 by 31 ft., is 60 ft. high, and stands between the two tracks so that the engines can be loaded on either side at the same time. The rise from the tracks for the cars is 6 ft., and the coal being dumped out will be carried upwards by means of elevator buckets. The foundation will be of reinforced concrete and the superstructure of iron and spruce. The locomotive house will be of concrete reinforced, and will have accommodation for six locomotives. At the rear of the locomotive shed will be a machine shop and offices for the locomotive foreman, etc. A store and oil house will be erected in close proximity to these buildings. The present coal chutes will be removed and the site used as part of the site for the new passenger station, which will be 110 by 35 ft. The foundation will be of concrete, with brick walls and slate roofing. There will be four entrances to the building, which will be laid out very much in the style of the present union station. A platform, very much longer than the present one, will be erected.

Northern Colonization Ry.—A no. 4 standard passenger station at Val Barrette, on the extension of this line from Nomining, Que., has been completed.

The Chief Engineer of the Board of Railway Commissioners recently made an inspection of the completed portion of the extension of this line from Nomining towards Maniwaki, the present terminus of the Ottawa and North Western Ry. up the Gatineau Valley. The line has been constructed as far as Duhamel, about 25 miles northwest of Nomining. It is expected that the extension to Maniwaki will be completed next summer.

Windsor St. Station, Montreal.—A contract has been let to C. E. Deakin for the construction of the pier foundations for the enlargements planned at this station. Work was started Sept. 13. The foundations will consist of concrete pillars sunk down to the solid rock, which is at a depth varying from 15 to 40 ft. It is desired to have the piers completed so that the actual work of erecting the building may be started at the earliest possible moment in the spring.

Ottawa Northern and Western Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of the authorized extension of this line from the present northwesterly terminus at Waltham, Que., crossing the Ottawa River at Allumette Island, to Pembroke, thence northwesterly passing south of Lake Nipissing to Sault Ste. Marie; also for the construction of a branch from Waltham northwesterly through the province of Quebec to Pontiac county; also for the construction of a line from Shawville, Que., westerly across the Ottawa River, through the county of Renfrew to Pembroke, Ont.

Wharf at Brockville, Ont.—The company, as lessees of the Brockville and Ottawa Ry., has deposited with the Department of Public Works at Ottawa plan and description of the site of an alteration in a wharf extending westerly from the east limit of Ferry St., Brockville, for which the approval of the Government is asked.

Kingston and Pembroke Ry.—We are advised that beyond ballasting and generally putting the line in better condition, the company has not any extensions in contemplation, nor are any improvements in progress.

Campbellford, Lake Ontario and Western Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of a line from the C.P.R. between Blairton and Ivanhoe stations, Ont., southwesterly through Peterborough, Hastings and Northumberland counties to Cobourg, thence westerly and northwesterly through Northumberland, Durham, Ontario and York counties to the C.P.R. between Locust Hill and Leaside Jct. stations, passing through Campellford, Warkworth, Cobourg, Port Hope, Newcastle, Bowmanville, Oshawa and Whitby.

Georgian Bay and Seaboard Ry.—Plans have been filed at the registry office at Lindsay, Ont., for a section of this proposed railway from Georgian Bay to a junction with the main line in the vicinity of Peterboro, Ont. The line has been constructed from Victoria Harbour to Coldwater, where it joins the C.P.R. Toronto-Sudbury line, and the plans now deposited are for the portion of the line in Victoria county.

West Toronto Improvements.—We are advised that the following buildings are under construction or will be erected this year at West Toronto: Extension to erecting and machine shops, 128 ft. by 139 ft. 5 in.; of concrete, brick and steel construction. Office building for car checkers, etc., 30 by 50 ft., one story brick building. Enlargement of 8-stall locomotive house, by the addition of an additional three stalls, each 80 ft. long, concrete and steel construction. Locomotive foreman's office, 24 by 24 ft., one story wooden building.

West Ontario Pacific Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of a line from London, Ont., northerly through Middlesex, or Oxford, Perth, Huron and Bruce counties to Lake Huron, in Bruce county.

Walkerton and Lucknow Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of the authorized extension of this line from Lucknow to Wingham, Ont., and of a branch from Teeswater northwesterly to Kincardine, Ont.

South Ontario Pacific Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of lines from Woodstock, Ont., through Brantford, thence through Hamilton to the Niagara River, where connections may be made by ferry or

bridge with railways in the U.S. from Hamilton to near Cooksville or Toronto, with extensions from some point of the authorized line by way of Embro and St. Marys to Lake Huron between Bayfield and Kincardine.

White Water, Man.—Tenders are under consideration for about 13,000 cubic yards of grading for a reservoir near White Water, Man.

Saskatoon to Wetaskiwin.—Tracklaying was started at the Hardisty end of the Wetaskiwin branch Aug. 27, the gang working easterly to meet the one working westerly from Sedgewick. The track is being laid with 85-lb steel, and it is expected that the work will be completed by the end of Sept., and that ballasting and other work will have been so far completed by Nov. 1 that a regular train service will be put on.

Lethbridge-MacLeod Cut-off.—Ballasting was started on this cut-off Sept. 1 and, as from 120 to 150 cars of ballast a day was being laid, the work was to be completed by the end of the month. In connection with the cut-off a new material yard will be put in seven miles west of Lethbridge which will handle all materials for the new line at present under construction northerly as far as Carmangay.

Strathcona-Edmonton Bridge. — The proposed bridge over the Saskatchewan River to carry the projected line to connect the C.P.R. line, now terminating at Strathcona, with Edmonton, Alta., will have a length, exclusive of approaches, of 2,684 ft., a width of 25 ft., and the floor of the bridge will be 295 ft. above high water mark. These dimensions are as the bridge is designed for a railway bridge exclusively, and the cost of the same is estimated at $842,727. The desirability of constructing the bridge so as to acommodate general traffic has been under consideration by the company and the city council of Edmonton for some time. The estimated cost of the bridge designed to accommodate both railway and general traffic is $1,428,793.

Fernie Yards.—The company is making extensive changes in the yards at Fernie, B.C. Several new sidings are being laid on the ground formerly used as a baseball and recreation park.

British Columbia Southern Ry.—The Board of Railway Commissioners has passed an order approving of the location of this railway from Michel to Kananaskis branch, mileage 30 to mileage 37.84. We are advised that no work has yet been done on this branch.

Esquimalt and Nanaimo Ry.—Tenders are under consideration for the grading and bridging on the Alberni branch from mileage 108 to Alberni, 27.5 miles. This section extends from the Little Qualicum River to Alberni. Some of the track has already been laid on the first section of the extension, at the Wellington end. Grading has been completed from Wellington to Nanoose, 12 miles, and from near Nanoose to French Creek, 13 miles. Between these two points there is some rock cutting that is not completed. On the old portion of the line between Victoria and Nanaimo the fencing and other work at Victoria West has been completed and the bridge has been once more thrown open for pedestrian traffic.

Puget Sound.—With reference to press reports that the company was about to construct a line to Puget Sound, D. McNicoll, Vice President, stated at Seattle, Aug. 30, that the C.P.R. had no intention of constructing such a line as long as the present tariff agreement with the Northern Pacific Rd. proved profitable.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—It has been announced that the Wisconsin Central Rd. shops at Fond du Lac, Wis., are to be enlarged and modernised. The work will include the construction of a new foundry and require considerable new machinery equipment. (Sept., pg. 639.)

Railway Commissioners' Traffic Orders.

Summaries of other traffic orders are given on another page under "Orders by Railway Commissioners":—

M.C.R. SWITCHING CHARGES AT ST. THOMAS.

7767. Aug. 7.—Re application of Canada Iron Corporation, Ltd., for order directing the Michigan Central Rd. Co. to refund $348, being amount of overcharge for tolls charged for switching cars to and from the applicant's works in St. Thomas, Ont., together with interest at 5% per annum on the excessive payments from the date of each payment down to the date the refund is made. Upon reading the application, the answer of the M.C.R. Co. and the report of the Chief Traffic Officer of the Board, it is ordered that the legal switching rate chargeable upon cars switched by the M.C.R. for applicant from the G.T.R. tracks to the applicant's works between July 19, 1907, and June 4, 1908, inclusive, was $3 a car; and it is further ordered that the M.C.R. Co. be authorized to refund to the applicant, upon the aforesaid cars switched for it by the railroad company in the period July 19, 1907, to June 4, 1908, the difference between the legal rate of $3 a car and the rate of $6 a car as charged.

RATES ON CORN AND CORNMEAL.

7768. Aug. 7.—Re complaint of C. W. Stewart, of St. John, N.B., that he is unable to market cornmeal in consequence of an alleged discrimination in favour of his competitors and to his disadvantage, upon hearing the complaint at St. John, N.B., on Jan. 19, 1909, in the presence of complainant and counsel for the C.P.R. Co., and what was alleged, and upon the report of the Chief Traffic Officer of the Board, it is ordered that the complaint be dismissed.

BINDER TWINE RATES FROM WELLAND.

7897. Aug. 10.—Re complaint of the Plymouth Cordage Co., of North Plymouth, Mass., and Welland, Ont., alleging that rates charged by the G.T.R., the M.C.R. and the Wabash Rd. on binder twine, in carload, from Welland to Canadian points west of Welland were unjustly discriminatory with respect to rates charged on the same article from Buffalo and Auburn, N.Y.; North Plymouth, Mass.; Detroit, Mich., and Chicago, Ill., and applying for an order directing a refund in connection with certain alleged overcharges; upon hearing the complaint in the presence of counsel for complainant, the Canadian Freight Association, the C.P.R. and the G.T.R. Cos., and what was alleged by counsel, it is ordered that the complaint be dismissed; and it is further ordered that the M.C.R. be authorized to refund to the applicant 2 c. per 100 lbs. in respect of four carloads of binder twine shipped by the applicant to Wallaceburg. Dresden and Wheatley, Ont., being the difference between the legal rate of 18c. per 100 lbs. and the rate of 20c. per 100 lbs. collected by the railway company on said shipments.

The Central Canada Railway and Engineering Club held its opening meeting for the season in Toronto, Sept. 21, when 26 new members were admitted. J. V. Jackson, Boiler Inspector G.T.R., Montreal, read a paper on the care and washing out of locomotive boilers, which is given in full on another page of this issue. The paper was fully discussed by A. M. Wickens, J. Duguid and others.

The Railway Agents' Association of the New England States, on their annual holiday outing, extending from Sept. 11 to Sept. 15, visited Montreal, Ottawa, Huntsville and Toronto, travelling by the G.T.R. and Richelieu and Ontario Navigation Co.'s routes.

C. P. R. Control of Orford Mountain Ry.

By reference to the C.P.R. annual report on another page it will be seen that the C.P.R. Co. has acquired all the O.M.R. Co.'s capital stock and also a lease of the line for 999 years. The O.M.R. Co. was incorporated by the Quebec Legislature in 1888. In 1901 the Dominion Parliament confirmed the provincial incorporation, and authorized the company to amalgamate with some other companies. In 1902 an act was passed granting an extension of time for the construction of the various lines authorised. The Dominion Parliament in 1890, 1899 and 1903 voted subsidies in aid of these lines. The company has constructed a line from Windsor Mills to Mansonville, Que., 55.10 miles, crossing the C.P.R. at Eastman Jct. It has also 2.30 miles of yard track and sidings. Its rolling stock on June 30, 1908, consisted of 3 locomotives, 4 passenger cars, 11 flat cars and 1 caboose. At the same date its outstanding capital stock was $50,000, and it had issued bonds for $702,000. It had received $192,942.50 in subsidies from the Dominion Government and $138,884.92 from the Quebec Government. The statistics showing the operations of the line for the year ended June 30, 1908, were published in our issues of April, pg. 241; May, pg. 323; and July, pg. 471.

The present officials of the O.M.R. are:—President, S. W. Foster, Knowlton, Que.; Sec. Treas., G. O. Stevens, Waterloo, Que.; Superintendent, Freight and Passenger Agent, A. C. Lytle, Eastman, Que.; Chief Engineer, R. K. Harris, Kingsbury, Que.

Canadian Northern Ry. Coal Interests.

Two companies have been incorporated under the Dominion Companies Act with offices at Toronto and the following provisonal directors: G. G. Ruel, A. J. Reid, A. J. Mitchell, F. C. Annesley, and F. J. Buller, all associated with the Toronto offices of Mackenzie, Mann and Co., Limited. The titles of the two companies are Brazeau Collieries, Ltd., and Rocky Mountain Collieries, Ltd. Each is registered with a capital of $1,000,000, and is authorized to acquire coal fields, mineral lands, timber rights, etc.; to carry on the business of mining for coal and other minerals, and to conduct a number of other businesses in connection therewith. These include the operation of tramways, steamships, the construction of wharves, docks, elevators, etc. The Brazeau Collieries will operate, it is said, an area of about 4,000 acres of coal bearing land situated on the Brazeau and McLeod rivers, about 175 miles west of Edmonton, Alta. The Rocky Mountain Collieries will operate on the Kananaskis River, south of the C.P.R. transcontinental line, and west of Calgary.

The Michigan Central Rd. has ordered 100 tons of steel sheet piling for coffer dam work in Canada.

The freight committee of the Regina, Sask., Board of Trade had a conference with various railway freight officials, Sept. 7, when a proposition was submitted for the consideration of the companies concerned, which it was considered would be acceptable to the shipper, providing for a reduction in freight charges, until such time as the Board of Railway Commissioners is able to dispose of the question of a standardized schedule of freight charges, or otherwise. W. B. Lanigan, Assistant Freight Traffic Manager C.P.R. Western Lines; R. E. Larmour, General Freight Agent C.P.R. Central Division, and G. H. Shaw, Traffic Manager C.N.R., dealt with the matter on behalf of the companies.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction Betterments.

Alberta and Great Waterways Ry.—We are advised that the only officers at present appointed are: President, W. R. Clarke, New York; Chief Engineer, J. A. L. Waddell, Kansas City, Mo.; General Manager, E. A. James, Winnipeg. The President recently returned from Europe, and we are advised that he was expected to visit Edmonto shortly thereafter to discuss the plans for construction with the other officers. The preliminary surveys for the line were made about two years ago, but no construction has been done. Labor is scarce all over the Western country at present, and it is not expected that very much, if any, construction will be done this year. (Aug., pg. 573.)

Alberta Central Ry.—An unconfirmed press report states that J. Grant Macgregor, formerly of Goderich, Ont., has been appointed Chief Engineer of this projected line, with office at Red Deer, Alta. (May, pg. 355.)

Alberta Ry. and Irrigation Co.—We are advised that steel is being laid on the first eight miles of the Raley branch, running south from Raley Jct. to Woolford, Alta. It is expected that this mileage will be opened in time for the movement of this season's wheat crop. Surveys were made for the construction of a branch southerly from near Spring Coulee in the winter of 1903-04, and during 1904 grading was completed for about seven miles. This work was done by the old St. Mary's River Ry., and, in 1905, when it was amalgamated with the Alberta Ry. and Irrigation Co., among the lines which the new company had power to construct was an extension of 16 miles from Raley Jct. to Kimball, and an extension thence to the International boundary, seven miles. (July, pg. 473.)

British Columbia Ry. & Development Co.—A company has been incorporated under Delaware state laws with the above title and offices at Wilmington, Del. The capital is named at $12,000,000, and the provisional directors are: D. V. Wolkenstein, H. G. Willard, J. W. Howie, New York; S. T. Townsend, Wilmington. No information of the objects is given and nothing is said of the special field in which the company proposes to work.

We are advised that this company has been incorporated for the purpose of opening up and developing the great natural resources of British Columbia by means of steam railways. To this end the charter granted by the British Columbia Legislature in 1906 to the British Columbia and Northern Alaska Ry. has been acquired. This company is authorized to construct a line of railway from Vancouver, or a point on Burrard Inlet, to the northern boundary of the province by way of Lillooet, the Fraser Valley, Tacla Lake, Stikene River and Teslin Lake, or in the alternative by the most feasible route through the Chilcoten Valley and via the Stikene River. Preliminary reconnaissances have partly been made and a survey party is to start soon to finish the survey to a point about 450 or 500 miles north of Vancouver. The company expects to be able to commence construction on or before March 1, 1910.

The officers of the company are: President, H. G. Villard; Vice President, W. G. Conklin; Treasurer, J. W. Howie; Secretary, W. C. Pratt; and the offices are at 34 Pine St., New York. (Aug., 1906, pg. 449.)

Canada and Gulf Terminal Ry.—The annual meeting of shareholders was held at Ste. Flavie, Que., Sept. 15, when all the arrangements in connection with the transfer of the Matane and Gaspe Ry. Co.'s property, franchises, etc., as made by the directors, were confirmed and ratified. The general offices of the company, which will be situated in Montreal, will, it is said, be opened shortly. Following are the officers and directors for the current year:—President, M. J. O'Brien; Vice President, H. J. Lyons; other directors, J. A. O'Brien, Rev. A. A. Soucy, C. A. Gauvreau, M.P.; J. A. Ross, M.P.; D. Caron, M.L.A.; Secretary Treasurer, Rene Dupont.

The construction of lines between Ste. Flavie and Matane, Que., which are being built under the charter granted to the Matane and Gaspe Ry. Co., which has been acquired by this company, are officially stated to be proceeding rapidly, but no details are given. The first line to Litttle Metis will, it is said, be completed and opened for traffic for the summer of 1910, and the first section of the line from Ste. Flavie to Matane will, it is said, be opened for traffic in Dec., 1910. The contract, which was let by the original company to the H. J. Beemer Co., of Ottawa and New York, is now in the hands of H. Doheny, Montreal. (Sept., pg. 663.)

Canada Western Ry.—It was reported at Pincher Creek, Alta., Sept. 1, that a contract for the construction of the first 50 miles of this line is to be let this fall, and that work is to be started as early as possible in the spring. This 50 miles will consist of that part of the line from North Fork Pass to Pincher Creek. The survey party is at present located southeast of Pincher Creek, and is working towards the International boundary. F. B. Lynch, St. Paul, Minn., who is interested in this proposed line advised us, Sept. 17, that the promoters were not ready to give any information as to their plans, further than that no construction will be done this year. (Sept., pg. 649.)

Canadian Terminal Ry.—The New Brunswick Legislature at its last session amended the act incorporating this company by striking out the name of H. F. White as one of the provisional directors, and substituting the names of W. A. Mitchell and G. J. Clarke. The company was also authorized to construct the following additional lines: from L'Etang harbor to the St. John River, with a branch to connect such line with St. Stephen, and "such other branches as the company may deem proper." The act of incorporation, passed in 1907, authorized the construction of a railway from L'Etang harbor to the St. Croix River, and some unnamed branches, together with docks, wharves, etc. The act passed last session granted an extension of time for the construction of these lines. (June, pg. 413, and May, 1907, pg. 323.)

Chibougamau District, Que.—Speaking at St. Johns, Que., Sept. 6, the Provincial Premier stated that his Government would construct a railway to the Chibougamau district if the report of the mining authorities, who will be sent there to study the district, is that it is worth the heavy expense which would be involved. The Chibougamau district lies just over the height of land at the back of the Lake St. John district, and Chibougamau Lake is the southerly stretch of waters of which the Mistassini Lakes are the most important. J. G. Scott and others who were associated with him in the Quebec and Lake St. John Ry. obtained a charter from the Quebec Legislature for the construction of a railway from near Roberval into this new mining district, but no construction has been done. Another company was incorporated by the Quebec Legislature in 1907, to construct a line to the same district from Lake Temiskaming.

The Premier of Quebec announced Sept. 14 that at the next session of the Legislature he would submit a resolution authorizing the sending of an engineering party to the Chibougamau region to study its natural resources and the possibility of constructing a railway into it from Roberval.

(See Temiscamingue, Chibougamau and James Bay Ry., Aug., 1907, pg. 563.)

Delaware and Hudson Co.—Surveys are being made at Montreal with a view to the fixing of a site for the construction of another bridge over the St. Lawrence River. The probable location will be from the old wharf on the St. Lambert side to the guard pier on the Montreal side. It is reported that the surveys are being made in the interests of the Delaware and Hudson Co., which owns the Quebec, Montreal and Southern Ry. Another report states that the New York Central and Hudson River Rd. and the Rutland Rd. are to be associated with the D. and H. Co. in the construction of the bridge. (See Montreal Bridge and Terminal Co., July, pg. 479.)

Detroit River Tunnel.—The final section of the tunnel under the Detroit River being constructed by the Michigan Central Rd. was lowered into place Sept. 14. This section connects the tubes in the river bed with the shore on the Canadian side. The contractors state that the tunnel will be ready by Oct. 1 for a preliminary trip through it. (July, pg. 475.)

Fraser River Bridge.—The British Columbia Government has authorized the expenditure of a considerable sum upon improvements at the bridge over the Fraser River at New Westminster. The traffic floor will be replanked for the first time since the bridge was constructed in 1903-04. Tenders for this part of the work were received by the Department of Public Works, Sept. 11. The repainting of the bridge is proceeding, but it is not expected to be completed until early in 1910. The bridge is owned by the Provincial Government, and the train service over it is operated by the Great Northern Ry.

Halifax and South Western Ry.—We are advised that the contract for the construction of the branch from the main line to the Canada Iron Corporation's mines at Torbrook, N.S., has been let to the Nova Scotia Construction Co. The contract for the ore handling plant at Port Wade, described on page 632 of our Sept. issue, has been let in two sections; for the ore dock to Reid and Archibald, Halifax, and for the manufacture and erection of the handling plant to I. Matheson & Co., New Glasgow, N.S. (May, pg. 355.)

Hudson Bay and Pacific Ry.—The route map of this projected railway has been approved by the Department of Railways, so far as it covers the route between Prince Albert and Pas Mission, Sask. (July, pg. 477.)

Indian River Ry.—We are advised that through its lease of the Rumford Falls Rd., made a couple of years ago, the Maine Central Rd. has acquired the right to construct the Indian River Ry from Oquossoc, Me., to Megantic, Que. Examinations of the route are in progress, but the report of the engineers has not been made. The matter of the route will probably be considered at the next meeting of the Maine Central Rd. directors, which will be held within the next month or two. (Sept., pg. 649.)

Intercolonial Ry.—The Canada Iron Corporation is about to construct a large ore dock near Newcastle, N.B., and in order to reach this from the railway it will be necessary to build a siding about a mile long. We are advised that the whole of the expense in connection with this siding is to be borne by the Canada Iron Corporation. (See New Brunswick Docks and Terminals in this issue, and Northern New Brunswick and Seaboard Ry., Sept., pg. 651.)

Contract for the erection of a passenger station at Little Metis, Que., has been let

to G. St. Pierre and Co., Fraserville, Que.

Tenders were received to Sept. 23 for the erection of an addition of six stalls to the engine house at Riviere du Loup, Que.

The Maritime Coal Ry. and Power Co. has completed the installation of an endless haulage system at its mines in Cumberland county, N.S. It has also placed orders for additions to its power plant at Chignecto, N.S. The Robb Engineering Co., Amherst, N.S., will supply the engine. The new plant will add 750 h.p. to the power which the company can deliver or utilize at its mines or railway.

Michigan Central Rd.—At a meeting of the Detroit, Mich., city council, Sept. 14, an ordinance was passed embodying an agreement between the city and the M.C.R. in regard to the erection by the latter of a new station and terminals at a cost of $2,000,000. The company is given 60 days to accept. As the company's officials have already approved most of the agreement, it is expected that work will soon be started.

New Brunswick Coal and Ry. Co.—By an act of the New Brunswick Legislature, the Government has been authorized to make a loan, not exceeding $30,000, to pay the deficiency in operating the line during 1908, and for completing the ballasting of, and to provide fencing and an increased water supply for, the line. The railway is being operated by a commission appointed by the Provincial Government. (June, pg. 415.)

New Brunswick Docks and Terminals.—By an act passed last session of the New Brunswick Legislature, a company was incorporated with this title to construct railway terminals and docks, etc., at or near Newcastle, and at such other points on Baie de Chaleur or the Miramichi River as the company may select. The provisional directors are: G. E. Drummond, T. J. Drummond, J. Drummond, E. McDougall, W. M. MacLeod, R. W. Cooper, and W. F. C. Parsons, who are all connected with the Canada Iron Corporation. (April, pg. 249. See also Northern N.B. and Seaboard Ry., Sept., pg. 651, and further on in this issue.)

Northern New Brunswick and Seaboard Ry.—An act passed at the last session of the New Brunswick Legislature entitled "an act in aid of the development of the Gloucester county iron deposits," authorized the Government to guarantee the principal and interest of the bonds of the N.N.B. and S. Ry. or such other company as may be incorporated to construct a railway from the iron mines near the Grand Falls of the Nipisiguit River, in Gloucester county, to the Intercolonial Ry. and thence to Alston Point on the north side, or to Carron Point on the south side of the entrance to Bathurst harbor, such guarantee not to exceed $15,000 a mile, nor for more than 26 miles. The rate of interest of the bonds is not to exceed 4%, and the bonds shall be payable in not more than 30 years from the date of issue. It is provided that the provincial guarantee shall be endorsed on the bonds after the Canada Iron Corporation's guarantee. The security to be taken by the government in return for its guarantee of the bonds consists of a first mortgage of the lines to be constructed, with the franchises, right of way, rolling stock, etc. (Sept., pg. 651.)

Portland Canal Ry.—Application will be made to the Dominion Parliament to incorporate a company with this title to construct a railway from the head of Portland Canal, B.C., along Bear River, 30 miles; also up American Creek; and with power to construct branch lines not exceeding in any one case 10 miles. The company also desires power to construct telegraph and telephone lines, to carry on a general navigation business, to construct wharves, docks, elevators, etc. It is also asked that the works to be constructed be declared to be for the general advantage of Canada. Pringle and Guthrie, Ottawa, are solicitors for applicants. (June, 1907, pg. 409.)

Quebec Eastern Ry.—The surveys being made up to the present have been entirely of an exploratory character and nothing definite has been decided as to route or construction. The line is projected from Sherbrooke to Levis, Que., and will include the Lotbiniere & Megantic Ry., which runs from Lyster to Thetford Mines and Black Lake. The main line will probably pass through Stoke South Ham, Wolferton, Halifax, Inverness, Lysander Falls and Ste. Agathe. There will be some fairly heavy rock cutting but the construction will be mostly light, with a few small bridges. (Sept., pg. 651.)

St. John Valley Ry.—An act was passed last session of the New Brunswick Legislature incorporating a company with this title to construct a railway from St. John, near Westfield, thence following St. John River Valley to Fredericton, thence to Woodstock, and via the villages of Lakeville and Centreville, to near Andover, and to Grand Falls, St. Leonards, or some other point on the National Transcontinental Ry. The line is to follow as nearly as practicable the valley of the St. John River and on the opposite side of the river to that now traversed by the C.P.R. The company is given all the usual powers, its capital is fixed at $2,000,000, and its offices are to be at Fredericton. The incorporators are: C. F. Chestnut, J. J. F. Winslow, J. T. A. Dibblee, B. E. L. Smith, C. M. Sherwood, E. A. Savage, J. Palmer, G. W. Hodge, F. B. Edgecombe, J. S. Neill, J. J. Weddall, H. Wilmot, A. R. Slipp, R. B. Emmerson, J. F. Tweeddale, W. H. Thorne, G. B. Jones, W. E. Foster, T. H. Bullock. (June, pg. 416.)

St. Maurice Valley Ry.—Application will be made to the Dominion Parliament for an extension of time for the construction of a railway from Three Rivers, Que., northwesterly on the west side of the St. Maurice River to Pointe Chevalier, thence following the St. Maurice River to the mouth of the Shawinigan River and crossing the river to Shawinigan Falls; also a line crossing to the east side of the St. Maurice River at Pointe Chevalier and running northerly to where it will cross the Shawinigan River to Shawinigan Falls and following the St. Maurice River to Grand Mere and thence to St. Jean des Piles, and following the general direction of the Matawin River to a junction with the National Transcontinental Ry. in Maskinonge county.

Superior and Western Ry.—The Dominion Parliament last session passed an Act incorporating a company with this title for the purpose of constructing a railway from Velora, on the Grand Trunk Pacific Ry. Lake Superior branch, 151.72 miles from Fort William, to the National Transcontinental Ry. north of Sturgeon Lake. The Ontario Legislature last session voted a subsidy of 1,000 acres a mile for seven miles from Waco station, mileage 160 from Fort William. On May 25 the Board of Railway Commissioners passed an order authorizing the S. and W. Ry. to join the G.T.P.R. tracks at Velora Jct., Ont. Alex. McDougall, Fort William, Ont., is president of the company. (May, pg. 359.)

An order has been passed by the Board of Railway Commissioners authorizing the company to open for traffic the portion of its line from the junction with the G.T. Pacific Ry. Lake Superior branch, near mileage 154, to the head of Sturgeon Lake, seven miles.

Temiskaming and Northern Ontario Ry.—A deputation from Elk Lake district waited on the Commissioners and the members of the Ontario Legislature, who have just completed a trip of inspection over the line, at Cobalt, Sept. 9, to urge the construction of a branch line from Cobalt through the Elk Lake district. It was stated that there was a town of 5,000 population at Elk Lake, which for two months in the year were practically isolated. The deputation said the municipality would provide the right of way without cost to the Government.

Thessalon and Northern Ry.—By an act passed last session of the Dominion Parliament, the line of railway which this company was authorized to construct by its act of incorporation, passed in 1907, by the Ontario Legislature, was declared to be a work for the general advantage of Canada. The company was also authorized to enter into agreements with the C.P.R., the G.T.R., or the C.N.R. The company has constructed a line from the north side of Lorne St., Thessalon, to the Algoma branch of the C.P.R., 1.93 miles. A spur line 2,154 ft. long to the Algoma Customs Smelting and Refining Co.'s ore trestle, and the grading for a coal siding or spur, 1,536 ft. long to the coal dock on Georgian Bay have been completed.

The railway, which the company was authorized to construct, will extend from the C.P.R. Algoma branch, two miles northeast of Thessalon southeasterly into the town, thence northwesterly to the C.P.R. Thessalon station, and from either of the two points on the C.P.R. northerly to the Mississauga River, in Gould tsp. The provisional directors are: A. A. Burke, T. Buchanan, D. J. Sandie, R. Pinder, and W. H. Taylor, all of Thessalon, Ont. At the same session of the Legislature a cash subsidy of $5,000 was voted in aid of the construction of that portion of the line from Thessalon to the C.P.R., to be constructed within two years. (Feb., pg. 105.)

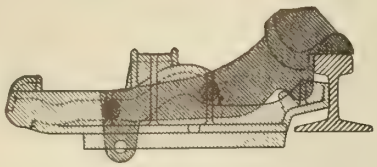
The Newfoundland Legislature at its last session voted $42,000 for railways.

The Lyall Co. has been incorporated under the Dominion Companies' Act, with a capital stock of $500,000 and offices in Montreal, for the purpose of transacting a general contracting business, and in connection therewith to carry on a number of other allied businesses. The provisional directors are: R. Taschereau, R. Genest, J. Marier, J. E. Billette and T. G. Charleboise, Montreal.

M. Frewen, a director of the G.T. Pacific Ry. Co., acting for a number of British capitalists, has entered a suit against the G.T. Pacific Development Co., alleging failure on the part of defendant company to deliver to him 1,000 lots, situated in the Prince Rupert townsite, for which it is alleged he contracted several weeks before the Vancouver sale. It is stated that about $1,500,000 is involved.

Owing to numerous complaints received respecting annoyance caused passengers on Canadian railways by U.S. immigration officers, the Board of Railway Commissioners propose to pass an order directing railway companies to instruct conductors to prevent any undue interference by such officers. A draft order has been prepared and submitted to the companies so they may offer suggestions in regard to it.

The International Association of Railway Financial Officers, which held its third annual meeting at Bluff Point, N.Y., Sept. 7 and 8, has a membership of 106, consisting of the financial vice presidents and treasurers of the leading railway systems on this continent, and has for its object the standardization of the forms of railway auditing, etc., as well as the presentation and discussion of the many financial problems relating to the conduct of railways. F. Scott, Treasurer G.T.R., Montreal, was elected President for the current year, and S. L. Shannon, Comptroller and Treasurer Intercolonial Ry., Moncton, N.B., was appointed a member of the executive committee.



The plan of having a single size applicable to a wide range of rail weights and heights is a valuable feature of Hayes Derails. It vastly simplifies ordering and stock keeping. For instance, size 5 of any model may be used on any ordinary rail from 4 to 6 inches high, which limits include most of the rails in common use.

The sliding type may be operated by any mechanism which is used to throw a switch; it works in with existing conditions in any track without special attachments.

28,000 Hayes Derails are now in use on over 300 roads. They are made in Canada at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

Railway Finance, Meetings, Etc.

Alaska Central Ry.—An order has been made for the sale of this partially constructed railway, at Valdez, Alaska, Oct. 9. The bonds are largely held in Canada, the Sovereign Bank being the largest holder. About 50 miles of the line, northerly from Seward, were put in operation in 1907, and there were about 60 miles additional under construction, and a further 185 miles were under contract. The company defaulted on its interest and a receiver was put in possession in May, 1908.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales for July, $30,003 against $26,721 for July, 1908. Railway traffic receipts for Aug., $27,581 against $24,645 for Aug., 1908. Aggregate traffic receipts for two months ended Aug. 31, $54,622.

Atlantic and Lake Superior Ry.—A general meeting of holders of certificates of participation in the A. and L. S. R. Trust Fund was held in London, Eng., Sept. 14 for the purpose of approving an agreement for the sale of the railway belonging to the trust fund.

Burks Falls and French River Ry.—The annual meeting was held at Burks Falls, Ont., Sept. 1. Following are the officers and directors for the current year:—President, R. J. Watson, Burks Falls, Ont.; Vice President, V. Ratz, Park Hill, Ont.; Solicitor, D. R. McLean, Burks Falls, Ont.; Secretary-Treasurer, H. W. Cooper, G.T.R., Montreal; other directors, A. A. Agar, Burks Falls, Ont.; W. J. Ard, South River, Ont.

Canada Atlantic Ry.—A discharge of a mortgage for $14,000,000 dated Oct. 31, 1903, by the company to J. C. and W. Greene, Ottawa, as trustees for bondholders and a reconveyance of the property to the company have been deposited with the Secretary of State at Ottawa.

Canadian Northern Ontario Ry.—There has been deposited with the Secretary of State at Ottawa a trust deed made between the company and the British Empire Trust Co. and the National Trust Co., dated June 28, securing its 4% perpetual consolidated stock and bonds upon the whole of its undertaking, property, and assets present and future, subject to certain exceptions, charges and provisions set out in the trust deed.

Canadian Northern Ry.—There has been deposited with the Secretary of State at Ottawa a trust mortgage deed, dated July 26, securing its 4% Winnipeg Terminals gold bonds upon certain terminal lands and buildings in Winnipeg, also upon all the company's rights and interests in an agreement made with the Grand Trunk Pacific Ry. and the National Transcontinental Ry. Commissioners. The agreement is made with the Province of Manitoba, which guaranteed the bonds.

Cumberland Coal and Ry. Co.—Press reports state that the C.P.R. has had agents making an inspection of the C. C. & R. Co.'s railway and coal mines in the vicinity of Springhill, N.S. Owing to difficulties with the men the mines have been closed down, and, as practically the whole of the traffic of the railway depends on the coal mined, it is expected that the railway will cease operating also. The C.P.R. was a large customer of the company for coal for the operation of its eastern lines.

Dominion Atlantic Ry.—Gross earnings for July, $142,700, against $144,954 for July, 1908. Aggregate gross earnings for 7 months ended July 31, $628,850, against $615,552 for same period 1908.

Grand Trunk Pacific Branch Lines.—There has been deposited with the Secretary of State at Ottawa a mortgage, or deed of trust, dated July 28, made by the G.T.P.B. Lines Co. to the National Trust Co. and the Province of Alberta, securing an issue of 4% first mortgage bonds due 1939, issued and to be issued under the provincial statutes of 1909, chap. 15. This act authorized the construction of certain railways in the province to aid in the construction of which the Government was directed to guarantee the bonds of the company.

A mortgage deed similar to the above, dated June 24, has also been deposited with the Secretary of State, to which the Government of Saskatchewan is a party, in respect of lines to be constructed in that province under chap. 4 of the Saskatchewan statutes, 1908-9.
the Boston & Maine Rd.

Klondike Mines Ry.—The annual meeting was held at Ottawa, Sept. 6. Following are the officers and directors for the current year:—President, J. A. Seybold; Vice President, W. C. Greig; Secretary, A. Haydon; other directors, C. G. Kekewich, J. Latta. The company does not publish an annual report.

London and Port Stanley Ry.—An informal conference has been held by the directors of this railway, which is practically owned by the city of London, Ont., and the representatives of the Pere Marquette Rd., which is operating it under lease, with respect to the terms for a renewal of the lease. The present lease has some years to run, but as a number of betterments are required to bring the line into a condition to handle all the traffic offering, the company is asking for an extension of the lease for 20 years.

Massawippi Valley Ry.—The annual meeting was held at Rock Island, Que., Sept. 1. Following are the officers and directors for the current year: President, J. G. Foster, Derby Line, Vt.; Vice President, C. W. Cate, Sherbrooke, Que.; Treasurer, J. H. Williams, Bellows Falls, Vt.; other directors, J. W. Dunklee, Boston, Mass.; C. H. Kathan, Rock Island, Que.; H. N. Turner, St. Johnsbury, Vt.; C. D. White, F. Grundy and F. N. McCrea, Sherbrooke, Que. This line is leased to

New Brunswick Coal and Ry. Co.—Press reports state that the C.P.R. has had an inspection made of this company's property with a view of an arrangement being made for its extension and operation. The railway part of the company's undertaking is at present being operated by a Commission appointed by the New Brunswick Government. The question which the C.P.R. officials is investigating is said to be as to the quality of the coal to be obtained from the mines. It is stated that if this prove to be satisfactory an arrangement will be made with the provincial authorities to construct an extension of 20 miles to Fredericton and to lease the whole line to the company.

Port Hood-Richmond Ry.—A. E. Dyment, Toronto, has been elected a director to succeed F. Outram, Port Hope, Ont., who has resigned.

Quebec and Lake St. John Ry.—Gross earnings for Aug., $55,420.84, against $68,860.76 for Aug., 1908. Aggregate gross earnings for eight months ended Aug. 31, $387,830.72, against $397,857.54 for same period 1908. Mileage operated, 285, against 240 during the same period 1908.

Quebec Central Ry.—The directors have declared the full dividend on the 7% income bonds for the year, thus bringing up the period during which they have had their maximum return to three and a half years.

Quebec Central Ry.—Gross earnings for July, $107,743.11; expenses, $67,300.37; net earnings, $40,442.74, against $129,501.35 gross earnings, $78,878.98 expenses, $50,622.37 net earnings for July, 1908.

Salisbury and Albert Ry.—Following are the directors for the current year: J. D. Newton, President; D. Bergen, New York; J. D. Hazen, D. K. Hazen, E. P. Raymon.

Spokane International Ry.—An issue of $4,200,000 first mortgage 5% bonds repayable in 1955 has been listed on the New York Stock Exchange. The bonds were issued to pay for terminal and station property and for construction and equipment. The C.P.R. advanced one-eighth of the construction cost and has an option on 52% of the stock. The C.P.R. has a traffic agreement with the company.

Temiskaming and Northern Ontario Ry.—Gross earnings for June, $131,850.04; expenses, $73,647.78; net earnings, $58,202.26; ore royalties, $19,273.16. Net result of operation for six months ended June 30, $377,529.65. Gross earnings for July, $146,111.00; expenses, $75,119.75; net earnings, $70,991.25. Approximate gross earnings for Aug., $155,000; expenses, $75,000; net earnings, $80,000.

White Pass and Yukon Ry.—Gross earnings for July, $223,657.

Inspection of G. T. R. and G. T. P. R.

Sir C. Rivers Wilson, President G.T.R., and the party of directors and officers of the G.T.R. and the G.T. Pacific Ry., who have been on a trip of inspection over the two lines, arrived in Montreal Sept. 15 on their return journey. After remaining in Montreal for a day, the President and his personal party went to New York, whence they sailed for England, Sept. 18.

The party started out from Montreal on their trip early in August, travelling in a special train, visiting Belleville, Toronto, and other important points on the G.T.R. in Western Ontario. Crossing into the United States they journeyed over the G.T. Western Ry. to Chicago. From this point they proceeded west over U. S. lines to Seattle, Wash., where they had some negotiations with reference to joint terminals in that city with the Great Northern Ry. From Seattle, they travelled to Vancouver, where they were entertained at a dinner given by the Board of Trade, Aug. 27. A trip was then made by steamboat to Prince Rupert, where the G.T.P.R. coast terminals were inspected. Coming east the party reached Edmonton over the C.P.R., and travelled thence to Winnipeg over the G.T. Pacific Ry., reaching that place Sept. 5. Fort William was reached Sept. 8, and the party left on the Northern Navigation Co.'s steamship Hamonic the same evening for Sarnia. The special train was resumed at Sarnia, and on the return journey to Montreal, London, Hamilton, and other points were visited. On Sept. 14, the party was in Ottawa, and had an interview with the Premier and members of the Cabinet.

In an interview at Montreal, Sir C. Rivers Wilson said he was very much pleased with the progress made on the line, the only regret he had was as to the condition of the section of the line which the Dominion Government was constructing between Winnipeg and Superior Jct. The failure of the Government to complete the construction of this section was a great disappointment to him, as it was no doubt to the government. Although the company's section of the line would be completed before the government section, it would be behind the date anticipated, Sept., 1911, but he hoped trains would be running from the head of the lakes to Prince Rupert by the latter end of 1912 or the spring of 1913.

The Dominion Labor Department received a report Sept. 9, to the effect that all matters in dispute between the Canadian Northern Ry., and its subsidiary companies and its locomotive engineers, had been satisfactorily adjusted.

FARNLEY STAYBOLT IRON

HIGHEST GRADE OF IRON FOR STAY-BOLTS, RIVETS AND MINING PURPOSES

All sizes carried in stock in Montreal and Winnipeg

It is said that 50% or over of the entire passenger movement from the middle and western states to Seattle during the time the special exhibition rates were in force, from the end of May to the end of Sept., went by the C.P.R. route in at least one direction.

The number of persons over 70 years of age on the C.P.R. pension roll at Jan. 1, 1909, was 105; between 60 and 70 years of age, 148; under 60 years of age, 23—total, 276 persons. The amount paid out for the year was $50,694.79, and the balance to the credit of the fund was $657,345.60.

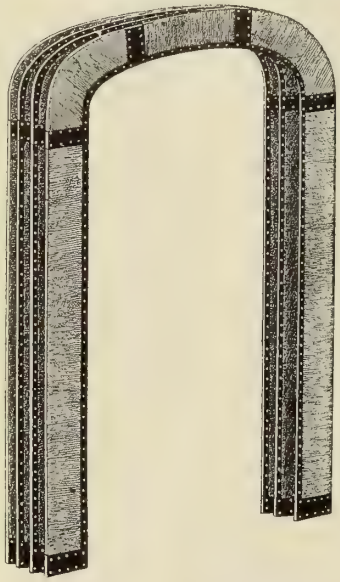
Manufacturers and Electrical Engineers - 41 Street Railway Chambers, Montreal



The "Ajax" Diaphragm

is the standard Diaphragm on practically all of the leading roads in Canada and the United States. It is reinforced by a GALVANIZED STEEL ROD which runs entirely around the Diaphragm inside the inner folds, which supports and effectually prevents the Diaphragm from sagging at the corners or top, buckling or getting out of shape. Made to suit all the standard types of vestibules. Write us for catalogue 117 and price.

Watch for illustrations of our other well-known specialties.

Orders by the Raliway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

7733, 7734. Aug. 5.—Authorizing Bell Telephone Co. to carry its wires across C.P.R. at Arnprior and Listowel, Ont.

7735. Aug. 6.—Recommending to Governor in council for approval C.N.R. by-law re spitting and smoking in railway cars and premises.

7736, 7737. Aug. 6.—Authorizing C.N.Q.R. to construct railway across road between lot 624 and lots 622 and 623 and between lots 162 and 159, St. Timothee parish, Que.

7738. Aug. 6.—Authorizing Hazeldean Rural Telephone Co. to erect wires across C.P.R. at Stittsville station, Ont.

7739, 7740. Aug. 5.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at Ouimet Ave., St. Laurent, Que., and at Daniel St., Arnprior, Ont.

7741. Aug. 5.—Authorizing Moosomin East Rural Telephone Co. to erect wires across C.P.R. between section 27 and 34, tp. 13, r. 31, w. 2 m., Satskatchewan.

7742. Aug. 5.—Authorizing Leeds and Grenville Independent Telephone Co. to erect wires across C.P.R. at Spencerville crossing, Prescott and Ottawa branch.

7743, 7744. Aug. 5.—Authorizing E. Blanchard, M.D., to erect telephone wires across G.T.R. at 11th concession, Brock tp., and at side line south of Laidlaw St., Cannington, Ont.

7745. Aug. 20.—Authorizing C.P.R. to construct its railway across Banff trail near Anthracite, Alta.

7746. Aug. 5.—Approving location of C.N.R., from sec. 2, tp. 15, r. 17, w. 6th m., to sec. 11, tp. 14, r. 17, w. 6th m., mileage 0 to 5, British Columbia.

7747. July 23.—Amending order 6538, of March 18, 1907, with respect to steel rolled tires on locomotive wheels.

7748. Aug. 3.—Authorizing Bell Telephone Co. to erect wires across C.P.R., at highway crossing west of Webbwood, Ont.

7749. Aug. 7.—Staying proceedings under order 7394 of June 28, 1909, with respect to G.T.R. station at Guelph, Ont., until question of subway at Neeve St. is disposed of.

7750. Aug. 10.—Authorizing Thedford, Arkona and East Lambton Telephone Co. to erect wires across G.T.R. at Thedford, Ont.

7751 to 7753. Aug. 10.—Authorizing the Bell Telephone Company to erect wires across C.P.R. and G.T.R. at three different points in Ontario.

7754 to 7756. Aug. 10.—Authorizing B.C. Telephone Co. to erect wires across Esquimalt & Nanaimo Ry. at three points near Duncans, B.C.

7757 to 7759. Aug. 6.—Authorizing Hazeldean Rural Telephone Co. to erect wires across C.P.R. at three points east of Stittsville station, Ont.

7760. Aug. 10.—Authorizing Claremont and Ashburn Telephone Co. to erect wires across G.T.R. at Brooklin, Ont.

7761. Aug. 10.—Authorizing C.P.R. to construct highway bridge carrying First St., Brandon, Man., over Assiniboine River and C.P.R. yard there.

7762. Aug. 10.—Authorizing G.T.P.R. to construct railway across highway between sections 10 and 11, tp. 36, r. 15, w. 3rd m., West Satskatchewan.

7763. Aug. 6.—Authorizing the C.N.Q.R. to construct railway across road between lot 624 and lot 27-12, St. Timothee parish, Que., mileage 77.11 west from Quebec bridge.

7764. Aug. 10.—Authorizing G.T.R. to construct branch line to the Blaugas Co. of Canada's premises in Montreal parish.

7765. Aug. 10.—Authorizing Hamilton Cataract Power, Light & Traction Co. to erect wires across G.T.R. north of Desjardins canal, Hamilton, Ont.

7766. Aug. 10.—Authorizing Saskatchewan Government Telephones to erect wires across C.N.R. between secs. 24 and 25, tp. 25, range 29, west 2nd meridian.

7767. Aug. 7.—Ordering refund of switching charges at St. Thomas, Ont., by M.C. Rd. to the Canada Iron Corporation. This order is given in full on another page.

7768. Aug. 7.—Dismissing complaint of C. W. Stewart of St. John, N.B., that he is unable to market cornmeal in consequence of alleged discrimination by C.P.R. This order is given in full on another page.

7769 to 7775. Aug. 12.—Authorizing Alberta Government Telephones to erect wires across Alberta Ry. & Irrigation Co.'s track at two points, and across C.P.R. at five points.

7776. Aug. 12.—Authorizing Bell Telephone Co. to erect its wires across C.P.R. 1½ miles east of Durham station, Ont.

7777 to 7779. Aug. 12.—Authorizing Bell Telephone Co. to erect wires across C.P.R. at two points and across G.T.R. at one point in Ontario and Quebec.

7780, 7781. Aug. 12.—Authorizing Ingersoll Telephone Co. to erect wires across C.P.R. at two points in West Zorra tp., Ont.

7782, 7783. Aug. 10.—Authorizing Saskatchewan Government Telephones to erect wires across C.N.R. at two points.

7784. Aug. 10.—Authorizing the C.P.R. to construct spur line to J. D. Clark & Co.'s premises, Winnipeg.

7785. Aug. 12.—Authorizing Pipestone municipality to erect wires across C.P.R. 3½ miles n.w. of Reston, Man.

7786. Aug. 7.—Authorizing G.T.R. to appeal to Supreme Court of Canada from order 7613, of July 22, 1909, directing that it provide station accommodation at or near where G.T.R. lines from Hamilton to Niagara Falls cross town line between Clinton and Louth tps., Ont.

7787. Aug. 7.—Directing Red Mountain Ry. to provide highway crossing over track a little south of Patterson's station, B.C.

7788. Aug. 7.—Authorizing village of Glencoe, Ont., to place electric light wires across G.T.R.

7789. July 26.—Authorizing C.N.Q.R. to construct spur to Warden, King & Sons' premises, Maisonneuve, Que.

7790. Aug. 16.—Amending order 6535, of March 18, 1909, by inserting the words "or steel-rolled" after the words "steel tire" in the fifth line of the operative part of order.

7791. Aug. 10.—Authorizing City of Vernon, B.C., to lay sewer pipes under C.P.R. where same crosses South Vernon, Schubert and Seventh Sts.

7792. Aug. 17.—Authorizing G.T.R. to construct spur line to Gull Lumber Co.'s premises, Bexley tp., Ont.

7793. Aug. 17.—Authorizing C.P.R. to construct spur line to Farmers' Grain & Supply Co.'s premises, Wauchope, Sask.

7794. Aug. 16.—Authorizing C.P.R. to construct two branch lines in St Boniface tp., Man.

7795. Aug. 17.—Authorizing C.P.R. to construct a second line between Bolton and Bolton Jct., Ont.

7796. Aug. 17.—Authorizing C.P.R. to construct spur line to J. Eveleigh & Co.'s premises, Montreal

7797. Aug. 17.—Authorizing C.P.R. to construct bridges at mileage 110.3 and 110.6, on its London section, Ont.

7798. Aug. 12.—Authorizing Manitoba Government Telephones to maintain wires across C.P.R. at ¼ mile west of Findlay.

7799. Aug. 13.—Authorizing Thamesville Telephone Co. to erect its wires across C.P.R. at North Thamesville, Ont.

7800 to 7805. Aug. 13.—Authorizing Alberta Government Telephones to erect wires across C.P.R. at five points.

7806, 7807. Aug. 13.—Authorizing Bell Telephone Company to erect wires across London & Port Stanley Ry. at White station, Ont., and across G.T.R. at Preston street, Ottawa, Ont.

7808. Aug. 13.—Authorizing Golden Flat Rural Telephone Co. to erect wires across C.P.R. in Saskatchewan.

7809 to 7812. Aug. 13.—Authorizing Volcanic Oil and Gas Co. to lay and maintain natural gas pipe under Michigan Central and Pere Marquette railways at four points.

7813. Aug. 13.—Authorizing City of Toronto to construct bridge to carry the highway and Toronto Street Ry. tracks over C.P.R., G.T.R., and C.N.O.R. tracks where such tracks cross Queen St. east, Toronto, and apportioning the cost. This order was given in full in our last number.

7814. Aug. 16.—Authorizing G.T.R. to construct branch line from its line between Orillia and Midland at or near Tiffin, running southerly through Tiny and Tay tps. to road allowance between lots 91 and 92, in 2nd concession of Tiny tp., Ontario.

7815. Aug. 16.—Authorizing G.T.R. to construct branch line from its line near corner of Victoria and Fourth Streets, Midland, Ont., running westerly partly through town of Midland, Tay and Tiny tps., and town of Penetanguishene, to junction with G.T.R. Penetang branch at or near Queen St., Penetanguishene, Ont.

7816. Aug. 16.—Authorizing G.T.R. to construct branch extending from its line between Colwell and Penetanguishene, near Wyevale, Tiny, Ont., and running northerly to road allowance between lots 91 and 92, 2nd concession, Tiny tp., Ont.

7817. Aug. 20.—Extending until Nov. 1, 1909, time in which branch line authorized by order 6365, of Jan. 27, 1909, was to be constructed by the C.P.R. and C.N.O.R. in Parry Sound, Ont.

7818. Aug. 16.—Approving Alberta Ry. & Irrigation Co.'s local standard passenger tariff C.R.C. 7, superseding C.R.C. 5, providing for rate of 3c. a mile.

7819. Aug. 18.—Approving revised location of C.P.R. Crow's Nest Pass branch between Pincher and Coleman, Alta., from mileage 31.60 to 37.56, and from mileage 53.42 to 56.92.

7820. Aug. 17.—Authorizing Humberstone tp., Ont., to lay culvert under G.T.R.

7821. Aug. 17.—Authorizing Bee Line Rural Telephone Co. to erect wires across C.P.R. in Saskatchewan.

7822. Aug. 17.—Authorizing the C.P.R. to construct spur to J. Y. Griffin & Co.'s premises, Winnipeg.

7823. Aug. 17.—Authorizing C.P.R. to construct spur to Tudhope, Anderson & Co.'s premises, Winnipeg.

7824. Aug. 17.—Authorizing C.P.R. to construct spur to Alpha Co.'s premises, Three Rivers, Que.

7825. Aug. 17.—Authorizing C.P.R. to close temporary crossing at Third Ave. and portion of First Avenue crossing C.P.R. right way, and to re-arrange its general yard at Moose Jaw, Sask., also to open up a temporary crossing at Fourth Ave.

7826. Aug. 20.—Authorizing the C.P.R. to construct spur to Imperial Oil Co.'s premises, Wetaskiwin, Alta.

7827. Aug. 20.—Authorizing C.P.R. to construct bridge over Dufferin and Lis-

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

Bowser Pumps in a Railway Storehouse

FIRE-PROOF OIL STORAGE

When your oils are stored by the Bowser System, you know they can never be the source of a fire—

What is more, fire starting from some other source cannot get to the oils.

These are only two results of

THE BOWSER SYSTEM

The Bowser is constructed so as to secure the measure of safety prescribed by the National Board of Fire Underwriters.

Equipments for Railway Oil Houses described in Bulletin 18. Send for it.

THE GRAND TRUNK RAILWAY COMPANY OF CANADA.

Notice is hereby given that the Ordinary Half-Yearly General Meeting of the Grand Trunk Railway Company of Canada will be held at the City Terminus Hotel, Cannon Street, London, E.C., on Thursday, the 21st day of October, 1909, at twelve o'clock noon precisely, for the purpose of receiving a Report from the Directors, and for the transaction of other business of the Company.

Notice is also given that the Transfer Books of the Company in London and Montreal will be closed from Monday, the 20th September, to the day of meeting, both days inclusive.

By Order,
C. Rivers Wilson, President.
H. H. Norman, Secretary.

Dashwood House, 9 New Broad Street, London, E.C., September 10th, 1909.

NOTICE.—The South Ontario Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways and bridge which it has been authorized to construct by section 3 of chapter 85 of the Statutes of Canada 1887 as enacted by section 1 of chapter 92 of the Statutes of 1891, and for other purposes.

WALTER R. BAKER,
Acting Secretary.

Andrew T. Thompson,
Ottawa Agent.

Dated at Montreal the 15th Sept., 1909.

NOTICE.—The Campbellford, Lake Ontario and Western Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it has been authorized to construct by section 8 of chapter 54 of the Statutes of Canada of 1904, and for other purposes.

H. C. OSWALD,
Secretary.

Andrew T. Thompson,
Ottawa Agent.

Dated at Montreal, the 15th Sept., 1909.

NOTICE.—The Walkerton & Lucknow Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it was authorized to construct by section 1, subsections (b) and (c) of chapter 175 of the Statutes of Canada of 1905, and for other purposes.

GEO. A. WALKER,
Secretary.

Andrew T. Thompson,
Ottawa Agent.

Dated at Toronto the 15th Sept., 1909.

NOTICE.—The West Ontario Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it has been authorized to construct by section 1 of chapter 178 of the Statutes of Canada, 1906, and for other purposes.

WALTER R. BAKER,
Acting Secretary.

Andrew T. Thompson,
Ottawa Agent.

Dated at Montreal the 15th Sept., 1909.

NOTICE.—The Ottawa Northern & Western Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it has been authorized to construct by section 1, subsections (a) and (b) of chapter 84 of the Statutes of Canada, 1899, and by section 1 of chapter 72 of the Statutes of Canada of 1900, and for other purposes.

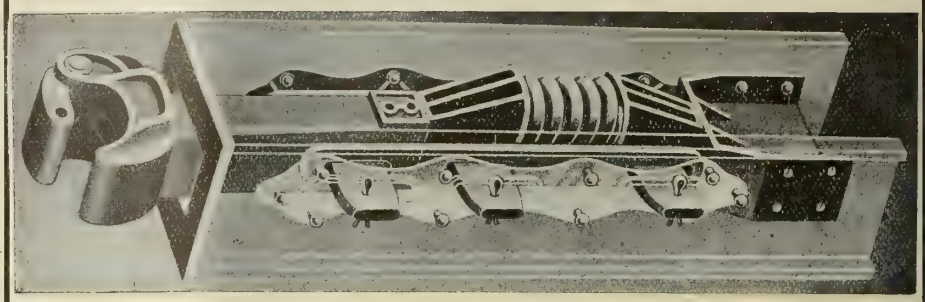
H. C. OSWALD,
Secretary.

Andrew T. Thompson,
Ottawa Agent.

Dated at Montreal the 15th Sept., 1909.

THE

Farlow Twin Spring Draft Gear



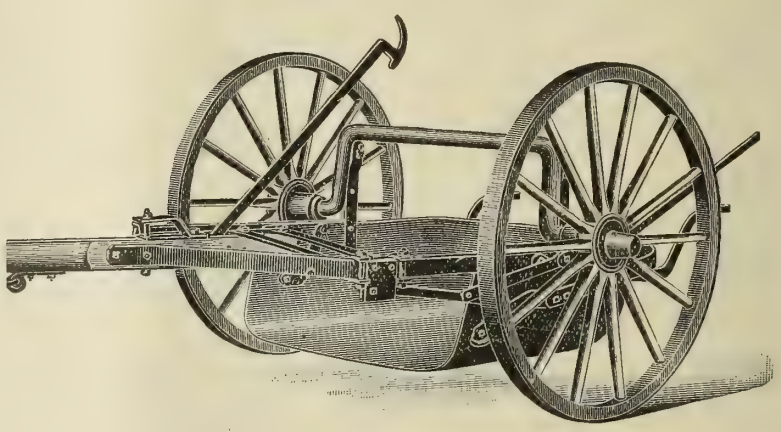
Designed for Wooden or Steel Cars and Engines.
Pulling Strains Distributed Equally on the Three Cross Keys.
Buffing Shocks Distributed on End Sill, Three Cross Keys, Filler Block and Body Bolster. Cannot be Pulled Out or Driven Back and Will Not Spread Sills.

FARLOW DRAFT GEAR CO.

Baltimore, Md. **Chicago, Ill.**

THE TORONTO PRESSED STEEL CO. LIMITED

TORONTO, CANADA



Our **SOLID PRESSED BOWL DRAG** and **WHEEL SCRAPERS** are the most satisfactory in the market. They are pressed out of one solid sheet of steel and have no joints or seams.

We manufacture a complete line of Contractors' Supplies including

PLOUGHS **DUMP CARS**
DUMP WAGONS **DUMP CARTS**
WHEELBARROWS **TRUCKS**
CEMENT MIXERS **WAGONS**
etc., etc.

PROMPT SHIPMENTS **SEND FOR CATALOGUE**

8042. Sep. 9.—Authorizing Canadian Machine Telephone Co. to place wires across G.T.R. at Burford, Ont.

8043. Sep. 9.—Approving location of G.T.R. station at Bluevale, Ont.

8044. Sep. 9.—Authorizing Centre Thorah Telephone Ass'n., to place wires across G.T.R., in the tp. of Thorah, Ont.

8045 and 8046. Sep. 9.—Authorizing Bell Telephone Co. to place wires across the track of the T.H. & B.R. near Grimsby, Ont.; and across M.C.R. at Bridgeburg, Ont.

8047. Sep. 9.—Authorizing V.V. & E.R. & Nav. Co. to construct bridge 439 over Similkameen River, B.C.

8048. Sep. 9.—Authorizing Village of Stirling, Ont., to erect electric power wires across G.T.R.

8049. Sep. 9.—Approving location of C.N.R. up North Thompson River from Nekaliston Creek to Coldwater River, B.C.

8050. Sep. 9.—Approving location of C.N.R. through tps. 9-5, ranges 33-34, west principal meridian, and ranges 1-6, west 2nd mer., mileage 16.09 to 65.16, Sask.

8051. Sep. 9.—Authorizing the Q.R.L. & P. Co. to construct branch line or Y at St. Joachim, Que.

8052. Sep. 9.—Authorizing C.P.R. to lay tracks across 18th St. Brandon, Man.

8053. Sep. 9.—Authorizing C.P.R. to construct spur to Brandon Gas & Coal Co.'s plant, Brandon, Man.

8054. Sep. 9.—Authorizing the C.P.R. to construct spur lines for Manitoba Rollings Mills, St. Boniface, Man.

8055. Sept. 13.—Authorizing G.T.R. to construct spur line to Davies & Doty's premises, Oakville, Ont.

8056. July 13.—Approving location of C.N.O.R. through Gloucester tp. and City of Ottawa, from mileage 53.91 to 57.42 west from Hawkesbury, Ont.

8057. Sept. 13.—Extending for two weeks from date of order time within which C.N.Q.R. may operate its trains from Quebec City to Garneau Jct.

8058. Sept. 13.—Authorizing C.P.R. to construct branch line in Saskatoon, Sask., to a point to be determined by City Engineer.

8059. Sept. 10.—Authorizing C.P.R. to operate spur line to G. Vrooman's premises, Lethbridge, Alta.

8060, 8061. Sept. 10.—Authorizing Village of Stirling, Ont., to place electric wires across G.T.R.

8062. Sept. 10.—Authorizing Laval Electric Co. to place wires across C.P.R. near Therese, Que.

8063 to 8065. Sept. 13.—Authorizing Bell Telephone Co. to place wires across G.T.R. at Howick, Que.; Stevensville, Ont., and Bridgeburg, Ont.

8066. Sept. 14.—Amending order 7963, Sept 1, 1909, authorizing C.N.R. to alter existing level crossing on Pembina St., Winnipeg.

8067. Sept. 14.—Authorizing G.T.R. to construct spur to H. Corby Distillery Co.'s premises, Thurlow tp., Ont.

8068. Sept. 10.—Approving masonry work to be constructed at bridge 27.3, Macleod section, C.P.R.

8069. Sept. 10.—Authorizing C.P.R. to construct branch line in blocks 3, 7, 12 and 14, plan Q 10, Saskatoon, Sask.

8070. Sept. 14.—Approving location of C.N.O.R. Udney-Orillia line through Mara tp., Ont.

8071. Sept. 10.—Authorizing Strathcona municipality to cross C.N.R. one mile east of Belmont, Man.

8072. Sept. 10.—Authorizing Macdonald municipality to place wires across C.N.R. 2 miles northeast of Brunkild, Man.

8073, 8074. Sept. 10.—Authorizing Bell Telephone Co. to place wires across M.C.R. near Bridgeburg and near Welland, Ont.

8075 to 8078. Sept. 14.—Authorizing Volcanic Oil & Gas Co. to lay pipe under M.C.R. at four points in Ontario.

8079. Sept. 14.—Authorizing G.T.R. to construct branch line in Oakville, Ont.

8080. Sept. 14.—Authorizing G.T.R. to construct branch line and two spurs to J. R. Eaton & Sons' planing mills, Ont.

8081. Sept. 14.—Authorizing C.P.R. to open for traffic the portion of its Nominingextension from Nomining to Rapide de l'Orignal, 34.6 miles.

8082. Sept. 14.—Approving tariff of parlor car rates C.R.C. no. S. 2 of Esquimalt & Nanaimo Ry.

8083. Sept. 14.—Authorizing C.P.R. to construct extra track across road allowance between secs. 14 and 23, tp. 11, range 12, west principal mer., Manitoba.

8084. Sept. 14.—Authorizing City of Toronto to construct additional bridge across G.T.R. and C.P.R. at Dundas St.

8085. Sept. 15.—Authorizing Winnipeg Electric Co. to operate cars over C.P.R. track on Logan Ave., Winnipeg.

8086, 8087. Sept. 15.—Authorizing Mt. McKay & Kakabeka Falls Ry. to cross C.P.R. and C.N.R. at Yonge St., Fort William, Ont.

8088. Sept. 14.—Dismissing application of Town of Leamington, Ont., to construct street over M.C.R. Leamington & St. Clair branch.

8089. Sept. 15.—Authorizing Mt. McKay & Kakabeka Falls Ry. to cross G.T.P.R. at Yonge St., Fort William, Ont.

8090. Sept. 13.—Authorizing Town of Listowel, Ont., to place wires across C.P.R. at Main St.

8091. Sept. 14.—Authorizing Village of Stirling, Ont., to place electric light wires across G.T.R. at William St.

8092. Sept. 14.—Authorizing Town of Listowel to place electric power wires across C.P.R. at Inkerman St.

8093. Sept. 15.—Authorizing C. Vanderburg to lay gas pipe under G.T.R. in North Cayuga tp., Ont.

8094. Sept. 15.—Authorizing Mt. Albert Telephone Co. to place wires across G.T.R. at lots near Mt. Albert station, Ont.

8095, 8096. Sept. 15.—Authorizing N.B. Telephone Co. to place wires across C.P.R. at two points in Carleton county, N.B.

8097. Sept. 15.—Authorizing Manitoba Government Telephones to place wires across C.P.R. west of Stonewall station.

8098. Sept. 15.—Authorizing Macdonald municipality to place wires across C.P.R. near La Salle station.

8099 to 8101. Sept. 15.—Authorizing Alberta Government Telephones to place wires across C.N.R. between mile posts 816 and 817, Alta., and the C.P.R. ¼ mile south of Parkdale, and at 11th Ave., Calgary.

8102 to 8106. Sept. 15.—Authorizing Bell Telephone Co. to place wires across G.T.R. at three points and the M.C.R. at two points in Ontario.

8107. Sept. 15.—Authorizing Saskatchewan Government Telephones to place wires across C.P.R. near Glen Ewen, Sask.

8108. Sept. 15.—Authorizing Volcanic Oil & Gas Co. to lay main under C.P.R. in Sandwich West tp., Ont.

8109. Sept. 15.—Authorizing C.P.R. to construct bridge 84.7 at Six Mile Creek, Mountain section Pacific Division.

8110. Sept. 14.—Authorizing Vancouver Power Co. to cross with its tracks New Westminster & So. Ry. at Cloverdale, B.C.

8111. Sept. 15.—Directing Brandon, Sask. & Hudson Bay Ry. to employ two men and a foreman on each of the sections known as the Boissevain and Minto sections, and if that number be not sufficient that the company employ such additional men as may be necessary for the purpose.

MAINLY ABOUT PEOPLE.

Hon. L. P. Brodeur, Minister of Marine, returned to Canada from England, early in Sept.

Lady Shaughnessy and the Misses Edith and Margaret Shaughnessy sailed for England, Sept. 24.

J. J. Hill, Chairman of the Board Great Northern Ry., celebrated his 71st birthday Sept. 17.

J. P. Mabee, Chairman Board of Railway Commissioners, returned to Canada from Europe, early in Sept

F. Ree, General Manager London and North Western Ry. (Eng.), arrived in Canada on a visit, Sept. 16.

Mrs. Calderwood, wife of Hugh Calderwood, marine architect, has returned to Toronto from Scarborough Beach, Me.

R. L. Barwick, who died at Barrie Sept. 3, aged 52, was in the old Northern Ry. of Canada's service for many years.

Colin Gordon, who died suddenly at Toronto, Sept. 8, aged 50, was for many years C.P.R. agent at Arthur, Ont.

W. J. Cockburn, special agent and inspector G.T.R. General Baggage Department, Toronto, died at his residence, East Toronto, Sept. 15.

D. McNicoll, Vice President C.P.R., returned to Montreal, Sept. 10, after completing a tour of the company's western lines.

H. E. Suckling, Treasurer C.P.R., returned to Montreal, Sept. 13, after a tour over the company's lines to the Pacific coast.

Lady Reid has presented a complete ambulance to the General Hospital, St. John's, Nfld., in memory of the late Sir Robert G. Reid.

Rear-Admiral Kingsmill returned to Canada Sept. 3, from England, where he had been attending the Imperial Defence Conference in London.

Jas. Mills, member of the Board of Railway Commissioners, has returned to Ottawa and resumed his duties, his health having much improved.

Mrs. A. Piers, wife of the manager of the C.P.R. Atlantic Steamship Line, and Miss Isabel Piers, left Montreal in Sept. to join Mr. Piers in Liverpool, Eng.

A. R. Mosher was re-elected Grand President of the Canadian Brotherhood of Railway Employes, at the annual convention held at Moncton, N.B., recently.

C. R. W. Postlethwaite, who was appointed Inspector of Asylums for the Ontario Government, is a son of C. W. Postlethwaite, Harbor Master of Toronto.

A. McMillan was presented with a mahogany buffet by the C.P.R. passenger staff in Toronto Sept. 8, on the occasion of his marriage to Miss Silverthorne.

Frank E. P. Turner, C.E., of Bracondale Hill, Toronto, who died recently, left an estate valued at $356,533, which he bequeathed to relatives and friends.

Lady Kirkpatrick, widow of the late Sir Geo. Kirkpatrick, C.P.R. director, will spend the winter in Egypt, where her son, Capt. E. Kirkpatrick, is stationed.

T. S. Acheson, C.P.R. General Grain Agent, Winnipeg, while feeding a pet bear at Winnipeg Beach recently, was attacked by it and rather badly mauled. We were advised Sept. 14, that though he had not recovered the use of the injured limb, he had been able to attend to his business as usual.

The directors of the newly-formed Canada Cement Co., Ltd., include the following: Sir Sandford Fleming, W. D. Matthews, Hon. R. Mackay, directors C.P.R.; J. R. Booth, Hon. G. A. Cox, directors G.T. Pacific Ry.; and G. E.

Drummond, director Canada Iron Corporation, Ltd.

J. Nelson, formerly Superintendent C.P.R., Toronto, is now connected with Robins, Ltd., a Toronto real estate firm, and is taking charge of its immigration business in the west.

T. C. Gregory, a well known civil and mining engineer, who was engaged on the construction of the Great Western Ry., now a part of the G.T.R., died in London, Eng., recently.

H. G. Dimsdale, of the G.T.P.R. engineering staff at Vancouver, B.C., while working near the camp, Sept. 13, sustained a broken arm and shoulder blade, caused by a falling tree.

J. Hendry, Vancouver, B.C., who has been elected President of the Canadian Manufacturers' Association, is President of the Vancouver, Westminster and Yukon Ry.

H. Larose, clerk in the C.P.R. ticket office at Place Viger station, Montreal, was sentenced to three years in the penitentiary, Sept. 13, for the theft of $800 from the company.

Among the ticket agents who have joined the Canadian Ticket Agents' Association recently are: H. G. Elridge, G.T.R., Vanleek Hill, Ont.; S. Way Kent, C.P.R., Paris, Ont.

A. C. Burrows, New York Central Lines travelling passenger agent, who has been transferred from Kansas, Mo., to Denver, Colo., is a son of W. T. Burrows, of Charlottetown, P.E.I.

L. A. Hamilton, ex-Land Commissioner C.P.R., will spend the autumn and early winter at his fruit farm, Lorne Park, Ont., having rented his Toronto house to Col. S. Denison.

G. Brown, St. John, N.B., who has been engaged for some time in the Maritime Provinces in railway construction, has been appointed Assistant Chief Engineer of Public Works.

A. C. Disney, chief clerk C.P.R. Atlantic steamship department, Chicago, has resigned to enter the White Star Line's service in its cruise department at New York.

Mrs. Crangle, wife of Capt. S. Crangle, formerly Marine Superintendent St. Lawrence & Chicago Steam Navigation Co., died at Toronto Sept. 12, aged 71, after several months' illness.

Lord Mount Stephen has given $1,000 to the fund being raised in Brantford, Ont., to purchase the old Bell homestead there, as a memorial to the telephone inventor.

W. Stitt, General Passenger Agent C.P.R. Eastern Lines, Montreal, spent a few days in the Ontario highlands early in Sept., and returned to Montreal, Sept. 18.

M. J. Haney, railway and general contractor, Toronto, was a passenger on board the steamboat Ohio when she ran on a rock on the Alaskan coast, Sept. 2, and became a total wreck.

Miss Heloise Keating, third daughter of E. H. Keating, C.E., ex-City Engineer of Toronto, and formerly General Manager Toronto Ry., was married at Toronto, Sept. 11, to C. F. Macklem.

P. A. McDermott, a Canadian Northern Ry. employe at Saskatoon, Sask., who was killed in the Warman, Sask., yards, Aug. 30, was at one time C.P.R. baggage master at Carleton Place, Ont.

H. D. Lumsden, ex-Chief Engineer National Transcontinental Ry. Commission, returned to Canada by the Empress of Ireland, Sept. 16, after an absence in Great Britain of about six weeks.

A. H. Smith, Vice President and General Manager New York Central Lines, was a passenger on the C.P.R. s.s. Empress of Ireland, arriving in Canada Sept. 16 from England.

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

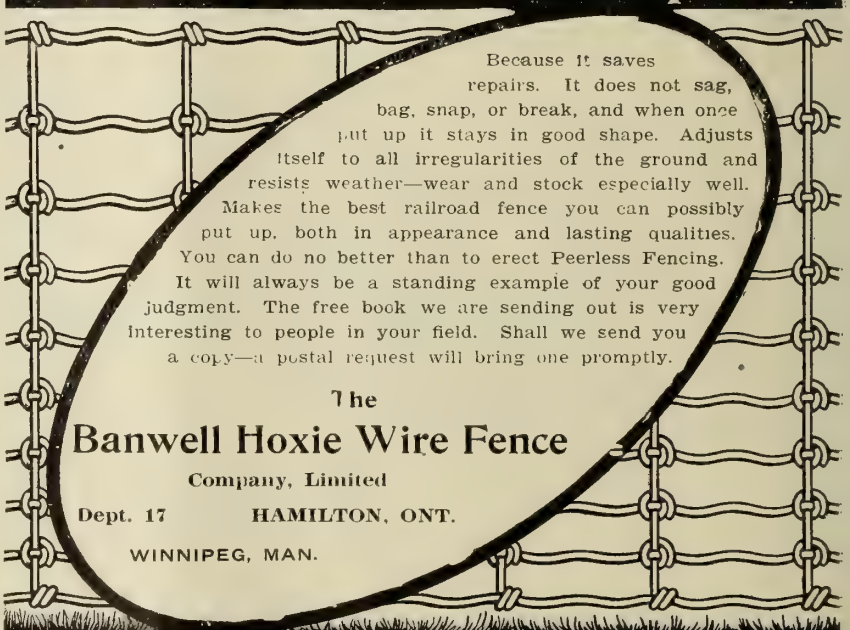
IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

PEERLESS
The Fence that saves Expense



Because it saves repairs. It does not sag, bag, snap, or break, and when once put up it stays in good shape. Adjusts itself to all irregularities of the ground and resists weather—wear and stock especially well. Makes the best railroad fence you can possibly put up, both in appearance and lasting qualities. You can do no better than to erect Peerless Fencing. It will always be a standing example of your good judgment. The free book we are sending out is very interesting to people in your field. Shall we send you a copy—a postal request will bring one promptly.

The
Banwell Hoxie Wire Fence
Company, Limited
Dept. 17 HAMILTON, ONT.
WINNIPEG, MAN.

STRONGER
Than Stock-Weather and Wear

P. Houston, heretofore Roadmaster Montreal and Ottawa section C.P.R., has been appointed Superintendent of Construction for Fauquier Bros., contractors for a portion of the National Transcontinental Ry.

M. J. Butler, Deputy Minister of Railways and Canals, returned to Ottawa, Sept. 4, from his trip of inspection over the lines being constructed in Western Canada in aid of which the government has granted subsidies.

D. B. Hanna, Third Vice President Canadian Northern Ry., and A. D. Davidson, Land Commissioner C.N.R., returned to Canada Sept. 4, from a brief business trip, during which they were in England, Scotland and France.

A number of championship, as well as individual prizes, were awarded by the judges at the Canadian National Exhibition, Toronto, recently to shorthorn cattle from Sir William Van Horne's farm at East Selkirk, Man.

W. W. Pope, K.C., assistant to W. H. Biggar, K.C., General Solicitor G.T.R., and Solicitor G.T.P.R., has been appointed Secretary to the Ontario Government Hydro-Electric Power Commission, with office at Toronto.

S. Spick, of the C.P.R. claims department, Winnipeg, was presented with a silver tea set by the clerks in the office, Sept. 1, on the occasion of his marriage and his removal to the company's service in Calgary, Alta.

Sir Thos. G. Shaughnessy, President C.P.R., has purchased the old Ross property on McGill St., Montreal, the price paid being, it is stated, $95,000. It is said the property has been purchased as a personal investment.

F. Ebey, C.P.R. station agent at Winnipeg Beach, Man., was presented with a case of pipes and some other smokers' supplies by the Winnipeg Beach Club, on the occasion of the closing up of the summer traffic season there.

A C.P.R. shunting engine collided with Sir Thos. G. Shaughnessy's private car early on the morning of Sept. 1, at Ottawa station. The President was asleep at the time, and he, as well as the other occupants, though somewhat shaken up, escaped without injury.

A. J. Nixon, who has resigned his position as Assistant Superintendent of the G.T.R. at London, Ont., recently, to enter the Board of Railway Commissioners service, was presented with a case of silver by the Mystic Shriners of that city, prior to leaving to take up his new duties.

S. Fay, General Manager of the Great Central Ry of England, arrived in Montreal Sept. 8, and during his stay visited the C.P.R. shops there. He was accompanied by his son, who is entering on the transportation course at McGill University.

Capt. L. A. Demers, F.R.A.S., Chief Examiner of Masters and Mates, and acting Wreck Commissioner, Ottawa, has been elected a member of the Royal Society of Arts, Eng., of which the King is a patron and the Prince of Wales the President.

Mrs. Brennan, widow of P. Brennan, yardmaster at Ottawa, who was killed in the yards June 17, has issued a writ against the G.T.R. to recover $10,000 damages, alleging that her husband's death was due to the company's negligence.

J. F. Stevens, formerly Chief Engineer of the Great Northern Ry., and latterly Chief Engineer of the Panama Canal Commission has been elected President of the Oregon Trunk Lines, the Hill railway to be constructed from the Columbia River to Central Oregon and San Francisco.

G. A. Beach, C.P.R. ticket agent at Fredericton, N.B., was arrested Sept. 8 on a charge of stealing $835 from the office there. The money was made up in a package to be sent to Montreal, and Beach claimed it disappeared during his temporary absence from the office. It is stated that an audit showed that there was a large shortage in the sale of tickets.

Mrs. Jas. Dobson, mother of C. A. Dobson, General Agent Dominion Express Co., Hamilton, Ont., died in Toronto Sept. 3, aged 93. She was a daughter of Capt. Wm. Moore, who was wounded in the battle at Queenston Heights, in which General Brock was killed. Her husband, who predeceased her by many years, was the first Reeve of Yorkville, now part of Toronto, and was a long time postmaster of Yorkville.

R. E. Perry, whose appointment as Assistant General Freight Agent Intercolonial Ry. at Montreal was announced in our last issue, was born at Drayton, Ont., July 5, 1876, and entered railway service Oct., 1891, since when he has been, to 1898, in various positions in local freight office, C.P.R., Toronto, and General Freight Agent's office, C.P.R., Toronto; 1898 to July 1, 1907, in general freight department, Intercolonial Ry., Montreal; July 1, 1907, to Aug. 1909, Chief of Tariff Bureau, I.C.R., Montreal.

Sir Thos. G. Shaughnessy, President C.P.R., accompanied by R. B. Angus, one of the directors, left Montreal on a special train Sept. 8 upon his annual inspection of the company's lines. At Toronto, W. D. Matthews and E. B. Osler, two other directors, joined the party, which went west on the Toronto-Sudbury branch, thence over the transcontinental line, intending to return via the Crow's Nest Pass route, the Minneapolis, St. Paul and Sault Ste. Marie Ry., and the Wisconsin Central Ry. Sir Thomas was expected to return to Montreal about Oct. 2.

F. H. Clendenning, who has been appointed Assistant General Freight Agent C.P.R. Pacific Division, Vancouver, B.C., was born at Montreal, Nov. 9, 1881, and entered C.P.R. service Aug. 1, 1898, since when he has been, to 1900, junior clerk; 1900 to 1902, register clerk, Traffic Manager's office, Montreal; to July, 1902, stenographer Fourth Vice President's office, Montreal; July 1, 1902, to Apr. 1, 1903, stenographer and freight clerk, Commercial Agent's office, New York Central and Hudson River Rd., Montreal; Apr. 1, 1903, to Feb. 1, 1904, stenographer and subsequently tracing clerk, C.P.R. General Freight Agent's office, Vancouver, B.C.; Feb. 1, 1904, to Sept. 1, 1908, Contracting Freight Agent C.P.R., Victoria, B.C.; Sept. 1, 1908, to Aug. 17, 1909, City Freight Agent C.P.R., and District Freight Agent Esquimalt & Nanaimo Ry., Victoria.

A. A. Tisdale, who has been appointed Superintendent G.T.P.R. Lake Superior Division, Fort William, Ont., was born at Mount Vernon, Ont., Mar. 8, 1874, and entered railway service Sept., 1889, serving until July, 1892, in various capacities in the G.T.R. local freight office at Hamilton, Ont. In July, 1892, he was transferred to the Chief Engineer's office as secretary, and remained in the same capacity when the engineering offices were removed to Montreal, Feb., 1896. In May, 1899, he was appointed secretary to F. H. McGuigan, then General Superintendent G.T.R., Montreal, and remained with him in his successive positions of Manager and Fourth Vice President, as secretary, chief clerk and assistant, and after Mr. McGuigan's resignation, he was appointed assistant to the General Transportation Manager, which position he held until his appointment as Assistant to the Vice President and General Manager G.T.P.R., Nov., 1907.

Instruction of Railway Shop Apprentices.

S. J. Hungerford, Superintendent C.P.R. Shops, Winnipeg, contributed a very interesting article on this subject to our last issue. We have since been supplied with the following official information respecting the work at the company's Angus shops, Montreal.

The system, based on broad, commonsense lines, has become well established, and while probably much remains to be accomplished, the splendid progress made thus far and the strong organization which is being built up, promise well for the future. The management is not looking for immediate results, for it is far-sighted enough to look five, even 10 years ahead, feeling sure that its present efforts will be rewarded when that time elapses.

The young recruit, when seeking admission, has to satisfy the management as to his general intelligence and good health. When in the workshops, the future mechanic is put through a systematic and continuous training, which, upon completion of his apprenticeship, enables him to qualify for a mechanic's position, and then, by further instruction, advance to the highest position in the organization. Every facility is placed in the way of the ambitious and intelligent employe to receive instruction from qualified and experienced officials in shop and railway work. The trend of this preliminary training has the tendency to create a desire in the aspiring employe. The training is progressive—starting first with educational instruction for young employes, then advancing to shop and educational instruction for the apprentices, and finally the journeyman receives educational facilities which enable him to qualify for minor positions on the staff. The moral and physical side, as well as the mental, is covered by the training given, and it is interesting to see what this railway is doing towards the development of its employes.

The primary education for young employes consists of 1, reading and writing; 2, elementary arithmetic; 3, geography of the C.P.R. system; 4, Biographical sketches of past and present eminent Canadians; 5, freehand drawing; 6, punctuality and regularity; 7, thoroughness application and self-reliance; 8, cleanliness and thrift; 9, recreation. The young employe after he has received the above training, is put through courses of instruction in shop arithmetic, shop mechanics, shop practice and mechanical drawing, which enable him upon completion of his apprenticeship to qualify as a skilled mechanic. Then, if necessary, he may take advantage of the advanced classes in mechanics, electricity, locomotive and car construction, and workshop practice.

A very interesting feature of the training is the practical work of the boys in the workshops, which is carried on under the direction of skilled shop men who are termed shop instructors. These men are carefully selected, as they are held responsible for the moral as well as the practical training of the boys. The educational side of the training is carried on in a room set apart for the purpose, and well equipped with desks, tables, blackboards, cupboards, etc. The apprentices attend the instruction classes during working hours, and for the time thus spent the boys are paid their regular wages. The instruction classes are under the charge of practical and technical trained men who are termed educational instructors. The chief Educational Instructor, Henry Maxwell, is a man with a large heart, and kindly feeling for the boys.

In order to encourage the deserving apprentices, the company donates each year a scholarship to the ten best apprentices. These scholarships consist of complete courses in mechanical or elec-

trical engineering, following the courses of the correspondence schools, but taught by the company's own instructors. The company also awards two scholarships, tenable for four years at McGill University, Montreal, each year to sons of employes. The holders of these McGill University scholarships are employed by the company during vacation, and receive remuneration for their services. Last year several officials of the company awarded prizes to successful employes attending evening classes.

A glance at the syllabus of the evening classes shows that the education given is upon very practical lines. Over 250 employes take advantage of these classes, the upkeep of which is chiefly borne by the men themselves, but is assisted by the company and the Educational Department of the Province of Quebec. Following is the syllabus for the season 1909-1910:

Locomotive Shop Practice—Instructor, A. H. Kendall, foreman, locomotive erecting shop, C.P.R.

Electrical Engineering—Instructor, G. McDermot, construction foreman, electrical department, C.P.R.

Mechanical Drawing—Instructor, D. L. Davis, draftsman, C.P.R.; H. Tetlaw, assistant foreman, machine shop, C.P.R.

Car Drawing—H. Vezina, educational instructor.

Mathematics—Instructor, H. Maxwell, educational instructor.

Iron and Steel—Instructor, E. B. Tilt, Assistant Engineer of Tests, C.P.R.

These instructors are all experienced officials, holding responsible positions in the company. With such a splendid system of training, the future of Canadian boys who enter upon railway work in the C.P.R. service will be assured. Inefficient and unskilled labor is always plentiful, but skilled labor is scarce. This interesting work is carried out under the supervision of H. H. Vaughan, Assistant to the Vice President; R. Johnson, Assistant Superintendent of Motive Power; and R. W. Burnett, Acting General Master Car Builder. These officials take a keen, personal interest in the welfare of the apprentices, and firmly believe that a properly organized apprenticeship system would do much to correct the scarcity of skilled labor. The supervisor of apprentices is Martin Gower, a graduate of London and Cambridge Universities, and a man who has had considerable practical engineering experience, as well as holding technical appointments. He has made a specialty of apprentice work for several years, both in the workshop and the school.

The young clerks in the general and other offices at Montreal have equal opportunities with the apprentices in the shops for equipping themselves for their life work. Schools of telegraphy and shorthand have been in operation for some time, and the advantages they offer are being eagerly seized by a number of ambitious youths. The schools are under competent teachers—L. W. Power being in charge of the telegraphic and C. A. Bennett in charge of the shorthand classes. The schools are located in the C.P.R. building, immediately west of Windsor St. station, Montreal. There are two terms each year, and the classes meet three evenings a week, when the students of telegraphy are instructed in the mysteries of the key, taught how to dispatch trains, etc., etc. In the shorthand school Isaac Pitman's system is used. To ensure a regular attendance a monthly fee of $2 is charged each pupil, but this is refunded in full at the end of six months' term to the pupils who have attended 75% of the classes.

The G.T.P.R. has recently had executed a large painting in oils, depicting Mount Robson in the Rocky Mountains. It has been exhibited in Montreal and Toronto, and will be sent to London, Eng., for display in the G.T.R. offices there.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Alberta Central Ry.—J. G. Macgregor, of Goderich, Ont., is reported to have been appointed Chief Engineer of this projected railway, with office at Red Deer, Alta.

Board of Railway Commissioners.—It was announced in our last issue, on official advice from Ottawa, that A. J. Nixon, heretofore Assistant Superintendent G.T.R., London, Ont., had been appointed as the Board's Operating Officer, his duties to commence Oct. 1. We have since been advised, officially, that Mr. Nixon has been appointed, by order in council, Chief Operating Officer, at a salary of $3,600 a year.

A. F. Dillinger, heretofore Operating Assistant Traffic Department, has been appointed Assistant Chief Operating Officer.

J. Ogilvie and W. S. Blyth, heretofore respectively Inspector and Assistant Inspector Railway Equipment and Safety Appliances; E. C. Lalonde, Inspector of Accidents, and J. Clarke and M. J. McCaul, Assistant Inspectors of Accidents, will be attached to the Operating Department.

Canadian Northern Ry.—G. R. Fairhead, heretofore chief clerk General Freight and Passenger Agent's office, Toronto, has been appointed City Freight Agent, Toronto, vice G. E. McCulloch, resigned.

C. H. Green, heretofore clerk, has been appointed chief clerk General Freight and Passenger Agent's office, Toronto, vice G. R. Fairhead, promoted.

Canadian Pacific Ry.—The operation and maintenance of the Company's Atlantic Steamship Line has been placed under the jurisdiction and supervision of G. M. Bosworth, Fourth Vice President. The Manager of the line reports to him and is governed by his instructions, instead of reporting to the President, as heretofore. Mr. Piers' jurisdiction is now confined to the Company's Atlantic Steamship Line.

G. A. G. Bartlett, heretofore locomotive engineer, running out of McAdam Jct., N.B., has been appointed Assistant Air Brake Instructor, and is Assistant to C. W. Carey on the air brake car.

J. R. Brennan, heretofore Roadmaster Maniwaki and Waltham branches, has been appointed Roadmaster Montreal and Ottawa section, vice P. Houston, resigned to enter the service of G. & F. E. Fauquier, railway contractors.

S. Jeffery, heretofore section foreman, Chalk River section, Ont., has been appointed Roadmaster Maniwaki and Waltham branches, Que., vice J. R. Brennan, transferred.

H. W. Dummert, heretofore fitter, has been appointed shop foreman, Carleton Jct., Ont., vice C. A. Stark, appointed Locomotive Foreman, Smith's Falls, Ont.

A. A. Sheppard, heretofore Locomotive Foreman, Schreiber, Ont., has been appointed Locomotive Foreman, Chapleau, Ont., vice G. P. Morton, transferred.

J. R. Gildea, heretofore Assistant Shop Foreman, North Bay, Ont., has been appointed Locomotive Foreman, Schreiber, Ont., vice A. A. Sheppard, transferred.

G. P. Morton, heretofore Locomotive Foreman, Chapleau, Ont., has been appointed assistant shop foreman, North Bay, Ont., vice J. R. Gildea, transferred.

W. J. Singleton has been appointed Trainmaster at North Bay, Ont.

S. C. Bushnell has been appointed Travelling Freight Agent for the C.P.R., Minneapolis, St. Paul and Sault Ste. Marie Ry., Duluth, South Shore and Atlantic Ry., C.P.R. Steamship Lines and the Canadian Pacific Dispatch, reporting to the State Agent at Milwaukee, Wis.

E. W. Kolb, heretofore Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, Central Division, has been appointed Superintendent of that service, vice O. V. Dotts, resigned. Office, Winnipeg.

S. A. Simpson, heretofore chief clerk Superintendent Sleeping, Dining and Parlor Cars and News Service office, Winnipeg, has been appointed Assistant Superintendent that service, Central Division, vice E. W. Kolb, promoted. Office, Winnipeg.

J. G. Cameron, Trainmaster, Winnipeg, has had his jurisdiction extended over Second Division lines east of Brandon and east of Belmont, Man.

G. A. Cunliffe has been appointed Trainmaster at Brandon, Man., with jurisdiction over lines west of Brandon and west of Belmont, Man.

W. J. Renix, heretofore acting Locomotive Foreman, Brandon, Man., has been appointed shop foreman, Brandon, Man.

J. C. Robinson, heretofore night yardmaster, has been appointed General Yardmaster at Brandon, Man., vice D. Nicks, transferred.

F. Nicklin, heretofore in the train service, has been appointed night yardmaster at Brandon, Man., vice J. C. Robinson, promoted.

T. Bates, heretofore Locomotive Foreman at Moose Jaw, Sask., has been appointed General Foreman, Calgary, Alta.

D. Nicks, heretofore General Yardmaster at Brandon, Man., has been appointed General Yardmaster at Moose Jaw, Sask.

H. W. Craig has been appointed Divisional Car Foreman, Western Division. Office, Calgary, Alta.

J. A. Tobin has been appointed acting Trainmaster at Macleod, Alta., vice R. H. Foster.

W. R. Haldane, formerly General Freight Agent, Pacific Division, has been appointed General Freight Agent, Kootenay and Boundary Districts, vice R. E. Larmour, transferred. Office, Nelson, B.C.

E. Sterling, heretofore trainman, has been appointed acting Trainmaster, Nelson, B.C., vice J. M. Cameron, transferred.

F. H. Clendenning, heretofore City Freight Agent C.P.R., Victoria, and District Freight Agent Esquimalt and Nanaimo Ry., has been appointed Assistant General Freight Agent Pacific Division, vice W. H. Robertson, resigned. Office, Vancouver.

We are advised that it is expected that W. H. Gardiner, formerly Contracting Freight Agent, Vancouver, will succeed Mr. Clendenning at Victoria.

Chicago and Great Western Ry.—A. C. Gillespie, heretofore assistant ticket agent C.N.R., Edmonton, Alta., is reported to have been appointed City Freight and Passenger Agent, C. and G.W.R., Winnipeg.

Cincinnati, Hamilton and Dayton Rd.—W. L. Kellog, heretofore Superintendent of Motive Power and Car Department, Detroit, Mich., has been appointed Superintendent of Motive Power, in charge of locomotive and car department. Office, Lima, O.

Grand Trunk Pacific Ry.—A. A. Tisdale, heretofore Assistant to Vice President and General Manager at Montreal, has been appointed Superintendent Lake Superior Division. Office, Fort William, Ont.

P. H. McFadden, at one time General Roadmaster G.T.R., Allandale, Ont., has been appointed General Roadmaster G.T.P.R. lines west of Winnipeg, reporting direct to General Superintendent. Roadmasters report to and receive instructions from the General Roadmaster. Office, Melville, Sask.

T. Young, heretofore Locomotive Foreman, Biggar, Sask., has been appointed Travelling Engineer. Headquarters, Biggar, Sask.

G. M. Carruthers has been appointed Locomotive Foreman at Biggar, Sask., vice T. Young, assigned to other duties.

Grand Trunk Ry.—J. D. Scott has been appointed Locomotive Foreman at Brockville, Ont., vice W. H. Walker, resigned.

J. H. Stortz, heretofore Locomotive Foreman, East Toronto, has been appointed Locomotive Foreman at Mimico, Ont., vice N. MacNicol, resigned.

W. J. Hallett has been appointed Car Foreman at Allandale, Ont., vice D. H. Sargent, deceased.

C. G. Bowker, heretofore Trainmaster at Stratford, Ont., has been appointed Assistant Superintendent, Middle Division, vice A. J. Nixon, resigned. Office, London, Ont.

J. A. McLardy, heretofore Trainmaster Wabash Rd., St. Thomas, Ont., has been appointed Trainmaster at Stratford, Ont., vice C. G. Bowker, promoted.

The following agents have been appointed:—Lacadie, Que., G. W. Kimball; River Beaudette, Que., J. Giroux; King, Ont., F. A. Tebo; Powassan, Ont., W. J. Buchanan; Thornton, Ont., T. Barlow; Burlington Jct., Ont., T. H. Sumner; Harley, Ont., N. A. Oxley; Aubrey, Que., F. O. Parent (temp.); Ste. Polycarpe Jct., Que., O. Clement (temp.); Arnprior, Ont., J. Boyd; Douglas, Ont., J. M. Joynt.

Grand Trunk Ry. and Wabash Rd.—G. F. Sullivan, heretofore night yardmaster, Fort Erie, Ont., has been appointed General Yardmaster at Black Rock, Buffalo, N.Y., vice J. W. Canatsy.

Intercolonial Ry.—Press reports stated recently that N. L. Rand, Master Mechanic, Moncton, had been placed on the pension list. We were officially advised, Sept. 13, that the report was unfounded. We understand that Mr. Rand is desirous of retiring from service, and has asked to be placed on the pension list.

V. Saindon, heretofore fitter, has been appointed acting roundhouse foreman, Riviere du Loup, Que., vice T. Ryan, whose appointment as acting Division Master Mechanic there was announced in our last issue.

Northern Navigation Co.—R. Beaumont has been appointed, temporarily, General Agent at Port Arthur and Fort William, Ont., vice J. Bell, resigned.

Pere Marquette Rd.—W. Boughton, heretofore Master Mechanic at Saginaw, Mich., has been appointed General Master Mechanic in charge of locomotive and car departments, vice W. L. Kellog, Superintendent of Motive Power and Car Department, resigned. Office, Detroit, Mich.

J. H. Anderson, heretofore Travelling Freight Agent, Buffalo, N.Y., has been appointed Commercial Agent, Cincinnati, O.

C. S. Stephens, heretofore Travelling Freight Agent, Chicago, Ill., has been appointed Travelling Freight Agent, Indianapolis, Ind., reporting to General Freight Agent, Detroit, Mich.

H. K. Patriarche, heretofore Travelling Freight Agent, Pittsburg, Pa., has been appointed Travelling Freight Agent, Boston, Mass., reporting to New England Freight Agent, Boston, Mass.

H. C. Dithridge has been appointed Travelling Freight Agent, Pittsburg, Pa., reporting to Commercial Agent, Pittsburg, Pa.

Quebec, Montreal and Southern Ry., Napierville Jct. Ry.—Press reports recently stated that G. H. Burgess had been appointed Chief Engineer Quebec, Montreal and Southern Ry., with office at Montreal. We are advised that he has been appointed Chief Engineer Delaware and Hudson Co.'s main and branch lines, not including those in Canada. The position of F. D. Anthony, as Chief Engineer Q.M. and S.R., and N.J.R., remains unchanged.

Wabash Rd.—J. W. Canatsy, heretofore General Yardmaster G.T.R. and W. Rd., Black Rock, Buffalo, N.Y., has been appointed Trainmaster at St. Thomas, Ont., vice J. A. McLardy, appointed G.T.R. Trainmaster at Stratford, Ont.

The Wabash Rd. has opened an agency for freight and passenger business at Seattle, Wash. This agency has jurisdiction over business in the State of Washington and in British Columbia. W. D. Stubbs, General Agent, has charge of the office.

F. H. Wegener, heretofore Station Passenger Agent at St. Louis, Mo., has been appointed Travelling Freight and Passenger Agent at Seattle, Wash., reporting to W. D. Stubbs, General Agent.

Wisconsin Central Ry.—C. F. Clement has been appointed Treasurer of the company, vice W. R. Hancock, resigned. Office, Minneapolis, Minn.

Meals at C.P.R. Angus Shops.

Napoleon said that an army travels on its stomach; a good comfortable meal for a workingman certainly means better work. Among the many special features at the C.P.R. Angus shops, Montreal, are the dining-rooms for the men, which are unique in Canada. Good, wholesome, well-cooked food is served in warm, comfortable surroundings at very low prices. This service is possible because the company furnishes free buildings, light, etc. The system used is known as the "help yourself"—the men come in at one door, take a tray and pass along a counter, where they help themselves to what they desire as they pass to their seats. A ticket or check is placed by one of the attendants upon each tray, showthe price of the food they have selected. A full meal costs 19c., and an average meal about 15c. One thousand men can be comfortably seated at once in the two large dining-rooms. The following reprint of the menu shows the prices paid for the various foods:

Soup	2	Iron brew, per bottle	5
Beef stew	3	Ginger ale, per bottle	5
Irish stew	3	Cream soda, per bottle	5
Hamburg steak	5	Apple nectar, bottle.	5
Roast beef	5	Lemon soda, bottle.	5
Roast pork	5	Dry toast	2
Corn beef	5	Buttered toast	3
Beefsteak (to order)	10	EGGS.	
Beefsteak pie	5	Fried—one	4
Fried liver	5	Scrambled—one	4
Boiled ham	5	Poached—one	4
Codfish cakes (fast days)	5	Poached—one, on toast	5
Creamed codfish on toast (fast days)	5	CEREALS.	
VEGETABLES.		Force, with milk	5
Boiled potatoes	3	Shredded wheat, with milk	3
Mashed potatoes	3	Canada Flakes, with milk	5
French fried potatoes	3	Oatmeal, with milk.	5
German fried "	3	SANDWICHES.	
Green peas	3	Ham	5
Stewed corn	3	Beef	5
Stewed tomatoes	3	Egg	5
Mashed turnips	3	Cheese	5
Boiled onions	3	Stewed prunes	3
Pickled beets	3	Cakes	1 and 2
Boiled cabbage	3	Crullers	1
Coffee	3	Pies, per cut	3
Tea	3	Pudding	3
Milk, per glass	3		

The above bill of fare includes bread with all meats, soups, stews and fish, and milk and sugar with coffee and tea. There is a change of bill of fare daily—serving two kinds of meat, two vegetables and choice of pie, pudding or cake. The dining-rooms are open every working day from 6 a.m. to 7 p.m. To see the men when at their meals is sufficient evidence that these dining-rooms are appreciated and enjoyed.

Conductor, on railway train—"This isn't the right ticket."

Passenger, absent-mindedly—"What's the matter with it?"

Conductor—"This ticket calls for a diamond ring."

EMBOSSED ALUMINUM NUMBERS

Our Signs and Numbers are made of ALUMINUM and riveted with ALUMINUM RIVETS to a BLACK JAPANNED STEEL PLATE. The great benefit of our Numbers and Signs is. that being made of Aluminum they will never CRACK, RUST or TARNISH, and can be seen much better both by day and night than any other manufactured. The Light, Glistening Aluminum Figure standing out on the Black Background makes a PERFECT CONTRAST between the Number and the Plate.

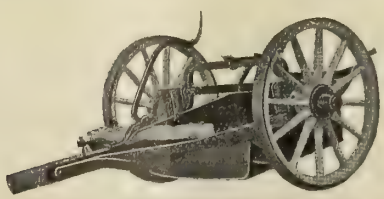
DRAG SCRAPERS—Pressed Steel. TRUCKS of every description
Catalogue for the Asking



Canadian Northern Ry. Construction, Etc.

The Canadian Northern Quebec Ry. is preparing to erect a roundhouse and machine shop at Joliette, Que. Plans have been prepared, but the matter has not yet reached the construction stage. It is said that it will be built by the Imperial Construction Co., of Toronto.

Quebec and Lake St. John Ry.—We are advised that the only work to be done at present in Quebec is the remodelling of the yard and putting up an addition 50 by 100 ft. to the car repair shops.

Canadian Northern Ontario Ry.—Tracklaying has been completed on the extension from Hawkesbury to the vicinity of Ottawa, and ballasting and other work necessary to complete the line for operation is well advanced. It is expected that construction into Ottawa will be completed so as to permit of the opening of the line for traffic early in Oct. Work on a temporary bridge over the Rideau River was started Sept. 15, to be completed by the end of Sept.

Tenders were received to Sept. 18 for the grading, etc., of the first section of the line between Ottawa and Toronto, viz., from Toronto to Trenton, about 100 miles. The route adopted leaves the company's Toronto-Sudbury line in the Don Valley, about six miles from Toronto, and will strike the boundary of Scarboro tp. about midway between the G.T.R. and the C.P.R., and keeping about equi-distant from these two lines, strikes the boundary of Pickering tp. in the vicinity of Cherrywood, where the line will join the line formerly located. This line runs through the middle of Pickering and Whitby tps., crossing the G.T.R. branch line from Whitby near Brooklin. The line will then drop a little southerly to Orono, in Clarke tp., and thence will gradually run south east until it reaches Port Hope; from thence it will parallel the G.T.R. to Trenton, passing through Cobourg, Grafton, Colborne and Brighton. Beyond Brighton the line crosses the G.T.R. main line and follows along the Bay of Quinte shore to Trenton. The contract of the construction of the Toronto-Trenton section has been let to Angus Sinclair, C.E., Toronto, and work will be started immediately.

D. D. Mann stated in an interview Sept. 7 that the company's general locomotive and car repairing and construction shops would be located in Toronto. They will not be constructed until the line from Toronto to Ottawa and the line from Sudbury to Port Arthur have been completed. The matter has been brought before the city council by the Mayor. A suggestion has been made that the G.T.R. yards at East York, which have been closed, the work done there being transferred to Mimico, would be suitable for the C.N.O.R. It is stated that a C.N.O.R. official has made an inspection of the property.

Canadian Northern Ry.—The Mayor of Fort William, Ont., received a letter Sept. 3 from H. Sutherland, Executive Agent C.N.R., Winnipeg, to the effect that the company was willing to pay its share of the cost of the Yonge St. subway according to the understanding between the city and the C.P.R. The propositions which remain to be approved by the C.N.R. pertain to the abandonment of certain rights on Arthur and Vickers streets, and the terms offered by the C.P.R. for the lease of running rights over C.P.R. rails from West Fort William to Port Arthur. When carried out this agreement will bring about the concentration of the railway tracks on the river front.

Application is being made for the amalgamation of the Northern Extension Ry. with the C.N.R. The N.E.R. connects different portions of the C.N.R. system in and adjacent to Winnipeg, crossing at St. James bridge and Portage Ave.

A contract has been let for supplying a duplicate pumping plant to provide water for the Fort Rouge shops and yards, Winnipeg. Each unit of the plant will be capable of pumping 500,000 gallons in 24 hours.

The stables at the joint terminal at Fort Garry are in course of erection. The building is to be of two stories, 228 by 100 ft. wide, containing 144 stalls. The contractors are G. H. Archibald and Co.

Tenders were received to Sept. 22 by the city engineer of Saskatoon, Sask., for the construction of a subway under the C.N.R. there.

Surveys on the line from Yellowhead Pass to Vancouver, B.C., are being pushed vigorously. The latest reports were that parties were working in the vicinity of Cranberry Lake. The surveys are extending northwards along the valley of the North Thompson River. Another party is working westward through the foothills of the Rocky Mountains towards the Yellowhead Pass. Two other parties, it is reported, have practically completed the final location of a line through the Fraser River canyon between Lytton and Yale, 54 miles. The location of the line between Yale and Hope is also in hand. Between Hope and New Westminster no serious engineering difficulties are likely to be encountered, as the Fraser River valley widens out considerably and there is plenty of room for more than one railway. (Sept., pg. 683.)

American Association G. P. and T. A.

The 54th annual convention of the American Association of General Passenger and Ticket Agents was held at Toledo, Ohio, Sept. 14 and 15. The President, G. T. Bell, Assistant Passenger Traffic Manager G.T.R. and G.T.P.R., occupied the chair, and in replying to an address of welcome by the Mayor made a number of interesting references to the position of Toledo as a railway centre In his closing address Mr. Bell urged co-operation between the Association and the baggage agents, travelling passenger agents and ticket agents associations, and expressed the hope that a new system of interline ticketing would be introduced that would immensely reduce the number of forms now used and reduce the ticket sellers' work, and suggessted an attempt to secure at leading stations where the ticket business requires the exclusive attention of one or more ticket sellers, the most efficient and experienced men.

Following the annual custom, the retiring President was presented with a gavel, the presentation being made by E. J. Weeks, Chairman New England Passenger Association. The gavel, which is a very handsome one, is made partly of Canadian oak from the Northern Navigation Co.'s s.s. Hamonic, and of ebony from a Mexican railway tie. The handle is a portion of Wright Bros.' first successful aeroplane. The gavel is bound together with a steel strand from the old G.T.R. suspension bridge at Niagara Falls, embedded in the gavel is a rivet from the original Victoria bridge at Montreal, and on it is a silver hand made from ore from the Drummond mine at Cobalt. The case for the gavel is made of British Columbia fir, inlaid with Mexican ebony.

W. Bunton, G.T.R. ticket agent, Peterboro, Ont., who attended as the representative of the Canadian Ticket Agents Association, addressed the meeting at length and was given a very cordial reception.

The following officers were elected:—President, S. G. Hatch, G. P. A. Illinois Central Rd., Chicago; Vice President, S. Moody, G. P. A. Pennsylvania lines west, Pittsburg; Secretary, C. M. Burt, G. P. A. Boston & Maine Rd., Boston.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases from 1908-09, from July 1, 1909:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 843,500	$613,900	$229,600	$26,700+
Aug.	807,100	602,700	204,400	18,300+
	$1,650,600	$1,216,600	$434,000	$45,000+
Inc. or Dec.	$ 174,700	$129,700	45,000	

Approximate earnings for three weeks ended Sept. 21, $700,900, against $587,800 for same period 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1908-9, from July 1, 1909:

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
July	7,140,029.93	4,660,159.20	2,479,870.73	205,297.48+
Inc. or Dec.	$ 847,149.11	$641,851.63	$205,297.48	

Approximate gross earnings for Aug., $7,152,000, and for 3 weeks ended Sept. 21, $5,385,000; against $6,254,000 and $4,203,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross operating earnings for July, $285,234.18; expenses, $203,288.70; net operating earnings, $81,945.4, against $226,114.98 gross operating revenue; $164,363.88 expenses; $61,751.10 net operating earnings for July, 1908. Approximate gross earnings for Aug., $308,376, and for two weeks ended Sept. 14, $143,525, against $234,773 and $112,529 for same periods 1908.

MINERAL RANGE RD.—Operating revenue for July, $73,665.33; expenses, $62,850.00; net operating earnings, $10,815.33, against $73,826.80 operating revenue; $60,898.17 expenses; $12,928.63 net operating earnings, for July, 1908. Approximate gross earnings for Aug., $74,015, and for two weeks ended Sept. 14, $34,495, against $70,437 and $29,157 for same periods 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for July, $1,144,521.82; expenses, $657,048.06; net earnings, $487,473.76, against $950,108.98 gross earnings; $556,808.02 expenses; $393,300.96 net earnings for July, 1908. Approximate earnings for Aug., $1,066,830, and for two weeks ended Sept. 14, $1,117,326, against $994,983 and $986,931 for same periods 1908.

CHICAGO DIVISION.—Gross earnings for July, $718,412.08; expenses, $435,376.11; net earnings, $283,035.97, against $659,261.94 gross earnings; $412,110.92 expenses; $27,151.02 net earnings for July, 1908.

Grand Trunk Ry. Earnings, Expenses Etc.

TRAFFIC RECEIPTS OF THE SYSTEM

Aggregate from July 1:

	1909	1908	Inc.	Decr.
Grand Trunk	£1,163,035	£1,056,914	£106,120	.....
Canad. Atlantic	69,779	76,916	.....	£7,137
G. T. Western	215,267	202,573	12,694	.....
D.G.H. & M.	66,425	61,656	4,769	.....
Total.	£1,514,506	£1,398,060	£116,446	.....

Approximate earnings for Aug., $3,897,409, against $3,483,778 for same period 1908.

Railway engineers are becoming increasingly alive to the importance of building both track and rolling stock with reference to the heavy centrifugal forces which are brought into play when heavy trains are run at express speed around curves. These stresses are particularly severe in the case of heavy electric locomotives built for use on steam railways. To prevent "nosing" or side oscillation, the New Haven electric locomotives have been provided with end pony trucks, and the New York Central locomotives with four-wheel trucks. In both cases the improvement in the running has been very marked.

Weld Frames Without Dismantling

Why go to the bother and expense of taking down a locomotive frame to weld it? Thermit enables you to weld it in place and return your engine to service with the least possible delay. Some shops are making a regular practice of doing the entire job in twelve hours or less. The process is equally advantageous for repairing driving wheel spokes, connecting rods, mud rings, crank shafts and for general repair work.

Write for pamphlet No. 25 N and for "Reactions," the Thermit Quarterly which give full information.

Executive Committee:—P. Dubee, Secretary, Montreal St. Ry.; E. A. Evans, General Manager, Quebec Ry. Light and Power Co.; R. J. Fleming, General Manager, Toronto Ry.; H. M. Hopper, Secretary-Treasurer, St. John Ry.; J. E. Hutcheson, Superintendent and Purchasing Agent, Ottawa Electric Ry.; C. B. King, Manager, London St. Ry.

Assistant Secretary, Aubrey Acton Burrows, Secretary and Business Manager, Railway and Marine World.

B. C. Electric Railway Locomotives.

The illustrations given herewith show one of three electric locomotives which have been built for the British Columbia Electric Ry. for its interurban line now under construction between New Westminster and Chilliwack, a distance of over 60 miles. The locomotives are of the articulated truck, four-axle type, with one motor mounted upon each axle. The maximum rated tractive effort is 16,000 lbs. drawbar pull, and the maximum instantaneous effort is 25,000 lbs.

A feature of special interest is that the body of the locomotive rests upon two four-wheeled trucks, coupled together by a massive hinge having lateral flexibility but vertical rigidity, thereby enabling the rear trucks to resist any tendency to tilt under the action of the forward truck, and vice-versa. The centre pins and cab platform framing are not subjected to any longitudinal stress, except that due to its own inertia when starting and stopping, the whole pull of the motors being transmitted direct from the motor through the trucks. Suitable arrangements are made to allow the trucks to radiate when passing round a curve. The spring suspension is of the locomotive type, the weight being carried by semi elliptic springs resting on the journal box saddles.

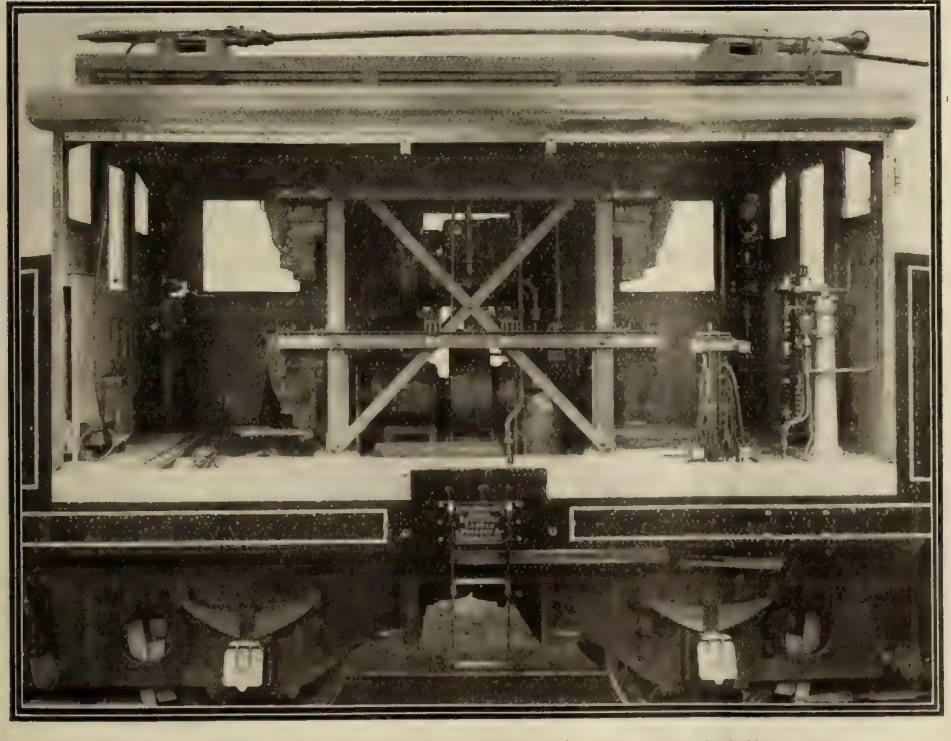
ELECTRIC LOCOMOTIVE FOR B.C. ELECTRIC RY. CO.'S FRASER VALLEY BRANCH.

Fig. 1 shows the general appearance of the locomotives, and fig. 2 gives a view of the interior of the cab. Here can be seen the two master controllers, one at each end of the cab, the contactor boxes, circuit breakers, switches, etc. The control equipment is of the standard multiple unit type, with series magnets operating the various contactors. The resistances are placed in the sloping ends of the superstructure.

The motor equipment consists of 4 D.K. 12 A motors. When operating on a 600 volt circuit, each motor will give a tractive effort of 4,040 lbs. on the periphery of the 42-inch wheels and a speed of 15 m.p.h. at the one hour rating. Each motor is fitted with reduction gear having a ratio of 3.64 to 1. The armature bearings of the motor are lubricated by oil rings which are specially designed to prevent flooding when running at high speeds. The axle bearings are lubricated by a system of wicks which are immersed in oil wells. No grease is used as an emergency lubricator. The whole of the gearing of the motors is contained in a malleable iron oil tight gear box, which is provided with suitable stiffening ribs. It is supported by the axle bearing at one end, and by the pinion bearing and motor shell at the other end.

The motors are designed and arranged for forced ventilation, the air being blown into the motor shell at the end farther from the commutator, and passing out at suitable openings provided at the commutator end.

The air for the forced ventilation is obtained by means of a centrifugal blower situated in the centre of the cab and driven by a motor. The controller for operating this motor is situated near the right hand master controller seen in fig. 2. In addition to the blower for the motors, there is an electrically driven air compressor with suitable air reservoirs for the air brake equipment, the locomotive being fitted with combined straight and automatic air brake. The compressor for the brake equipment is mounted above the motor driven blower in the cab. Two current collectors are provided, these being of the straight under running trolley type, the current being collected from an overhead trolley line. The trolleys are equipped with retrievers.



INTERIOR OF ELECTRIC LOCOMOTIVE CAB. B.C. ELECTRIC RY.

Following are general dimensions, etc.

Number of motors	4
Gear ratio	3.64 to 1
Number of driving wheels	8
Diameter of driving wheels	42″
Total wheel base	24′ 6″
Wheel base of each truck	8′ 0″
Length over all	35′ 7″
Length of main cab	16′ 5″
Height of cab above rail level	14′ 1½″
Width of cab	9′ 8″
Total weight of locomotive	50 tons

The locomotives were built by Dick, Kerr & Co., Ltd., the electrical equipment at Preston, Eng., and the trucks and mechanical portion generally at Kilmarnock, Scotland.

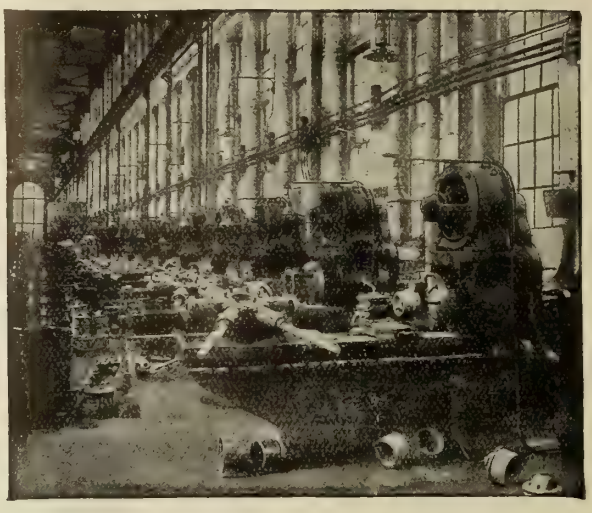
Canadian RAND Co. Limited
MONTREAL, QUE.
Branches at:
TORONTO, WINNIPEG, ROSSLAND, COBALT, HALIFAX, MONTREAL.



This Shop's Power Cost is Probably 40% Lower than Your Shop's

—unless your shop, too, is equipped with Hawthorn Direct Drive Motors, you are actually wasting from 20 to 50 per cent. of the horsepower you spend good money for. The Individual Motor Drive is specially valuable in a railway machine shop. The Variable Speed Hawthorn Motor maintains any desired speed at the will of the operator—it greatly increases production. These Motors economise floor-space, and permit machinery to be placed where it can be used most advantageously. BULLETIN 714, mailed you on request, goes into details that will interest you. Please send for it.

Hawthorn Motors are built in types and sizes suitable for all uses, and can be mounted anywhere—on floor, ceiling or wall.

MIDLAND, ONTARIO CHICAGO, ILL

Quebec Railway, Light and Power Co.

The 11th annual report submitted at the shareholders' meeting, Sept. 14, is signed by the new president, W. G. Ross, who is also Managing Director Montreal St. Ry. Following are extracts:

Gross earnings	$724,648 32
Operating expenses	444,300 39
Net earnings	$280,347 93
From which deduct:—	
Interest on bonds	$125,000 00
City percentage on earnings	10,683 56
Interest, etc., paid and accrued	10,238 83
Dividends on preferred stock	44,123 95
Dividends on common stock	50,000 00
	$240,046 34
Surplus	$ 40,301 59
Which has been transferred to surplus account, making a total to the credit of this account of	$462,947 74

The gross earnings increased during the year, $68,815.27, or 10.49%; the operating expenses, $26,381.23, or 6.31%, and the net earnings $41,886.88, or 17.57%. The increase in gross earnings of 10.49% compares favorably with the increase of 1907-1908, which was 8.59%. The operating expenses were 61.31% of gross earnings, against 63.72% the previous year, decrease of 2.41%. The fixed charges, however, exclusive of dividends on common stock, have increased $38,651.72, or 25.53%. This increase is due to the dividend upon the additional preferred stock, which was issued last year for the new power developments. The additional issue of $250,000 of preferred stock was made and allotted, making the total issue now $750,000. The premium of $7,760.00 derived from this issue was placed to credit of surplus account.

Following are extracts from General Manager E. A. Evans' report:—The total number of passengers carried upon the city division was 6,859,679, an increase of 810,476. The average fare per passenger was 4.19c. against 4.22c.; the income per capita of the population increased from $3.55 to $3.65 (the income per capita in 1899 being $2.04). The operating expenses show an increase of $12,652.58, principally due to increased wages, etc. The car mileage was 1,394,744, an increase of 62,434 miles. The continued increase of travel upon this division has necessitated the purchase of additional direct current machinery, and a contract was entered into for a 1500 k.w. motor generator set, which is now practically installed in the sub-station. The installation will enable the company to improve the car service during the coming winter. Further additions to the rolling stock and car shed accommodation are necessary; this expenditure will materially increase the revenue of the company.

The total number of passengers carried upon the Montmorency division was 1,442,327, an increase of 43,982; the average fare per passenger was 10.28c. Upon the elevator 266,814 passengers were carried, an increase of 26,904. The operating expenses have increased $1,719.52, principally due to increase of wages. The business upon this division is increasing rapidly, and it will be necessary to purchase additional electrical machinery and rolling stock to effectually handle the traffic upon this division.

The earnings from the power division have increased 15.55%. The cost of generating and distribution has increased 14.19%; a large proportion of this can, however, be considered an extraordinary expenditure, consisting of the re-winding of the motor generators, in the sub-station, very considerable renewals to the pole and distribution lines, etc., all of which have been charged to operating for this year, instead of distributing the same over a number of years. The remodelling and fire-proofing of the power house has been completed, and it may now be considered as modern and fireproof.

ASSETS

Road and equipment, real estate, buildings, etc., including Kent House	$6,239,499 25
Cash on hand and in bank	14,428 85
Power division—operating account, accounts receivable, stores and equipments, etc.	68,031 54

Winding up of the Von Echa Company.

An order was made in Toronto by Chief Justice Mulock for the winding up of the Von Echa Company, of Erie, Pennsylvania, and subsequently of Brantford, Ont. The company was incorporated under the laws of West Virginia, Oct. 2, 1900, for the object of mining, but its charter was wide enough to cover other purposes. The authorized capital was $250,000. The incorporators were H. W. Surtees, E. L. Wood, J. E. Scraggs, J. E. Chilton and T. J. Paxton, all of Charleston, W. Va. The Ontario Government granted on April 2, 1903, a license to construct railways, bridges, etc., in Ontario, allowing the company to use not more than $40,000 capital in Ontario. S. Ritter Ickes wes president of the company, and J. H. Armstrong secretary. In Oct., 1900, the company commenced to operate in Ontario under a contract for the construction and operation of the Woodstock and Thames Valley and Ingersoll Electric Ry. The Provincial Secretary was notified on May 15, 1906, by J. G. Wallace, of Woodstock, solicitor, that the company was practically out of business; that the railway between Woodstock and Ingersoll had been built several years before, and that between Brantford and Galt was completed about February, 1904; that Ickes was practically the company, the other shareholders being merely nominal; that in 1905 Ickes had sold out his interest in the railway, and, so far as Wallace knew, paid up all the Von Echa liabilities, then went to Seattle, where he died in April, 1906. His whereabouts had not been known till his death was announced. On May 20, 1902, the Von Echa Co. entered into an agreement with the Grand Valley Railway Company to build a railway from Brantford to Paris, thence to Blue Lake, thence to St. George, and thence to Galt, for $28,000 cash, 6,750 shares of G.V.R. stock and $560,000 G.V.R. bonds. The company also constructed, owned and operated the Brantford St. Ry. The winding up is on the petition of C. Mickle of Gravenhurst and S. Dyment of Barrie, who claim that the Von Echa Co. became insolvent owing to Ickes in 1905 taking away and retaining its assets. Their claim is for $562.28, due since Dec. 21, 1905. Ickes' estate is said to amount to $54,834. A writ for $611.10 and $40.52 costs was issued, and judgment obtained against the company by the petitioners on Jan. 21, 1907, but the Trusts & Guarantee Co. refused to pay the claim without proof that Ickes was personally liable to pay the debts. The petitioners, therefore, asked for an investigation of the company's affairs. The Local Master at Brantford is appointed provisional liquidator.—Globe.

Electric Railway Position Wanted.

WANTED.—Position with Canadian Electric Railway to take charge of traffic transportation or employment and inspection department. Capable of organizing and installing modern system in either. Fifteen years experience. At present employed by one of the largest American Electric Railway properties. References from present and past employers. Canadian citizen. Box 4325, care The Railway and Marine World.

Projects, Construction, Betterments, Etc.

Barrie, Ont.—It is reported that a proposal has been submitted to the council for the construction of an electric railway connecting the C.P.R. and C.N.R. at Atherley with the C.P.R. at 13th concession, Essa tsp. It is stated that the right of way over certain streets in Barrie and some financial assistance for the project will be asked from the town shortly. J. W. Moyes, Toronto, is interested in the scheme.

Berlin and Bridgeport Electric St. Ry.—We are advised that the company is considering the extension of its line through Bloomingdale, Winterbourne and west Montrose, where it will cross the Guelph and Goderich line of the C.P.R., to Elora and Fergus. J. H. Wuest is Superintendent of the company.

Berlin and Waterloo St. Ry.—A by-law has been passed to raise $19,000 by debentures for the construction of a second track along a portion of the line between Berlin and Waterloo, Ont. (Mar., 1908, pg. 202.)

British Columbia Electric Ry.—The new capital which is being provided, by an issue of stock on the London, Eng., market, will be utilized for the purpose of carrying out a number of improvements on the company's lines, and for constructing a new terminal station in Vancouver.

A contract has been let for the construction of about four miles of second track in South Vancouver to Christian, Hartney and Christian, Vancouver.

Steel on the first 12 miles of the line from New Westminster to Chilliwack was expected to be laid by Sept. 15. This will carry the line to Cloverdale. It is expected that this section will be opened for traffic about Nov. 1. We are advised that the grading has been practically completed as far as Abbottsford, a further distance of 26 miles. Immediately the line is opened to Cloverdale the work of track laying and electrifying this additional portion of the line will be started. It is expected that the line into Abbottsford will be completed ready for operation by July, 1910. A contract has been let to the Puget Sound Bridge and Dredging Co., Vancouver, for the clearing and grading of 12 miles, from Abbottsford to Sumas Lake, and another contract has been let to Palmer Bros. and Henning, Vancouver, for the grading of a further distance of 12 miles from Sumas Lake to Chilliwack. It is expected that the line from Abbottsford to Chilliwack will be completed by Dec. 31, 1910.

The extension of the Vancouver and Lulu Island Ry., owned by the C.P.R., but operated as an electric railway by the B.C.E.R., from Eburne to New Westminster was opened for traffic Sept. 15. The line follows the north arm of the Fraser River, and is now open from Steveston to New Westminster.

Victoria ratepayers have passed a by-law under which the city agrees not to enter the power business without first offering to buy the company's plant. The company in return agrees to spend $1,500,000 in installing a power plant at Jordan River.

A contract has been let to Malcolm and Dimsdale for an addition to the power plant on Store St., Victoria.

A proposition has been made to the company with a view of the construction of a street car line in Nanaimo with branches to Wellington, Ladysmith and other contiguous points. (Sept., pg. 683.)

Edmonton Radial Ry.—The electric railway in Edmonton, Alta., is owned by the corporation, which also owns the lines to and in Strathcona, constructed under the Strathcona Radial Ry's charter. Out of the 10.5 miles of track laid up to the end of 1908, about 0.75 mile was laid in 1907; all the Strathcona portion of the system was laid in 1908, and about 6.5 miles have been laid this year. Power is obtained from the city power house, which is owned by a separate department, and is located on the bank of the river about half a mile above the Saskatchewan bridge. The track is laid with 64 lb. steel. The rolling stock at present consists of seven semi-convertible cars, purchased from the Ottawa Car Co., and four pay-as-you-enter cars, purchased from the Preston Car and Coach Co. The officers of the line are: Superintendent, C. E. Taylor; Road Master, W. J. Fountain; Barn Foreman, A. Isseling; Accountant, J. Carr. (July, pg. 522.)

Elk Lake City, Ont.—J. Garvin, speaking at a dinner to the members of the Ontario Legislature and the Commissioners of the Temiskaming and Northern Ontario Ry. recently said: "Give us a charter for an electric railway and we will finance it ourselves." It was suggested on the part of the Government that a proposition should be submitted by those interested.

Fort William, Ont.—The city council decided Sept. 9 to consider the desirability of constructing a spur line to connect the industrial quarter in the vicinity of the Canada Iron Corporation's foundry with existing lines within Fort William's municipal boundaries. (Sept., pg. 684.)

Guelph Radial Ry.—The Mayor of Guelph announced Sept. 13 that, with the delivery of power from Niagara Falls in the city next year, the G.R.R. commission will take up the question of the extension of the railway to Puslinch Lake. (April, pg. 283.)

Hamilton Radial Electric Ry.—We are advised that the company has no present intention of extending its line from Oakville to Toronto. (Sept., pg. 684.)

International Power Co.—The New Brunswick Legislature at its last session incorporated a company with this title for the purpose, among other things, of constructing an electric railway from Milltown to Sprague's Falls, so called, in the county of Charlotte. The company is also authorized to construct a bridge across the St. Croix River at Sprague's Falls to connect the railway with the opposite side of the river. The provisional directors are: I. R. Todd, G. J. Clarke, C. F. Todd, G. A. Curran, C. F. Pray, B Y. Curran.

Moncton Electric Tramway Co.—The New Brunswick Legislature at its last session amended the act of incorporation of this company in a number of particulars. The provisional directors are: J. L. Harris, J. Starr, C. P. Harris, E. H. Keating, M. Carney, W. F. Humphrey, M. Lodge, instead of those formerly acting. The company is authorized to construct an electric railway along the city streets, subject to the approval of the city council, and also along any of the streets or highways of Moncton parish, subject to the approval of the county council. The act also contains general paragraphs as to the city's rights and the matters upon which the city and company have to agree. The privileges, powers, etc., granted to the Moncton Electric St. Ry., Heat and Power Co. under sec. 3, chap. 76 of the statutes of 1894 are revived and confirmed for 40 years from the passing of the act, provided that the lines authorized be completed and in operation within a year. (June, pg. 447.)

Montreal and Southern Counties Ry.—Construction along the first section of this line is rapidly nearing completion, and it is expected that cars will be running between Montreal and St. Lambert, Que., by Oct. 20. The city section has been completed to the west end of the Victoria bridge, with the exception of about 400 ft. of concrete wall which is

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

The only Hotel that Commands an Unrivalled View of Both Falls.

HOW TO REACH THE CLIFTON HOTEL.

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes. Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make Canada plain in the address.

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	"	"	"	73.46	"	"	180.00

"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-selected districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

WOVEN RAILROAD FENCING

We are in the best possible position to supply anything in this line. We make both a "wrapped" stay —the "Safe Lock," a rigid fence, and a "straight" stay of the usual type, our "Monarch," therefore we can take care of any kind of an enquiry, to your liking. Both fences are made of No. 9 wire throughout and are made in the most up-to-date style.

We solicit your enquiries for catalogue, further information, samples and prices.

The Owen Sound Wire Fence Co. LIMITED

OWEN SOUND, ONTARIO

being erected on Riverside St. The overhead work on Victoria bridge has been completed, and the flooring and tracklaying is being gone on with. Tenders are under consideration for the grading of the section of 4.5 miles through St. Lambert, Brooklin Park, Montreal South and Longueuil. The steam plant for the generation of electricity to be used on the line is being installed near the Victoria bridge by the Canadian Westinghouse Co. (Sept., pg. 684.)

Niagara, St. Catharines and Toronto Ry.—We are advised that the projected extension to Port Colborne, Ont., will pass through Welland, Welland Junction and Humberstone. Trestle bridges will be used for crossing the Welland canal feeder at Welland. The construction will be done by the company's own staff. Work is to be commenced immediately and it is expected that the line will be in operation by the beginning of 1910. The company is in the market for the necessary material for the construction of this extension. (July, pg. 523.)

Ottawa and St. Lawrence Electric Ry.—It is reported that at a meeting of directors at Ottawa Sept. 3 an offer was submitted from a syndicate of British capitalists to take over the charter and to provide the funds needed to construct the line, and that the directors have given the syndicate an option on the charter until Nov. 30. The route is said to have been decided upon between Ottawa and Morrisburg, although the exact location of the entrance into Ottawa has not been arranged, and it is stated that grading will be started at the beginning of Oct. The line will be 55 miles long, and will pass through the towns and villages of Williamsburg, Bouck's Hill, Elma, Dunbar, Winchester Springs, Chesterville, Winchester, Morewood, St. Therese, Ormond, Kenmore, Vernon, Metcalfe and Greeley. (July, pg. 523.)

Ottawa Electric Ry.—The question of the extension to the cemeteries is still before the city council. The street railway's committee has held several meetings, and at one held Sept. 3 a letter from the company was submitted showing the relative cost of several lines to the cemeteries. In connection with this matter it should be noted that it is the council of Eastview village, and not of Eastwood, as previously stated, that is interested. (Aug., pg. 609.)

Quebec Ry. Light and Power Co.—After a meeting of directors held Aug. 30 an inspection was made along St. Valier St. as far as the cemetery on which it is proposed to construct an extension of the line, as soon as arrangements are made with the C.P.R. regarding the crossing on St. Valier St.

Plans have been deposited in the registry offices of Montmorency county, showing the proposed location of a branch or Y in the parish of St. Joachim. Application will be made to the Board of Railway Commissioners for authority to construct it. (Aug., pg. 609.)

Toronto Ry.—The Board of Railway Commissioners has refused to allow the company to appeal against the order for the construction of a high level bridge on Queen St. east. The company objects to paying 15% of the cost of the construction. The bridge is to provide accommodation for the street railway over the railway tracks on Queen St. east at the Don.

The company is erecting a large block of car barns on Lansdowne Ave. The contractors are the Imperial Construction So., Toronto.

The Winnipeg Electric Ry. is operating cars over the new loop line at the north barns down Athole St. and up Inkster Ave. A large force started work Sept. 9 on the excavation for new barns at the corner of Athole and Main streets.

Electric Ry., Finance, Meetings, Etc.

Berlin, Waterloo, Wellesley and Lake Huron Ry.—In the C.P.R. annual report for the year ended June 30, the list of acquired securities shows that the C.P.R. owns the entire issue of $426,000 of 4% first mortgage bonds of the

Berlin and Bridgeport Electric St. Ry.—The adjourned annual meeting was held Sept. 20. Following are the officers and directors for the current year:—President, W. H. Breithaupt; Vice President, J. S. Anthes; Secretary, A. Millar; other directors: L. J. Breithaupt, Berlin; G. M. Shirk, Bridgeport.

British Columbia Electric Ry.—Gross earnings for July, $220,665; working expenses, $123,063; net operating earnings, $97,602; renewal funds, $16,084; net earnings, $81,518; approximate income from investments, $16,500; net income, $98,018; against $174,410 gross earnings, $92,172 working expenses, $82,238 net operating earnings, $13,816 renewal funds, $68,422 net earnings, $13,550 approximate income from investment, $81,972 net income, for July, 1908.

The company is placing on the London, Eng., market an issue of £500,000 of new debentures, to provide capital for improvements to the line, and the construction of terminals in Vancouver.

Edmonton Radial Electric Ry.—Net earnings for Aug., $8,161.87. Passengers carried during month, 193,704, and from the inauguration of the railway, Nov. 9, 1908, 1,347,600.

Halifax Electric Tramway.—Railway receipts for Aug., $21,366.12, against $20,052.81 for Aug., 1908. Receipts for 3 weeks ended Sept. 21, $13,156.97, against 16,144.77 for same period 1908.

Hull Electric Co.—Following are the officers and directors for the current year: President, A. R. Creelman; Vice President and General Manager, W. R. Baker; other directors, D. McNicoll, I. G. Ogden, E. W. Beatty, J. Oborne, E. Hanson. The company is owned by the C.P.R. and no separate statement of its earnings, etc., is issued.

Montreal Park and Island Ry.—The annual meeting was held at Montreal, Sept. 16. Following are the officers and directors for the current year:—President, Hon. L. J. Forget; Vice President, K. W. Blackwell; other directors: W. G. Ross, Sir H. Montagu Allan, F. L. Wanklyn, D. McDonald and T. A. Trenholme.

Montreal St. Ry.—Passenger earnings for Aug., $344,513.84; miscellaneous earnings, $10,715.88; total earnings, $353,-229.72; operating expenses, $183,582.60; net earnings, $171,647.12; city percentage on earnings, $44,083.70; interest on bonds and loans, $14,444.55; rent leased lines, $498.67; total charges, $59,026.92; surplus, $112,620.20; against $319,300.07 passenger earnings; $10,471.98 miscellaneous earnings; $329,772.05 total earnings; $164,261.92 operating expenses; $165,510.13 net earnings; $36,137.89 city percentage on earnings; $17,530.22 interest on bonds and loans; $444.43 rent leased lines; $54,112.54 total charges; $111,397.59 surplus for Aug., 1908. Aggregate passenger earnings for 11 months ended Aug. 31, $3,408,784.01; miscellaneous earnings, $83,992.54; total earnings, $3,492,776.55; operating expenses, $2,078,-393.01; net earnings, $1,414,378.54; city percentage on earnings, $248,270.70; interest on bonds and loans, $165,208.25; rent leased lines, $5,322.68; total charges, $418,801.63; surplus, $995,576.91; against $3,258,784.01 aggregate passenger earnings; $70,158.90 miscellaneous earnings; $3,329,059.97 total earnings, $1,978,659.18 operating expenses; $1,350,400.79 net earnings; $225,130.54 city percentage on earnings; $193,315.27 interest on bonds and loans; $4,575.29 rent leased lines; $423,021.10 total charges; $927,379.69 surplus for same period 1907-08.

Montreal Terminal Ry.—The annual meeting was held at Montreal, Sept. 16. Following are the officers and directors for the current year:—President, F. L. Wanklyn; Vice President, G. S. Campbell; other directors: J. G. Ross, C. H. Catelli, R. Forget, C. Archer, F. E. Meredith; Secretary, L. G. Morin.

Montreal Terminal Ry.—Montreal press reports Sept. 14 stated that the Canadian Northern Quebec Ry. was about to secure control of the Montreal Terminal Ry. The Chateauguay and Northern Ry., now a part of the C.N.Q.R., was originally in the same hands as the M.T.R., and the entrance of the C.N.Q.R. into Montreal was arranged in connection with the M.T.R. C.N.Q.R. officials at Toronto state that the rumor probably originated in the fact that the two companies recently had to close out an agreement regarding an overlapping track. The M.T.R. is owned by the Montreal Street Ry.

The Quebec Ry. Light and Power Co. has declared a dividend of 1% on its common stock for the six months ended June 30.

South Western Traction Co.—The Master in Chancery, London, Ont., has made an order in the action of the London and Western Trusts Co. against the S.W.T. Co., directing the sale on Oct. 20 of the latter company's electric railway, property, franchises, etc. The railway is described as 28 miles long, connecting London with Port Stanley, passing through St. Thomas. About 14 miles is constructed on private right of way, including the entrance into London, the remaining mileage being on the public highways. The power house is situated adjacent to London, and is fitted with engines, boilers and generators having a capacity of 275 h.p. The rolling stock consists of 15 passenger cars, 2 freight cars, 1 combination construction car and snowplough, 5 flat cars and 2 steam road box cars.

At a special meeting of St. Thomas city council, Sept. 9, it was decided to accept the offer of the liquidators of the company to pay the amount due for rental of the St. Thomas St. Ry. tracks less $700, amount of rental for the seven months during which the company did not use the tracks prior to the completion of its line to Port Stanley. The offer was accepted without prejudice on the condition that the amount due be paid by Sept. 13.

Toronto Ry.—Gross earnings for July, $329,804; operating expenses, $168,201; net earnings, $161,603; against $299,646 gross earnings; $152,896 operating expenses; $146,750 net earnings, for July,

Gross earnings for Aug., $333,223.09; expenses, $166,056.55; net earnings, $167,166.54; against $299,932.97 gross earnings; $149,626.08 expenses; $150,306.89 net earnings for Aug., 1908. Aggregate gross earnings for eight months ended Aug. 31, $2,477,310.22; expenses, $1,266,-064.33; net earnings, $1,211,245.89; against $2,275,126.62 gross earnings; $1,252,519.44 expenses; $1,022,607.18 net earnings for same period 1908.

Winnipeg Electric Ry.—Gross earnings for July, $214,000; operating expenses, $100,900; net earnings, $113,100; against $178,600 gross earnings; $89,700 operating expenses; $88,900 net earnings; for July, 1908. Aggregate gross earnings for 7 months ended July 31, $1,424,800; net earnings, $715,300; against $1,197,700 gross earnings, and $598,800 net earnings for same period 1908.

The usual quarterly dividend of 2½% was declared at a meeting of directors Sept. 13, making the second successive year that a 10% dividend has been declared.

Electric Railway Notes.

The British Columbia Electric Ry. is reported to be planning to construct 25 pay-as-you-enter cars at its Vancouver shops.

F. L. Wilson, who died at Centre Island, Toronto, Sept. 16, was father of C. L. Wilson, Assistant Manager Toronto and York Radial Ry.

The Windsor, Essex and Lake Shore Rapid Ry., is in the market for six new or second hand flat cars and three box cars, standard type, equipped with air brakes.

E. Richards, Assistant Treasurer and General Freight Agent, Chatham, Wallaceburg and Lake Erie Ry., was married Sept. 11 in Wallaceburg, Ont., to Miss D. Colville.

The Quebec Ry., Light and Power Co.'s employes' annual picnic was held at Cap Tourmente, Sept. 16 and 23, half of the employes forming the party on each occasion.

R. H. Sperling, General Manager British Columbia Electric Ry., was presented with a tea and coffee service by the company's Vancouver staff, on the occasion of his recent marriage.

In accordance with the Public Utilities Act passed last session of the Nova Scotia Legislature, the electric railway companies operating in the province have filed in the Attorney General's office schedules showing rates in force on their lines.

The General Manager of the Quebec Ry., Light and Power Co., states, in his annual report, that owing to the rapid increase of business on the Montmorency Division, it will be necessary to purchase additional electrical machinery and rolling stock.

The cars for the Montreal and Southern Counties Ry. are being manufactured by the Ottawa Car Co., and the first delivery will be made Oct. 1. They are of the vestibule type, with smoking compartment in the rear. Each car has a seating capacity for 65.

As a result of a complaint, the Calgary, Alta., city council has increased the pay of its conductors and motormen to 25c. an hour, the increase to date from Oct. 1. The men demand that the increase date from Aug. 15, and threaten to strike if the demand is not complied with.

R. Forget, M.P., is reported to have said in an interview, Sept. 15, that the outlook for the proposed merger of street railway, electric and water power interests in the Quebec district was most assuring, and in his opinion such a merger would be a good thing for Quebec.

D. McDonald, Manager Montreal St. Ry., and President Canadian Street Railway Association, whose portrait appears on the first page of this issue, returned to Montreal, Sept. 13, after spending a little over three months in Europe. Biographical data respecting him were published in our July issue.

By reference to summaries of orders 7975 and 7976, passed by the Board of Railway Commissioners, as given on an earlier page of this issue, it will be seen that the Montreal St. Ry. Co. and the Montreal Park and Island Ry. Co., have been authorized to appeal to the Supreme Court against two of the Board's decisions.

The Winnipeg city council which recently took up the question of heating the street cars operating in the city during the winter, about which there appears to have been some complaint, has received a letter from the Manager of the Winnipeg Electric Ry., stating that steps have been taken to ensure that the cars will be properly heated.

The Winnipeg city council is seeking to obtain an injunction against the Winnipeg Electric Ry., to restrain it from erecting light and power poles on the streets without permission. Pending the hearing of the original action the council inserted a clause in the permits, without prejudice, to which the railway company took exception and is taking further action.

A committee of the Halifax city council discussed Sept. 9, a complaint relating to the noise alleged to be made by street cars on Sundays while passing places of worship. A sub-committee was appointed to further discuss the matter with the Halifax Electric Tramway Co., to see what steps could be taken. The company, some time ago, issued instructions to motormen and conductors to avoid all possible noise in the vicinity of churches.

Following are the chief particulars of the "pay-as-you-enter" cars, which the Silliker Car Co., Halifax, is building for the Halifax Electric Tramway Co.:

Length over end sills	21′ 0″
Length of rear vestibule	5′ 0″
Length of front vestibule	4′ 0″
Length over all	30′ 0″
Width over side sills	7′ 7¾″
Width at belt rail	8′ 2¾″
Height from sills to under sides of plate	6′ 0⅝″
Stationary seats	15
Upholstering	Rattan.
Inside finish	Cherry
Wheels, diam.	33″
Fenders	H. E. T. Co.'s standard.
Seating capacity	30

Recently the Mayor of Hamilton notified the Hamilton Radial Electric Ry. that it must cease operating freight cars on King St. The company has the right to operate freight cars to the corner of Sanford Avenue and Wilson St. On receipt of this notice the company gave notice that it would cease the handling of freight altogether. As a result there was a meeting between the members of the council and officers of the company Sept. 14, when an arrangement was made by which such freight as may be carried in a combination passenger car to be approved of by the council can be carried along King St. to the terminal, but the right of running through freight cars is not conceded. The Manager stated that the carrying of freight would be resumed now that the difference of opinion as to what constituted a freight car had been removed.

Regina.—A plan has been submitted to the Works Committee of the Regina, Sask., city council for the construction of an electric railway in the city. The plan provides for the construction of a system covering the old town plan no. 33. In this area the line would run on Fourth Ave., from Winnipeg St. westward to Government Road, south to Thirteenth Ave., east to Elphinstone, south again to Sixteenth, extending easterly to Winnipeg St. and north on to the starting point. It also provides for a line on Dewdney St. from Government Road to Winnipeg St., and one on Thirteenth Ave. from Elphinstone to Winnipeg, with intersections on a number of other streets. An outer belt line is also proposed, taking in all the present annexes. The matter is under consideration.

A lady passenger riding on a street car recently said to the conductor: "Can you tell me, please, on which cars these transfers are good? I am from another town and am rather mixed up." "It's very simple, madam," replied the polite conductor. "East of the junction by a westbound car a transfer from an eastbound car is good only if the westbound car is west of the junction formed by the eastbound car. South of the junction formed by a northbound car a transfer from a southbound car is good south of the junction at the time of issue, but only south of the junction going south if the southbound car was going north at the time it was south of the junction. That's all there is to it."

Pere Marquette-Lehigh Valley Line—G. H. Anthony, heretofore General Agent, Chicago, Durham, M. St. P. and S.S.M..R., Winnipeg, Man., has been appointed General Agent P.M.-L.V. Line, with offices at St Paul and Minneapolis, Minn. He has charge of Northwestern Territory, covering Minnesota, the Dakotas and the Canadian Northwest, also Superior and Ashland, Wis.

The Canadian Westinghouse Co., Ltd., has declared a quarterly dividend of 1½% payable Oct. 11.

The Dominion Iron and Steel Co., Ltd., has declared a 7% dividend on its preferred stock, payable Oct. 1.

R. J. Mackenzie, of Mackenzie, Mann & Co., Winnipeg, is reported, from New York, to have purchasesd four horses, to add to his stable.

The various companies operating sleeping, dining and parlor cars in Canada have filed with the Board of Railway Commissioners standard tariffs of maximum tolls charged on their lines.

W. Gell, formerly Master Mechanic Grand Trunk Pacific Ry., Rivers, Man., died at Stratford, Ont., Sept. 9. He was appointed Master Mechanic G.T.P.R. in Feb., 1908, having previously, for some years, been Master Mechanic G.T.R., Ottawa, and resigned the position, on account of ill health, June, 1909.

E. Dunsmore, who has occupied the position of secretary to A. J. Nixon, heretofore Assistant Superintendent G.T.R., London, Ont., who has been appointed Chief Operating Officer of the Board of Railway Commissioners, is reported to have been appointed private secretary to the Vice President St. Louis and West-

The Imperial Government has included in its Irish Land Bill a provision whereby mortgage bonds and debentures of railways in Canada, the U.S., Mexico and the Argentine are included in the list of securities in which the trustees of estates purchased from life tenants under the bill may hereafter invest this purchase money.

G. J. Ellis, a former employe of the company, has entered action against the Atlantic, Quebec and Western Ry., claiming $5,399.50 for false arrest. Some time ago, $1,200 disappeared from the company's office at New Carlisle, Que., and he was arrested on a charge of theft, and being kept under arrest for some time, was acquitted.

Grace Henderson, cashier Thousand Islands Ry., Gananoque, Ont., who was recently charged with the theft of a considerable sum from her employers, was acquitted at Brockville, Ont., Sept. 21. It was proved by the evidence that whatever discrepancies existed, were made to cover loans to her superior employes. The jury expressed the opinion that she should be recompensed by the company.

A recent press report stated that W. H. Walker, G.T.R. Locomotive Foreman at Brockville, had been appointed as Master Mechanic of the Northern Railway of Costa Rica in charge of shops and road. We are officially advised that Mr. Walker is not entering the Northern Railway's service, and that A. Curotte, who has been acting Master Mechanic for some time, has been appointed Master Mechanic.

The reorganization of Rhodes, Curry & Co., Ltd., under the title of Rhodes, Curry Co., Ltd., has been completed, and the properties of the first named have been transferred to the new company. Following are the officers and directors for the current year:—President, N. Curry; Vice President, N. A. Rhodes; other directors, T. J. Drummond, W. M. Aitken, C. H. Cahan, Montreal; V. G. Curry, H. S. Dupuy, Amherst; and J. M. Robinson, St. John; Secretary Treasurer, J. M. Curry, Amherst; Assistant Secretary, O. B. MacCallum, Montreal.

Lake Shippers' Clearance Association.

In our last issue we gave some particulars respecting the establishment of a grain clearing house at Fort William and Port Arthur, Ont., since when the following information has been supplied. The Lake Shippers' Clearance Association has been organized as an agency for the purposes of facilitating dispatch in loading grain cargoes at the terminal ports of Fort William and Port Arthur, and as a general headquarters for marine interests at the head of the lakes. For a number of years it has been apparent that organized effort was necessary to obviate the delay due to cargo being taken from three to seven or more elevators. At the same time some general depot where vessel captains on arrival might report for orders, and to which the owners might address instructions, has seemed particularly desirable. The Lake Shippers' Clearance Association is designed to meet these various requirements, and to operate in general to the advancement of all shipping interests. It has already received the unanimous endorsation of the exporting and lake shipping interests in the Winnipeg Grain Exchange, and the support of many U.S. shipping firms has already been promised. The Grain section of the Dominion Marine Association has also given its hearty approval, and sanctioned a graduated scale of charges for the services of same for 1,000 bushels as under:

For loading at one elevator	30c.
" two elevators	20c.
" three or more elevators	10c.

The balance of the necessarily heavy expense is guaranteed by the members of the Association, who will also, by a process of clearing warehouse receipts facilitate as much as possible the general dispatch of vessels. Commodious quarters have been secured and will be fitted up at Fort William. The services of a very competent authority on marine and financial matters have been secured for the management, and a strong staff selected to further the interests of the Association in every particular. The cooperation of every grain vessel owner is anticipated. Orders in general will be given by grain exporters through the Association's office, and vessels not complying with its regulations and tariffs will lose the advantage of the quick dispatch which the Association will be enabled to give, and will be subject to the annoying delay that has been experienced in the past. To prevent any misunderstanding on arrival of vessels, captains and pursers should be invariably instructed to apply for orders to the Lake Shippers' Clearance Association, where telegrams or letters may be directed, and prompt delivery assured. Instructions should also be issued for the payment of Association charges before clearing.

The Association's officers are:—President, Jno. Fleming, of A. McFee & Co.; Vice President, C. Tilt, of Jas. Carruthers & Co., Ltd.; H. N. Baird, of Norris & Co.; Treasurer, A. K. Godfrey, of the Canadian Elevator Co.; Secretary, A. C. Ruttan, of Jas. Richardson & Sons, all of Winnipeg; General Manager, F. W. Young, Fort William; Assistant Manager, A. H. Bevan, Winnipeg. F. W. Young has been a bank manager at Fort William for some years, and is a brother of C. A. Young, one of the National Transcontinental Railway Commissioners.

Dominion Lighthouse Service Steamboat.

The twin screw steel steamboat, no. 21, which is being built at the Dominion Government shipyard, Sorel, Que., was launched there Sept. 4, and named Montmagny. She will be used in the lighthouse service below Quebec for carrying material and men for lighthouse construction, in distributing supplies for the various stations and for inspection work. Following are her principal dimensions, etc.:—

Length between perpendiculars	212 ft. 8 ins.
Length over all	222 " 0 "
Beam moulded	34 " 8 "
Depth moulded to upper deck	22 " 0 "
Draught of water (loaded)	15 " 0 "
Displacement to l.w.l.	2064 tons.
Cargo at load draught	600 "
Coal at load draught	230 "
Reserve feed tank at load draught	25 "
Fresh water tank at load draught	10 "
Capacity of fore peak tank	13 "
Capacity of after peak tank	45 "
Capacity of double bottom	120 "
Capacity of trimming tank	85 "
Estimated speed (loaded)	11½ knots.

The vessel is built of steel and is of the flush deck type, with two pole masts. There are three steel decks: the upper one sheathed with wood throughout, the main and lower ones are sheathed with wood only in the way of accommodation. There is a double bottom 3 ft. deep extending through machinery space, and bunker divided, into three watertight compartments, that under the boilers forming the reserve feed tank. There are 6 watertight bulkheads. The whole of the steel scantlings are not less than required for Lloyd's highest class. The accommodation for the officials is placed aft and consists of two staterooms, an office and bath-room in a deck house, and a dining saloon, 2 two berth cabins, 2 four berth cabins, pantry and bath-room, also baggage and linen rooms on the main deck. Accommodation for captain, chief mate, chief engineer, 2nd and 3rd mates and wireless operator, with mess-room and bath-room, also the galley is placed in the deck house amidships. Accommodation for the 2nd and 3rd engineers, two cooks and three spare two berth cabins are on the main deck amidships, where are also placed the ice house, 2 provision store rooms, boatswain's store, paint locker, lamp room, and workshop, which is proposed to be fitted up with lathe, shaper, drilling machine, etc., driven by an electric motor. The accommodation for 4 oilers, 4 quarter-masters, boatswain, carpenter, mess-room, bath-room and carpenter's store is arranged on main deck forward. Accommodation for 12 sailors and 12 firemen is arranged on lower deck forward. Temporary accommodation for 20 men with pantry and lavatories is arranged at the after end of forehold on the main deck. The two lower masts are of steel to the hounds, with pitch pine top masts. The steam winch for the forehold is arranged with suitable derrick and gear for lifting 12 tons with a purchase of two double blocks or 3½ tons direct from the barrel. The after winch will lift 2 tons direct from the barrel. There is a steam and hand windlass for lifting the anchors (30½ cwt. each, with 1⅝" cable), also a steam warping capstan aft. The boats include 2 life-boats, 3 surf boats, 1 gasoline launch and 1 dinghy. On the boat deck, which extends the length of the midship deck house is a wheel house and chart room, with a navigating bridge on top. The steam steering engine is placed in the engine casing, with one wheel on the bridge and one in the wheel house, there is also screw hand gear aft. The vessel is lighted throughout with electric light including signal lanterns, and is fitted with wireless telegraph apparatus. The machinery consists of twin screw triple expansion engines, having cylinders 15", 24" and 39" diameter by 24" stroke, supplied with steam from 2 boilers of the marine return tube type, 14' dia. by 10' long each, having three furnaces 3' 3" diameter and 272 3" tubes. The working pressure is 180 lbs. per sq. in. There is a donkey boiler of the vertical type, 5' diameter by 9' 2" high; working pressure, 125 lbs. The auxiliaries include a feed pump, ballast pump, general service and fire pump, feed heater, sanitary and fresh water pumps, also ash ejector. A "navy" type hand pump is placed in the casing and connected to the general service pump for use when steam is not available.

Pickford and Black, Ltd., Halifax, N.S., has chartered the Furness Line s.s. Almeriana, to replace the s.s. Dahomey, on the West Indies route.

Notices to Mariners

The Department of Marine has issued the following:

No. 77. Aug. 31. 199.—British Columbia, Chatham Sound, approach to Prince Rupert, Ridley Island range day beacons discontinued. 200.—British Columbia, Chatham Sound, Metlakatla harbor, Shrub beacon replaced by buoy. 201.—British Columbia, Vancouver Island, east coast, Stuart channel, chart of Boat harbor issued. 202.—British Columbia, Chatham Sound, chart of middle passage, Skeena River, issued.

No. 78. Sept. 1. 203.—New Brunswick, south coast, Bay of Fundy, Cape Spencer, change in character of light. 204.—Nova Scotia, Bay of Fundy, Digby Gut, Point Prim, change in character of light. 205.—Nova Scotia, west coast, Cape St. Mary, change in character of light. 206.—Nova Scotia, south coast, Country Harbor approach, Green Island, change in character of light. 207.—Prince Edward Island, northeast coast, east point, change in light. 208.—Prince Edward Island, southeast coast, Cape Bear, change in color of light. 209.—Prince Edward Island, south coast, Hillsborough Bay, Charlottetown harbor, Blockhouse Point, light improved. 210. Prince Edward Island, northwest coast, North Point, change in light.

No. 79. Sept. 3. 211.—Ontario, Lake Ontario, Simcoe Island, Nine Mile Point, change in character of light. 212—Ontario, Detroit River, Limekiln Crossing, Texas Dock range, additional lights established. 213.—Ontario, River St. Clair, east of St. Clair middle ground, characteristic of gas buoy light. 214.—United States of America, Detroit River, wreck removed.

No. 80. Sept. 8. 215.—Ontario, Lake Ontario, east end, Pigeon Island, new lighthouse, change in character of light. 216.—Ontario, Lake Erie, Port Maitland, hand fog horn at light station. 217.—Ontario, Georgian Bay, Parry Sound, wreck.

No. 81. Sept. 9. 218.—Nova Scotia, Cape Breton Island, east coast, Bras d'Or, Boularderie Island, McNeil Beach, light mast replaced by tower. 219.—Quebec, Chaleur Bay, Port Daniel, color of light on wharf. 220.—Newfoundland, Strait of Belle Isle, Flower Island, change in light. 221.—Newfoundland, east coast, White Bay, Seal Cove, new tower, change in color of light. 222.—Newfoundland, east coast, Canada Bay, Aiguillettes or Inglee harbor, new tower, change in color of light. 223.—Ireland, east coast, Rosslare harbor, shoals in. 224.—Wales, Cardigan Bay, alterations in lights and buoys.

No. 83. Sept. 29. 230.—Nova Scotia, southeast coast, Cranberry Island, intended change in character of light. 231.—Newfoundland, southwest coast, Port Basque, Channel head, change in character of light.

No. 84. Sept. 22. 232.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, above Portneuf, gas buoy established. 233.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, eastern end of Lake St. Peter, changes in buoyage.

No. 85. Sept. 24. 234.—Quebec, River St. Lawrence below Quebec, temporary change in position of Beaujeu Bank west end gas buoys. 235.—Quebec, River St. Lawrence, Lake St. Peter, St. Francis River, description of range lights.

Tax on Vessels Entering U. S. Ports.

Section 36 of the new United States tariff bill imposes a duty of two cents a ton at each entry on all vessels which shall be entered at any port in the U. S. from any foreign port or place in North America, and various other countries on the American continent; and a duty of six cents a ton on all vessels entering from any other foreign port. The tonnage duty will not be levied on vessels in distress or not engaged in trade; and in the first case is not to exceed 10 cents a year, and in the second case 30 cents a year. The new tax comes into force Oct. 5. In connection, the so-called reciprocal tonnage tax exemption law of 1886 is repealed.

Under the existing law vessels from Ontario ports have been exempt from taxation in the U. S. as the sick mariner's charges are not levied by the Province on U. S. vessels entering Ontario ports. Such taxes are levied in Quebec and the Maritime Provinces, and have been met by a corresponding tax on vessels entering U.S. ports from Quebec and the Maritime Provinces. Several attempts have been made in the U. S. to place a tax on all Canadian vessels entering U.S. ports, but have hitherto been defeated. This year it was hoped that the opposition offered to the passing of the new law would have secured the exemption of the Great Lakes therefrom. The avowed object of the advocates of the law was to prevent the foreigner from saving $10 where the U. S. vessel owners only saved $1. This was not unreasonable in respect of ocean tonnage, where the preponderance is against the U. S.

The new law applies impartially to U. S. as well as to foreign vessels, so that all vessels, Canadian or U. S., entering U. S. ports from Canadian ports will be liable to pay a tax not to exceed 10 cents a ton in any one year, for the privilege of trading between ports not in their own country.

Under the new International Waterways Treaty, approved by Congress, and awaiting the approval of the Dominion Parliament, it is agreed that the navigation of all boundary waters shall for ever continue free and open for the purposes of commerce to the vessels of both countries, equally, subject to any laws or regulations of either country, within its own territory, not inconsistent with the privilege of free navigation, and applying equally to the inhabitants and vessels of both countries. It is a question whether, under this treaty, either country could tax the vessels of the other country without taxing its own.

Under these circumstances it would appear that vessel owners at the Canadian ports on the Great Lakes where U. S. vessels are free from sick mariner's

charges, should direct their effort to inducing the U. S. Congress to exclude the Great Lakes from the programme of taxation, rather than to ask the Dominion Parliament to pass a measure imposing a retaliatory tax, which Canadian vessels might also have to pay.

Hydrographic Survey Steamship.

The Dominion Government is having constructed in England a steamship for hydrographic survey work on the Pacific coast. She will be built of steel, with straight stem, elliptical stern, and fitted with two pole masts. Her dimensions will be: length, over all, 173½ ft.; length between perpendiculars, 163 ft.; beam, moulded, 29 ft.; depth, 15 ft. 7 in. Displacement, on a mean draught of 11 ft. above bottom of keel angles amidships, with 150 tons of coal and 80 tons of stores and water, 850 tons. She is to class 100 A1 at Lloyds. The hull will have a double bottom extending from aft the engine-room to the forward bulkhead, and a watertight flat forward and aft of same. It will be divided into seven complete watertight bulkheads extending to the main deck, and, in addition, there will be four watertight bulkheads extending to the water tight flats. The rudder will be of the single plate type, controlled by a 2-cylinder 4 by 5 in. steering gear. There will be on the main deck, one steam winch for handling boats and warping ship; one steam winch for handling anchors, etc.; and on the shade deck, two gasolene launches, each fitted with a 15 h.p. 4-cycle engine, two 27 ft. cutters, and one 18 ft. light gig or dinghy.

There will be four decks—orloop, main, forecastle, and shade. On the shade deck will be deck-house, pilot house and bridge. The accommodation to be provided on the different decks will be as follows, from aft forward:—Orloop deck—Store-room, saloon, stateroom for officer in charge of hydrographic work, and staterooms for the staff of four; forward of the engine-room space will be quarters for the petty officers and seamen. Main deck—Saloon and staff mess-room aft; and forward of the engine-room space, officers' mess-room, cabins for the chief, second and third engineers, and cabin for the mate, lavatories, carpenter's shop, etc. Shade deck—Pilot house, chart-room, sailing master's stateroom.

The machinery is to consist of two vertical, inverted three cylinder, triple expansion engines, cylinders 11½, 18 and 31 inches diameter, by 24 inch stroke, driving a 3-bladed septre bronze propellor 8 ft. diameter, and 9 ft. 6 in. pitch. Steam will be supplied to the engines by two Scotch boilers, each 10¼ ft. long and 11½ ft. mean diameter, each with two or three corrugated iron furnaces as large as can be got into the shell. The combined grate surface to be about 90 sq. ft., and the collective heating surface about 3,000 sq. ft. The boilers to be tested for a working pressure of 185 lbs. to the square inch. The two main boilers will be placed in the middle of the ship, with a common fire room. The bunker capacity to be 150 tons. The auxiliary machinery in the engine-room will consist of a steam turbine dynamo, an independent bilge pump, fire pump, auxiliary pump, a 10-ton evaporator, and a distiller with a capacity of 1,600 gallons of potable water per 24 hours. There will be two feed and filter tanks of 150 gallons each located in the aft end of the engine-room.

When completed, the builders have to give the vessel a sea test, during which she is to steam for six consecutive hours at the rate of not less than 11½ knots an hour. The vessel was designed and the specifications prepared by R. L. Newman, Victoria, B.C.

R. & O. Navigation Co.'s s.s. Rochester.

The vessel which is being built for the Richelieu and Ontario Navigation Co., at Detroit, Mich., was launched Sept. 4, and christened Rochester. When completed, she will be a thoroughly modern, twin screw passenger steamer of the lake and river type. Her dimensions are: length, over all, 256 ft.; beam, 43 ft. 8 ins.; depth of hull, molded, 14 ft. 9 ins.; draft, 9 ft. 6 ins. Her engines will be of the triple expansion, inverted surface condensing type, with four cylinders working on four cranks, with a stroke of 22 ins., developing about 2,000 i.h.p. at 180 revolutions a minute. The boilers will be of the round return tubular type with induced draught. She will be equipped with six water tight bulkheads, two of which are provided with water tight doors, the remainder being without openings, and will be supplied with stockless anchors, with flukes recessed inside the line of hull plating, steam windlass and capstan, and six lifeboats. Her propellors are of the sectional type with semi-steel hub and manganese bronze blades. The most modern type of steam steering gear will be supplied. Her stipulated speed is about 18 miles an hour.

The dining-room and pantry will occupy about one-third of the after portion of the main deck, and immediately forward of the dining-room will be the engine-room and entrance hall, in which will be situated the purser's office and check-room. Forward of this the main deck is clear and will be used for the carriage of motor cars and express freight, with the exception of the bow, which will be taken up with sleeping-rooms for the engineers, stewards, etc. The main staircase situated in the entrance hall leads up to the first saloon deck, which is taken up entirely with staterooms and toilet-rooms. A new feature is the making of all staterooms of the outside type. There are also several parlor staterooms with bath-rooms connecting on this deck. Forward and aft on this deck there is comfortable saloon space for passengers desiring to sit indoors, and forward and aft there are also observation decks. The same general arrangement of the main saloon deck is carried out on the gallery deck, and above which is the hurricane deck on which will be found the smoking-room, ladies' room, buffet and news stand, and forward of the smoking-room are the rooms of the captain and navigating officers, as well as the pilot house.

The main entrance hall will be panelled in mahogany with rubber tile floor, and the dining-room in oak. The main saloon deck and gallery deck will be painted to give a light and cheerful effect, while the smoking-room will be panelled in polished hard wood. The main saloon and gallery deck will be carpeted in colors harmonizing with the decorations.

The steward's department will be equipped with a refrigerating plant of five tons ice capacity.

The Rochester will have 133 staterooms and eight parlors with baths attached.

Vessels Removed from the Register.

During Aug. the following vessels were removed from the register for the reasons assigned:—Steam: Daisy, Victoria, 41 tons, wrecked; Sweet Mary, Collingwood, Ont., 9 tons, burned. Sailing: Ancenis, Yarmouth, N.S., 1,700 tons, sold to foreigners; F. Richard, Weymouth, N.S., 94 tons, broken up; Ladysmith, Parrsboro, N.S., 597 tons, transferred to Barbadoes; Phœnix, Parrsboro, N.S., 397 tons, wrecked; Ste. Anne, Quebec, 44 tons, broken up; Ste. Anne, Quebec, 18 tons, lost; Semidas, Quebec, 41 tons, broken up.

Atlantic and Pacific Ocean Marine.

In connection with the recent grounding of the s.s. Jeanara, J. B. McGillivray, pilot, was fined $50 and suspended for one month by the Pilot Commissioners at Sydney, N.S., recently.

The s.s. Belle of Spain, chartered by the Dominion Iron and Steel Co., sailed from Sydney, N.S., Aug. 30, with steel rails and fittings for Prince Rupert, B.C. It is anticipated that she will complete the voyage round the Horn, in 65 days.

A dispatch from Rome, Italy, states that, at the request of the Italian Government, the General Italian Navigation Co. has decided to extend its New York service to Boston, with the probability that such service will be extended to Canada, commencing in Nov.

Furness, Withy & Co., operating the Furness Steamship Line, have added two vessels to their fleet running between Halifax, N.S., and Great Britain, making 10 vessels now running out of that port, under the company's management. Five of these run to London and the remainder to Liverpool.

The Donaldson Steamship Line has ordered a twin screw steamer, to be ready for service by May, 1910, for the Montreal-Glasgow route. She is to have a speed of 15 knots, accommodation for 300 cabin and 1,000 third-class passengers, and to be equipped with all the latest devices, including wireless telegraph.

It was recently announced that F. Waterhouse & Co., had established an agency in Vancouver, B.C., with Greer, Coyle & Co., with the intention of inaugurating a passenger and freight service between Vancouver and New Zealand and Australia, during Sept. A monthly service, it is said, is to be maintained, with three vessels.

A press report states that the Shipping Federation of Canada has received advice from Liverpool, Eng., to the effect that the Cunard Steamship Co.'s steamships Etruria and Umbria, which were recently withdrawn from service and offered for sale, may be placed on the St. Lawrence route shortly. The prices offered for the vessels were not considered sufficient, and it is stated that the company may retain them and enter the Canadian trade.

The Ulster Steamship Co.'s annual report states that the net earnings of the company's vessels, for the year, are £17,321. The net balance to credit of profit and loss after paying interest on deposits, income tax, etc., is £9,584, from which an interim dividend of 2% has been paid, leaving a balance of £5,684, from which a further dividend of 2% has been declared, and £1,784 carried forward. The company owns the Head Line operating between Montreal and Ireland.

A feeling is reported to be current in London, Eng., amongst Anglo-Canadians, that after the conclusion of Lord Strathcona's present visit to Canada, or very shortly after his return to England, an announcement will be made regarding an agreement between the British and Canadian Governments, as to the subsidy to be paid for a fast trans-Atlantic service, to be followed by full particulars as to the route decided upon and the service to be given, with the name of the successful tenderer.

The Allan Line s.s. Laurentian, running between Boston and Glasgow, went ashore, Sept. 6, at Mistaken Point, five miles from Cape Race, Nfld., and was considered to be a total loss. She carried 50 passengers and 40 of a crew, all of whom were taken ashore and sent to St. John's. The divers who examined the wreck are reported to have said that the keel was severely damaged and firmly embedded in the rocks, while the plates are crooked and badly torn in

places. The greater proportion of the cargo has been salved, and it is considered probable that the vessel may be refloated, should the weather continue favorable. The Laurentian was built at Greenock, Scotland, in 1872, and was formerly known as the Polynesian. Her dimensions are: length, 400 ft.; breadth, 42.2 ft.; depth, 35.5 ft.; tonnage, 4,522 gross, 2,838 register. She was originally on the St. Lawrence route, in the Montreal-Liverpool mail service, but for several years has been on the Boston-Glasgow route. During the Boer war she was chartered by the British Government as a troop ship, and carried troops and horses from Halifax to South Africa.

For several weeks past rumors have been current on both sides of the Atlantic as to changes which were taking place in the management and control of the Allan Line Steamship Co. The general trend of these rumors was that the company was to be absorbed by the G.T.R. The facts are, that J. and A. Allan, of Glasgow, Scotland, have retired from business as managers and agents of the company, which will be still carried on there under the management of Allan Bros. & Co., Ltd., which company will continue the agencies of the Allan Line Steamship Co., in Liverpool and London, Eng., as heretofore. For the present, the head office will remain in Glasgow, but it is expected that the vessels will, in the near future, be transferred to the Canadian Register, and when this has been effected, the head office will be transferred to Montreal. The importance of such a change to Canada will be appreciated, when it is remembered that the fleet consists of 30 vessels, aggregating 160,000 tons. The following board of directors has been elected for the current year, replacing the previous one:—President, H. A. Allan; Vice President, Sir H. Montagu Allan; other directors, A. A. Allan, B. J. Allan and J. S. Park.

As mentioned in our Aug. issue, the Thomson Steamship Lines are increasing their trans-Atlantic service, by the inauguration of a direct service between Canada and Italy, during the approaching winter season. The s.s. Tortona, which is under construction at Wallsend-on-Tyne, Eng., was launched there recently, and it is anticipated that she will be ready for service early in Nov. She is a four-masted twin screw steamer with complete shelter deck. Her length is 464 ft., beam 54 ft., and depth, 40 ft. to shelter deck. She has been built to the highest class at Lloyds and in accordance with the regulations of the British Board of Trade, and the U.S. and Italian emigration laws, with accommodation for 37 first class and 1,082 third class passengers. There is a dining saloon, with ladies' cabin and smoking room situated forward of the bridge, while the shelter deck is allotted to the sleeping quarters of the third class passengers, fitted with galvanized iron beds and spring mattresses. There are three dining rooms for the third class, situated amidships on the shelter deck, and additional dining accommodation has been provided 'tween decks whenever required. Two kitchens have been provided, one forward and the other aft for the third class passengers, and a separate kitchen supplies the needs of the first class passengers. The machinery includes 14 derricks with capacities of from 5 to 20 tons, with 12 powerful steam winches. The steering gear is on the latest principle, and is actuated by telemotor gearing from the wheel house amidships. Steam heat is supplied throughout the vessel and fire extinguishing pipes are laid to all holds, and the vessel is lighted throughout with electricity. The propelling machinery consists of two sets of triple expansion, surface condensing engines with cylinders 25½", 41" and 88" diar. by 46" stroke, supplied with steam by four single-ended boilers, having 16 furnaces and a total heating surface of about 13,200 sq. ft. Amongst the latest appliances with which this vessel is equipped, is a wireless telegraph installation. The vessels of this line are managed in Canada by Robert Reford Co., Montreal.

Maritime Provinces and Newfoundland.

The s.s. Margaret, which recently went aground on Thrum Cap Shoal, left the Halifax marine slip, Sept. 9, after having received a new foremast and other repairs necessitated by the accident.

The Newfoundland Legislature last session voted the following sums for marine services: Ocean services, Allan Line, $9,734; service from Port aux Basques and Sydney, N.S., $20,280; occasional ocean services, $1,000; for 15 coastal services, $186,200.

It is reported that when the icebreaking steamer Earl Grey reaches Canada, she will be placed in charge of Capt. Finlayson, who will be succeeded on the s.s. Minto by Capt. Brown of the s.s. Stanley. The Stanley will, it is said, be used as a lighthouse supply vessel on the Bay of Fundy, under the charge of Capt. C. Fraser.

The New Brunswick Legislature has confirmed an agreement made with the Maritime Steamship Co., by the council of Charlotte county, N.B., whereby the company is exempted from taxes, except those for educational purposes, for 15 years, in return for a steamship service between ports in that county and St. John.

The city of St. John has been authorised, by the New Brunswick Legislature, to transfer certain property and privileges to a body which may be constituted as a commission for the harbor of St. John, upon such terms as may be agreed upon by the city council, after the question of the transfer has been submitted to a vote of the ratepayers.

The construction of the breakwater at Summerside, P.E.I., having been completed, it was handed over to the Dominion Government by the contractor, H. McDonald, Sydney, N.S., early in Sept. It extends from the lighthouse to Indian Head, and is 51 ft. wide, and 5 ft. above water. The construction has extended over two years.

The s.s. Turret Bell, which was recently floated off Cable Head, P.E.I., after having lain there since she stranded in Nov., 1906, was originally insured on a valuation of £18,000, and the loss was paid by the underwriters in 1907. She was offered for sale by private tender Aug. 31, but it is reported that none of the offers received were considered sufficiently high, and that she has been withdrawn, for the present, and berthed for the winter, at Quebec.

The icebreaking steamboat, Earl Grey, which is illustrated on this page, and which arrived in Canada recently, met with some difficulties on her first voyage from England. She ran short of coal, and had to put into Newfoundland for supplies. Regarding press reports as to the transfers of the vessels Minto and Stanley, when the Earl Grey is put into service, we are officially advised that it has not yet been decided what changes, if any, will be made in the work which these vessels are now doing, nor is the question of their command finally settled.

Tenders were recently received by the Newfoundland Postmaster General for a steamship service for the conveyance of passengers and mails between Kelligrews and Belle Isle, calling at Portugal Cove and Broad Cove, making train connections at Kelligrews twice daily, that is, with the outgoing train from St. John's in the morning and with the incoming train to St. John's in the evening. The contract is for five years dating from Sept. 1, 1909, and may be terminated at any time by either side giving one month's notice.

The Valley Steamship Co.'s s.s. Granville, recently built at Yarmouth, N.S., in her trial trip developed a speed of 10 knots an hour. Her dimensions are: length, 90 ft.; breadth, 22 ft.; depth, 9 ft.; tonnage, 140 gross, 49 register. Her machinery consists of an engine of 25 n.h.p. driving a screw, steam steering apparatus, etc., and she has accommodation for 43 regular passengers, and has been passed to carry 250 passengers on Annapolis Basin. She will operate between St. John, N.B., and Annapolis, N.S., under the charge of Capt. C. W. Collins, Granville Ferry, N.S.

MANUFACTURING CO.

MILWAUKEE, WIS., U.S.A.
ESTABLISHED 1854

NOTICE

The Consolidated Car-Heating Company is the owner of Canadian patent No. 113,350 to James F. McElroy, for Regulating Devices for Steam Heating Systems. This patent covers the system of vapor heat for railway trains. Arrangements have been made for manufacturing this device at Coaticook, Canada, and it is prepared to fill Canadian orders from such manufacture.

(Signed),

CONSOLIDATED CAR-HEATING COMPANY.

been appointed to the Fisheries Protection Service.

G. W. Stephens, Chairman Montreal Harbor Commission, visited New York in the middle of Sept. to study the conditions of the grain traffic.

The Parks and Ferries Committee of the Montreal city council, recently promised that an investigation would be made regarding the management of the ferry service between Montreal and St. Helen's Island. Complaints have been made that the service has been made an hourly one, instead of half-hourly, as called for by the contract.

The Montreal Harbor revenue for Aug. was $48,769 as compared with $43,482 for Aug., 1908. The aggregate receipts for the period of navigation to Aug. 31, were $190,897, an increase of $6,054 over those for the same period, 1908. Imports and exports at the port show a decrease, but local traffic, especially that from the lakes, shows a considerable increase over the returns for the previous year.

Ontario and the Great Lakes.

The Dominion Bessemer Mines Co. is constructing docks in connection with its iron mining properties, about 22 miles from Port Arthur, on Thunder Bay.

The port of Key Harbor, Ont., has been established as an outport of Customs and warehousing port under the survey of the port of Parry Sound.

R. Beaumont has been appointed, temporarily, General Agent Northern Navigation Co. at Port Arthur and Fort William, vice John Bell, resigned.

A press report from Halifax, N.S., states that the Government cruiser Canada, which has been in the coast service for some time, is to be transferred to the Great Lakes.

The Keystone Fish Co.'s steam tug Ogle, of Erie, Pa., was caught in Canadian waters recently, and it is reported that she will be offered for sale to the highest bidder, at Port Dover.

The Canadian Locomotive Co., is making considerable extensions to its docks at Kingston, and at the same time reclaiming some of the land from the water, thus extending its premises.

The steam tug, Charles F., registered at Port Stanley, Ont., was offered for sale at Detroit recently on instructions from the Ontario Government. She was seized some time ago for fishing without a license.

A. McVittie, President Toledo Shipbuilding Co., who died at Detroit, Mich., Sept. 15, aged 67, was born in Scotland, and came to Montreal at an early age, and later lived at Bothwell, Ont., before going to the U.S.

Montreal rumors credit the Richelieu and Ontario Navigation Co., with the intention of increasing its capital in the near future, and pursuing a more progressive policy. Among other things said to be included in the proposed policy, are, the construction of several large and modern steamers, and the reconstruction or refitting of the day-boats running between Montreal and Quebec.

The name of the steamboat Dortha, no. 100397, registered at Brockville, has been changed by order in council to Ramona, and the name of the steamboat Florence Main, registered at Toronto, no. 111920, has been changed to Mohawk Belle.

A Collingwood press dispatch recently stated that there is every possibility of the C.P.R. steamboats, Alberta and Athabasca, being lengthened there during the approaching winter. We have been officially advised that there is no truth in the report.

The Thousand Islands Steamboat Co.'s steamboat, Islander, was destroyed by fire at Alexandria Bay, N.Y., Sept. 15. She was built at Rochester in 1871, her dimensions being: length, 425 ft.; breadth, 20 ft.; tonnage, 118 gross, 59 net. The loss has been estimated at $25,000. The boat was not on the Canadian register.

A Port Arthur press dispatch states that preliminary steps are being taken for the formation of a company for the operation of a line of lake vessels in the package freight trade. It is said that the company will be closely allied with the Western Drydock and Shipbuilding Co.

The International Waterways Commission met at Toronto, Sept. 3, when after a brief discussion relating to proposed improvements on Lakes Erie and Huron and connecting rivers, and the conduct of ordinary routine business, the meeting was adjourned until Oct. 15, at Buffalo, N.Y.

The U. S. steamboat, Arthur H. Hawgood, ran into the stone pier at the upper entrance of the Canadian canal at Sault Ste. Marie, Sept. 5, and sank with a large hole in her port side, just aft of the bow. It is said that the accident was due to mistaken signals. The position in which the vessel lies does not seriously impede navigation.

A Vancouver press dispatch dated Sept. 15, states that the Mayor has received a letter from a Calgary official, to the effect that on account of the lack of terminal facilities at Vancouver, the operation of the grain route by way of the Pacific coast has been abandoned for this season, and that grain will be shipped via Fort William.

The Farrar Transportation Co., has entered a protest against the decision of the underwriters who have awarded the contract for the raising of the steamboat Collingwood, which was sunk in the Detroit River, Aug. 24, to a U.S. company, after it was practically understood that it was to go to a Canadian concern, whose tender of $13,800 was the lowest one received.

The Department of Public Works will, it is announced, lease the graving dock at Kingston, for 21 years. For some time past, complaints have been received that the dock is not provided with necessary facilities for repairing vessels, thus causing considerable delay. It is rumored that interests closely connected with the Canadian Locomotive Co., will acquire the lease.

The Superintendent of the Canadian Canal at Sault Ste. Marie, notified the Lake Carriers' Association, Sept. 8, that the draught of the canal had been reduced to 19 ft. 3 ins., for both up and down vessels. It is surmised that the canal officials have the idea that the greater depth on the Canadian side causes overloading of vessels and possible trouble in getting them through.

The Richelieu and Ontario Navigation Co.'s steamboat, Prescott, was destroyed by fire recently. This vessel, formerly named Bohemian, was built at Montreal in 1873, and rebuilt at Sorel, Que., in 1900. Her dimensions were: length 195.1 ft.; breadth, 27.8 ft; depth, 9 ft.; tonnage, 1,107 gross, 648 register, with engine of 53 n.h.p., driving paddle wheels. She was valued at £8,250, and was insured in London, Eng., against fire risk alone.

The U. S. Lake Survey reports the levels of the great lakes for Aug., in feet above tide water, as follows:—Superior, 602.42; Michigan and Huron, 581.04; Erie, 572.79; Ontario, 246.82. During Sept., it was anticipated that Superior would be 1¼" higher, Michigan and Huron, 2" lower, Erie 3¾" lower, and Ontario 5" lower. Compared with the Aug. average for the past 10 years, Superior was 7½" lower, Michigan and Huron 1¾" lower, Erie 1½" higher, and Ontario 4½" higher.

The Fort William Coal Dock Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $50,000 and office at Fort William, to purchase, lease, construct and operate coal and ore docks, derricks, hoists, lighters, vessels, barges and dredges, tracks and tramways, and all plant and machinery for loading and unloading coal, ore and fuel, and for other purposes. The provisional directors are, H. J. Cuaig, F. W. Grant, B. Chew, F. P. Nesbitt and J. S. Montgomery, Midland, Ont.

Regarding a report from Collingwood to the effect that the Northern Navigation Co. proposes to undertake some extensive alterations and repairs to the Huronic during the winter, we are advised, that the management has been considering the advisability of remodelling the Huronic, so as to make her equal to the Hamonic, but that it has been practically decided that nothing in this direction will be undertaken next winter, beyond the preparation of plans and estimates for the directors' consideration.

The steamboat Kathleen, owned by Elliot and Moynes, Lindsay, was struck by lightning and burnt to the water's edge, at Sturgeon Point, Sept. 2. She was rebuilt at Lindsay in 1905, her dimensions being: length, 66 ft.; breadth, 14 ft.; depth, 4 ft.; tonnage, 37 gross, 26 register. She was equipped with an engine of 6 n.h.p. driving a screw. This vessel was formerly known as the Greyhound, and before its reconstruction, plied between Fenelon Falls and Bobcaygeon, and subsequently was utilized as a tugboat.

The Great Lakes and St. Lawrence Navigation Improvement Association was organized at Toronto Sept. 9, for the purpose urging on the Government the advisability of improving the navigation route from the Great Lakes to Montreal. It was decided to send a delegation to the Dominion Government in connection with the proposed deepening of the Welland Canal, and in the meantime, all municipalities along the route are being circularized with information as to the necessity for such improvements. H. W. Richardson, Kingston, was elected President, and the following were elected Vice Presidents:—A. A. MacKay, H. Champ, Hamilton; T. Conlan, Thorold; T. L. Church, A. E. Kemp, J. B. Miller, Toronto; T. King, Kingston; J. S. Campbell, St. Catharines; Col. Ponton, Belleville; L. L. Henderson, Montreal, and L. H. Daniels, Prescott.

A press report states that H. L. Timms, of Chicago, Ill., has been appointed Superintendent of the Western Drydock and Shipbuilding Co., Port Arthur. By an agreement with the city, the company agrees to build, equip and operate in the city, first a drydock capable of receiving and handling the largest vessels plying on the great lakes, and second, a shipbuilding plant adequate for the construction and equipment of such vessels. The work is to be commenced within two months of the ratification by the ratepayers, or of the date of the passing by the Ontario Legislature of an act empowering the municipality to enter into the agreement, should the authority of such an act be found necessary. Both the drydock and shipbuilding plant are to be ready for operation by Sept. 1, 1911, and at least 300 hands are to be kept in steady employment in the works. The city has provided a site of 100 acres, free of cost, with water frontage on Thunder Bay. The company's property is exempt from taxation, except for school purposes, fixed at $2,000 a year, for 20 years. For the first ten years the company receives an annual cash subsidy of $25,000, but if fewer

than 300 hands are kept employed in any one year, the amount of subsidy is to be decreased in proportion, but the company may, in subsequent years, by employing more than that number, earn the portion of subsidy withheld. The city, also undertakes to construct, or to procure the construction, by the Government, of adequate breakwater protection.

Manitoba, Saskatchewan and Alberta

J. G. Hargrave and Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $150,000 and office at Winnipeg, to carry on a general grocery, contracting and commission business, and in connection therewith to own and operate vessels of all kinds, and to carry passengers and freight and conduct a general transporation business.

The Moore Lumber Co. is building a steamboat at Icelandic River, which, it is stated, will be the largest steam vessel yet launched on Lake Winnipeg. It is expected to have it completed early in 1910, in time for the opening of the St. Andrews lock, when it will ply in the passenger service between Winnipeg and Lake Winnipeg points.

B.C. and Pacific Coast Marine.

The Victoria city council has given notice of application for a grant or lease of the foreshore on the inner harbor of Victoria harbor, at the termination of Discovery St., and has deposited plans as required by the statute.

The Sechelt Steamship Co. will, it is announced, inaugurate a steamship service between Vancouver and Ladysmith, using for the present two vessels of the company's fleet, and substituting, later, a larger and more modern vessel, negotiation for the purchase of which are reported to be proceeding in England.

Rogers' Bros.' steamboat Westham was launched at New Westminster recently. Her dimensions are: length, 95 ft.; beam, 22 ft.; draught, 7 ft., with a carrying capacity of 150 tons of freight. She has been built specially for the coasting freight trade, and is equipped with the steam engines taken from the steamboat Lapwing.

The Westminster Towing and Fish Co. has added a tug to its fleet. This vessel, which was launched at Lulu Island recently, has been named Wireless. Her dimensions are: length, 90 ft.; breadth, 18' 6": depth, 9' 4". She is equipped with engine of 100 h.p., and when completed will be used on the Fraser River and the Pacific coast.

The contract for the material for the construction of a 1,000 ton floating pontoon drydock is reported to have been awarded to an English firm, and instructions have been received in Vancouver for the preparation of a site which the dock is to occupy there. The dock's dimensions are given as: length, 510 ft.; width, 70 ft.; over sills, 30 ft., with a lift capacity of 11,000 tons.

The question of the construction of a breakwater at English Bay was before the Point Grey council, Aug. 30, and was adjourned for further information as to what amount would be spent at the beginning, and for each succeeding year until completion. The syndicate, which is prepared to undertake construction, has applied to Government for a lease of the foreshore, and proposes to construct a breakwater at a cost of $1,500,000, work to be started within two years, and completed within seven years.

Mackenzie Bros. are reported to have purchased the s.s. Puri of Bombay, which they intend to place on the run between Vancouver and Seattle. She is a steel vessel, built at Dundee, Scotland, in 1895, her dimensions being: length, 260 ft.; breadth, 34 ft.; depth, 15 ft. 3 in.; tonnage, 1,330 gross, 643 register. She is equipped with triple expansion engines with cylinders 21", 33" and 52" diar., by 30" stroke, driving twin screws. She has a capacity for about 1,500 passengers and 600 tons of freight, with a speed of 17½ knots.

The power lifeboat for the Canadian life saving service, to take the place of the one which was wrecked last year at Bamfield Creek, has been completed and shipped to Bamfield Creek station, Vancouver Island. She is 26 ft. long overall, with beam 8 ft. 1½ ins., and is built of mahogany fastened with gunmetal and copper. She is diagonally planked on two layers with canvas between and is self baling and self righting with the crew lashed to the thwarts. There are eight water tight compartments below the deck, each compartment filled with copper cases, 82 in all. The boat is lug-rigged with foresail, mainsail and jib, with hollow masts, gun metal centre

Lake Grain Shipments, 1908 Crop.

The following statement, prepared by F. E. Gibbs, Grain Inspector, Fort William, Ont., shows the bushels o grain shipped from the different elevators at Fort William and Port Arthur, of the crop of 1908, Sept. 1, 1908, t Aug. 31, 1909, inclusive, with ports of destination. The last two figures in each column, after the period represent lbs.

board, and is also fitted with 10 oars. An auto-marine, six cylinder, four cycle gasolene motor of 35-40 h.p. is installed in the after end compartment, giving a speed of about 10 miles an hour, with 650 revs. Tests as to the stability, self-righting, sailing and speed were undertaken in the United States under the supervision of Lt.-Col. Anderson, Chief Engineer, Department of Marine.

Grain Elevator Notes.

The Pasqua Farmers' Elevator Co., Ltd., Pasqua, Sask., has been dissolved and the name removed from the register.

The name of Caron Farmers' Elevator Co. has been changed to the Caron Farmers' Elevator and Trading Co., with office at Caron, Sask.

The Bulyea Farmers' Elevator Co., Ltd., has been incorporated under the Northwest Territories Ordinance respecting companies, with office at Bulyea, Sask.

John Richardson & Sons' elevator at Wainwright, Alta., was completed towards the end of Sept., in readiness for the new crop. Its capacity is about 35,000 bush.

The Ogilvie Flour Mills Co., has erected 16 additional elevators during this year, bringing the total of country elevators operated by the company, in the prairie provinces, to 116.

The Taylor Milling and Elevator Co., has completed an addition to its elevator at Lethbridge, Alta., and is now building an elevator at Diamond City, of 55,000 bush. capacity. It is also reported to be considering the question of erecting one at Nanton.

Tenders were received during Sept. for the brick work on the power house of the C.P.R. elevator under construction at Victoria Harbor, Ont. The contractor will supply the labor only, all materials being supplied by the company. The elevator is being built by the John S. Metcalf Co.

The Norris Grain and Elevator Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $150,000, and office at Winnipeg, to carry on a general elevator and warehouse business. The provisional directors are J. S. Norris, Montreal; H. N. Baird, R. D. Stratton, Winnipeg; F. Heap, Selkirk, Man.

The North Star Grain Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $500,000 and office at Winnipeg, to deal in grain and to own and operate grain elevators, warehouses and other conveniences. The provisional directors are:—W. A. Anderson, H. R. Soot, J. A. Machray, F. J. Sharp, H. Dunk, Winnipeg.

The Montreal Harbor Commissioners' elevator was closed for all local grain, Sept. 2, and from that date, only grain for export was received there. It is reported that the question of building another elevator at Montreal, under the Commissioners' control, at a cost of $2,000,000, is to be brought under the Dominion Government's consideration.

The Globe Elevator Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $600,000, and office at Calgary, Alta., to acquire and operate country, terminal and all classes of elevators, storehouses, cleaning plants, etc. The provisional directors are R. B. Bedford, J. E. A. MacLeod, J. B. Roberts, J. W. Hugill, Calgary, Alta.

The Burrard Grain Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to carry on, in British Columbia, throughout Canada and elsewhere, the business of manufacturers, millers and warehousemen of flour and other grain products, and in connection therewith to own and operate elevators, wharves, warehouses, etc.

The Lyleton Grain Growers' Elevator Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $15,000 and office at Lyleton, for the purpose of carrying on a general milling warehouse and elevator business. The provisional directors are:—A. M. Lyle, A. E. Venton, G. Campbell, R. A. Stinson, R. J. Tooke, J. Harkness, W. A. Sawyer and C. A. Chalmers, Lyleton.

At a meeting of the Dominion Millers' Association, at Toronto, Sept. 2, the following resolution was adopted and forwarded to the Dominion Government: "Whereas, the terminal elevators at Fort William and Port Arthur are under the control of persons engaged in the grain trade of Canada, and whereas such control enables them to manipulate the different grades of grain and tends to create dissatisfaction in the minds of shippers, millers and receivers of grain; therefore be it resolved that we respectfully request and urge that immediate action be taken on the recommendation of the Royal Grain Commission appointed by your Government for the investigation and betterment of these conditions, and the joint request of northwest farmers and the Dominion Millers' Association for effective control of these elevators."

Telegraph and Cable Matters.

The stringing of the Government lines from Athabasca Landing to Lesser Slave Lake, Alta., is proceeding rapidly. The right of way has been cleared and the poles erected, and it is expected that the work will be completed this fall.

G. E. Eccles, the wireless telegraph operator on board the s.s. Ohio, who died at his post, while signalling for assistance when the vessel was wrecked on the Pacific Coast recently, was buried at Almonte, Ont., Sept. 7.

The Newfoundland Legislature last session voted the following sums for telegraph service:—Marconi royalties, $2,500; for construction, $10,000; for St. Johns staff, $15,162; for operators outside St. Johns, $35,738; for contingencies, $15,000; and for shares of tolls Commercial Cable Co., $6,000.

The Grand Trunk Pacific telegraph line has been completed to Edmonton, Alta., and the construction is being continued westerly concurrently with the laying of steel for the railway. A telegraph office has been opened at Edmonton, and a special commercial wire is being used for business purposes, between Winnipeg and Edmonton.

So successful have been the experiments with the new Telefunken system of wireless transmission at the new 20-kilowatt station of the Austrian government at Pola on the Adriatic, that signals strong enough to be automatically printed on tape by the coherers were received at Norddeich on the North Sea, Copenhagen, and Berlin.

W. Marconi, is at present at Glace Bay, N.S., for the purpose of superintending the reconstruction of the wireless telegraph power station which was recently destroyed by fire. He is reported to have said that the new station would be equipped with the most powerful appliances for the despatch of messages across the ocean, and he hoped that the work would be completed by Jan. 1, 1910.

The U. S. press is complaining of the scarcity of telegraph operators, and states that in a very short time this will prove a very serious problem for the railways in Canada and the U. S. The telegraph branch of transportation has grown more than any other, and remarking on the installation of the telephone, to take the place of the telegraph for train dispatching, says: "The telephone on the railway is a very convenient means of verbal intercourse between officials, but for practicable and expeditious handling of a large volume of business, of which records must be kept, and in which errors must not occur, the telephone thus far has been a failure."

"How Telegraphs and Telephones Work," is the title of a volume just issued by Seeley & Co., 38 Great Russell St., London, E.C. The book is written by C. H. Gibson, author of several works dealing in a non-technical and popular way with electricity and its application to modern uses. He has succeeded in telling in simple language all about telegraphs and telephones in a way that will interest and instruct the general reader, as well as the operator who desires to know something about these inventions. There are added chapters on Wireless Telephony, one Concerning Lightning, and a short discussion of the Electron Theory. The volume is illustrated by five full page illustrations and

Among the Express Companies.

A. H. Irwin has been appointed agent Dominion Ex. Co., Lethbridge, Alta.

The Canadian Northern Ex. Co., has opened offices at Bonito and Durban, Man.

L. McBean has been appointed Agent Canadian Ex. Co., Port Huron, Mich., vice W. H. Timmonds transferred.

The Canadian Ex. Co., has opened offices at Avondale, N.S., Becancourt, Becquets, Fortierville, Gentilly, La Baie, St. Gregoire, Valois, Que., and Findley, Ont.

Express companies operating in the U. S., put into effect, Sept. 5, an order requiring that all cinematograph films be packed in heavy metal cases enclosed in wooden boxes bearing a warning against the storing of the package near a radiator, stove or other source of heat.

The Canadian Northern Ex. Co., which has extended its service over the Canadian Northern Quebec Ry., between Garneau Jct., and Quebec, as advised in our last issue, has opened offices at Cap Rouge, Dombourg, Portneuf, St. Augustine, St. Casimir, Prospere and St. Stanislas.

S. Coates, who was recently convicted of forging money orders of the Dominion Ex. Co., while in its employ, was sentenced to 3 years in the penitentiary, at Montreal, Sept. 3. He had previously been sentenced to a 5 year term, in Aug., on other similar charges. Presumably the sentences will run concurrently.

The Canadian Northern Ex. Co. has reopened its offices at Belleview, Grays, Hilton, Kelwood, Myrtle, Rounthwaite, Man., and Kenaston, Sask., has opened offices at Zephyr, Ont., and Bruno, Sask., and has closed its offices at Footes Bay, Royal Muskoka, Sparrow Lake, Ont., and Harris, Sask. The name of Monck Road, Ont., has been changed to Rathburn.

Hendrie and Co's stables at Front and Peter streets, Toronto, were partially destroyed by fire, Sept. 15. The cause is said to be lightning. The damage has been etimated at $10,000.

"Yes," said Clarence. "I proposed to her on hipboard while the steamer was going twenty knots an hour."

"What was her answer?"

"Well, it was brief, but it was—er—at the rate of about sixty 'nots' a minute."

They were on the St. Joe boat.

"Percy," asked Claribel, snuggling closer, "what's making that rasping, cracking noise?"

"It's the wireless telegraphic apparatus, dear," said Percy. "It's sparking, too."

Locomotive Dispatching and Terminal Facilities.

By C. Kyle, General Master Mechanic, Eastern Lines C.P.R.

In preparing this paper I have, as far as possible, aimed to keep clear of the technical and theoretical side, and have rather inclined to the practical or every-day side of the question, having in mind an after discussion somewhat on the lines of the old time bunk-room chats. To my mind there is no department connected with railway operation that so much depends upon as that charged with the dispatching of locomotives. The roundhouse is the most important of all the departments, for no matter what figuring and calculating is done elsewhere or what business may be secured, if, from various causes, the roundhouse fails in prompt and reliable dispatching thus causing detentions, etc., the business will eventually fall off. The dispatching of locomotives embraces many features that may not be known to those not directly connected with this branch of railway operation. The successful and economical dispatching of locomotives depends, in a large measure, on good government, and organization which will bring about team work of the whole staff, and only those absolutely necessary to handle the business carried on should be considered as members of this team; any surplus help will only tend to diminish interest and lead to sloppy work.

In the best organized shops a general tendency will be noticeable towards tidiness both around the premises and with the equipment; the practice of making temporary repairs merely to tide a case over at these points will rarely, if ever, be resorted to. These particular shops appear to be able to handle the business without the necessity for doing work in such a manner as to invite failures; at all times the idea prevails that the efficiency of the road depends upon the condition of the power, which, if first-class, will greatly aid in train operation, and all the statistics being prepared on a basis of tons handled seems to appeal to all concerned; the question of aggressive departmental controversies has no place here, but where a general betterment can be effected, there is no hesitation, but rather a desire to assist, both by example and practice, the other departments, so that the general result on the particular district with which the shop is identified may be a cause for special mention; in this way the credit is shared by all.

In former days it was enough to turn a locomotive out for a trip with a supply of stores, fuel, etc., that to-day will take care of a machine of double the capacity; then the question of costs for repairs, fuel, lubrication, etc., was not gone into as thoroughly as at present, and it was considered the duty of an up-to-date shop to turn out a fine looking machine without regard to cost. A change in the state of affairs has been brought about by the handling of competitive business, making it imperative that the freight offered at present shall

F. M. SPAIDAL
General Superintendent Canadian Northern Quebec Ry. and Quebec and Lake St. John Ry.

be handled with such dispatch as will ensure its delivery as contracted for, and the demands made on the machine, both in the matter of greatly-increased tonnage hauled and in the decrease in time allowed for so doing should be taken into consideration. To-day, careful record is kept of shop expenses, cost of locomotive repairs, fuel consumed, lubrication used, etc. This, along with the possibilities of engine failures and detentions, makes locomotive dispatching somewhat of a difficult problem. It may, therefore, not be considered out of place to look into a few points that may be considered as essential in modern locomotive dispatching; among these the question of terminal facilities that will permit of expeditious handling of locomotives, is I think, one of the most important, and generally speaking, does not receive the consideration it should, as with the close of navigation the railways are called upon to handle important business promptly in cold and stormy weather, and there should be no question about providing sufficient in-coming and out-going tracks equipped with coal and sand hoppers, ash-pits with proper ash-handling devices, and water cranes of such capacity as will care for the business without detention to locomotives to and from the shop. The turn-table should be looked upon as the key to the situation, and should be of such construction as will enable it to hold up against the weight of the heaviest locomotive in service; it should be preferably power driven. There should be one person specially appointed to take care of its inspection and oiling, and it should be his duty to know beyond doubt, that it is always in satisfactory condition.

The shop should be roomy, well ventilated, and heated, and special attention given to proper drainage from both the pits and floor, thus making it possible for the men to get about without the inconvenience of wet feet, etc., which affects the efficiency of the average man. There should be provision made for a suitable office for foreman, and an engineer's registering room; there should also be a well ventilated rest house for engine crews, equipped with sleeping and dining room accommodation, which will permit of the men getting a warm, substantial meal.

At the principal shops that are responsible for the upkeep of locomotives, there should be provided tracks of sufficient capacity to take care of locomotives out of service on account of waiting repairs, traffic conditions, etc., and also wheel tracks sufficient to take care of new and old wheels kept in stock. There should be both driving and truck wheel pits, and all pits should be provided outside with jacking planks or timbers. There should be appliances for loading and unloading wheels, suitable lorry tracks for trucking heavy materials, up-to-date boiler tester and hot water washing out plant, with pits specially allotted and constructed for this purpose, special care being given to bad water districts. There should be sufficient modern machinery to take care of the proper maintenance of tire work, driving boxes and wedges, pistons, valves, and motion and rod work, also a proper blacksmith and boilermakers' equipment; all obsolete tools originally used for repairs to the smaller power should either be disposed of or scrapped.

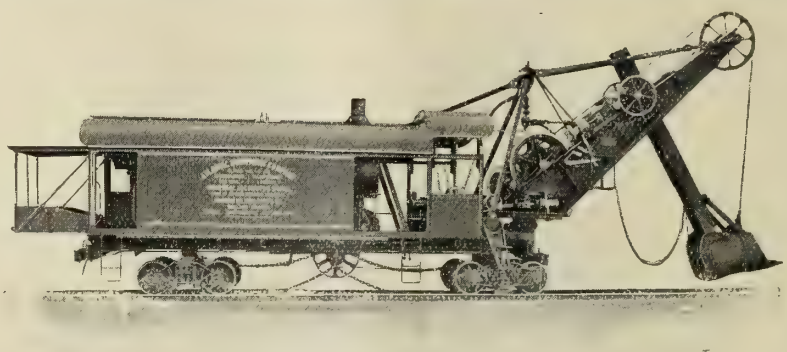
The roundhouse staff should be looked

LOCOMOTIVES FOR ALL CLASSES OF SERVICE

Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39.200 pounds.

ATLANTIC STEAM SHOVEL



Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

MONTREAL LOCOMOTIVE WORKS, LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

upon as the bone and sinew of the concern; each one should be imbued with a feeling of loyalty to his foreman, and have such a sense of the chain of responsibility, from the call boy up that he will realize it is only by his individual efforts that the best results can be obtained. The foreman who gives thought and study to his business, and is thorough in system, straightforward, honest, and true in his dealings with his staff and other departments, excels; the most careful foreman is one who, while exercising close supervision, is possessed of tact and diplomacy, as no matter what the conditions are or how much expense has been gone into for equipment, etc., if the staff is not properly managed the result will be disappointing.

The importance of knowing costs promptly is an absolute necessity in successful locomotive dispatching this does not necessarily mean elaborate statements of figures, etc., but rather implies a systematic method of expending money, watching and knowing costs on lines that are applicable to any other business. To quote from H. H. Vaughan's presidential address at the recent Master Mechanics' convention: "In short, that without in any way reducing the interest we have in locomotive engineering, we take up in a far more business-like and serious way the financial problems connected with the operation of the loco. department, the form of organization that will give the best results, and the commercial aspect of work of the motive power official in conducting his department as though he were manager of a large business enterprise."

A foreman who can in a quiet way make it known to his staff just what a job is worth, and if necessary be prepared to demonstrate that he has gone into the question sufficiently to know his statements are correct, will enjoy the confidence and loyal support of all.

Investigations should be made into cases of damage and the cause ascertained if at all possible, so that all questions relating thereto may be answered promptly and recommendations outlined that will assist in reducing possible future cases to a minimum. It should be the ambition of those handling correspondence to feel that when a file of papers connected with such an investigation leaves their office, the investigation is complete as far as they are concerned.

The chargeman or leading hand should so figure on his work that only at a time when power can be best spared should heavy repairs be undertaken, at which time it is preferable to see that all that is possible is done, and done in such a manner that there shall be no necessity to hold the locomotive out of service at the first turn around point, to go over what had not been properly done in the first instance. The chargehand should be in the relation of a doctor with the locomotives as patients; he should know the particular ailment or tender spot of each locomotive and by encouraging engine crews to explain defects and talk over conditions, be in a position to decide just how long it would be wise to keep an engine in service without attention; this will greatly assist in the economical handling of repairs. He should make it apparent to his foreman that there need be no anxiety as to his ability to handle his position, or of the question as to whether he can carry the responsibility of work done under his supervision, by cultivating friendly relations with both loco. crews and shop staff; he will soon find them becoming so interested that they will of their own accord feel like sharing the responsibilities, thereby lightening the daily load.

The chargehand should consult with his foreman regularly as to his doings and how he figures to handle his work; he should feel it is his privilege to make recommendations that will, in his opinion, result in economy or a betterment of shop conditions. He should be prepared to give an intelligent and honest expression of opinion as to the cause of any failure, having in mind that it is his business to know, and if it is a case of either faulty workmanship or material the facts should be given without hesitation, making it clear that he is in all respects worthy of the position he has been selected to fill.

The machinist, boilermaker, blacksmith, and carpenter should be closely in touch with the chargeman or leading hand and should lose no opportunity of bringing to his notice conditions or defects that may have been observed which, in their opinion, might lead to failures. Since from this class of men intelligence and skill are looked for, each one should, when given a job, use thought as to how the work is to be performed with the best possible dispatch, always having in mind that a failure from inferior workmanship reflects on the shop and directly on himself, and also bearing in mind the fact that when vacancies occur for higher positions, selection is invariably made from among those who have been energetic, thoughtful and loyal in the general performance of their duty.

The engine hostler is a very important person in the roundhouse staff; he should be the diplomat of the concern, and being in daily contact with the locomotives and crews, must by meeting the men familiarize himself with the condition of their engines. He should know of any defects that would necessitate the blowing off of boiler, emptying of tank, changing of wheels, etc., and should in turn arrange to place the engine on the proper pit allotted for the work required, and incidentally advise the chargeman of his doings; he should know the individual peculiarity of the men, and give serious consideration to the importance of their getting all the rest possible, and by his many acts of common courtesy inspire such a confidence as would cause the foreman no concern regarding detentions from waiting engineers and firemen. Should a cause of discipline be under consideration, the hostler should be of such standing that he might be looked upon as a referee and be prepared to give a straightforward opinion if questioned by the foreman.

The apprentice of to-day may be looked upon as the mechanic of the future, and while it is true the different companies have taken a greater interest in the training of the boys, and as far as they can have made it possible for the boy to enjoy all the privileges necessary to qualify as a successful journeyman, it must also be borne in mind that time has brought about change in equipment, more efficient machines, systems and methods of handling repairs, so that the responsibility for the training of the boys from the shop standpoint has increased in proportion, and it is the duty of all fair-minded men to keep this before them, and so by their example make it apparent to the lad that his selection of the trade is a wise one. The cultivation of studious habits and perseverance, and generally of manly deportment, should be encouraged from the start; there should be a feeling grow up between man and boy that their interests are mutual. By exercising kindness and patience the man will soon see the fruits of his labor in the training of the boy, who will seek his advice and confide his little difficulties and secrets to him; this will be the time to discourage any inclination to coarseness or unmanly behavior and to impress on the boy to at all times endeavor to keep the dignity of the trade uppermost in his mind, so that when the time comes for the boy to start out for himself, he will be a mechanic reflecting credit on the shop that turned him out. A story occurs to me at this moment of a man who secured a position in an up-to-date shop, who on starting was given a piece of work that required accurate filing; the foreman noticed in passing by the new man that he was handling the file like the bow of a violin. On calling the man's attention to this, and intimating that work of that kind could not be permitted the man replied: "If I only had the file I served my time with, I could show you how to do a good job." The point I wish to bring out is that in the training of our boys we should endeavor to teach them the use of any file; or, in fact, of any tool or machine so thoroughly as will ensure getting everything possible out of it.

To the enginemen belong the task of conducting their respective duties in such a manner that by their individual and collective efforts, the district with which they are identified generally, and themselves individually, shall be prominent in favorable mention when comparisons are being made. The changes that have recently been made, and those that are constantly taking place in locomotive design, call for not a little thought and study on the part of engine men. The engineer of to-day should closely watch the new devices introduced, and only be satisfied after he has become familiar with the workings of the same. He should avail himself of every opportunity of being present when any discussion or demonstration is being made pertaining to his business, and should aim at becoming an authority on some particular feature of his business. This, along with a keen sense of economy, the exercising of care and intelligence when reporting repairs required, having in mind what it costs to perform work that might be done more economically, at a time for instance when the boiler is being washed and the like, and the exercise of thought and judgment in other ways, will result in considerable saving. The ideal engineer will be careful to see that no entry of repairs required is recorded over his signature that there is any doubt about; there are always ways and means for the proper method of locating defects, and until such defects are known the report should be withheld. When on the line there should be a desire to gain a reputation for good judgment in train handling in order that the superintendent and train dispatcher may be justified in making the statement that they have men on their districts who can do, and are doing, good work, for experience has shown that superintendents and those in charge are liberal to a fault in sounding the praises of enginemen rendering good service.

The economical use of fuel has always been, and I presume always will be, a subject of interest. There can be no question as to what can be accomplished when all concerned are fully alive to this question, and while the engine crew can, with careful practice, take advantage of each and every move made by each other in respect to this item for the most efficient working of the machine, I would beg leave to quote the following extract, bearing on this subject, from the report of the committee dealing with this at the Master Mechanics' Convention of June.

A PERSONAL MENTION.

The Managing Director of the Railway and Marine World left Toronto hurriedly, Oct. 15, to sail by the s.s. New York for Plymouth, en route to London, Eng., in response to a cablegram advising him of his second daughter's sudden, and apparently hopeless, illness there.

This mention will explain his present inability to attend to personal correspondence and other matters requiring his individual attention.

PORTABLE LIGHTS

Pay well when the days get short. Let us send you our illustrated catalogue.

BUCKEYE KEROSENE LIGHTS.
2,000 to 10,000 Candle Power. We carry in stock the popular sizes.

Vancouver, 614 Hastings St., W.

1909: "Efficient handling of this involves the work of both the engineer and fireman, and to our minds constitutes one of the most, if not the most important element in fuel economy. The question of running an engine in order to get most economic results involves the work of both engineer and fireman, and is so important from that point of view, that we shall introduce this portion of the subject by making the following statement: An engine may be built of the very best material, and of the most approved design, mechanically perfect, with all the modern conveniences to assist in its perfect manipulation, and you place that engine in the hands of an incompetent engineman, and you have almost nullified the combined expert mechanical skill necessary to turn out the finished product; we think you will all agree it is most important that the finished machine should have skillful operation."

While the above is true, there is little accomplished unless those who have to do with the handling of orders, station work and the like, understand that fuel consumed when delays are taking place is wasteful, and that the responsibility rests on someone; this, along with fuel unnecessarily burned at terminals when the locomotive is in the hands of shop staff, tends to lessen the interest of enginemen, since they are responsible in all such cases for excessive fuel consumption, over which they have practically no control. No case of this kind should be allowed to pass unnoticed, for when enginemen are thus assured that interest is being taken elsewhere than in the engine cab, it will become an incentive for them to be on the alert and prompt in the discharge of their respective duties, and thus create the desire to establish a record for their district that will outclass all others on their system.

The fireman of to-day may be looked upon as the engineer of the future. He should have in mind his ideal of what constitutes a successful engineer. He is, of course reminded by the more extensive examinations he is called upon to write up, of the increasing importance of giving attention to his business, and to what will be expected of him as advancement takes place. By close attention he will hear the name of some particular person in his line being continually mentioned by the engineers as one who can be depended upon under all conditions to do a good job; requests from engineers on most important runs will be made to foremen for this class of man. A man of this kind becomes known, his opinion is valuable, and is sought by those in charge and also by his associates in cases of dispute; in cases of discussion and arguments pertaining to subjects for advancement in his line of business his remarks are listened to with interest, and by his example he discourages thoughtless expressions which are disloyal, and neither good for the employe nor the company. It should then be worth his while to locate this type of fireman, get in touch with him, and gain all the good points possible, always realizing he has to handle one of the greatest items of cost in the business of transportation. I will here again, with your permission, refer to the statement made by R. Quayle, at the recent Master Mechanics' convention, in which he says: "We will suppose the fuel is all right, the specifications are all right, the purchasing agent is all right, and the delivery on the ground is all right. I made this statement to 22 locomotive firemen within the last two weeks, that I would select 100 locomotive firemen on the C. & N. W., and I would guarantee that if I had every other man on the railway equally as good firemen as the 100 I could select, that I could save easily $500,000 a year in fuel."

The importance, therefore, of familiarizing himself with just what can be got from one scoopful of coal properly applied is something for serious consideration, and will eventually result in the fireman's ability, rather than his seniority, being the cause for his being selected for important runs or promotion. In going into the fuel question, I find I have gone a little outside of the terminal switch, but the importance attached to this particular item, and what it is possible to accomplish by constantly keeping before all concerned what this account means to a company, is the only excuse I have to offer.

I would also beg leave to touch on the importance for the necessity of friendly co-operation between the two departments responsible for the handling of terminal traffic. I feel satisfied that a hearty co-operation of the trainmaster and the locomotive foreman, at the terminal with which they are together identified, would make a freight blockade next to impossible, and this combination along with proper equipment, efficient help, and intelligent supervision, are, in my opinion, what may be considered as the essential factors required for successful locomotive dispatching.

The foregoing paper was read before the Canadian Railway Club recently.

Telephone Dispatching on the C.P.R.— Our September issue contained a paragraph stating that during August the equipment of several telephone circuits was completed on the C.P.R. system, among others one from White River to Fort William, Ont., 251 miles, and that the same had been placed in use for dispatching trains. A C.P.R. official at Fort William informed us that this was not quite correct, and stated that between White River and Fort William the dispatching was being carried on by telegraph, but that telephone wires had been strung, so that in case of an accident on the line, engineers or conductors could attach a telephone to the wires and get into touch with the dispatcher. We were officially advised Oct. 2 that the item referred to in our September issue was practically correct; that trains were being handled by telephone between White River and Pearl, the latter point being 215.2 miles west of White River and only 28.5 miles east of Fort William, and that the balance of the line to Fort William would be dispatched by telephone within a short time.

Railways Lands Patented. — Letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta and British Columbia, were issued during July, as follows:—

	Acres.
Canadian Northern Ry.	1,247.01
Canadian Pacific Ry. grants ..	161.00
	1,408.01

The board of conciliation appointed to enquire into points at issue between the Government Railways Managing Board and the Intercolonial Ry. roundhouse employes at Halifax, N.S., consists of Sir George Garneau, Chairman; J. H. Gilmour, Brockville, and A. C. R. Mosher, Halifax.

J. S. Dennis, Assistant to the Second Vice President C.P.R., speaking in reference to the Company's Bow River irrigation project, stated recently, that at the close of 1908, 1,150 miles of canals and ditches were completed, and during this year, 500 additional miles would be completed, making a total of 1,650 miles of waterways in the western section, and providing water for 350,000 acres. The surveys indicate that about the same amount of canals and ditches will be required for each of the other sections, so that when the scheme is fully completed, there will be about 5,000 miles of waterways, constructed at a total estimated cost of $9,000,000.

November Birthdays.

Many happy returns of the day to—

J. O. Apps, General Baggage Agent C.P.R., Montreal, born at Tara, Ont., Nov. 9, 1877.

A. B. Atwater, Assistant to Second Vice President and General Manager G.T.R., for lines west of Detroit and St. Clair Rivers, Detroit, Mich., born at Sheffield, Ohio, Nov., 1845.

W. F. Brougham, Local Right-of-Way and Lease Agent C.P.R., Vancouver, B.C., born in Westmoreland, Eng., Nov. 25, 1865.

G. B. Burchell, General Manager Maritime Coal, Ry. and Power Co., Joggins Mines, N.S., born at Sydney, N.S., Nov. 1, 1877.

M. J. Butler, C.M.G., Deputy Minister of Railways and Canals, Ottawa, born at Deseronto, Ont., Nov., 19, 1856.

J. R. Cameron, General Superintendent Canadian Northern Ry., Winnipeg, born at Truro, N.S., Nov. 5, 1865.

L. D. Chetham, City Ticket Agent C.P.R., and District Passenger Agent Esquimalt and Nanaimo Ry., Victoria, born at Matlock, Eng., Nov. 5, 1869.

F. H. Clendenning, Assistant General Freight Agent C.P.R., Pacific Division, Vancouver, B.C., born at Montreal, Nov. 9, 1881.

F. Conway, acting General Superintendent Kingston and Pembroke Ry., Kingston, Ont., born at Ernestown, Ont., Nov. 19, 1850.

C. W. Cooper, Assistant General Passenger Agent Canadian Northern Ry., Winnipeg, Man., born at Montreal, Que., Nov. 16, 1868.

W. L. Creighton, Advertising Agent Intercolonial Ry., Moncton, N.B., born at Derby, Eng., Nov. 9, 1871.

W. Cuthbert, Fuel and Tie Agent G.T.R., Montreal, born at Longueuil, Que., Nov. 9, 1856.

W. Downie, General Superintendent C.P.R. Atlantic Division, St. John, N.B., born at Rock Currie, Ireland, Nov. 12, 1850.

Jos. Dubrule, Jr., Manager Canadian Pacific Car and Passenger Transfer Co., Prescott, Ont., born at Spencerville, Ont., Nov. 14, 1872.

Grant Hall, Superintendent Motive Power, C.P.R. Western Lines, Winnipeg, born at Montreal, Nov., 1863.

C. R. Hosmer, director C.P.R., born at Coteau Landing, Que., Nov. 12, 1851.

J. McGillvray, Superintendent Inverness Ry. and Coal Co.'s lines, Inverness, N.S., born at Nairn, Scotland, Nov. 13, 1867.

T. E. Martin, Local Freight Agent, C.P.R., Quebec, Que., born at Beauharnois, Que., Nov. 23, 1852.

C. Murphy, General Superintendent Eastern Division C.P.R., Montreal, born at Prescott, Ont., Nov. 20, 1865.

F. Nicholls, Vice President Toronto Ry., director Canadian Northern Ry., born in England, Nov. 23, 1856.

H. P. Sharpe, General Agent Dominion Express Co., Toronto, born at Brockville, Ont., Nov. 24, 1864.

G. H. Shaw, Traffic Manager Canadian Northern Ry., Winnipeg, Man., born at Smith's Falls, Ont., Nov. 25, 1859.

J. S. Sheppard, Contracting Freight Agent C.N.R., Winnipeg, born at Teeswater, Ont., Nov. 27, 1881.

F. M. Spaidal, General Superintendent Canadian Northern Quebec Ry., and Quebec and Lake St. John Ry., Quebec, born at Gananoque, Ont., Nov. 13, 1858.

J. Sparks, Assistant General Baggage Agent C.P.R. Western Lines, Winnipeg, Man., born in London, Eng., Nov. 25, 1874.

H. P. Timmerman, Industrial Commissioner C.P.R. Eastern Lines, Montreal, born at Odessa, Ont., Nov. 6, 1856.

H. E. Whittenberger, Superintendent Eastern Division G.T.R., Montreal, born at Peru, Ind., Nov. 9, 1864.

Saunders Corrugated Car Stopper

Stops cars without damage **Simple and easily installed**

Cost of maintenance very low

As shown in the illustration, this device is installed at the end of the track and is designed to take the place of the Rigid Bumping Post. It consists of ten heavy steel corrugated castings set securely on timbers and when in place is sixteen feet long. It is very serviceable and requires no special attention when installed.

LET US SEND YOU FULL PARTICULARS

One bad accident caused by cars hitting a Rigid Bumping Post while running at a high rate of speed will cost as much as it would to equip all the dangerous tracks in the average sized yard.

FOR SALE

SECOND HAND

Steam Shovel Plant

We have the following plant to dispose of immediately, subject to inspection and acceptance before shipment and subject to prior sale:

1 "Marion" Steam Shovel, Model 50, 2 cu. yd. dipper capacity, wt. 60 tons

20 "Kilbourne & Jacobs" Standard Double Dump Cars, 6 cu. yd. capacity, steel underframe, standard gauge

2 "Davenport" Saddle Tank Locomotives, cyls. 10 in. x 16 in. wt. 18 tons

The above plant was purchased new last May and is in perfect condition. Full particulars and prices upon request.

F·H·Hopkins & Co SUCCESSOR LATE JAMES COOPER **Montreal**

The Lethbridge Viaduct on the Canadian Pacific Railway

By J. E. Schwitzer, Assistant Chief Engineer, C.P.R. Western Lines.

The C.P.R. Crow's Nest Pass line branches off the main trans-continental road at Coleridge, 7.1 miles east of Medicine Hat, Alta., and parallels it through the mountains a hundred miles to the south, to give easy access from the east to the rich mining regions of Southern British Columbia.

The old line between Lethbridge Junction and MacLeod is 37 miles in length, the distance from Lethbridge, which is situated on a spur track, to Lethbridge Junction is 1.5 miles, the total distance from Lethbridge to MacLeod being 38.5 miles. The old line is constructed with curves as sharp as 7 degs. (819 ft. radius) and with a grade of actual 1% (52.8 ft. per mile), no compensation being allowed for curvature, so that in the estimates for new location the ruling gradient on this line was calculated to be equal to a virtual 1.2% grade (63.4 ft. per mile).

On the old line, which was constructed in 1897 and 1898, are the following wooden deck bridges:—

Bridge.	Length.	Height from ground to base of rail.
108.7	406 ft.	110 ft.
112.2	476	105
112.4	420	94
112.8	463	87
113.1	674	67
113.5	503	102
113.8	403	77
114	569	84
114.3	569	74
114.8	473	62
115.2	317	41
115.6	419	39
116	2933	65
117.5	707	117
119.6	449	73
120	567	117
120.2	313	53
121.1	629	113
131.8	755	24
132.5	16	9

A total of 20 bridges, with a total length of 12,063 ft., or 2.8 miles, 1,450 ft. of this length being Howe Truss spans, varying in length from 100 to 150 ft. In the majority of cases these bridges cross streams and ravines with very steep-cut banks, which, on account of the nature of the soil, require constant watching, especially in the spring and during high water. The worst of these crossings are those at St. Mary's and Belly Rivers. On account of the life of these bridges being very nearly expired, they would require, during the present year, heavy repairs, or practically rebuilding. The estimated cost of permanent bridges to replace these wooden bridges is $1,065,000. Owing to the necessity of rebuilding these bridges, and to the rapid increase of traffic, and the fact that the original charter for the Crow's Nest branch required the construction of a line to start from Lethbridge, it was therefore decided to have surveys made and ascertain if it were possible to secure a low-grade line with better alignment. With this object in view extensive surveys were made in 1904 and 1905, the line which was finally adopted giving a maximum virtual grade of fourth-tenths of 1% (21.12 ft. per mile) with a maximum curvature of 3 deg. (1910 ft. radius).

PORTION OF LETHBRIDGE VIADUCT, C.P.R. FROM THE NORTHEAST.

As already noted, the town of Lethbridge is on a spur track of the Crow's Nest Pass Ry., 1.5 miles long, which necessitates practically all trains running into Lethbridge and backing out, being a loss of 3 miles, which will be saved when the new line is placed in operation. The saving effected by the new location as compared with the old is as follows:—5.26 miles of line, 1735 deg. less curvature, 37 fewer curves, and 401.5 ft. less rise and fall, besides securing the 0.4% grade, as compared with a virtual 1.2% on the old line. These changes should so reduce operating expenses that the saving with an increase of 20% in traffic above what it was last year would pay an interest at the rate of 4% on an investment of $3,625,000, besides which it would cost to replace the old bridges with permanent structures, $1,065,000. The total capital expenditure which would therefore be justified would be $4,690,000, while the estimated cost of the change of the line is $2,048,700. On this new line there are only two bridges, both large viaducts, one over the Belly River at Lethbridge, 5,327.6 ft long, with a maximum height of 314 ft. from the bed of the river. This viaduct is the subject of this article. The second bridge, over the Old Man River, is 1,900 ft. long and 146 ft. in height from the bed of the river.

The east end of the viaduct is 3,800 ft. west of Lethbridge station, being somewhat west of the centre of the town. Lethbridge is the centre of a large irrigation tract and of an important coal-mining district, is a divisional point of the C.P.R. Crow's Nest branch and the Alberta Railway and Irrigation Co., and has a population of about 6,000. It is located in the province of Alberta, 759 miles west of Winnipeg, 2,174 miles west of Montreal, and is the centre of a rapidly developing territory.

The site of the bridge is the best for a high-level crossing in the immediate vicinity of the town. The slopes are fairly uniform for a distance of 1,000 ft. from the prairie level, then drop more abruptly for 800 ft. to the flat, which is flooded in extreme high water, then runs on an approximate level for a distance of 1,800 ft. to the edge of the river, which is 300 ft. wide. On the west side of the river it rises rapidly to prairie level in a distance of 1,300 ft. On the east bank the soil is clay and gravel for about 6 ft. from the surface, then 50 ft. of hard clay, 12 ft. to 20 ft. of coarse gravel, and below this shale and coal. In the bed of the river there is about 20 ft. of gravel, then 20 ft. of coal-shale, below that 2 ft. of blue clay, then a hard shale for a distance of 16 to 18 ft., below which is hardpan and sandstone. The west side is of somewhat similar formation, but the bank has been eroded, causing it to cave in at several points, which makes it necessary to do extensive work in order to secure proper foundations for the bridge. The alignment of the bridge is a tangent throughout, there being a 1 deg. curve at the east approach of the bridge, and a 3 deg. curve at the west approach; the grade is 0.4% rising to the west for the whole length of the bridge. On the east side of the bridge there are some old mine workings which followed a vein of coal 7 ft. thick which was worked out in 1888 to 1890. This vein of coal was practically horizontal and level with the flat at the river, varying from 25 ft. at bent no. 23 to 150 ft. below the surface at the east end of the bridge.

The work of finally laying out the centre line and locating the position of the pedestals for the viaduct was commenced during the first week of Dec., 1907. The contract for the excavation and substructure of the bridge was awarded to J. Gunn and Sons, of Winnipeg, the work to be completed by March 1, 1908. The excavation work was started in Oct., 1907, and the concreting was commenced in Nov., 1907, and carried

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

shovel, the material being raised by bucket and derrick. Three centrifugal pumps were required to keep the foundations dry, excavations were made to hard shale, and drillings made to a further depth of at least 20 ft. to make sure there was no change of formation. In three of the piers it was found that the pumps could not hold the water down long enough to erect the forms, and it was therefore necessary to have the bottoms carefully cleaned by divers before concrete was deposited; 4 ft. of concrete was placed in the bottom, the full size of the caisson, and allowed to set. The caisson was then pumped out and the balance of the pier finished as usual. On account of the steep side hill special pile-drivers had to be made for driving concrete piles. Owing to the nature of the west slope all foundations were carried down to such a depth that if the ground takes a natural slope, the foundations will be well below it, besides which the ground in the immediate vicinity of the piers was sloped. In addition to this, in order to keep water away from the west bank a reinforced concrete retaining wall has been built. This concrete wall is built strong enough to withstand the pressure of saturated quicksand. This was adopted altogether as a precautionary measure. In addition to this piles were driven up-stream from the piers on the flat to catch any drift-wood which might come down in the flood and lodge in the steel-work, and it is further intended that booms will be anchored up-stream in the river which will deflect any debris through the 100-ft. openings.

Numerous preliminary studies were made in connection with this structure, and the design finally decided upon consists of 44 plate girder spans 67 ft. 1 in. long, 22 plate girder spans 98 ft. 10 in. long, and one riveted deck lattice truss span 107 ft. long, carried on 33 rigidly braced riveted steel towers. The distance

centre to centre of towers in each column was made 67 ft. 3 in., and the distance centre to centre of columns in adjacent towers 100 ft. The tower spans were made 67 ft. long, in order to give longitudinal stiffness to the towers, and reduce stresses in the tower legs. A batter of 1 in 6 was given to the legs, which, with the spacing of the girders of the spans at 16-ft. centres, gives ample spread at the base of the towers to keep the uplift at the piers within a reasonable amount; 100-ft. intermediate spans between towers were decided on for that portion of the structure over 125 ft. high, these spans being the longest thought feasible to handle, from an erection standpoint, although theoretical economy would call for still longer intermediate spans. On account of the severe winds experienced in this region, and considering the great height of the structure, it was decided to use through plate girder spans instead of decks on this viaduct, so as to render it practically impossible for cars to leave the deck from derailment or wind, and give greater security to the viaduct, since a derailed car might fall, and knock out tower legs and bracing, on account of the great batter of the bents, and cause great delay to traffic. This type of span has since been adopted for a similar high viaduct in New Brunswick.

In order to take care of the uplift from wind the columns were securely anchored to piers by means of four 2½-in. diameter bolts built into the piers to such a depth as to engage a mass of masonry weighing 1½ times the uplift. Special steel castings were designed to secure the bases of these columns to the anchor-bolts, and between the shoe-plate and bed-plate the C.P.R. standard disc-bearing was used, so as to provide for proper bearing in the event of the masonry not being absolutely level. Contraction at the base of the towers was taken care of by fixing one corner and allowing the other three corners to slide on the bed-plates. This was arranged by making 5-in. holes in the steel casting, shoe and disc-plates. At the fixed corner a hollow cast-iron cylinder was placed around the bolt, filling up the hole. At the other three corners, where movement takes place, a piece of steam-pipe was placed around the bolts, having a length of about ⅛-in. greater than the distance from the top of the bed-plate to the top of the steel casting, so as to allow the

LETHBRIDGE VIADUCT, C.P.R.; RIVER BENTS.

LETHBRIDGE VIADUCT, C.P.R.; SHOWING METHOD OF TRESTLES RISING WEST BANK.

washer of the anchor-bolt to bear tight on this filler, which in turn, bears on the bed-plate, and allows sufficient slack between the underside of the washer-plate and the steel casting for the latter to move. Dry graphite was placed in the recess of the bed-plates in which the disc-plates rested, to act as a lubricant. Tongues were made on the bed-plates at two corners of the towers, and the fourth bed-plate was made without any tongue, with the idea of its moving in a diagonal direction.

At the western end of the bridge a high cut bank of hard clay had to be crossed, and although this bank was cut down to a slope of 1½ to 1, it was considered inadvisable to place pedestals on it, and it therefore became necessary to span this with a deck lattice truss span 167 feet long. The top chords of this span had to be built of special design in order to carry the heavy erection traveller, which will be referred to later on, and to give the effect of through plate-girders as viewed from the bridge floor; the bottom of these chords being at rail-level, while the top is flush with the top flanges of adjacent plate-girder spans.

As will be seen from the sheet of typical details, the columns are of very liberal dimensions, the bottom sections being composed of six angles, two web-plates 25 in. wide, one cover-plate 26 in. wide, in addition to two 6-in. plates placed in the inside of the columns. Longitudinal and transverse bracing is composed of angles laced together, the diagonal bracing being figured for tension only, and struts composed of channels placed back to back and latticed, are used to take compression stresses. Long struts are supported in the centre. The use of double triangular type of bracing (without the horizontal struts) was considered, but was not used because of the great length of compression diagonals.

Details are also shown of the bearing of the spans on column caps, consisting of steel keys set in slots in the cap of the column and riveted to the girder shoe. In the fixed end the key is a neat fit in the groove of the column cap, but in the expansion end the key is made narrow so as to provide clearance on either side for movement of key in the slot. The underside of these keys are bevelled at the edges to provide against their binding in the cap-plates. Detail is also shown of the shore end of the flanking spans which shows how the top flanges are curved.

A material yard was located a short distance east of the eastern end of the bridge, over which was erected a travelling crane, consisting of a standard 125-ft. highway span, provided with end wheels, two of which at each end are connected up by gearing and shafting to standard two-drum hoisting-engine, thus providing for its travelling along the runway. Each end of the crane is provided with a 5-ton 42-ft boom derrick commanding the additional storage area of 40 ft. wide by the length of the runway for the storage of lighter class of material, the main area between the crane and the runways being utilized for the storage of girders and heavy columns. The length of crane runway is 240 ft., and the height 37½ ft. For lifting 100-ft. girders, which weigh about 30 tons each, two sets of three-sheave steel blocks rigged with ⅝-in line were provided, with a capacity of 17 tons each, connected up to a standard double-drum hoisting-engine. Turning of the 100-ft. girders end for end is provided for by hooks and beams arranged to swivel on the centre floor beam of a 125-ft. crane, such arrangement being desirable in the event of girders reaching the work wrong end first. For the purpose of transporting material from the storage yard to the front the contractor is provided with constant use of locomotive and ten flat cars. To facilitate the work of erection a regular programme for the loading of material was arranged. A pair of 100-ft. girders, with their accompanying floor-beams and stringers were loaded on two 80,000-lb. capacity 40-ft. long flat cars, the girders being loaded at a height to suit convenient picking up by the erection traveller. The 67-ft 1-in. girders, weighing about 30,000 lbs. each, were loaded in a similar manner. The columns were loaded on flat cars with corbels of convenient height for lifting off by the erection traveller.

The main traveller for the erection of this viaduct is a very ponderous machine, built entirely of steel, except for some minor parts, such as the engine-house and various platforms. (See page 803). It was designed with two principal trusses 207 ft. long, spaced 16 ft. apart centre to centre, to suit the spacing of the main girders of the viaduct spans. The cantilever portion of the trusses

have a reach of 116 ft., the balancing portion of the trusses being 91 ft. long. The rear end of each balancing truss is carried on a truck with two 24-in. cast-steel wheels, and the forward end is supported on four similar wheels. The rear end of the traveller is counterweighted with 46 tons of steel rails, in addition to the weight of the engine-house, platforms, and hoisting machinery contained thereon. The traveller runs on 80-lb. rails on oak planking along the top flange of the girders, the rails and oak planking being bolted together in sections, so as to facilitate its placing and removal with each movement of the traveller. The weight of the traveller in working condition is 712,000 lbs. The clearance under the deck of the traveller was made sufficient to permit the running of flat cars loaded with girders under it. The strains of the traveller were carefully calculated, special attention being paid to the matter of wind stresses on account of the very high winds certain to occur during the time of erection, which was estimated to be one year. A stress sheet was made up on the expectation that it might be necessary to carry the entire weight of the bottom storey of the bent suspended from the end of the traveller, which would make a total load of 90,000 lbs. at the end of the traveller. This estimation was due to the expectation of assembling such bottom storey flat on the ground and then lifting it vertically into position on the piers. This method was later abandoned in favor of placing each item in the bent directly in its final position. To carry out this latter plan it was found desirable to suspend an assembling cage from the end of the traveller.

The erection traveller is hung with four trolleys hung on two trucks 8 ft. apart centre to centre, which trucks extend the whole length of the traveller arm and about two-thirds of the balancing arm. All the material is taken directly from flat cars run under the rear end of the traveller and handled by these trolleys, each one of which is provided with a 40-ton hydraulic jack of 18-in stroke, these jacks being used to lift the girders from the cars, as it was undesirable to set the traveller high enough to give head room for block and tackle for this purpose. Girders were run out on flat cars under the traveller, and when transferred to these trolleys they were pulled forward on to the cantilever-arm of the traveller until in a proper position for lowering into place. Lighter material, such as longitudinal bracing, was lowered direct to the ground by wire-rope tackles, and raised to position in the structure by special 85-ft. swinging booms of 5 tons capacity each, attached to the traveller. In erecting the bents the traveller was moved to position to bring the hoisting tackle at the end of the traveller directly over the centre line of the bent to be erected, the overhang of the traveller being sufficient to span the maximum space of 100 ft. made by the length of the intermediate girder span.

On completion of the lower storey of a bent supporting 100-ft. spans its top was braced back to previously-completed work by an erection strut, and similar struts were placed at each storey of the bent as it was erected, and when the bent was completed the 100-ft span was put in place, the traveller moved forward, and the remainder of the tower completed, and the tower-span put in place. All of the transverse connections and splices requiring to be field-bolted were rendered readily accessible to the workmen by means of a cage suspended from the end of the traveller. On this erection traveller were placed six hoisting-engines, and a system of telephones was installed to establish communication between the men engaged in erecting material and those in charge of the hoisting-engines. The riveting of this bridge was carried on as quickly as possible after the material was put in place, and a separate traveller was used for this purpose, moving along the same track as the erection traveller. The riveting traveller was built of timber, and high enough to permit of the passage of loaded flat cars beneath it. Riveting platforms were suspended on the sides from this traveller. All the riveting was done by pneumatic hammers. Compressed air of 100-lb. pressure was piped out on the bridge from an air-compressor plant placed on the ground near the Lethbridge abutment.

LETHBRIDGE VIADUCT, C.P.R.; VIEW FROM NORTHWEST, MAY 27, 1909.

LETHBRIDGE VIADUCT, C.P.R.; NEAR VIEW OF ERECTING TRESTLE.

The raising of steel began about Aug. 15, 1908, and a good deal of time was lost during the winter months on account of extremely cold weather, and two weeks in Feb. on account of a strike of workmen. During March, 1909, bents 37-46 inclusive were completely erected, comprising a tonnage handled during that month of 2,300 tons and about 735 lineal feet of structure. A serious accident was averted because of the through-girder construction: a heavy derrick-car handling some heavy material was accidentally tipped over, but was restrained from falling by the through girders. The 167-ft. span over the west bank was erected in the usual manner by falsework. The last girder was placed June 22, 1909, the riveting being completed Aug. 9, 1909.

The quantities in the structure are approximately as follows:—dry excavation, 18,110 cubic yards; wet excavation, 4,870 cubic yards; concrete, 17,080 cubic yards; concrete piling, 1,676 piles; riprap, 339 cubic yards; steel, 12,200 tons. It required 645 cars to transport the steel actually used in the erection of the bridge to the bridge site. Contractor's plant amounted about 40 cars, tie and guard rail 53 cars, besides which there would be an additional number of cars for coal used on the work, which would make the total about 900 cars. It is estimated that in order to give the bridge two coats of paint about 7,600 gallons will be required.

Makers of Base Supported Rail Joints for Standard and Special Rail Sections, also Girder, Step or Compromise, Frog and Switch, and Insulating Rail Joints, protected by Patents.

Throughout the work careful records were kept of all measurements, triangulations, and all other work, the notebooks being carefully indexed. In addition to this, weather records were kept, together with notes as to the wind, as on many occasions the wind was so strong that the men could not work on the erection of the bridge. In addition to this, records were kept showing progress of work. These were sent into the head office twice a month in order that a check might be kept.

During high water a new channel was formed about 300 ft. east of the old one, and considerable gravel was carried down and deposited in the vicinity of the bridge.

The bridge was designed by the C.P.R. bridge department at Montreal, while the field work was carried out under the direction of the Assistant Chief Engineer, Western Lines, Winnipeg.

The manufacture, designing of erection equipment, and erection of the steelwork were carried out in a most efficient manner by the Canadian Bridge Co. of Walkerville, Ont., contractors for superstructure. C. F. Prettie had direct charge for the bridge company in the field, and had a gang of about 100 men.

Locomotive Counterbalancing.

By H. H. Vaughan, Assistant to Vice President C.P.R.

The counterbalancing of locomotive engines is one of the few problems in connection with that apparently simple yet exceedingly complex machine which is capable of an exact theoretical determination. When the weights, locations, and movements of the various parts of an engine are known, it is possible to calculate accurately the forces which they cause at any speed of rotation, and apart from some practical considerations, such as the engine being constricted in its lateral movements by the wheels which support and guide it on the rails, and the fact that it is connected in a more or less imperfect way with a tender the movements which result from the action of these forces can also be exactly ascertained; this subject has consequently been very thoroughly treated by a number of writers, and I shall therefore endeavor to discuss, as shortly as possible, the theoretical principles which underlie it.

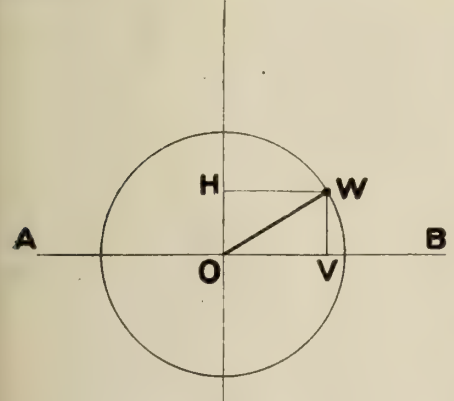

FIG. 1

The disturbing forces which necessitate the counterbalancing of any reciprocating engine are those required to start and stop the mass of the reciprocating parts at each end of the stroke; neglecting the disturbance caused by the obliquity of the connecting rod, which is unnecessary to consider in any existing type of locomotive, these forces are identical with that caused by a corresponding mass at the crank pin, with the exception that they have no vertical effect.

In fig. 1 let the weight W be rotating round the centre O, at a velocity of V feet per second; then what is known as the centrifugal force, which is really the force that is required to make W move in a curved line instead of in a straight line, as it would do if left to itself, acts along the line W O and equals $\frac{W\ V^2}{32.2r}$ when r is the radius in feet. This force W O can be resolved into two components W H and W V, the first acting entirely in a horizontal, and the other in a vertical direction; it will be seen that when W is on the vertical diameter W H is nothing, while W V equals W O, and when it is on the horizontal diameter W H equals W O while W V is nothing. Now, if the weight W moved backwards and forwards along the horizontal line A B in such a way that its position on that line was always vertically under or over the position of W when rotating uniformly around the centre O, the force necessary to accelerate or retard it is always W H, or, in other words, equals the horizontal component of the centrifugal force due to an equal weight rotating in a circle. This is what happens in the case of a weight such as a piston and crosshead actuated in a horizontal line by a connecting rod, as in fig. 2; here the distance of the weight P from the centre of the stroke corresponds with the horizontal distance of the crank pin C from the centre O and the force accelerating or retarding it is equal to C H when C O equals the centrifugal force which P would exert if moving on the path of C.

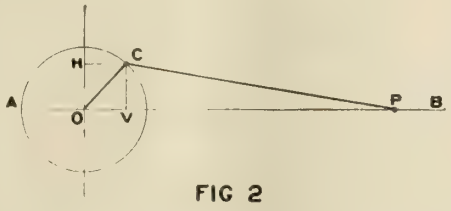

FIG 2

Since P in this case is moving entirely in a horizontal plane, it gives rise to no vertical forces whatever, and it is this fact that introduces all the difficulties in connection with balancing an engine; before, however, discussing that question, the connecting rod must be referred to. It is evident that this has at one end a circular, and at the other a reciprocating movement, while between the ends, the motion of any part is of intermediate nature; the result is the same as though part of its weight were concentrated at the crank pins and had a circular motion, while the remainder was concentrated at the crosshead and had a reciprocating motion.

In a paper read before the Northwest Railway Club, in 1893, I suggested that four-fifths of the weight of the back end should be taken at the crank pin, and the weight of the front end and one-fifth of the back end at the crosshead, figures that were obtained by calculations from two or three types of rod; this question was, however, treated in an exceedingly ingenious and scientific way in a paper read before the New York Railway Club, by R. A. Parke. He developed an accurate method for obtaining the exact division of weights for any rod, and his results showed for modern types of rod that five-sixths of the weight of the back end of the rod should be considered as concentrated at the crank pin with reasonable accuracy. I would refer anyone interested in this subject to his paper, as it is a most interesting example of the application of a really difficult mathematical analysis, by which an absolutely simple method is deduced for obtaining correct results. I consider however, for practical purposes, that five-sixths of the weight of the back end is sufficiently accurate, and that figure is used on the C.P.R. There is one more elementary statement to make, namely, that a weight of W pounds at a radius 2r has the same effect as a weight of 2W pounds at a radius r; this follows immediately from the value of the centrifugal force $\frac{M\ V^2}{32.2r}$ for with the same number of revolutions V is proportional to r, so that for equal forces Mr must be a constant. For simplicity, therefore, all balance weights will be assumed to be placed at the same distance from the centre as the crank pin.

With these facts in mind, let fig. 3 represent an ordinary engine, and let all the rotating weights be concentrated at the crank pin W, say 1000 lbs.; let the reciprocating weights be concentrated at the crosshead at P, say 1500 lbs. The rotating weight can be balanced by a weight of 1000 lbs. placed at C, diametrically opposite W on the other side of the centre; evidently, whatever be the position of the crank, the forces caused by the two weights are equal and opposite, and there is no resulting force to disturb the axle at O. When, however, attempting to balance the 1500 lbs. at P, by placing 1500 lbs. at C, the condition is entirely different; the horizontal forces caused by the movement of P are exactly equal and opposite to those caused by the 1500 lbs. at C, but as no vertical forces are caused by P's movement, the vertical forces caused by the movement of the 1500 lbs. at C are left entirely unbalanced, and the effect is the same as though a weight of 1500 lbs. at C were entirely unbalanced vertically. Whatever weight then is introduced at C to balance the horizontal forces caused by P, causes vertical forces equal in amount to the extent by which those due to P are reduced; there is no possible combination by which this can be avoided, except by using crank pins that are not at right angles to each other.

For instance, if there were a crank pin at C and a connecting rod as shown by the dotted line C L, then if the weights at L and P were in substantially the same plane and equal, they would practically balance each other, as is the case with four-cylinder engines, which can be almost perfectly balanced without introducing any vertical forces, while three-cylinder engines can be balanced longitudinally but are, with respect to nosing, almost in the same class as two-cylinder engines. The latter are the engines now under consideration, and in their case the question of counterbalancing is a compromise. If P is left unbalanced the engine is said to be badly balanced, if P is completely balanced

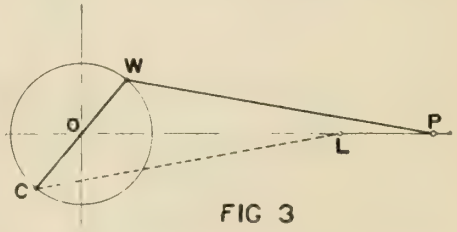

FIG 3

the engine is said to be well balanced, but vertical forces are introduced which certainly may be injurious to track or bridges.

The extent of the force due to any unbalanced weight may be calculated at any speed, but is usually taken at 40 times the weight when the speed in miles per hour is equal to the diameter of drivers in inches; it really varies with the stroke, and the exact figures are 38.5 for a 24" stroke, 41.7 for a 26", and 44.9 for a 28"; taking 40 for an approxi-

mate figure, 500 lbs. at C above that required to balance the rotating weights, or as it is termed, "as overbalance," means a force of 20,000 lbs. acting upwards and downwards at each revolution, and while this seems a high figure, it is occasionally found. The speed of 69 miles per hour is high for a 69" wheel, but it represents a possible condition, and it must be remembered that while the factor of 40 is not reached until that speed for that size of wheel, that it increases with the square of the speed, so that it is not advisable to consider a lower speed. Evidently, then, it is desirable to keep the overbalance as small as possible, and yet on the other hand the reciprocating parts must be partially balanced for the comfort of the men and the various rules of the counterbalancing have really indicated the nature of the compromise.

The rule most commonly used in America has been that recommended by the committee on the subject at the M.M. convention in 1882, in which two-thirds of the reciprocating parts are balanced; this compromise has, on the whole, given very satisfactory results, and constituted a great advance on one of the methods given as an answer to the inquiry made by the committee, which was "to figure a little and then guess at it." The two-thirds rule, however, is not necessarily satisfactory; it proves so in the majority of cases, because the relations between the weight on drivers, weight of engine, and reciprocating parts do not vary greatly in engines of ordinary types but the first great advance was made when G. R. Henderson, in a report made to the Norfolk and Western Ry., in 1895, pointed out that the allowable weight of unbalanced reciprocating parts was a factor of the weight of the engine. Assuming only, that the maximum speed is proportional to the diameter of the drivers, and that it is desired to construct engines that will be reasonably comfortable for the men at that speed; in other words, that will vibrate to the same amount, then evidently the disturbing forces, or the weights of the unbalanced parts, may vary in direct proportion to the weight of the engine. Mr. Henderson showed that engines in which $\frac{1}{400}$ of the weight of the engine was unbalanced rode satisfactorily, and that $\frac{1}{360}$ can be left unbalanced without objectionable vibration; we have then in this rule a scientific method of determining the weight of reciprocating parts that may be left unbalanced and yet allow the engine to ride reasonably well, which is applicable to engines of widely varying types; for instance, if two engines were of the same weight, but one had reciprocating parts weighing twice as much as those on the other, this rule would allow the same weight to remain unbalanced; in other words, both engines would ride equally well, whereas with the old two-thirds rule one engine would have twice as much unbalanced weight as the other.

So far as the action of the engine is concerned, there is, I consider, no criticism possible that can be made of this rule; in other words, an engine balanced by it is certain to ride satisfactorily, but in balancing an engine there is another and very important aspect of the matter which it ignores, namely, the effect of the overbalance on the track. This side of the question has often been referred to, and its effect discussed in a general way, but so far as I am aware, locomotive builders have never really established any rule limiting its amount, although they have recommended balanced compound engines for the utilization of the weight of the tender, which I shall refer to later. On the other hand, no maintenance of way engineer has, I believe, defined the limit of overbalance which he considers permissible although he will cheerfully advocate none being used; neither is he able, except in extreme cases, to show any definite evidence of damage from this cause. Taking, however, the maximum speed before referred to, an overbalance of 500 lbs. in a wheel carrying 20,000 lbs. causes the pressure between that wheel and the rail to vary from 40,000 lbs. when the overbalance is down to nothing when it is up, and any greater overbalance would tend to lift the wheel from the rail.

Testing plant experiments show that when the calculated effect of the overbalance exceeds the weight on the wheel that it does actually leave the rail, and that there is a definite blow when it strikes again. I have analyzed this action, and have shown that this blow may, in extreme cases, be severe and sufficient to account for the damage that is occasionally met with; on the other hand, I do not believe that any case of repeated bending of rails has occurred in which the vertical effect of the overbalance did not considerably exceed the weight on the wheel. It is, however, only reasonable to acknowledge that a wheel that presses alternately nothing, and 40,000 lbs. on the rail, is going to affect the track more than one which presses down continuously with 20,000 lbs. It will damage more defective rails, cause more injury to tracks, and may, in weather when the rail is unevenly supported, be the cause of rail breakages. From the track point of view, therefore, the less the overbalance the better, and the problem of the locomotive engineer is to determine to what extent it can possibly be reduced. To discuss this I must refer more in detail to the action of the unbalanced weights on the engine.

In fig. 4 let P_1, P_2, be the right and left cross heads respectively, C_1, C_2, the crank pins, and O_1, O_2, the overbalances;

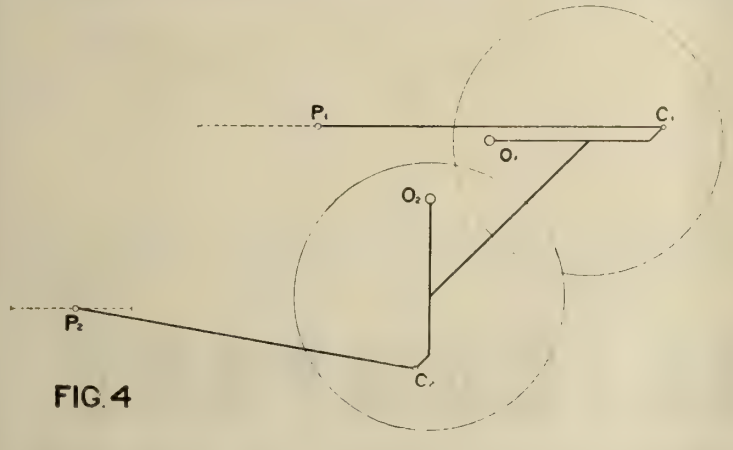

FIG. 4

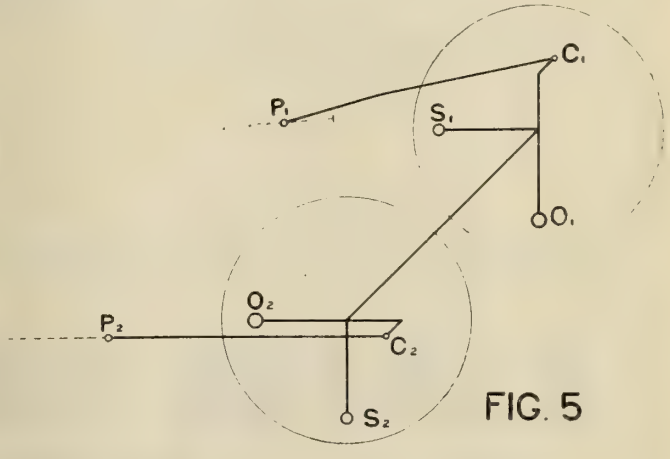

FIG. 5

as C_2 and O_2 are in the middle of the stroke they have no horizontal effect, and there is a longitudinal force equal to P_1—O_1 tending to drive the right side of the engine backward; as P_2 comes to the end of its backward stroke there is a similar force tending to draw the left side of the engine backward, and at that time the effect of P_1 and O_1 is nothing. This action is repeated at the other end of the stroke, so that the action of the unbalanced weight is to drive the engine backwards and forwards as a whole, and also to cause the ends of it to vibrate transversely; or, as it is usually called, "make it nose."

There are then two distinct actions of the unbalanced weight in an engine, which I will call the longitudinal and transverse movements; the latter you will agree, I believe, is not generally very noticeable, but on small 8-wheel engines it is objectionable when running at a high rate of speed. Some years ago, when working on this subject, I noticed, as I dare say you have, that on the longer heavier engines, the nosing from unbalanced weights was not noticeable, in a paper before the Northwest Railway Club, in 1896, I advocated a rule in which the unbalanced weight was increased in proportion to the length of the engine as well as to its weight. This rule was defective, as it increased the longitudinal vibrations on a long engine as compared to a shorter one of equal weight, and as the longitudinal vibrations are those which render an engine rough riding, it could not, and no rule could increase the unbalanced weight beyond a certain amount without being objectionable. It is true that engines balanced by it rode satisfactorily, but that was because it started with a short engine with $\frac{1}{400}$ of the weight unbalanced, and on the longest engines it was applied to did not increase the unbalanced weight beyond $\frac{1}{360}$ which is an amount that does not, as a rule, lead to criticism by the men.

Although this rule was not of much practical value, it recognized one point, namely, that the nosing motion was not as important as the longitudinal, and when investigating the counterbalancing of some engines on the C.P.R., in which the counterbalances were offset so as to increase the longitudinal, and decrease the nosing movement it occurred to me that by allowing an increase in the nosing movement, a decrease in the amount of overbalance could be obtained without increasing the longitudinal movements. This can be done by means of off-set counterbalance weights, but as they have a serious objection, the same result can be obtained by means of supplementary counterbalance weights placed at right angles to the cranks. This arrangement is shown on fig. 5, S_1, S_2, indicating the supplementary counterbalances and the

arrows the direction of the forces. Neglecting the difference in the distances, centre to centre of the balance weights and the pistons, which it is not necessary to consider here, it will be seen that the forces at O_2 and S_1 both tend to drive the engine forwards as against that of P_2 driving it backwards; in place of a force $P_2—O_2$ driving it backward as in fig. 4, the force is, therefore, reduced to $P_2—(O_2+S_1)$ on the other hand, the force $P_2—O_2$ still tends to throw the front of the engine to the right, and it is assisted by S_1. The net result therefore is, an engine that is balanced longitudinally as an engine would be with an overbalance O_2+S_1 and balanced transversely as though its overbalance were $O_2—S_1$. To put this into figures, suppose the engine weighs 160,000 lbs., and the reciprocating parts weigh 1300 lbs. a side; the permissible unbalanced weight at $\frac{1}{400}$ of the weight is 400 lbs., leaving 900 lbs. to be balanced, or 300 lbs. per wheel, if the engine has six drivers; if the weight per wheel is 20,000 lbs., this overbalance is 1.5% of the weight on the wheel, and the variation in pressure at the maximum speed is 12,000 lbs. or 60%.

This would not be an unusual case in fact it would be an ordinarily well-balanced engine. Now, if we place a supplementary balance weight of 100 lbs. on the opposite wheel, and reduce the overbalance to 200 lbs., this 200 lbs., and the 100 lbs. from the other wheel, make up the 300 lbs. to balance the engine longitudinally, but for transverse balance the 100 lbs. has to be deducted from the 200 lbs. overbalance, so that only 100 lbs. is balanced in each wheel, or 300 lbs. altogether. Taking 300 from 1300 leaves 1000 lbs. unbalanced transversely, or $\frac{1}{160}$ of the weight, and we, therefore, have an engine that longitudinally has $\frac{1}{400}$ of its weight unbalanced, but transversely $\frac{1}{160}$ unbalanced. The overbalance has been reduced from 300 to 200, but the reduction in the effect on the track is not quite as great as this; the greatest effect of S_2 and O_2 is not when O_2 is vertical, but it equals $\sqrt{(O_2^2+S_2^2)}$ or, for the two weights in question 222 lbs., a reduction of 78 lbs., or 3120 lbs. at the maximum speed.

I am not entirely prepared to say how far this system can be carried, but from the experiments so far, it would appear that an engine having $\frac{1}{400}$ of its weight unbalanced longitudinally, and entirely unbalanced transversely, is entirely satisfactory as far as its riding qualities are concerned. This would mean that the supplementary balance was equal to the overbalance, and in that case the effect on the track would be 71% of that of an ordinary overbalance giving the same longitudinal effect, and this reduction can be accomplished without detriment to the ordinary qualities of the engine, or without introducing any objectionable troubles. It is true that the nosing must be prevented by the pressure on the hubs of the wheels but against this, it must be remembered, that when balance weights are distributed amongst three or four wheels that the effect of the overbalance on the boxes of all except the main wheels is just the same as it is on the track, and that the steadying effect on the engine is obtained at the expense of wear in the boxes. The wheel base on an engine is so long, compared to the distance from the centre of the engine to the centre of the cylinder, that a very small pressure on the hub is able to overcome a nosing motion much better than a balance weight, and probably with less wear.

We are not, however, leaving engines entirely unbalanced transversely except as an experiment, but are leaving from $\frac{1}{100}$ to $\frac{1}{150}$ of the weight unbalanced transversely, and $\frac{1}{400}$ unbalanced longitudinally with extremely satisfactory results; one passenger engine has been entirely balanced longitudinally and entirely unbalanced transversely. It is reported to be a perfect riding engine, and its balance is exactly the same as a 3-cylinder engine having two outside cranks each at right angles to the inside crank, and otherwise unbalanced, so that it has been shown that an engine of this kind would be entirely satisfactory as far as the balancing is concerned. We are, however, using the system of balancing to reduce the action of the overbalance on the rail, and have adopted a rule to balance the engine so that the overbalance in any one wheel shall not, if possible, exceed 1% of the weight on that wheel and is limited to 1¼%. The latter figure causes a variation of 50% of the weight on the wheel at the maximum speed, and while I have, of course, no accurate information to show that this is the proper limit, it is so much better than on many existing engines, that I feel that it is a sound limit to work to, and we are certain that under no conditions can any hammer blow occur from wheels balanced in this way. So far, no engine has been met with in which it is not possible, by using supplementary balances, to obtain satisfactory results without increasing the overbalance above this amount.

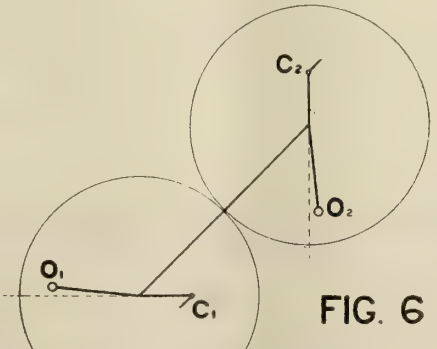

FIG. 6

There are also one or two practical advantages in the system of allowing a greater unbalanced weight transversely. It is possible to properly counterbalance consolidations as the supplementary weights can be placed in the wheels at right angles to the crank, thus overcoming the difficulty experienced of not being able to get sufficient balance opposite the crank without an excessive overbalance in the leaders and trailers. It makes the adjustment of the balance very easy. It is only necessary to cast the main balances 75 or 100 lbs. light, and then place 75, 100, or 125 lbs. in the supplementary balance, as is necessary to keep the longitudinal unbalanced weight down to $\frac{1}{400}$ of the weight of the engine. Extreme accuracy is entirely unnecessary, any engine that has less than $\frac{1}{400}$ unbalanced longitudinally will ride well, and apparently, the transverse balancing is very unimportant. The weights should be checked up to see that the effect of the overbalance and supplementary balance is less than 1¼% of the weight on the wheel, but this is fairly well known from corresponding engines and in the types so far gone into, there has been no case where this figure had to be exceeded. These advantages are, of course, incidental, the chief interest is, I consider, the fact that an engine may be unbalanced transversely to a far greater extent than longitudinally without causing its riding qualities to be objectionable, consequently, the overbalance can be reduced, and its effect on the track maintained within reasonable limits.

I have referred to the utilization of the weight of the tender. This has been done on the Prussian State Railways by coupling the engine with tender so firmly that the weight of the tender assisted in absorbing the longitudinal vibrations. If this could be done the factor of $\frac{1}{400}$ could of course be applied to the total weight of the engine and tender, and I understand that engines have run with the reciprocating parts entirely unbalanced with satisfactory results. We have always found here that when less than $\frac{1}{360}$ was unbalanced, trouble has developed in keeping up the connection between engine and tender, and lost motion has occurred very quickly. I feel that, with our heavy reciprocating parts and hard service, this method is hardly practicable, and it does not afford any hope of being able to avoid some system of balancing for two-cylinder engines.

Before closing, I wish to refer to off-set counterbalances, as it is obvious that the combination of main and supplementary balances I have described is the same as an off-set balance weight; the trouble with the latter is that it cannot be weighed, and must be calculated. Some very serious errors have been introduced by depending on weighing it, especially where it is off-set, to reduce the nosing movement; in fig. 6 let C_1, C_2, be the crank pins, O_1, O_2, the counterbalances (not only the overbalances); when weights are placed on the crank pins at C_1 they do not show the weight of the overbalance at O_1, as in the case with an ordinary balance opposite the crank; suppose the crank pin radius be 12" and the counterbalance O_2 is set 4" off the centre line; evidently the weight at C_1 acting at 12" is helped by that at O_2 acting at 4", and the mistake has been made of thinking this weighed the counterbalance at O_1; it does not begin to. O_1 in addition to balancing the weights at C_1 is balancing the entire weight of the crank pin and hub, and a numerical example will show what happens. Suppose O_1 is also 12" from the centre, and that the weight of the crank pin and hub at C_1 is 500 lbs., and that the counterbalance desired is 400 lbs. Neglecting the fact that O_1 is not quite 12" from the vertical line, it would require 900 lbs. at O_1 to give a counterbalance of 400 lbs. in addition to balancing the weight of the hub; this 900 lbs. would also act at O_2 at a distance of 4" from the centre line, and consequently the weight required at C_1 to balance would be $\frac{900\times12-900\times4}{12}$ or 600 lbs., of which 500 lbs. is supplied by the crank pins and hub, leaving only 100 lbs. actually necessary to balance an overbalance of 400 lbs. Evidently this might easily be very misleading, and the difficulty is that, from the weight on the crank pin the actual overbalance cannot be calculated except by estimating the weight of the crank pin and hub, and knowing the exact off-set of the centre of gravity of the counterbalance. For this reason the arrangement of counterbalance weights directly opposite the pin is far better as they can accurately be weighed and the supplementary balances of known weight afterwards added.

The case of Dunsmuir v. Dunsmuir was recently brought before a judge in chambers at Victoria, when an order was made nominating Mrs. Henry Croft as plaintiff in place of the late Mrs. Dunsmuir. The action is concerned with the Dunsmuir estate, of which the Esquimalt and Nanaimo Ry., and the Wellington collieries formed a part.

Inside Pump Type

Quick Action Hydraulic Jacks

Joyce-Cridland Hydraulic Jacks have a speeding device whereby they can be run quickly up to load, where the speeding device automatically cuts out, leaving only the power pump in action This device adds no extra pump or complicated parts to the jack. These jacks are so built that they may be used in any position and the filling liquid will not escape. The outside pump type has a short barrel, adapting it for use in cramped quarters.

Full description and explanation of the working parts of the Joyce-Cridland Hydraulic Jacks are given in Bulletin 33.

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.

MONADNOCK, CHICAGO

C.P.R. Annual Meeting.

The 28th annual meeting of shareholders was held in Montreal, Oct. 6, Sir Wm. C. Van Horne, Chairman of the Board, presiding. The President, Sir Thos. G. Shaughnessy, in moving the adoption of the report for the year ended June 30, which was published in our Oct. issue, said:

The gross receipts for the year were quite as large as we had reason to expect, but the working expenses were abnormally heavy, due in part, as explained in the annual report, to the additional mileage included in the traffic returns, and in a greater measure to other conditions that could not well be controlled. However, with the abundant crops harvested in almost every section of the territory served by your lines, and the certainty of a very large westbound merchandise traffic, there is reason to anticipate a substantial increase in the total earnings for the current year as well as an improvement in the ratio of working expenses.

In the Annual Report reference is made to the company's land affairs, but more particularly to the success that has attended the irrigation project in the territory east of Calgary. I am sure that the outcome of this great undertaking is a source of satisfaction to the shareholders, as it is to the directors. In this connection you may be interested in knowing that the cash in hand resulting from the sale of lands and townsites has now reached the considerable sum of $14,000,000, and that the deferred payments exceed $18,000,000.

Accompanied by several of the directors I have recently travelled over a considerable portion of the company's lines in Canada and of the subsidiary lines in the U. S., and the information that we gathered, not only as to the physical condition of the properties but as to the progress of settlement and the enlargement of agricultural and business development of every description, was most gratifying. The area of the wheat growing belt served by your lines in Western Canada is steadily increasing and interior elevators for handling grain are now to be found in districts where a few years ago the best informed never expected to see grain produced. The valleys of the Columbia and Kootenay Rivers and the lands tributary to the Okanagan and other lakes in British Columbia are rapidly being converted into orchards, the lumber interests of the mainland and Vancouver Island are becoming of vast importance, and every city and town west of Fort William bears the mark of progress and prosperity. In the commercial and manufacturing centres of Eastern Canada all of this is being reflected in a most pronounced way, as indicated by the business activity and the growth of population in practically all the cities and towns reached by your lines in Ontario, Quebec and the lower provinces. Beyond doubt we are justified in declaring that the agricultural and general business interests of Canada are in splendid shape, and that the outlook for the Company is at this time more reassuring and more promising than ever before.

"The traffic prospects of the Minneapolis, St. Paul & Sault Ste. Marie Ry. are also very satisfactory. Having secured access to Chicago and Milwaukee by the lease of the Wisconsin Central Ry., the Soo Line, in conjunction with this company, has become an important factor in the transcontinental business between these points and the Pacific Coast.

"The sanction of the Governor in Council having been obtained, the shareholders at the special general meeting held a year ago took the necessary action to provide for an increase of the ordinary capital of the company from $150,000,000 to $200,000,000, and the directors were clothed with authority to issue the additional $50,000,000, in such amounts and on such terms, from time to time, according to the requirements of the company, as they might determine. Thus far the directors have not thought it necessary to deal with the subject, but the same conditions that bring enhanced revenue also compel constant and important expenditures for locomotives and cars, for the acquisition or enlargement of terminal grounds and buildings, and more siding accommodation, not only at the important centres but at hundreds of other places on the system, and for desirable additions and improvements of almost every description on different sections of the railway throughout the country. Anticipating these future general requirements, and to meet them as they arise, the directors think it prudent at this time to make provision for the necessary funds by offering to the holders of the ordinary capital stock a portion of the unissued shares. It is proposed that the issue shall be in the proportion of 20% of the shares registered in the name of each individual holder in the books of the company in London, New York and Montreal, on Nov. 15, and the issue price will be 125, or at a premium of 25% over the face value of the shares. The usual practice of having payments made in instalments at intervals of about 60 days will be allowed, and interest at the rate of 6% per annum will be allowed on such payments. After the requisite formal action has been taken by the board, a circular letter dealing with the subject in greater detail will be prepared and mailed to the shareholders."

The resolution was seconded by R. B. Angus, and the report was adopted unanimously.

The following resolutions were also adopted:—That the indenture of lease from the Orford Mountain Ry. to this company, of which a draft is submitted, endorsed by the Secretary for the purpose of identification, be sanctioned and approved, which indenture, among other things, demises to this company for 999 years, the Orford Mountain Ry. as constructed from Eastman to Windsor Mills, together with the branches heretofore constructed, having a total length of about 58½ miles, and all other railways or branches hereafter constructed by that company, and their appurtenances, at an annual rental of a sum equal to the interest payable on all bonds carrying interest at a rate not exceeding 4% per annum, payable half-yearly, which the lessor may issue at the request of this company expressed in writing under its corporate seal, the payment of such interest being guaranteed by this company and the aggregate of all such bonds outstanding not to exceed at any time the rate of $15,000 per mile of railway, then either constructed or under contract to be constructed. And further, the President and Secretary be authorized to execute the said indenture on behalf and under the corporate seal of this company, with verbal changes if any, as they may deem proper,, not altering the substance as above described.

That by-law 94 prohibiting spitting in passenger stations, waiting rooms, or other premises of the company, passed by the directors June 14, and reading as follows be approved:

"Spitting in passenger stations, waiting rooms, closets or other premises of the company, and in passenger cars, or on platforms, except in receptacles provided for the purpose, is prohibited. Every person violating the provisions of this by-law, in addition to any other liability he may incur, will be liable to a fine not exceeding $40 for each violation, such penalty to be imposed and collected in the manner prescribed by the Railway Act. Where such violation is attended with damage or annoyance to the public, the company may summarily interfere, using reasonable force if necessary, to prevent such violation or to enforce observance of the provisions of this by-law without incurring any penalty by reason thereof."

That by-law 95 relating to tariffs of the telegraph tolls to be charged by the company passed by the directors Oct. 6, amending by-law 93, and reading as follows be approved:

"That J. Kent, Manager of the Company's Telegraphs be authorized to prepare and issue tariffs of the telegraph tolls to be charged by the company as provided for by the Railway Act as amended by 7-8 Edward VII., chap. 61, being "An Act to amend the Railway Act with respect to Telegraphs and Telephones and the jurisdiction of the Board of Railway Commissioners," and any further amendments of such Railway Act, for all telegraph traffic of the company upon that portion of its railway upon which the telegraph tolls clause of the Act applies, and upon other railways owned or operated by the company."

The retiring directors, D. McNicoll, C. R. Hosmer, Hon. R. Mackay and Hon. J. Dunsmuir, were re-elected for a further term of four years.

At a meeting of directors held immediately after the shareholders' meeting, the following officers were re-elected for the current year:—Chairman of the Board, Sir Wm. C. Van Horne; President, Sir Thos. G. Shaughnessy; Vice President, D. McNicoll; Executive Committee, R. B. Angus, D. McNicoll, E. B. Osler, M.P., Sir Thos. G. Shaughnessy, Lord Strathcona, Sir Wm. C. Van Horne.

G.T.R. Betterments, Construction, Etc.

Bonaventure Terminals.—Reports are again in circulation that plans are in preparation for the reconstruction of the terminals at Bonaventure, Montreal.

Turcot Yards.—Work has been started on the enlargement of the freight yards at Turcot, Que. At present they have a capacity of 4,000 cars, but the company has a site sufficiently large to increase the capacity to 15,000 cars. In view of the present extension, the Montreal Park and Island Ry. Lachine line will be moved 600 ft. towards the Canada Car Co.'s works.

St. Lambert Freight Yards.—Plans are being prepared for the enlargement of the terminals at St. Lambert, Que., for which the company has acquired over 100 acres in the vicinity. No time has been fixed for the starting of the work, but it is expected that everything will be in readiness next year.

The Midland Line.—A survey party started work at Cobourg, Ont., Oct. 1, on surveys in connection with the improvements proposed on the Midland section of the company's line. It is understood that the work will involve the straightening of the line in the town and the erection of a new station.

Bridgeburg Bridge.—The company is carrying out some work on its bridge across the Niagara River, connecting Bridgeburg, Ont., with Buffalo, N.Y. For this some false work has been erected. On the part of New York State it is claimed that the false work interferes with Erie canal navigation, and steps are being taken to prevent the work from proceeding. The company has secured a temporary injunction to prevent interference.

Brantford Improvements.—A conference has been held at Brantford, Ont., between city officials and the G.T.R., with reference to the carrying out of a number of improvements on the railway property there. A number of matters were discussed, and it was arranged that a further conference would be held. (Oct., pg. 721.)

ST. PAUL, U.S.A.

CHICAGO NEW YORK PITTSBURG NEW ORLEANS

American Association G.P. and T.A.

In our last issue we were only able to refer briefly to this Association's meeting at Toledo, and to summarize some of the suggestions made by the retiring President, G. T. Bell, A.P.T.M., Grand Trunk Ry. Mr. Bell said:—"At our convention seven years ago, following the report of a committee, the enlargement of the Association's usefulness, a resolution was introduced by me and adopted requesting the American Association of General Baggage Agents, American Association of Travelling Passenger Agents, International Association of Ticket Agents, and similar passenger organizations each to appoint an official representative to appear before this Association yearly and deliver a short address reviewing the work of his organization and presenting suggestions for the betterment of the passenger service. Many interesting and helpful addresses have since been given and are published in our proceedings. Out of the same resolution has grown valuable addresses from the passenger branch of the Association of American Railway Accounting Officers. Between that association and ours there should always be the closest co-operation, which, I believe, can be made mutually and increasingly beneficial. It is my earnest hope and belief that the joint committee of these two associations will be able shortly to recommend a new system of interline ticketing that will immensely reduce the number of forms now considered necessary, and at the same time greatly simplify the work of the ticket sellers. If coupled with this important improvement, a joint committee from this association, the ticket agents associations, and the transportation section of the American Railway Association, would consider and report upon a plan for securing and retaining by suitable encouragement, especially at leading stations where the ticket business requires the exclusive attention of one or more ticket sellers, the most efficient and experienced men, it would tend to a general betterment of the service, be creditable to the transportation lines, and appreciated by the public. If left to the initiative of individual lines or territorial passenger associations, reforms in these two directions will be slow and uncertain compared with results likely to follow the well matured recommendations of strong joint committees representing all transportation lines and all interested branches of the passenger service. As a basis for further consideration of these subjects there is much of value in the carefully stated ideas from the International Association of Ticket Agents which appear in the proceedings of our New Orleans Convention, October, 1903, and are renewed in report from the same association in the proceedings of our Old Point Comfort Convention, October, 1904, and which are endorsed and extended in the address from the same Association, also from the Canadian Ticket Agents Association, at our Atlantic City Convention, October, 1906, and on other occasions.

"In closing my term as President I venture to urge upon the new officers of our association earnest attention to these subjects. Our efforts should ever be to advance through our association progressive ideas designed to improve the passenger service of our three countries. Do not rest upon the laurels of the past—press forward towards new victories. Never permit the germ of sectional or territorial ideas to undermine the broad and strong foundation upon which we have built so long and so well."

W. Bunton, G.T.R. ticket agent, Peterborough, Ontario, who represented the Canadian Ticket Agents Association at the convention, was given a very hearty reception. He said:—

"There are some things which need not be said, but which, from consideration of courtesy, must be said. In Peterboro, where I come from, a gentleman of the Hebrew persuasion, conducted two clothing stores. He had occasion to take a business trip, leaving his son in charge of his interests. One night one of the stores was destroyed by fire; the son wired the father these words:—'Store burnt last night, come home at once.' While the operator was counting the number of words of the message, he suggested that the son should add, for the father's information, which store was destroyed. 'Oh, there's no need of that—he'll know." It went without saying that there was no misunderstanding as to where the fire occurred. It also goes without saying that I am proud and honored with the position I find myself in to-day—received with cordiality and kindness by a distinguished gathering of the foremost representatives of the tremendous transportation interests of this continent. I take this as a high compliment because, aside from the special interests involved in this great gathering, I am a foreigner and a stranger—at least I felt that I was a few minutes ago, but I don't feel that way now—the kindness of my reception seems to me like adoption into the family. I am not surprised at that, for we Canadians know from the past, the broad-minded, liberal, fraternal spirit that moves the American Association of General Passenger and Ticket Agents. You have shown this spirit by honoring Canada in holding your annual convention in Toronto last year. This liberal spirit is further exhibited in your choice of President, G. T. Bell, who you all know from reputation. From both personal and business knowledge, I can confidently say that if he makes as great a success in the capacity of President as he has done as General Passenger and Ticket Agent, and now Assistant Passenger Traffic Manager of the G.T.R., your association made no mistake in the choice of a presiding officer.

I only wish I could speak as confidently of the choice of a representative to your association, made by the Canadian Ticket Agents Association, with which I am honored. Whatever question there may be of the business ability and mental capacity of your humble servant, to fittingly represent the Dominion, you will, perhaps, be inclined to admit that in the matter of physical proportions, I am a worthy representative of the largest country on the western hemisphere. For you all know that Canada is a big country. In the matter of territorial area it is larger than the United States. If Canada could be lifted and planted on the top of Europe it would blot out two-thirds of its area and squelch about 200 millions of population. While Canada bulks big in territory, it has a comparatively small population, but if you will permit me to say so, what it lacks in numbers it makes up in quality, pluck and enterprise. "Little frozen Canada," as some of our Yankee cousins playfully call it, has in the way of enterprise, achieved a record, which for its numerical strength is, perhaps, without a parallel in human history. Before Canada had a population of 5,000,000 it had expended $100,000,000 in building canals and opening waterways and another $100,000,000 in building railways, that is, the Government had laid out $200,000,000 in providing the highest essential of advanced civilization—transportation—$40 for every man, woman and child of our population. And we are still at it. Sir Wilfrid Laurier, Premier of Canada, who by the way, is a great admirer of your country and people, said in his campaign addresses last election that the 19th century belonged to the United States and the 20th century belongs to Canada—that is while the United States in the 19th century made its tremendous strides in growth, Canada would do the same in the 20th century. Not that the United States would stand still—by no means—but having practically reached the limit of expansion it would devote its energies to concentrating, solidifying and strengthening the fruits of its progress, while Canada will play the role of conquering and peopling its boundless vacant places and developing its equally inexhaustible natural resources.

Transportation is the key that unlocks the treasure house of national wealth. In this both the great countries of the North American continent are interested. The annual trade exchange between Canada and the U.S. amounts to between $400,000,000 and $500,000,000 yearly, and it is bound to increase. Canada has, perhaps, the largest per capita trade of any country in the world. Our total trade, incoming and outgoing, is over $100 per head of population, while that of the U.S. is about $30 per head. This discrepancy is not mentioned by way of disparagement—it is simply explained. The U.S. has far greater population and a lesser extent of undeveloped resources, easily converted into trade material. We have a great wealth of natural resources and a small but energetic population alive alike to its opportunities and responsibilities. There seems to be no end of our resources. From the apple orchards of the Annapolis Valley, down by the Atlantic, to the peach belt of the Niagara district, from there to the fruit farms of the Okanagan Valley beside the Pacific ocean, and from there to the golden drift of the Klondike, every square mile of the three million odd square miles of Canada contains resources that invite and will richly repay commercial and industrial exploitation. Less than a dozen years ago, the lands in the Cobalt district, now one of the greatest, if not the greatest silver producing camps in the world, would not sell for a dollar a square mile—to-day some of this territory is worth a dollar a square inch—and the same general conditions in other forms applies to your own Alaska. What a tremendous work is cut out for the iron horse and his steel speed-way, our railway lines and systems!

In the matter of transportation the interests of the two countries are largely common. Our railway systems so overlap, interlace, and dovetail one into the other, as to constitute international systems defying boundary lines. The Canadian Pacific is eating its way into United States territory at different points. A great U.S. railway system, controlled by the way by another Canadian, J. J. Hill, is nosing its way into the Canadian west, and another great Canadian transcontinental, the Grand Trunk Pacific, is throwing out its trade tentacles. The G.T.P proposes building a spur south from the main line to Emerson on the Red River, the forerunner of an extension to the twin cities, St. Paul and Minneapolis or other points. These conditions indicate the mutual nature of the interests of railways and the wisdom of co-operation for mutual self interest and protection. There is room for infinite expansion. In the matter of U.S. and Canadian railways there are no main lines—they are all, to a great extent, feeders to each other. While they are rivals, they cannot live, to the highest advantage, without each other.

The U.S., having reached the limit of home expansion in the 19th century, did not fold its hands in idleness. With the restless spirit of Yankee enterprise you sighed for more worlds to conquer and you found them in Cuba, in the Phillipines, in Hawaii and in Canada. The American invasion of to-day is a big episode in history, like the Israelites, taking possession of the Promised Land. A generation ago Canada lent you a million or so of the very flowers of Canadians, to

help to make your country great, and they have done their work and made their mark in every realm of activity—in your senatorial chambers and legislative halls, in your colleges, in your laboratories, in your factories and workshops; and now you are paying us back; you are sending the cream of your western farmers to seize upon the Canadian west. In doing this, you are not only honorably paying a debt, but you are making a gilt edged investment. These good Yankee farmers will help to build up a new empire in the west, and help to develope the gold mine that never peters out, the golden wheat field. This year the Canadian west has reaped 120,000,000 bushels of wheat with only a tenth part of our wheat land gashed by the plough. When we reflect what the present means and foresee what the future holds, we can see the boundless international travel and traffic possibilities. You want no. 1 hard wheat for the mills of Minneapolis and elsewhere, and we shall want your manufactured and other products, and they will come and go, for no line of custom houses can dam the tide of trade, nor any tariff tinkers build a wall that a mogul engine will not flatten.

The railway men of both countries have an interest in taking advantage of these conditions and friendly co-operation (and good-will and friendliness are the cue), and the right spirit is abroad. Your association has hung out friendly signals, by holding your annual meeting last year in Canada. You elected as your president a Canadian (and he is a specimen brick), and you have in other ways practically recognized the obligations arising from a common interest. To show international amity the Canadian Ticket Agents Association has held several of its annual meetings in the U.S. for the promotion of good fellowship and the creation of an esprit de corps, as between the traffic officials of the two countries. This has more than a sentimental interest; it has a real, a substantial and tangible value, represented by facilitated and increased business. And the cordial reception that has been tendered me today, as the delegate of the Canadian Ticket Agents Association, is another proof of the freemasonry of railroading. The more we get together the more we see and know of each other and of the systems over which we route passengers to be handled by the lines under your jurisdiction, the better it will be for all of us and for the vast and closely interrelated interests we represent.

This brings me to a sore, or at least a tender spot in the hearts of the Ticket Agents Association. In our business capacity we can do everything, but one thing. We can send thousands of travellers over your systems, but we can't send ourselves except on the same degrading terms that apply to the common every day public. In the past ticket agents have been given complimentary transportation on your roads. A law—I won't call it any names (only think them)—cut off our commissions, and at present only bona fide ticket agents who make an exclusive business of selling tickets are favored with transportation. Now, a large proportion of ticket agents (and many of them our best) conduct ticket agencies in connection with some other suitable business—this does not make them any worse workers for the railways—the acquisition of railway knowledge which free transportation helps to give is in the interest of the railways themselves. The agent who can give the customer the best information stands to do the best business. The agent who speaks from personal knowledge of what he is talking about will pull in the most and best business, for the public, like the man from Missouri, "want to be shown." A ticket agent who keeps in personal and intimate touch with traffic conditions and changes is the best man for the business. Free transportation is the best possible means to this, and the legislation I have referred to shuts out many of the best ticket agents, men who, in connection with an honorably connected commercial business, have worked themselves high in the confidence of the public, and who can easily, and with advantage, use that confidence in connection with a ticket agency. With all the extensions you railway gentlemen are making, you might include the extension of free transportation to the now contraband class of our ticket agents. It won't cost the railroads much to carry us—our good company should be enough compensation—and we won't take up much room (with my native modesty, I speak for others and not for myself). It won't hurt the railway companies and will be a great benefit to us—on the same principle of the big hulking Cornish miner, who, on being chaffed for allowing his little wife to thrash him, philosophically answered "It pleases she and it don't hurt Oi."

In conclusion I wish to repeat my acknowledgments of the courtesy of your kind reception, of your patience in listening to my remarks, and to re-assert that the railway interests and the general national interests of both countries are very largely in common. We live under different flags, and though these two flags differ in color-blending and blazonry, they are woven of the same sterling fibre, constitutional liberty and free institutions, they stand for the same principles of enterprise, progress, and the rights of humanity. Although we owe and own different allegiance, we all spring from the same stock, the same blood flows in our veins, and common interests and common ambitions should make us allies and coworkers in all things separate in name, but united in aim. Both in the railway world and in national activities these two countries pulling together will make a team that cannot be beaten—fit to "make the grade" on a double track line, that will carry humanity on this continent to the highest destination of human achievement."

Great Northern Ry. Lines in Canada

Winnipeg Terminals.—It is understood that the Hill interests have recently made offers for the purchase of the amusement park, known as Happyland, to add to the properties already acquired for terminal purposes in Winnipeg. The price offered was said to be insufficient, but the matter has not yet been finally disposed of.

Midland Ry. of Manitoba.—The Manitoba Legislature has passed an act amending sec. 3 of the company's act of incorporation by striking out a number of words defining the route from Winnipeg to Brandon and westerly, and inserting the following words:—"In a generally westerly direction to the city of Brandon, thence in a generally westerly direction." Power was also given to transfer its constructed lines, together with all its franchises and rights to another company. (See Manitoba Great Northern Ry.

Manitoba Great Northern Ry.—The Manitoba Legislature has incorporated a company with this title for the purpose of acquiring the Midland Ry. of Manitoba, together with all its rights and franchises, subject to the approval of the Lieut.-Governor in Council. The capital is fixed at $50,000, and it has power to issue bonds to the amount of $20,000 a mile. The provisional directors are : L. W. Hill, R. I. Farringdon, J. Fisher, C. P. Wilson and J. F. Fisher. Notice has been given that all formalities having been complied with, the M.G.N. Ry. has taken over the lines of the Midland Ry. of Manitoba, and has become possessed of all its rights, franchises, and other property. The lines taken over are two in number, namely, one from Gretna, on the International boundary, to Portage la Prairie, and the second from Morden southeasterly to the International boundary. A press report from Morden, Oct. 6, says that one of the first works to be undertaken will be the extention of the Morden line. The proposition under consideration is to extend the line in a northwesterly direction, passing two miles to the east of Miami and about four miles west of Rosebank, then, to near Rathwell, probably touching Carberry.

Saskatchewan.—Surveys are being made for a line running easterly from Regina, to connect with the Brandon, Saskatchewan and Hudson Bay Ry. at Brandon, Man., and also for a line from Regina to the International boundary to connect with one of the G.N.R. branch lines running northerly from near Minot, N.D. It is stated that construction will be started on these two lines by the end of the year.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—Preliminary surveys have been completed for the tunnel route for this line in the vicinity of Princeton, B.C. The new route diverges from the old at Otter Flat, following the Tulameen River to the mouth of Eagle Creek,thence along the creek for about a mile, where the tunnel begins and extends for eight miles to the Coquihalla. The tunnel will have a gradient of about 1%. The old route was a circuitous one via the Otter valley and the Coldwater and necessitated a 2% gradient. The tunnel route will reduce the distance between Princeton and Vancouver from 154 to 124 miles. It is estimated that the tunnel will take about five years to construct. While it is under construction a temporary line will be built to meet the pressing need of early connection with the coast. J. H. Kennedy is Chief Engineer of the line.

Nothing yet has been decided with reference to the projected terminals in Vancouver. Plans have been prepared for the erection of a new station at New Westminster, B.C. It will be located immediately to the east of the present station. The building will be two stories high. accommodation being provided on the ground floor for the company's business, while the second floor will comprise agent's quarters. Work will be started immediately. (Oct., pg. 713.)

The Governor in council has confirmed the act passed last session by the Ontario Legislature amending the Ontario Railway Act, 1906, in so far as the statute purports to prohibit or regulate work, business or labor within the legislative authority of the province on Sundays.

The three men who were recently found guilty at Montreal of obtaining money from various Canadian transportation companies by means of claims for bogus accidents, were sentenced to five years, two and a half years, and one year at hard labor, respectively, in St. Vincent de Paul penitentiary.

In the case of Robinson v. C.N.R. at Winnipeg, recently, judgment was delivered in favor of the plaintiffs, who claimed damages for loss suffered by the lack of spur track facilities. The amount of damage sustained is to be enquired into. The spur was laid to plaintiffs' premises by the Northern Pacific Ry., in 1888, and was removed by the C.N.R. in 1904, after the company had leased the N.P.R. lines. The plaintiffs had later petitioned the Board of Railway Commissioners in the matter, and had obtained an order for the restoration of the tracks, the company maintaining that it would be inconvenient to continue such facilities.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearing took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

8112. Sept. 16.—Authorizing Volcanic Oil & Gas Co. to place wires across P.M.R. in Tilbury East and Romney tps., Ont.

8113. Sept. 15.—Authorizing Saskatchewan Government Telephones to place wires across C.N.R. between secs. 21 and 28, tp. 33, r. 4, west 3rd mer.

8114. Sept. 16.—Authorizing Govan Rural Telephone Co. to place wires across C.P.R. at Valley St., Govan, Sask.

8115. Sept. 15.—Authorizing C.P.R. to construct spur for the Lake Megantic Pulp Wood Co., near McLeod's, Compton county, Que.

8116. Sept. 21.—Authorizing C.P.R. to construct branch line on alley west of Caron Ave., Windsor, Ont.

8117. Sept. 21.—Authorizing C.P.R. to construct bridge 69.8, Moose Jaw section.

8118. Sept. 17.—Authorizing C.P.R. to construct bridge 42.15, Schreiber section, Lake Superior Division.

8119. Sept. 21.—Approving location and plans of C.N.R. stations, Ottawa-Hawkesbury and Gearneau-Quebec Divisions.

8120. Sept. 14.—Dismissing application of G.T.R. for permission to construct spur to Noxon Co.'s premises, near Ingersoll, Ont.

8121. Sept. 21.—Approving location of C.N.R. from mileage 10 to 15, up Fraser River from Yale, B.C.

8122. Sept. 21.—Authorizing Ontario Power Co. to place its transmission line across N. St. C. & T. Ry. between lots 17 and 30, Thorold tp., Ontario.

8123. Sept. 21.—Approving revised location of G.T.P.R. from s.e. ¼ sec. 14 to s.w. ¼ sec. 23, tp. 14, range 27, west 1st mer., Shoal Lake District, Man.

8124 to 8127. Sept. 21.—Authorizing Saskatchewan Government Telephones to place wires across C.P.R. at four points.

8128. Sept. 21.—Authorizing Town of Weyburn, Sask., to lay water main under C.P.R. at Third St.

8129 to 8131. Sept. 21.—Authorizing B.C. Telephone Co. to place wires across Van., Vic. & Eastern Ry at three points in B.C.

8132, 8133. Sept. 21.—Authorizing Bell Telephone Co. to place wires across C.P.R. at West Brome, Que., and across G.T.R. at Clinton, Ont.

8134. Sept 21.—Authorizing Canadian Machine Telephone Co to cross G.T.R. at Mount Pleasant flag station, Ont.

8135. Sept. 21.—Authorizing Volcanic Oil & Gas Co. to place wires across M.C.R. at lot 9, North Middle road, and lot 9, South Middle road, Ont.

8136. Sept. 17.—Authorizing Town of Milton, Ont., to lay water main under C.P.R. at Court St.

8137. Sept. 14.—Directing that in operation of railway lines where snowfall is such as to require running of snowplows or flangers, the company may remove planks from farm crossings; provided that no such planks shall be removed unless necessary, and shall be replaced by the company in the spring, or as soon as snow is off the ground.

8138. Sept. 21.—Authorizing C.N.Q.R. to open for traffic the portion of its line from its connection with the Quebec & Lake St. John Ry. in Quebec City to Garneau Jct., 78.76 miles.

8139. Sept. 15.—Refusing Toronto Railway Co. leave to appeal order 7813, July 3, authorizing City of Toronto to construct bridge across its tracks at Queen St. East.

8140. Sept. 14.—Authorizing Nipissing Central Ry. to construct its railway across Temiskaming & Northern Ontario Ry. by an overhead crossing, in town site of Argentite, Ont.

8141. Sept. 22.—Authorizing Macdonald municipality to place wires across C.N.R. near Sanford, Man.

8142. Sept. 14.—Ordering the G.T.R. to clean station at Seguin Falls station Ont., to provide proper station seats and lamps and to construct platforms, etc.

8143. Sept. 22.—Directing that time for completion of work in connection with bridge carrying St. Catharines St., Montreal, over C.P.R. tracks be extended until May 1, 1910.

8144. Sept. 21.—Authorizing G.T.P.R. to operate trains across Winnipeg Elec. St. Ry. at Pembina highway, Winnipeg, without being brought to a stop.

8145. Sept. 14.—Ordering all railways subject to the Board's jurisdiction to equip, before April 1, 1910, their freight vans with coupler-operating levers, and the cupolas of cabooses with air-gauges and air-controlling valves.

8146. Sept. 22.—Recommending to Governor in council for sanction agreement between Canadian Collieries Limited, and United Coal Fields of British Columbia, re sale and transfer of franchise, powers, railway, and undertakings.

8147. Sept. 22.—Approving location plan of C.P.R. station at Mowbray, Man.

8148. Sept. 22.—Authorizing C.P.R. to open for traffic portion of line from Bolton to Bolton Jct., Ont.

8149. Sept. 21.—Directing C.N.R. to construct certain highways in Fort William, Ont.

8150. Sept. 22.—Authorizing Listowel Municipality Electric Light System to place wires across G.T.R.

8151. Sept. 22.—Authorizing C.P.R. to construct spur in Kildonan, Man.

8152. Sept. 22.—Authorizing C.P.R. to construct spur for Empire Elevator Co. Fort William, Ont.

8153. Sept. 22.—Approving plan of iron bridge to be constructed by G.T.R. to replace present bridge near Ailsa Craig, Ont.

8154. Sept. 22.—Authorizing the C.P.R. to construct spur for J. Brodie & Son, mileage 3.79 from Staynerville Jct., Que.

8155, 8156. Sept. 22.—Authorizing Listowel Municipality Electric Light System to place wires across G.T.R. at Mill St.

8157. Sept. 23.—Authorizing Walford Rural Telephone Co. to place its wires across C.P.R. at Irish Creek, Ont.

8158. Sept. 23.—Authorizing Bell Telephone Co. to place wires across M.C.R. near Bridgeburg, Ont.

8159. Sept. 21.—Dismissing application of C.P.R. for leave to cross the G.T.R. with its tracks in Ingersoll, Ont.

8160. Sept. 22.—Dismissing application of C.P.R. to cross the G.T.R. with its track at mileage 5.03 in Oxford county, Ont.

8161. Sept. 24.—Approving location and plans of C.P.R. station at Belle Plain Sask.

8162. Sept. 24.—Authorizing G.T.R. to construct spur to Schultz Bros'. premises, Brantford, Ont.

8163. Sept. 24.—Authorizing C.P.R. to construct spur for Redcliffe Realty Co., Redcliffe, Alta.

8164. Sept. 24.—Approving location of G.T.P.R. from Prince Rupert easterly, mileage 150 to 180.74, Coast District, B.C.

8165. Sept. 23.—Authorizing Bell Telephone Co., to place wires across G.T.R. at Howick Jct., Que., and M.C.R. ½ mile west of Charing Cross station, Ont.

8167 to 8171. Sept. 23.—Authorizing Manitoba Government Telephone System to place wires across C.N.R. and C.P.R. at various points.

8172. Sept. 24.—Authorizing the City of Toronto to lay high level intercepting sewer on Don Esplanade, across G.T.R.

8173. Sept. 24.—Authorizing the town of Walkerville, Ont., to lay sewer under G.T.R.

8174. Sept. 25.—Authorizing C.P.R. to construct a line connecting its Pembina branch with G.T.P.R. main line in Winnipeg.

8175. Sept. 24.—Amending order 8087, Sept. 15, authorizing the Mount McKay and Kakabeka Falls Ry. to cross C.N.R. at Yonge St., Fort William, Ont.

8176. Sept. 24.—Authorizing C.N.R. to cross C.P.R., Wetaskiwin branch, at Camrose, Alta.

8177. Sept. 20.—Approving rearrangement of C.P.R. tracks between bents 2, 3, 4 and 5, and elevation and clearances of overhead footbridge at Brown St., West Fort William, Ont.

8178, 8179. Sept. 25.—Authorizing Manitoba Government Telephone System to place wires across C.N.R. at Glenfrosa siding, and at Third St., Belmont.

8180. Sept. 25.—Authorising C.P.R. to construct spurs for Speitz Fur Co. and Hanover Cement Co., Hanover, Ont.

8181. Sept. 25.—Authorising G.T.R. to construct branch and three spurs therefrom to Asbestos Mfg. Co.'s premises, Lachine, Que.

8182. Sept. 25.—Authorising C.P.R. to construct spur for Sydney Brick Co., Sydney, Man.

8183. Sept. 25.—Authorising the C.P.R. to construct branch line in Calgary, Alta.

8184. Sept. 25—Approving Supplement 2 to Canadian Freight Classification 14.

8185. Sept. 25—Authorising C.P.R. to construct trestle bridge at mileage 63.5, Moose Jaw branch, Sask.

8186. Sept. 25—Authorising G.T.R. to construct spur for Sanderson-Harold Co., Paris Jct. station, Ont.

8187. Sept. 25.—Authorising G.T.R. to construct spur for Bechtells Ltd., Waterloo, Ont.

8188. Sept. 25.—Authorising C.P.R. to construct spur for Charbonneau, Leroux & Forget, St. Vincent de Paul Parish, Que.

8189. Sept. 25.—Authorizing C.P.R. to construct spur to Asquith ballast pit on its Pheasant Hills branch, Sask.

8190. Sept. 25.—Authorizing G.T.P.R. to operate its trains across C.P.R. Pembina branch at Oak Point Jct., near Winnipeg.

8191. Sept. 25.—Authorizing C.P.R. to construct branch line in parish town of Lachine, Que.

8192. Sept. 29.—Authorizing C.N.Q.R. to place wires and tracks under Bell Telephone Co.'s wires at Charlesbourg Road, Quebec county, Que.

8193 to 8195. Sept 25.—Authorizing Hydro-Electric Power Commission of Ontario to place wires across G.T.R. at three points.

8196. Sept. 27.—Authorizing C.P.R. to open for traffic the Kenora section of its double track from Busteed, mileage 16.0 to Deception, mileage 18.8, Ont.

8197. Sept. 23.—Approving location of C.N.Q.R., Hedleyville Jct. to the Montmorency River, Quebec county, mileage 0 to 7.62.

8198. Sept. 27.—Authorizing G.T.P.R. to operate trains over Pembina highway crossing, Winnipeg, without being brought to a stop.

8199. Sept. 27.—Authorizing Brantford Gas Co. to lay main under G.T.R. at Colborne St., Brantford, Ont.

8200. Sept. 27.—Authorizing Macdonald municipality to place wires across C.N.R. near Brunkild station, Man.

8201. Sept. 28.—Authorizing Northern Colonization Ry. to construct its line across highways between mileage 10 from Nomining, and Rapid le l'Orignal, Que.

8202 to 8204. Sept. 25.—Authorizing Hydro-Electric Power Commission of Ontario to cross G.T.R. at three points.

8205. Sept. 28.—Authorizing C.P.R. to construct branch line across several streets in Regina, Sask.

8206. Sept. 28.—Authorizing C.N.Q.R.

to reconstruct western trestle approach of Ottawa River bridge, near Hawkesbury, Ont.

8207. Sept. 27.—Dismissing application of Canadian Freight Association for order rescinding order Oct. 10, 1904, fixing rates on fruit, in carloads from Eastern Canada to Winnipeg, Portage la Prairie, and Brandon, Man.

8208. Sept. 14.—Approving plan, profile, and book of reference of Montreal Park & Island Ry., and authorizing deviation of its line from lot 142, to lot 1698, Montreal parish, Que.

8209. Sept. 28.—Authorizing Saskatchewan Government Telephone System to place wires across G.T.P.R. between secs. 32 and 33, tp. 35, r. 4, west 3rd mer.

8210, 8211. Sept. 28.—Authorizing Bell Telephone Co. to place wires across C.N.Q.R. at St. Canute, Que., and ½ mile north of Duncan station, Ont.

8212. Sept. 28.—Authorizing City of Medicine Hat, Alta., to lay water mains under C.P.R. at River St., and at East Road allowance.

8213. Sept. 28.—Authorizing Sarnia Gas and Electric Light Co. to lay mains under G.T.R. at South Christina St., Sarnia, Ont.

8214. Sept. 28.—Authorizing C.P.R. to construct spur for Joliette Sand and Gravel Co., St. Felix de Valois parish, Que.

8215. Sept. 29.—Authorizing the St. James Church vestry, Berthier, Que., to lay sewer under C.P.R.

8216. Sept. 29.—Authorizing Mount McKay and Kakabeka Falls Ry. to cross C.N.R. at Montreal St., Fort William, Ont.

8217. Sept. 30.—Approving the revised location of C.P.R. from McKay Ave. to Victoria Ave., Edmonton, Alta.

8218. Oct. 1.—Authorizing Manitoba Government Telephone System to place wires across C.P.R. at Neepawa.

8219. Sept. 29.—Authorizing C.P.R. to construct spur along lane in blocks 10 and 16, and across 24th St., Saskatoon, Sask.

8220. Sept. 29.—Authorizing C.P.R. to construct bridge 6.7, on its Cascade section, B.C.

8221. Sept. 30.—Authorizing C.P.R. to open for traffic the portion of its double track from St. Lazare to Dalhousie Mills, Smith's Falls section.

8222. Sept. 30.—Authorizing C.P.R. and G.T.R. to operate their trains across interlocker at Brampton, Ont.

8223. Sept. 29.—Authorizing City of Toronto to lay sewer under C.P.R. on Howland Ave.

8224. Sept. 29.—Authorizing Pipestone municipality to place wires across C.P.R. near Ewart, Man.

8225. Sept. 30.—Authorizing City of Winnipeg to construct, for the purpose of patrol road, suitable crossings where its transmission power lines cross C.P.R.

8226. Oct. 1.—Authorizing West Canadian Colleries, Ltd., to construct an overhead crossing over C.P.R. at Bellevue, Alta.

8227. Sept. 29.—Authorizing Arthabaska Water & Power Co., Quebec, to lay water pipe under G.T.R. near Nicolet River bridge, Victoriaville, Que.

8228. Oct. 5.—Approving location of Montreal & Southern Counties Ry. from St. Denis St., St. Lambert, to Chambly road, Longueuil, Que.

8229. Oct. 5.—Authorizing Montreal & Southern Counties Ry. to place power wires across G.T.R. at six points in its Point St. Charles yards, Que.

8230. Oct. 5.—Authorizing Ontario Pipe Line Co. to lay gas pipe under T.H. & B.R., Victoria Ave. South, Hamilton, Ont.

8231. Oct. 6.—Approving location of G.T.P.R. through Fort William, Ont., subject to the condition that the railway shall do as little damage as possible, and shall make full compensation to persons interested for damage by it sustained by reason of the location of the railway along any street.

8232. Oct. 6.—Approving location of G.T.P.R., Prince Rupert easterly, mileage 180.74 to mileage 235.675, coast district, B.C.

8233. Oct. 4.—Authorizing C.P.R. to use bridges 65.1, 84.4, and 106.1 on its Pacific Division between Kamloops and North Bend, B.C.

8234. Oct. 5.—Approving revised location of G.T.P.R. station grounds, Yorkton branch, from sec. 4, tp. 24, r. 5, to sec. 6, tp. 25, r. 4, west of the 2nd mer., mileage 11 to 18, Assiniboia district, Sask.

8235. Oct. 6.—Recommending to the Governor in council for sanction, by-law passed by M. C. Rd. directors in New York, Sept. 22, 1909.

8236. Oct. 5.—Authorizing C.P.R. to open for traffic that portion of the Port Moody diversion of the Cascade section of its line from mileage 113.76 to 115.68, B.C.

8237. Oct. 5.—Authorizing C.P.R. to construct railway across Main St., Shoal Lake, Man.

8238. Oct. 5.—Temporarily approving tariff of tolls which the Bell Telephone Co. shall be authorized to charge, and agreement between the company and eight other companies located in Ontario.

8239. Sept. 25.—Authorizing C.N.R. to cross G.T.P.R. near Riley, Alta.

8240. Oct. 4.—Authorizing C.P.R. to use bridges on its Central Division, Broadview section, Man.

8241. Oct. 4.—Authorizing C.P.R. to use four bridges on its Shuswap section, Pacific Division, between Revelstoke and Kamloops, B.C.

8242. Oct. 7.—Authorizing C.P.R. to construct railway across 13 highways, on its Sudbury-Kleinburg branch, Ont.

8243. Oct. 7.—Approving location of C.N.R. from mileage 72 to 88, up North Thompson River, from Kamloops, B.C.

8244. Oct. 5.—Authorizing C.P.R. to construct spur for Winnipeg Oil Co., Saskatoon, Sask.

8245. Oct. 5.—Authorizing C.P.R. to construct industrial spur in Blocks 4 and 6 across 26th St., Saskatoon, Sask.

8246. Oct. 5.—Authorizing C.P.R. to construct spur to Kamloops Mines, Ltd., property, on Lot 43, Yale district, B.C.

8247. Oct. 5.—Authorizing G.T.R. to construct iron bridge to replace present structure at farm crossing, at mile post 11.68, 17th district of its line west of St. Catharines, Ont.

8248. Oct. 2.—Authorizing C.P.R. to construct siding to Moore & Co.'s premises, Toronto.

8249. Oct. 7.—Approving C.P.R. station location and detail plans at Redvers, Sask.

8250 to 8252. Oct. 5.—Authorizing city of Peterboro, Ont., to lay water main under G.T.R. at Murray St., McDonnell St. and Ware St.

8253. Oct. 5.—Authorizing city of Hamilton, Ont., to lay water pipe under G.T.R. on Young St.

8254. Oct. 5.—Authorizing city of Winnipeg to lay sewer under C.P.R. where it intersects crossing between Talbot and Carter Sts.

8255, 8256. Oct. 5.—Authorizing Manitoba Government Telephones to erect wires across C.P.R. 3½ miles s.w. Hartney station and 2½ miles south of Selkirk.

8257. Oct. 12.—Authorizing C.N.Q.R. to erect telegraph wires under G.N.W. Telegraph Co.'s wires near Cap Sante, Que.

8258. Oct. 8.—Authorizing C.P.R. to construct bridge 75.1 on its Moose Jaw Northwest branch, Sask.

8259. Oct. 5.—Authorizing the Miniota rural municipality to erect wires across C.P.R. at r.c. one mile west of Arrow River station, Man.

8260. Oct. 5.—Authorizing Harwich tp. council, Ont., to construct drain under Lake Erie & Detroit River Ry.

8261 to 8264. Oct. 5.—Authorizing Bell Telephone Co. to erect wires across M.C. Rd. and P.M. Rd., Highgate, Ont., Montreal Terminal Ry. at Bout de l'Isle Park, Que., and G.T.R. at Irondale and Hamilton, Ont., and at Notre Dame St., St. Henri, Montreal.

8265. Oct. 5.—Authorizing Norfolk County Telephone Co. to erect wires across G.T.R. at lots 5 and 6, 14th con., Townsend tp., Ont.

8266. Oct. 5.—Authorizing Dominion Natural Gas Co. to lay main under G.T.R., Talbot Road, Wyndham tp., Ont.

8267. Oct. 4.—Authorizing Kaministikwia Power Co. to erect wires across C.N.R. at Edward St., West Fort William, Ont.

8268. Oct. 4.—Authorizing C.P.R. to construct branch line for Kaufman Lumber Co. at mileage 39.1, on its Sudbury-Kleinburg branch, Ont.

8269. Oct. 7.—Authorizing C.N.Q.R. to maintain its tracks and telegraph wires under G.N.W. and C.P.R. telegraph wires at C.P.R. crossing, Lachevrotiere, Que.

8270. Oct. 7.—Authorizing Man. Government Telephones to erect wires across C.P.R. on Nairn Ave. and Eaton St., Elmwood, Winnipeg.

8271. Oct. 6.—Authorizing Saskatchewan Government Telephone System to erect wires across C.N.R. near Craik.

8272. Oct. 6.—Authorizing United Gas Co. to lay pipe under G.T.R. at Forks Road, 1st range from the river, Moulton tp., Ont.

8273 to 8279. Oct. 7.—Authorizing Bell Telephone to erect wires across P.M. Rd., M.C. Rd., C.P.R. and G.T.R. at various points in Ontario.

8280 to 8285. Oct. 6.—Authorizing the Hydro-Electric Power Commission of Ontario to erect wires across G.T.R. at six points.

8286. Oct. 6.—Authorizing city of Winnipeg to erect transmission lines with telegraph and telephone wires across C.P.R. at lot 82, Kildonan parish.

8287. Oct. 11.—Authorizing C.P.R. to use bridges on its Prince Albert branch, Central Division, Regina, Saskatoon and North Saskatchewan.

8288. Oct. 8.—Approving G.T.P.R. by-law no. 7 authorizing certain officials to prepare and issue tariffs of tolls to be charged for passenger traffic over its lines.

8289 to 8292. Oct. 8.—Authorizing city of Calgary, Alta., to erect power wires across C.P.R. at 17th Avenue E., 14th Street W., 15th Street E. and 11th Street E.

8293. Oct. 8.—Authorizing C.P.R. to construct a bridge of the St. Maurice Valley Ry. over C.N.Q.R. at Grand Mere, Que.

8294 to 8296. Oct. 8.—Authorizing C.P.R. to construct bridges 59.3, 56.7 and 65.0 on its Moose Jaw Northwest branch, Sask.

8297 to 8299. Oct. 8.—Authorizing Bell Telephone Co. to erect wires across M.C. Rd. near Cornell station, Ont.; G.T.R. near Paris Jct., Ont., and C.N.Q.R., lot 222E., Hochelaga county, Que.

8300 to 8302. Oct. 8.—Authorizing Consolidated Telephone Co. to erect wires across C.P.R. near Erin and Hillsburg, Ont.

8303. Oct. 8.—Authorizing Manitoba Government Telephones to erect wires across C.P.R. 1½ miles south of Altona station.

8304 to 8308. Oct. 8.—Authorizing Wroxeter Rural Telephone Co. to erect wires across C.P.R. in Howick and Turnberry tps., Ont.

8309, 8310. Oct. 8.—Authorizing Clinton municipality, Ont., to lay water main under G.T.R. at Matilda St.

8311, 8312. Oct. 8.—Authorizing F. J. Weidenhammer, Hawkesville, Ont., to erect wires across C.P.R. west and southwest of Wallenstein station, Ont.

8313. Oct. 12.—Authorizing C.N.Q.R. to reconstruct trestle approaches of its

bridge over the St. Maurice River, near Grand Mere, Que.

8314. Oct. 12.—Authorizing G.T.P.R. to construct railway across certain highways in West Saskatchewan.

8315. Oct. 6.—Authorizing St. Maurice Valley Ry. to cross C.N.Q.R. at Grand Mere, Que.

8316. Oct. 13.—Approving location of C.N.O.R. through Goulburn and Marlborough tps., Carleton county, mileage 17 to 29.

8317. Oct. 13.—Authorizing C.N.O.R. to connect its Udney-Orillia line with Georgian Bay & Seaboard Ry. at Atherley Jct., Ont.

8318, 8319. Oct. 13.—Authorizing the city of Montreal to lay water main under C.N.Q.R., Nicolet St. and Valois St.

8320. Oct. 12.—Authorizing Consumers' Gas Co., Toronto, to lay main under C.P.R., St. Clair Ave.

8321. Oct. 13.—Authorizing C.N.Q.R. to maintain its tracks and telegraph wires under Bell Telephone Co.'s wires, Cap Rouge, Que.

8322. Oct. 12.—Authorizing city of Peterboro, Ont., to lay water main under C.P.R., Burnham St.

8323 to 8325. Oct. 13.—Authorizing the Saskatchewan Government to cross with wires C.N.R. at one point and C.P.R. at two points.

8326 to 8328. Oct. 13.—Authorizing Miniota rural municipality to erect wires across C.N.R. at three points in Manitoba.

8329. Oct. 13.—Authorizing Canadian Machine Telephone Co. to erect wires across G.T.R., Mount Vernon, Ont.

8330. Oct. 13.—Authorizing Manitoba Government Telephones to erect wires across C.N.R. at p.c. near Argue station.

8331. Oct. 12.—Authorizing town of Walkerville, Ont., to lay sewer under Lake Erie & Detroit River Ry., Argyle Ave.

8332. Oct. 13.—Authorizing Manitoba & Saskatchewan Coal Co. to erect wires across C.P.R. at Bienfait, Sask.

8333. Oct. 11.—Authorizing G.T.R. to cross with its second track the United Counties Ry. at St. Hyacinthe Jct., Que.

8334. Oct. 5.—Ordering that certain streets at St. Henri, Montreal, be protected by watchmen, appointed by the G.T.R.

8335. Oct. 5.—Authorizing C.N.O.R. to construct its line across p.c. on lot 26, con. 1, Gloucester tp., Carleton county, Ont.

8336. Oct. 5.—Dismissing application of C.N.O.R. to connect its tracks with the Manitoulin & North Shore Ry. in Sudbury, Ont.

8337. Oct. 8.—Rescinding order 7343, June 23, by substituting for clause 2 of first part the following clause: "That on cheese shipped from points west of Montreal on separate rail bills of lading to Montreal, and which arrived at Montreal before the close of the St. Lawrence navigation season then current, the railway companies absorb the Montreal wharfage and port warden's fees, provided the said cheese is exported from the port of Montreal not later than May 31 of the following St. Lawrence navigation season, the said absorption to continue . . . etc."

8338. Oct. 15.—Authorizing G.T.R. to construct certain branch lines in Toronto, extending from its Don yards, east of Trinity St., across River Don and along Cherry St. and certain other properties belonging to the city, to the National Iron Works' premises.

8339. Oct. 14.—Approving deviation in location of portion of the Edmonton & Slave Lake Ry. through tps. 56 to 60, r. 25, w. 4th mer., mileage 21.39 to 46.68, Alta.

8340. Oct. 14.—Authorizing National Transcontinental Ry. Commissioners to carry railway at grade across highway near mile 3, from the north abutment of the Quebec bridge.

8341. Oct. 14.—Authorizing city of Calgary, Alta., to erect wires used for Calgary Electric Ry. operation across C.P.R. spur line at 2nd Street E.

8342. Oct. 15.—Approving location of G.T.P.R from mileage 229 to 289, Cariboo district, B.C.

8343. Oct. 15.—Authorizing city of Peterboro, Ont., to lay water main under G.T.R. Lindsay branch, Park St.

8344. Oct. 14.—Authorizing Georgetown village, Ont., to lay water main under G.T.R. spur.

8345, 8346. Oct. 14.—Authorizing Citizens Telephone Co. to erect wires across C.P.R. at first crossing south of Bromo, and second crossing west of West Shefford, Que.

8347. Oct. 14.—Authorizing Sterling Gas Co. to lay pipe under G.T.R. between lots 20 and 21, con. 1, Humberstone tp., Ont.

8348. Oct. 14.—Authorizing United Fuel Supply Co. to lay pipe under G.T.R. on lot 8, front con. of Raleigh tp., Ont.

8349. Oct. 14.—Authorizing Bell Telephone Co. to erect wires across N. St. C. & T. Ry. at p.c. Welland Ave. and Francis St., St. Catharines, Ont.

8350. Oct. 14.—Authorizing Citizens Telephone Co. to erect wires across C.P.R. first crossing west of West Shefford, Que.

8351. Oct. 9.—Authorizing C.P.R. to construct branch line across and along Hardisty St., Fort William, Ont.

8352. Oct. 9.—Authorizing C.P.R. to cross Port Arthur and Fort William Electric St. Ry. at Syndicate Ave. and connect with the Fort William Terminal Ry. and Bridge Co., Fort William, Ont.

8353. Oct. 14.—Authorizing city of Wetaskiwin, Alta., to lay water and sewerage pipes under C.P.R., Pearce St.

8354. Oct. 15.—Authorizing Volcanic Oil & Gas Co. to erect wires under C.P.R. at Walker Rd., Sandwich East tp., Ont.

Railway Commissioners' Sundry Orders.

Summaries of other orders are given on another page under "Orders by Railway Commissioners":—

BRANDON, SASKATCHEWAN & HUDSON BAY RY.

8111. Sept. 15.—In the matter of the Brandon, Saskatchewan & Hudson Bay Ry. sections known as the Boissevain and Minto sections, and as to increase of staff of sectionmen, upon hearing counsel for the company, the report of the Board's Inspector, and its Chief Engineer's recommendation, it is ordered that the Brandon, Saskatchewan & Hudson Bay Ry. Co. be directed to employ forthwith two men and a foreman on each of the sections known as the Boissevain and Minto sections of its line, and that, in case it be found that the said number is not sufficient to keep the road in safe and proper state of repair, the company employs such additional men as may be necessary for the purpose..

PLANKING AT CROSSINGS.

8137. Sept. 14.—In the matter of the practice of certain railway companies of removing the planking at highway and farm crossings during winter months, and in the matter of secs. 2, 30, 235 and 253 of the Railway Act, upon the report and recommendation of the Chief Engineer of the Board, it is ordered: 1. That in the operation of railway lines where the snowfall is such as to require the running of snowplows or flangers, the company may remove the planks from farm crossings, provided that no such planks shall be removed unless necessary, and shall be replaced by the company in the spring, or as soon as the snow is off the ground.

2. That where it is necessary to operate snowplows or flangers over highway crossings upon railway lines, companies may remove one plank next to the inside of each rail, the same to be replaced in the spring or as soon as the snow is off the ground.

3. That order 6255, Feb. 10, 1909, be rescinded.

EQUIPMENT OF RAILWAY CARS.

8145. Sept. 14.—In the matter of the equipment by railway companies of freight vans with coupler-operating levers and of the cupolas of cabooses with air-gauges and air-controlling valves, upon the report and recommendation of an Inspector of the Board, and upon the hearing of counsel for the G.T.R., C.P.R., N.Y.C. Rd., M.C.R., and Boston & Maine Ry. companies, and what was alleged, it is ordered that railway companies subject to the legislative authority of the Parliament of Canada, operating railways by steam power, each equip, before April 1, 1910, its freight vans with coupler-operating levers, and the cupolas of its cabooses with air-gauges and air-controlling valves; and it is further ordered that every such railway company be liable to a penalty not exceeding $25 for every failure to comply with the foregoing regulations within the time for their coming into force and thereafter.

A Railway to Hudson Bay.

A party of engineers started from Pas Mission, Sask., Oct. 18, for the purpose of locating a line from that point to some point on Hudson Bay. The party is in charge of W. J. Clifford, and is working on behalf of the Dominion Government. It is expected that other parties will be sent out later. The work will be prosecuted throughout the winter, this season being more favorable for survey work in that region than the summer.

The question of the location of the terminals on Hudson Bay is still under consideration by the engineering staff. A statement was made by one of the staff in Winnipeg, Oct. 8, that Fort Nelson and not Fort Churchill would be chosen as the terminus. The distance is 71 miles less than to Fort Churchill, while the cost is estimated at $3,000,000 less. The C.N.R. has a branch connecting with The Pas, and this place is also the objective of other projected lines, notably the G.T.P.R. and G.N.R.

A press report states that the Dominion Government will authorize the starting of work on the construction of the line from The Pas at an early date, and that it will be started this fall. This is hardly likely as the full report of the preliminary surveys has not yet been considered. This report is ready for presentation to Parliament. The Minister of Railways, speaking at Athens, Ont., recently, stated that while it had not yet been decided that the railway would be constructed by the Government, it would certainly be constructed. Before deciding on the terminal, he added, it would probably be necessary to approach the harbors from the outside, and make a careful investigation of their approaches, the depth of water available, the season of open water, and the relative cost of developing a harbor of sufficient capacity to accommodate modern vessels. (Sept., pg. 641.)

During Aug., 11 employes were killed, and 22 injured, in the course of their work on Canadian railways. Of the fatalities, four were due to being run over, three to derailments, and one each to being caught between cars, to a fall, to drowning and to sunstroke, while, of the other accidents, five were due to falls, four each to derailments and to falling material, three to being run over, two to an explosion of powder, and one each to tools, to being caught between cars, to a collision, and to an assault in the railway yards by tramps.

Canadian Ticket Agents' Association.

The 23rd annual meeting was held at Statler's Hotel, Buffalo, N.Y., Oct. 5. Before the business session the members and the ladies accompanying them assembled in one of the hotel meeting rooms, H. Parry, General Agent Passenger Department New York Central Rd., the Chairman-Secretary of the Buffalo local committees, presiding. Mayor Adams welcomed the Association to the city, President R. J. Craig, ticket agent C.P.R., Cobourg, Ont., responding. The business meeting was then proceeded with, President Craig in the chair. After routine proceedings, Secretary de la Hooke presented his report, showing 190 members in good standing against 184 in 1908. The new members outnumbered the withdrawals; nine of the 16 retirements were owing to men moving or giving up agencies and one to death, leaving only six to be accounted for. The financial condition shows signs of improvement. The year's receipts were $415, which with $95.41 balance brought forward and a credit of $69.76 from the Detroit meeting totals $580.17. The expenses were $456.35, leaving a balance of $123.82. Death was unusually busy among the members during the year, Lt. Col. Piche, of Joliette; A. H. Baird, of Paris; and N. Lusher, of Montreal, having passed away. Col. Piche and Mr. Baird were very regular in their attendance at the annual meetings, Mr. Lusher occasionally. The first named was elected First Vice President last year. The report said: "The deceased were so well known to you that it is not necessary to eulogise, beyond saying that they were esteemed as good men and true and they will be much missed at our gatherings. J. N. Bastedo, of the Sante Fe Rd., passed away in February. Though not a member, he rarely missed a meeting. He was much respected, was always cheerful and ever ready to help an agent out of a difficulty. I thing it was Mark Twain who said: 'A man should so live that when he dies even the undertaker will be sorry.' I quite believe that those whose loss we now regret lived such lives. Let us endeavor to do likewise."

W. Bunton, G.T.R. ticket agent, Peterboro, Ont., made a verbal report on his attendance at the American Association of General Passenger and Ticket Agents' meeting at Toledo in September, and expressed his appreciation of the cordial welcome accorded him. He wished it were possible for more of the C.T.A.A. members to attend the A. A. of G. P. and T. A.'s meetings. He had strongly urged the restoration of commission to agents and had pointed out that some of the best ticket agents were those who were engaged in other business. By building up successful businesses in their respective communities they had secured the confidence of their fellow citizens and were in a splendid position to make first-class ticket agents and secure a good volume of business. He urged that Canadian ticket agents should be furnished with transportation on U.S. railways whenever they required it, and he hoped that notwithstanding the existing U.S. laws some way would be found of granting this privilege. He believed that such transportation would be available and also that commissions would be restored. The retiring President of the A. A. of G. P. & T. A. A., G. T. Bell, had expressed himself very strongly in favor of the granting of transportation. Mr. Bunton was accorded a hearty vote of thanks.

President Craig having made a brief address, W. McElroy, C.P.R. Ticket Agent, Peterboro, Ont., gave an interesting talk on "A trip around the world," starting from Peterboro and travelling westward by the C.P.R. to Vancouver, thence by the C.P.R. Empress steamships to Japan and China, or by the Canadian Australian line to Honolulu, Fiji, Brisbane, and thence to Sydney. Passengers by either of these routes would meet again at Colombo, Ceylon. Thence the Mediterranean route would be taken to Naples, and the rail route via Antwerp to London.

In the discussion which followed it was decided that at the next meeting Mr. McNamara, of Walkerton, read a paper on a round the world trip without going outside British territory.

Considerable discussion took place in regard to making the business features of the annual meetings more prominent. It was decided that the executive prepare a list of questions to be discussed and also arrange for the reading of papers on matters of common interest.

It was decided to ask the American Association of General Passenger and Ticket Agents and the Travelling Passenger Agents Association to send delegates to the C.T.A.A. annual meetings in future.

Correspondence was read in reference to the resolution adopted by the Association last year urging that supplements to tariffs be restricted. G. T. Bell, A.P.T.M., Grand Trunk Ry., wrote: "I feel sure that all of the lines desire to limit the number of supplements and we will see what can be done to avoid the necessity of having more than two or three supplements to any one passenger tariff, which, unless the circumstances are very exceptional, is entirely reasonable."

W. Stitt, G.P.A., Canadian Pacific Ry., wrote:—"We can appreciate the difficulties under which agents suffer through the large number that are issued. We try to avoid the issuance of too many as much as possible, but it is difficult to control them. Some tariffs will take weeks to prepare and their cost will mean between $300 and $400. Slight changes take place which have to be given effect to, and were we to issue new tariffs and confine them to issuance of two or three supplements an army of clerks would be required and the cost, as you can estimate from the figures I have given, would be enormous."

G. H. Webster, Secretary Eastern Canadian Passenger Association, wrote:—"As the tariffs of the lines in the E.C.P.A. are re-issued the lines are working to the idea of not having more than one supplement to the new tariffs in effect at any one time."

W. Phillips, G.P.A., Canadian Northern Ry., wrote:—"The resolution suggesting that supplements to passenger tariffs be restricted to two or three is one that I consider should be acted upon, knowing as I do the difficulties encountered by agents in keeping tariffs in proper shape, owing to the numerous supplements issued."

President Bohreer, of the Travelling Passenger Agents Association, said it would give them great pleasure to send a delegate to the C.T.A.A. meetings, and he hoped the latter association would reciprocate. A resolution to this effect was adopted.

A resolution expressing regret at the absence of G. J. Alexander, G.T.R. ticket agent, Richmond, Que., owing to an attack of typhoid, was adopted.

Officers were elected as follows:—President, J. P. Hanley, G.T.R., Kingston, Ont.; 1st Vice President, S. A. Morris, C.P.R., Rodney, Ont.; 2nd Vice President, J. L. Thomson, P.E.I.R., Charlottetown, P.E.I.; 3rd Vice President, A. Philps, G.T.R., Huntingdon, Que.; Secretary-Treasurer, E. de la Hooke, G.T.R., London, Ont.; Auditor, F. M. Hawley, G.T.R., Cobourg, Ont.; Executive Committee, W. Bunton, G.T.R., Peterboro, Ont.; C. E. Horning, G.T.R., Toronto; W. Jackson, C.P.R., Clinton, Ont.; W. McIlroy, Peterboro, Ont. M. McNamara, Walkerton, Ont.

A number of votes of thanks were passed, including the railway companies which furnished transportation, the local committees, etc.

A committee of Buffalo transportation officials made splendid arrangements for the entertainment of the members and their wives. The social programme included on Oct. 5 in the morning a ladies' shopping trip under escort of committee, in the afternoon a steamboat trip on the Niagara River around Grand Island for ladies and others not attending the business meeting, in the evening a theatre party of ladies under escort of committee. The Association's Dutch lunch held in the evening was most enjoyable, embracing among other details an excellent musical programme. On Oct. 6 the party went in the morning by special train to East Aurora, N.Y., where a very interesting time was spent visiting the various Roycroft shops. Mrs. Elbert Hubbard spoke a few words of welcome at the Roycroft Inn, where a most charming luncheon was served. F. W. Churchill, C.P.R., Collingwood, Ont., responded for the Association. On returning to Buffalo in the afternoon the party was taken on an automobile tour of the city, and in the evening enjoyed a theatre party. On Oct. 7 a trip was made by electric car over the Niagara Belt Line, through the Niagara Gorge and Victoria Park, and after lunching at the Clifton Hotel, the party dispersed.

About 75 members and 55 ladies were in attendance.

T. Thauburn, C.P.R., Brampton, Ont., distributed to everyone in attendance some beautiful cut flowers from the Brampton nurseries.

The Association presented H. Parry, G.A.P.D., New York Central Rd., and B. P. Fraser, D.P.A., Pennsylvania Rd., with cut glass decanters, and G. B. Wyllie, T.P.A., Illinois Central Rd., and W. B. Wheeler, G.A.P.D., Lehigh Valley Rd., with silk umbrellas in acknowledgment of their services on the local committees.

Trade and Supply Notes

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The British Boards of Trade and Admiralty have officially endorsed the low pressure automatic acetylene gas buoy system, manufactured by the International Marine Signal Co., Ottawa, and which has already been adopted by the Canadian Government.

O. F. Bannard, President National Trust Co., who has been selected as the Republican candidate as Mayor for New York City, is Chairman of the Board of Directors of the Herring-Hall-Marvin Safe Co., which is about to erect a large plant in Canada in conjunction with the Canadian Fairbanks Co., its Canadian representatives.

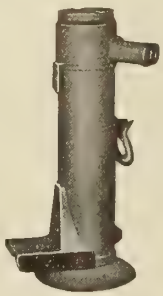
W. R. Toppan, Vice President and General Manager L. M. Booth Co., has closed a contract with the Vandalia Rd. for a Booth water softener, with a treating capacity of 40,000 gallons per hour, and a 350,000 gallon steel storage tank to be installed in connection with the new shops at Terre Haute, Ind. The Booth water softener on the C.R.I. and P. Ry., at Sayre, Okla., has been put into operation.

The Intercolonial Ry., is reported to have made a contract with the North Atlantic Coal Co., Port Morien, N.S., for 500,000 tons of coal.

H & E Patent Ball-Bearing Lifting Jacks

For Railway and Bridge Work, Contractors' and Builders' Use

Foot-Lift



For Convenience, Speed and General Efficiency these Jacks are Unequalled. Are fully guaranteed. Being made of the best grades of Malleable Iron and Steel are strong and durable. Working parts entirely protected insure long wearing qualities. Sizes from 8 to 50 tons now complete. Send for prices and discounts.

Castings of All Kinds

C.P.R. Betterments, Construction, Etc.

Richelieu River Bridge.—Work has been started upon the sub-structure for the bridge over the Richelieu River between St. Johns and Iberville, Que. The bridge will be 1,500 ft. long, and will have a lift span in the centre. It will be made of sufficient width for a second track, but this will not be laid at present. The contractors are Quinlan & Robertson, Montreal. The Dominion Government is carrying out some important works at this point in the way of widening the river so as to improve the navigation, the dredging work being already well under way.

Ottawa, Northern and Western Ry.—The Dominion Parliament will be asked next session to extend the time for the construction of the lines authorized.

Campbellford, Lake Ontario and Western Ry.—With reference to the recent press reports that the C.P.R. would, at an early date, start construction of a line eastward from Toronto, in order to reach a number of lakeside towns and agricultural centres in eastern Ontario, J. W. Leonard, General Manager Eastern Lines, stated that whatever the company might do in the future, for the present there was absolutely no truth in the story. The company was too busy with urgent construction in the west to bother much with eastern lines. "Eventually," he added, "we will double-track much of the line between Montreal and Toronto, and build new lines, but not for some time."

Georgian Bay and Seaboard Ry.—The engineers on the surveys for the location of this line between Victoria Harbor and Peterboro, Ont., have been working at the Peterboro end recently. According to the present survey, the line will meet the C.P.R. main line at Kendry siding, five miles west of Peterboro. The engineers state that they have found a satisfactory route, no steep gradients having been met, and the general condition of the country is favorable. The line comes down from Omemee, cutting through Cavan and Manvers townships.

Ashbridge's Bay, Toronto.—In connection with G.T.R. application to the Board of Railway Commissioners, to construct a siding into the site acquired by the National Iron Works, the C.P.R. asks that provision be made for a connection for its lines. The plans have been referred to the Board's engineer for a report.

London to Windsor, Ont.—The relaying of the track between London and Windsor, Ont., with 85-lb. steel has been completed.

Goderich Freight Sheds.—General Superintendent Oborne had a conference with the Mayor relative to the construction of a freight shed at Goderich. Two suggestions were made, the first being that the curve at the commercial dock be straightened by extending the dock to a line which would allow for the sheds, the other being that a slip be cut along the beach at right angles to the south pier. The company thinks the Government or the town should bear the expense. The question is under consideration.

Fort William Union Station.—A conference was recently held at Winnipeg between the C.P.R., the C.N.R., the G.T.P.R., and the Mayor of Fort William, on the subject of the union station in that city. The object was to arrange that the station which the C.P.R. is building in Fort William, which will be completed next year, shall be used by all three lines. It is understood that an arrangement has been arrived at by which this object can be carried out.

Fort William — Winnipeg Second Track.—The completion of construction of the second track between Fort William, Ont., and Winnipeg, was marked by a special trip over the line made by representatives of the Winnipeg newspapers and others, early in Oct. The contract has been in progress since 1906, a good deal of work of a preliminary character having been done in previous years by the company. The work done includes over 100 miles of rock cuts, 1,069 running feet of tunnels, and 70 miles of diversions. The greatest difficulties met with in the work were the muskegs, some of which took several months to fill. In all, 2,080,000 cubic feet of rock were blasted, and 14,000,000 yards of earth, sand and gravel handled.

Winnipeg Transfer Track.—Work was completed Oct. 15 on a transfer track in St. James, Winnipeg, between the C.P.R. and the G.T.P.R. Up to the present time the exchange of traffic between these two lines has been made at Portage la Prairie, Man.

Manitoba and North Western Ry.—Application will be made next session of the Dominion Parliament for an expension of time for the construction of the line authorized by sec. 1, chap. 126, of the Statutes of 1908. The company will also ask for authority to construct the following additional lines: from near Birtle to near Hamiota, Man., and from near Russel in a northerly or north easterly direction for 150 miles.

Ardal Extension.—Over 70 teams and 100 men are at work on the extension of the Teulon branch to Ardal, Man. It is expected to have the track laid from Komarno, where the track now ends, to Kreutzburg, about 11 miles north, early in Nov.

Schwitzer Junction.—Tenders are under consideration for grading for tracks in the yards at Schwitzer Junction, Man.

Strassburg.—Considerable work is being done in the laying out of yards, etc., at Strassburg, Sask. The company has a number of men engaged in drilling for water, and, it is understood, if a satisfactory supply can be obtained, a divisional point will be established there.

Sheho to Lanigan.—Tracklaying has been completed on the line to connect the old Manitoba and North Western Ry. at Sheho with the Pheasant Hills branch at Lanigan, Sask.

Wilkie to Hardisty.—Tracklaying on the uncompleted portion of the line between these two points, 75 miles, on the line from Saskatoon to Wetaskiwin, has been in progress since Aug. 20. Progress was slow at first on account of the scarcity of labor, but by the middle of Sept. the difficulty was got over and the work went ahead rapidly. Early in Oct. the contractor stated that tracklaying would be completed by Oct. 24. On Oct. 14, it was reported that only 16 miles remained to be laid. It is not expected that the line will be opened for traffic before the end of the year.

Calgary and Edmonton Ry.—The Dominion Parliament will be asked next session to extend the time within which the company may construct its authorized lines. The company will also ask for authority to construct an extension of its Lacombe branch as authorized by sec. 6b, chap. 89, of the Statutes of 1903, to a junction with the C.P.R. Moose Jaw branch at Outlook, Sask., about 200 miles.

Lethbridge-MacLeod Cut-Off.—Ballasting has been completed, and everything is ready for the operation of the line, except the bridge over the Old Man River. This bridge is expected to be ready by Nov. 1.

Lethbridge Northerly. — Tracklaying was commenced at the end of Sept., and it is expected it will be completed into Carmangay by the end of Nov.

Columbia and Western Ry.—Application will be made next session of the Dominion Parliament to extend the time for the construction of the second, fifth and sixth sections of the authorized line.

Nicola, Kamloops and Similkameen Coal and Ry. Co.—The Dominion Parliament will be asked next session to extend the time within which the company may construct the lines authorized by the B.C. Legislature and the Dominion Parliament.

Esquimalt and Nanaimo Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of the extension of the main line to Comox and branches authorized by chap. 14, B.C. Statutes 1884; and the lines authorized by sec. 2, chap. 92, Statutes of Canada, 1906.

The tender of Jense, McDonnel and Timothy, Calgary, Alta., has been accepted for the construction of the second section of the extension from Nanaimo to Alberni. The contract covers the grading and bridging from the Little Qualicum River to Alberni, and is the most difficult portion of the extension. It involves some heavy cutting at the divide, and a good deal of rock work at other points. On the first section of the extension, grading has been completed from near Wellington to Nanoose, 12 miles, and from near Nanoose to French Creek, 13 miles. Between these two points there is some rock cutting not completed. Some track has already been laid at the Wellington end.

The company has completed the sale of 54,000 acres of timber lands in the Cowichan valley, Vancouver Island, to a U. S. company. In connection with the sale, R. Marpole, Vice President of the E. and N. Ry., stated that the company will undertake the construction of a branch from Cowichan Bay, on the east coast of Vancouver Island, to the foot of Cowichan Lake. This line will be 22 miles, to be used mainly for the development of the lumber trade from these limits.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The issue of bonds listed on the New York Stock Exchange has been made principally for the purpose of constructing 50 miles of line extending from the Kettle River in Pine county, Minn., northeasterly through Pine, Minnesota, Douglas and Wisconsin counties to Duluth. (Oct., pg. 739.)

Nova Scotia Southern Ry.—In the course of railway construction work in Caledonia, Queen's county, before the acquiring, completing or construction of the New Germany and Caledonia branch by the Halifax and South Western Ry., certain work was done by the N.S.S. Ry. or by R. G. Hervey, beyond the line since acquired by the H. and S. W. Ry. with resulting injury to the lands of several persons. No claims for these injuries were made at the time the commissioner was appointed in 1903 to adjust the claims. Some of the claimants, to whom awards were made, have failed to apply for the money awarded them, and last session of the Nova Scotia Legislature an act was passed authorizing the use of the unclaimed awards for compensating the owners of lands who did not put in claims originally.

The International Railway Fuel Association has decided to hold its second annual meeting at Chicago, Ill., in May, 1910.

In carrying out what are known as No. 1 repairs on a locomotive, the C.P.R. machinists at the Winnipeg shops recently completed same, in about 2½ days, which is claimed to be a record for the continent, the previous best time being seven days.

The British North America Mining Co. will apply next session of the Dominion Parliament for power among other things, so far as it is necessary or useful for its purposes, to construct and operate tramways, telegraph and telephone lines, to acquire steam and other vessels, and to construct wharves, piers, etc.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments.

Alaska Central Ry.—In connection with the reported purchase of this railway by the Sovereign Bank, Toronto, now being wound up, it is stated that the purchaser will fix up the 100 miles already constructed and proceed with the construction of the additional 350 miles necessary to carry it to the copper mining district at the Tanana River. It was to reach these fields that the construction of the line was originally undertaken. (June, pg. 413.)

Alberta and Great Waterways Ry.—C. Goddard, who has completed the surveys for the Canada Western Ry., has opened an office in Edmonton, Alta., and is in charge of the location surveys of this projected railway. An Edmonton dispatch states that over twenty engineers are making surveys for the section of the line between Edmonton and Lac la Biche, Alta.

An Edmonton dispatch of Oct. 8 says there is good reason to believe that financial affiliations have been made between this company and the Canada Western Ry. Co., and that a line will be constructed from Edmonton to Calgary to connect them. (Oct., pg. 743.) (See also Canada Western Ry.)

Algoma Central and Hudson's Bay Ry.—The Superintendent and the Chief Engineer have been engaged recently in looking over the located line to connect the Josephine Mine, where the company's Michipicoten branch now terminates, with the C.P.R. near Grasset station, Ont. A survey party has been out all summer, and the visit is for finally passing upon it. It is expected an announcement will be made at an early date respecting construction, not only of this piece of line, but also of the section of the main line from the present end of track to the junction with the Michipicoten-C.P.R. line. (Sept., pg. 649.)

Canada and Gulf Terminal Ry.—We are advised that construction is proceeding satisfactorily on the first section of 10 miles on this railway. The line starts near St. Flavie, on the Intercolonial Ry., and the 10 miles under construction will bring it to Little Metis, Que. It is expected to have this section completed in time for the tourist traffic of next season. The grading and approaches to the bridge over the Metis River are being finished, and the bridge itself is under construction. (Oct., pg. 743.)

Canada Western Ry.—The surveys for a line from Calgary to the International boundary are reported to have been completed, also surveys for a connecting line from the International boundary to Butte, Mont. The preparation of construction plans is being proceeded with, C. Goddard, Edmonton, Alta., being the engineer in charge. It is understood that tenders for construction will be asked for at an early date. The route as laid out starts at Calgary, runs about 20 miles west and turns due south to The Gap, passing between the Porcupine Hills and the Livingstone range. From The Gap it continues parallel with the C.P.R., crossing the Crow's Nest Pass branch between Cowley and Pincher, to Pincher Creek. From this point it takes a southeasterly direction to the International boundary. It is reported that for the present connection will be made in Montana with the Chicago, Milwaukee and Puget Sound Ry. Among the promoters of the undertaking are F. B. Lynch, O. A. Robertson, and T. E. Kenaston, St. Paul, Mo. These men are interested in a number of land, coal and lumber companies at Taber, Red Deer, Alta.; Nelson, Revelstoke and Fernie, B.C. (Oct., pg. 743.) (See also Alberta and Great Waterways Ry.)

Diamond Ry. Coal Co.—The last spike of the line constructed by the company, from the C.P.R. Crow's Nest branch near Lethbridge, Alta., to the coal fields in tsp. 10, range 21, west 4th p.m., was driven Oct. 14, by the wife of the Lieut.-Governor. The ceremony took place at Diamond City, which is the name of the mining town at the terminus of the line. The company's mine has been developed, and after the spike driving ceremony the coal tipple was started and a car loaded up for shipment. T. Underwood, Calgary, Alta., is Managing Director. (Oct., 1908, pg. 711.)

Eastern Townships Ry.—The Dominion Parliament will be asked next session to extend the time within which the company may construct the lines authorised by section 8, chap. 84 of the statutes of 1906-07. L. R. Lavergne, Arthabaska, Que., is solicitor for the company. (July, pg. 475.)

Edmonton, Dunvegan and British Columbia Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of lines authorized by section 71, chap. 85 of the statutes of 1907. Pringle and Guthrie, Ottawa, are solicitors for the company. (July, pg. 475.)

Erie, London and Tillsonburg Ry.—Application will be made next session of the Dominion Parliament for an extension of time within which it may construct its authorised line. The notice is signed by J. H. Teall, of Tillsonburg, Ont. (July, pg. 475.)

Kamloops and Yellow Head Pass Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of the lines authorised by section 8, chap. 115 of the statutes of 1906. Tupper and Griffin, Vancouver, B.C., are solicitors for the company. (July, pg. 477.)

Lillooet to Fort George.—Application will be made next session of the B.C. Legislature for the incorporation of a company for the construction of a railway from Lillooet, northerly by way of the Fraser River valley or other feasible route, to Fort George, B.C., together with all necessary powers. A. McEvoy, Vancouver, is solicitor for the applicants.

Nelson River Ry.—Application will be made next session of the Dominion Parliament for the incorporation of a company for the construction of a line from Lake Winnipeg near its outlet into the Nelson River, or near the discharge of the Saskatchewan River, or from a place between, to the Hudson Bay Ry. (so called) to be located by the Dominion Government. The company also asks power to construct or acquire vessels and operate them from Winnipeg and other places on the Red River and Saskatchewan River to Lake Winnipeg to connect with such line; to construct tramways at points on the Nelson and Saskatchewan Rivers where necessary to transport freight and passengers around rapids; to operate vessels on the Nelson River, and from the mouth of the river to any other port. The company also asks for a number of other powers with the object of developing the country through which the proposed line will pass, Bonnar, Trueman and Thomburn, Winnipeg, Man., are solicitors for the applicants.

Northern New Brunswick and Seaboard Ry.—We are advised that the portion of this railway now under construction begins at the Intercolonial Ry., four miles south of Bathurst station, and extends up the valley of the Nipisiguit River, 17 miles, to the Canada Iron Corporation's ore deposits. The gradient is 1% with the load, and the maximum curvature 955 ft. The bridges are of steel, the culverts of reinforced concrete, and the line will be laid with 85-lb steel rails. Ore will be shipped at Bathurst and Newcastle. Some dredging will have to be done at Bathurst before ore shipments can be made. About one mile below Newcastle, on the Miramichi harbor, the Canada Iron Corporation is constructing ore discharging docks, including trestle approach, a 10,000-ton ore pocket, and an endless bucket conveyor; to reach which a line, one mile long is being constructed from Newcastle station. J. J. Taylor is engineer in charge. (Oct., pg. 745.)

Ottawa, Brockville and St. Lawrence Ry.—Application will be made next session of the Dominion Parliament for an extension of time within which the company may construct the railway authorized by chap. 71 of the Statutes of 1900. (Oct., 1908, pg. 713.)

Owen Sound and Meaford Ry.—At a public meeting in Owen Sound, Oct. 12, a resolution was passed favoring the granting of aid towards the construction of a projected railway from Owen Sound, Ont., easterly, to the extent of $400,000, either by way of an investment or the guarantee of bonds. An opinion was expressed in favor of making the connection with the G.T.R. at Thornbury instead of at Meaford, on account of the easier gradient. An alternative proposal was to construct a line between the C.P.R. station in Owen Sound and that company's Sudbury branch.

The distance between Owen Sound and Meaford is 25 miles, and the O.S. and M. Ry. has a charter for the construction of such a line. The Manitoulin and North Shore Ry. and the Huron and Ontario Ry. (electric) have charters covering the same route. The Dominion Parliament has voted a subsidy on the usual terms for the construction of a line between Owen Sound and Meaford. (July, pg. 479.)

Pine Pass Ry.—Application will be made next session of the Dominion Parliament for the incorporation of a company to construct a line from Edmonton, Alta., northwesterly to junction of the MacLeod and the Athabaska Rivers, thence to Grande Prairie, and westerly to Pouce Coupe Prairie and continuing through Pine River Pass, thence southwesterly to Fort George on the Fraser River, B.C. The company will also ask for power to construct and navigate steam and other vessels; to construct bridges for railway and general traffic and to charge tolls for their use. Smith and Johnston, Ottawa, are solicitors for the applicants.

Prince Albert and Hudson Bay Ry.—Application will be made next session of the Dominion Parliament for an act amending section 7 of its act of incorporation by striking out the words "thence crossing the Saskatchewan River," and providing for an extension of the line from Prince Albert, Sask., by the most feasible route southerly and westerly to Calgary, Alta., and also for a branch from its authorised line southerly to Melfort, Sask., on the C.N.R. It is also desired to issue bonds to the amount of $50,000 a mile, to have power to make agreements with other companies, and to have an extension of time within which it may construct its authorised line. Smith and Johnson, Ottawa, are solicitors for the applicants. (Feb., pg. 103.)

Quebec Central Ry.—The annual report presented to the annual meeting in London, Eng., Oct. 13, states that the extension from St. George to Justine was commenced in the spring, and satisfactory progress having been made, it is expected that this portion of the line will be open for traffic early in 1910.

Queen Charlotte Islands Ry.—A syndicate has been formed in Seattle, Wash., with a capital of $1,000,000 to develop the resources of the Queen Charlotte Islands, B.C. The syndicate owns 20,500 acres of timber lands on the islands, which it is proposed to develop by the immediate construction of a railway. The section of the line which it is proposed to construct at once will be 17 miles and terminate on Lena Island,

AGENTS FOR THE

Flannery Bolt Company, = Pittsburgh, Penn., U.S.A.

where wharves, etc., will be constructed. J. A. Moore, Seattle, is one of the leading members of the syndicate. The Queen Charlotte Islands Ry. was incorporated by the B.C. Legislature in 1903. It has power to construct a line from Rennell Sound to Skidegate Harbor, and from any point on the line to Massett Inlet, all on Graham Island, one of the Queen Charlotte Islands. The company obtained extension of time for construction in 1905 and 1907. The original incorporators of the company were M. King and J. Irving, Victoria, B.C. (June, 1907, pg. 409.)

Queens County Ry.—The Nova Scotia Legislature last session incorporated a company with this title, the provisional directors being J. Walker, New Market, N.H.; H. W. Anderson, Exeter, N.H.; and V. J. Paton, Bridgewater, N.S. It is authorised to acquire the Sable Lumber Co.'s railway lines, extending from Wilkins Siding to its timber lands, to extend same, and generally to construct a line or lines from the Halifax and South Western Ry. between Liverpool and Shelbourne to Sable Lumber Co.'s lands. It is also given various other powers with its capital stock fixed at $100,000, and authority to issue bonds.

Reid Newfoundland Ry.—A survey is being made for the location of a branch line in the Bonavista Bay district. The new line, it is understood, will commence at Shoal Harbor, and run along to Goose Bay, across country to Catalina, and again along the shore to Bonavista, Nfld., about 80 miles. The survey is in charge of J. Powell.

W. D. Reid, together with members of the Government and the Legislature, arrived at Shoal Harbour, Nfld., Oct. 12, and started on a trip of inspection over the route surveyed for the new branch to Bonavista.

St. Lawrence and Ungava Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a line from the St. Lawrence River in Berthier county, Que., northerly through Joliette, Berthier, Maskinonge, St. Maurice and Champlain counties to the northern boundary of the province, thence into the Ungava district, northeasterly to Ungava Bay. The company will also ask for power to construct telegraph and telephone lines, to operate steam and other vessels, to construct docks, wharves, etc., and to carry on a number of other businesses. Greenshields, Greenshields and Languedoc, Montreal, are solicitors for the applicants.

Superior and Western Ontario Ry.—We are advised that the line authorized to be constructed by this company is to extend from Velora Jct. on the G.T.P.R. Lake Superior branch to the National Transcontinental Ry., north of Sturgeon Lake, Ont. The line will be about 60 miles long, and will pass through a partially settled district around Sturgeon Lake. The company has this year made a beginning by constructing a portion of the line, from Velora to the south end of Sturgeon Lake, at O'Brien, where it connects with the New Ontario Transportation Co.'s vessels trading to all parts of the lake. The company is now doing a large business, chiefly from railway contractors and prospectors on Sturgeon Lake. The portion of the line opened has been carrying traffic since Aug. 1. Since the opening of the line the name of Velora Jct. has been changed to West Ontario Jct. The officers of the company are:—President, A. McDougall; Vice President, J. J. Whalen; General Manager, J. A. Whalen. (Oct., pg. 745.)

Temiskaming and Northern Ontario Ry.—After considerable delay there is now a prospect of the early construction of the spur line to the wharf at Haileybury. The Commissioners began construction, but a body of citizens objected to the line crossing the water front and the work was stopped. The matter came before the Ontario Railway and Municipal Board Sept. 30, and an order has been made authorizing construction.

The construction of the new station at Cobalt is progressing rapidly. It was announced that half of the structure would be ready for occupation Oct. 30.

Tenders will be asked at an early date for the construction of the spur line to the wharf at New Liskeard. (Oct., pg. 745.)

Thessalon and Northern Ry.—The officers and directors are:—President, D. J. Sandie; Secretary, A. A. Burke; directors, W. H. Taylor, T. Buchanan, H. Appleton, J. B. Dobie, C. A. Keast. The company has constructed a line from Thessalon to the C.P.R., 3.50 miles. This piece of line is being operated by the C.P.R. to and from the town. (Oct., pg. 745.)

Toronto Eastern Ry.—Application will be made to the Dominion Parliament to incorporate a company with this title to construct a line from Toronto, easterly through Whitby, Oshawa and Bowmanville to Cobourg, Ont., with branches from Cobourg to Peterboro, Scarboro tp. to Markham, Stouffville or Uxbridge; from Oshawa northerly, via the eastern side of Lake Scugog, to Lindsay; from Oshawa southerly to Lake Ontario. The company desires that the lines be declared to be for the general advantage of Canada, and that it be authorized to amalgamate with other companies. L. K. Murton, Oshawa, Ont., is solicitor for the applicants.

Railway Rolling Stock Notes.

The C.N.R. has placed an order with Rhodes, Curry Co., Ltd., Amherst, N.S., for five snow plows.

The I.C.R. has ordered 30 Hart-Otis steel dump cars from the Dominion Car and Foundry Co., Montreal.

The Crossen Car Mfg. Co., Cobourg, Ont., has completed delivery of a recent C.N.R. order for 200 box cars and 15 cabooses.

The Montreal Locomotive Works, during the month preceding Oct. 23, delivered locomotives, as follows:—Temiscouata Ry., two; Grand Trunk Pacific Ry., seven; Intercolonial Coal Mining Co., one; New Canadian Co., one; E. and W. Reade Co., one.

The Temiskaming and Northern Ontario Ry. is asking the prices for 12 cinder cars and 50 box cars. Recent additions to rolling stock include five locomotives, nos. 127 to 131, from the Canadian Locomotive Co., Kingston, Ont., and five vans, nos. 63 to 67, from the Silliker Car Co., Halifax, N.S.

The C.N.R., between Sept. 15 and Oct. 15, received the following additions to rolling stock, one first-class coach and eight cabooses from Rhodes, Curry Co., Amherst, N.S.; 20 box cars and 15 cabooses from the Crossen Car Mfg. Cobourg, Ont., and one first-class coach from the Silliker Car Co., Halifax, N.S.

The G.T.P.R., since July 1, has received 25 mogul locomotives from the Canadian Locomotive Co., Kingston, Ont., 25 eight wheel passenger locomotives from the Montreal Locomotive Works; five tourist cars, five colonist cars, 138 box cars, 50 refrigerator cars, 100 stock cars and 50 cabooses from the Canada Car Co., Montreal.

The C.P.R., between Sept. 13 and Oct. 14, placed orders for rolling stock, as follows:—10 consolidation locomotives, three Pacific locomotives, 83 box cars, 48 flat cars, four stock cars, one refrigerator car, one pile driver and two second class cars at its Angus shops, Montreal; five vans and one flanger at its Farnham shops, Que.

The C.P.R., between Sept. 13 and Oct. 14, received the following additions to rolling stock: 177 box cars, seven first class and smoking cars, three box baggage cars, three mail and express cars, seven refrigerator cars and one hump switching locomotive from its Angus shops, Montreal; 125 steel frame flat cars from the Dominion Car and Foundry Co., Montreal; and nine D-10 locomotives from the Montreal Locomotive Works.

The Dominion Car and Foundry Co., Montreal, is building two 50-ton flat cars with steel floors for carrying slag for the Hamilton Steel and Iron Co., Hamilton, Ont. Following are the pricipal dimensions, etc.:

Length	50 ft.
Width	9 ft.
Journal boxes	Cast iron, M.C.B.
Wheels	Cast iron, M.C.B.
Axles	Steel
Couplers, bolsters and brakebeams	Simplex
Brakes	Hand, only

The Dominion Car and Foundry Co., Montreal, has received an order from the Dominion Iron and Steel Co., for 40 all steel hopper ore cars, of which the following are the chief particulars:

Capacity	50 tons
Length inside	28' 0"
Width inside	9' 6"
Centre to centre of trucks	23' 2"
Length inside to inside of coupler knuckles	33' 0"
Top of rail to top of sides	9' 10"
Couplers	Tower
Brakes	Hand only
Trucks	Arch bar M.C.B.
Wheel base	5' 0"
Journal boxes	Cast iron
Bolsters and brake beams	Simplex
Axles	Steel
Brake shoes	Cast Iron

The Esquimalt and Nanaimo Ry. has ordered 20 all steel drop bottom coal cars from the Dominion Car and Foundry Co., Montreal, of which the following are chief particulars:

Length inside	36' 9½"
Width inside	9' 6"
Height inside	5' 0"
Centre to centre of trucks	26' 0"
Length over end sills	38' 10"
Height top of rail to top of side	9' 4 13-16"
Air brakes	Westinghouse K.C. 1012
Couplers	Simplex 5" by 5"
Draft springs	M.C.B. class G
Truck wheel base	5' 6"
Truck bolsters	Simplex
Side bearings	Susemihl frictionless
Brakebeams	Simplex
Wheels	Cast iron
Axles	Steel
Journals	5½" by 10"
Journal boxes	McCord M.I.

The G.T.R., since July 1, has placed orders for 10 Pacific type locomotives, 15 compound consolidation locomotives, with the Montreal Locomotive Works, and 25 mogul locomotives with the Canadian Locomotive Co., Kingston, Ont. Following are chief particulars of the Pacific type locomotives:—

Tractive effort	31,559 lbs.
Weight in working order	210,000 lbs.
Weight on drivers	139,000 lbs.
Weight of engine and tender	353,300 lbs.
Wheel base, driving	13' 4"
Wheel base, engine and tender	62' 9½"
Cylinders	22"×28"
Wheels, diam. over tires	73"
Journals	9½"×12"
Truck journals, back	8"×14"
Truck journals, front	6½"×10½"
Boiler, type	Extended wagon top
Boiler, pressure	200 lbs.
Firebox	96⅞"×75¼"
Tubes, no. and diam.	308, 2"
Tubes, length	20' 6"
Heating surface, tubes	3,306 sq. ft.
Heating surface, firebox	169 sq. ft.
Heating surface, total	3,475 sq. ft.
Grate area	50.62 sq. ft.
Tender, tank	Water bottom
Frame	10" channel, steel
Wheels, diam.	34"
Journals	5½"×10"
Capacity, water	7,000 gals.
Capacity, coal	10 tons

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

DRUMMOND, McCALL & CO.
GENERAL SALES AGENTS

MAINLY ABOUT PEOPLE.

Jay Gould has been elected a director of the Wabash Rd., succeeding W. B. Sanders retired.

Stewart Gordon, formerly in the C.P.R. hotel system service, is living in North Devon, Eng., where he has leased a place.

W. N. Graham, son of the Minister of Railways and Canals, was married at Cannington, Ont., Oct. 14, to Miss N. Dure.

Miss N. Lewis, granddaughter of Collingwood Schreiber, C.M.G., was married at Ottawa, Oct. 13, to T. F. Ahearn, Ottawa.

F. A. Mills, cashier Great Northern Ry., Brandon, Man., was arrested there recently, charged with embezzling $350 from the company.

J. W. Lyon, who represents the Guelph City Council, on the board of the Guelph Junction Ry., has occupied that position for over sixteen years.

W. D. Reid, President Reid Newfoundland Co., returned to Newfoundland at the end of Sept., after spending a few weeks in Great Britain.

J. M. Gibbon, C.P.R. Advertising Agent, London, Eng., who has been spending some time in Canada, returned to England at the end of Sept.

F. H. McGuigan, formerly of the G.T.R., and now contractor to the Ontario Hydro Electric Commission, is living at the Prince George Hotel, Toronto.

E. B. Bartlett, one of the engineers engaged on the National Transcontinental Ry., died at Weymontachene, Que., Oct. 8, and was buried at Quebec, Oct. 12.

Lord Strathcona has given his old home farm at Silver Heights to the Selkirk Centennial Exhibition, after which it is to be used as a public park.

R. B. Bennett, Calgary, Alta., stated Oct. 4, that there was no truth in the report that he had been appointed General Solicitor C.P.R. at Montreal.

D. Cummings, G.N.R. ticket agent, Winnipeg, was reported missing, Oct. 15. It was stated that he had been despondent since the recent death of his wife.

W. M. Porteous, C.P.R. Freight Agent, St. Louis, Mo., who recently underwent an operation for the removal of a growth near the spine, has returned to business.

F. H. Phippen, General Counsel Canadian Northern Ry., who removed from Winnipeg to Toronto recently, has leased J. K. Osborne's house, Clover Hill, Toronto.

N. A. Rhodes, one of the founders of the firm of Rhodes, Curry & Co., car builders, Amherst, N.S., died Sept. 30, from the effects of an operation for appendicitis.

F. C. Hammond, of Toronto, eldest son of the late H. C. Hammond, President of the Northern Navigation Co., was married at Kingston, Ont., recently, to Miss K. S. Saunders.

L. R. Thompson, Travelling Freight and Passenger Agent Eastern Steamship Co., St. John, N.B., and Mrs. Thompson, celebrated the twenty-fifth anniversary of their wedding, Sept. 25.

R. Kerr, Passenger Traffic Manager C.P.R., returned to Montreal, Oct. 16, from Chicago, Ill., where he had been attending the meetings of the Transcontinental Passenger Association.

F. B. Nixon, formerly train dispatcher, Central Vermont Ry., St. Albans, Vt., has been appointed train dispatcher for the Colorado Springs and Cripple Creek District Ry., at Cripple Creek, Col.

D. McNicoll, Vice President and General Manager, and J. W. Leonard, General Manager Eastern Lines C.P.R., left Montreal, Oct. 12, for an inspection trip over the company's lines in Ontario.

R. L. Black was mentioned in our last issue as foreman of the freight car repair shop I.C.R., Moncton, instead of R. L. Blake. The compositor's error was unfortunately overlooked in proof reading.

F. Sturdee, of the C.P.R. Passenger Department, Montreal, was presented with a number of cut glass articles, Oct. 16, by transportation officials of the city, on the occasion of his forthcoming marriage.

C. H. F. Plummer, Manager Canadian Lake Transportation Co., Toronto, who recently underwent an operation for appendicitis, is progressing favorably, and it is expected he will be able to resume business shortly.

E. E. Fisher, who retired from the position of General Superintendent of the Toronto, Hamilton and Buffalo Ry. recently, after fifteen year's service, died in the city hospital, Hamilton, Ont., Oct. 13, from the effects of an operation.

W. Mackenzie, President Canadian Northern Ry., has given $500 towards the erection of a memorial tower at Halifax, N.S., in connection with the celebration of the 150th anniversary of the establishment of self government in the province.

J. H. Clergue, father of F. H. Clergue and B. J. Clergue, who were associated with the starting of the various industrial and railway enterprises at Sault Ste Marie, Ont., now carried on by the Lake Superior Corporation, died at Sault Ste. Marie, Sept. 25, aged 79.

G. A. Taylor, railway contractor, who died at Brockville, Ont., Oct. 13, was the first Traffic Manager of the Canada Atlantic Ry. In addition to contracts for the C.P.R., G.T.R. and Intercolonial Ry. he constructed the Coteau du Lac section of the Soulanges canal.

S. Harris and C. Burnside, two of the engineers engaged on the construction of the Guelph and Goderich Ry. and now engaged on the construction of a Chinese transcontinental railway, have been called to Toronto to give evidence in the action brought by M. A. Pigott against the G: and G. Ry.

G. Beach, who was recently arrested charged with stealing $835 from the C.P.R., at Fredericton, N.B., where he was employed as a ticket clerk, was released from custody toward the end of Sept., no evidence being offered against him when the case came up for trial. It was stated that the shortage has been refunded.

D. B. Lindsay, who has been connected with the Temiscouata Ry., for many years, and since Jan., 1901, as Secretary and General Manager, Riviere du Loup, Que., has resigned the position of General Manager, on account of ill health and advancing years, but will retain his connection with the company, holding the position of Secretary.

L. E. Lavoie, who has been appointed General Purchasing Agent Intercolonial Ry., Ottawa, was born June 22, 1879, and entered I.C.R. service Oct., 1894, since when he has been, to Oct., 1902, clerk; Oct., 1902, to Sept., 1904, secretary to General Superintendent; Sept., 1904, to Oct., 1909, chief clerk to General Superintendent.

H. W. Brodie, Assistant General Passenger Agent C.P.R., Winnipeg, has been presented with a gold watch by the members of the British Association attending the recent meetings at Winnipeg. The watch bears the inscription, "H. W. Brodie, in acknowledgement of kind attentions, British Association Western Excursion, 1909."

W. J. Oldham, whose appointment as Supervisor of Bridges, Temiskaming and Northern Ry., North Bay, Ont., was announced in a recent issue, was born at Ellenburgh, N.Y., Sept. 13, 1868, his record being, June, 1887, to June, 1891, bridge and building carpenter, C.P.R.; June, 1891, to June, 1909, bridge and building foreman, same road.

M. Manion, Prescott, Ont., reputed to be the oldest locomotive engineer in the C.P.R. service, was presented with a silver cup and an address by the Brotherhood of Locomotive Engineers and Firemen recently, in recognition of his honorable record. He entered the St. Lawrence and Ottawa Ry. service in 1863, and remained in the service when that railway was taken over by the C.P.R.

H. Shearer, who has been appointed Superintendent Canadian Division M.C. Rd., St. Thomas, Ont., entered that company's service in 1891, since when he has been successively, Agent at Chicago Heights, Michigan City and Jackson, Travelling Freight Agent, chief clerk in General Freight Department, Chicago, Ill., and latterly secretary to the General Manager, Detroit, Mich.

A. M. Travis, I.C.R. station master at Hampton, N.B., who will shortly be retired on the pension fund, entered the service of the old European and North American Ry., May, 1863, as telegrapher at Rothesay, N.B., and served in that capacity, later, at Salisbury and Anagance, and, until May, 1868, as trackmaster at St. John. Since May, 1868, he has acted as station master at Hampton.

M. Hoar, who has been in the employ of the Intercolonial Ry., and its predecessor, the European and North American Ry., for about 37 years, will, it is reported, be placed on the pension fund, Nov. 1. He was employed in connection with the first survey of the line, in 1853, and subsequently drove the stage coach between St. John and Moncton. He has been connected with the track department the whole of the time, the first three years being spent at Dorchester, and the remainder at Sackville, N.B.

G. H. Anthony, who has been appointed Agent Pere Marquette Rd., Minneapolis, Minn., was entertained to dinner by a number of railway men and shippers of Winnipeg, Sept. 30, on the occasion of his leaving that city, where he had been acting as Agent Wisconsin Central Ry., and who since its acquirement by the Minneapolis, St. Paul and Sault Ste. Marie Ry., had acted for that company. In the course of the evening he was presented with a travelling bag, and Mrs. Anthony with a vase.

N. L. Rand, heretofore Master Mechanic Intercolonial Ry., Moncton, N.B., has retired on the pension fund. He was born at Shediac, N.B., Oct. 28, 1843, and entered railway service in 1859, since when he has been, to 1866, apprentice European and North American Ry., Shediac, N.B.; 1866 to 1875, locomotive engineer same road and its successor the Intercolonial Ry.; 1875 to 1897, roundhouse foreman, Moncton, N.B.; 1897 to 1902, road foreman of engines; 1902 to 1909, Master Mechanic, Moncton, N.B.

"'Cluny' McPherson left for Montreal last night in his private car, in response to a telegram from headquarters. Although he absolutely declined to say anything that would indicate the nature of the business, it is believed that he is slated for the vice presidency of the big concern. It is an open secret that two big transcontinental enterprises have been bidding strong for the aggressive Scotchman's services in connection with the management of their roads." (Ten years hence, Winnipeg Tribune.)

H. H. Adams, who has been appointed General Superintendent Toronto, Hamilton and Buffalo Ry., Hamilton, Ont., was born at Detroit, Mich., Aug. 13, 1876, and entered railway service, July, 1899, as

Bowser Pumps in a Railway Storehouse

Greater Net Earnings

A big gross income is a good thing, but it is what is left after all expenses are deducted that counts.
Reduce your operating expenses, and thereby increase your net income by installing

The Bowser System of Oil Storage

The BOWSER reduces the cost of labor involved in handling the oil 75 per cent. It reduces the oil bills 10 to 25 per cent. It also reduces the insurance rate by decreasing the fire hazard.
Bulletin 18 tells all about it. Sent upon request to those interested.

draughtsman in the M.C. Rd. After serving in various capacities in the engineering department, he was appointed Assistant Chief Engineer, Mar., 1902; Secretary to the General Superintendent, Nov., 1902; Assistant Superintendent, Canadian Division, Jan. 1, 1903, and Superintendent Canadian Division, Jan., 1904.

R. L. Latham, who has been appointed Chief Engineer, Toronto, Hamilton and Buffalo, Ry., Hamilton, Ont., was born at Toronto, Nov. 20, 1876, and graduated in civil engineering from the School of Practical Science in 1889, taking the degree B.A. Sc., in 1901. During portions of 1898, 1899 and 1900 he was engaged in the City Engineer's office, Toronto, and on re-location surveys for C.P.R. Ontario lines, and entered T. H. and B.R. service, May 1, 1901, as Assistant Engineer, which position he held until his present appointment.

C. H. N. Connell, who has been appointed Engineer of Maintenance, Canadian Northern Quebec, and Quebec and Lake St. John Rys., was born at Woodstock, N.B., Aug. 26, 1876, his railway record being, from Aug. to Oct., 1897, chainman, C.P.R. Crow's Nest Pass branch; Oct., 1897, to Nov., 1898, clerk in Division Engineer's office, same road; Nov., 1898, to Aug., 1899, topographer, C.N.R. survey between Port Arthur and Winnipeg; Aug., 1899, to Oct., 1900, Assistant Resident Engineer on construction, same road; Dec., 1900, to Nov., 1902, Resident Engineer on construction, Algoma Central and Hudson Bay Ry., Sault Ste. Marie, Ont.; May, 1903, to Oct. 1, 1909, Locating and Resident Engineer, Alberta Ry. and Irrigation Co., Lethbridge, Alta.

Miss Muriel Acton Burrows, second daughter of the Managing Director of the Railway and Marine World, sailed from Montreal, Sept. 25, en route to Paris, where she was to spend a few weeks with C. E. M. and Mrs. Hodge, at whose wedding she was the bridesmaid in May, and then return with them to England, and remain with them there for some months. While staying in London, on the way, for a few days, she was attacked with meningitis. Her uncle, A. J. Burrows, went to her from Kent; Mr. and Mrs. Hodge hurried from Paris, and the highest specialist advice was secured, but the case was pronounced hopeless, and her father left Toronto, Oct. 15, to sail by the fastest boat available, in the hope of being able to reach London in time to see her alive, but a cablegram received Oct. 20 announced that death took place on that date.

C. G. Bowker, whose appointment as Assistant Superintendent G.T.R. Middle Division, London, Ont., was announced in our last issue, was born at Medford, N.J., Apr. 21, 1871, and entered railway service in May, 1888, since when he has been, to Oct., 1890, operator, Philadelphia and Reading Rd.; Oct., 1890, to 1893, division operator, New England Division, same road; 1893 to 1897, in charge of telegraph lines and electrical service, Buffalo Division, Lehigh Valley Rd.; 1897 to May, 1900, train dispatcher, Lehigh Valley Rd., Buffalo, N.Y.; May, 1900, to Feb., 1902, train dispatcher, G.T.R., London, Ont.; Feb., 1902, to Nov., 1905, train dispatcher, G.T.R., Durand, Mich.; Nov., 1905, to May, 1907, Chief Train Dispatcher, G.T.R., Stratford, Ont.; May, 1907, to Sept., 1909, Trainmaster, G.T.R., Stratford, Ont.

F. M. Spaidal, General Superintendent Canadian Northern Quebec Ry., and Quebec and Lake St. John Ry., Quebec, whose portrait appears on the first page of this issue, was born at Gananoque, Ont., Nov. 13, 1858, and entered railway service in 1876, since when he has been, to June 1883, operator, agent and dispatcher G.T.R., at various points between Kingston, Ont., and Montreal; June, 1883, to June, 1885, agent and dispatcher Union Pacific Rd., Butte, Mont., and other points; Aug. to Dec., 1885, operator C.P.R., Ottawa; Dec., 1885, to June, 1893, dispatcher C.P.R., Ottawa; June, 1893, to Sept., 1897, Chief Dispatcher C.P.R., Ottawa; Sept., 1897, to Oct., 1903, Trainmaster C.P.R., Ottawa; Oct., 1903, to Aug., 1906, Superintendent, District 2, C.P.R. Eastern Division and Montreal Terminals, Montreal; Aug., 1906, to Dec., 1907, Superintendent Canadian Northern Ontario Ry., Toronto; Dec., 1907, he was appointed General Superintendent Canadian Northern Quebec Ry., Montreal, and Mar., 1908, his headquarters were moved to Quebec, and on the acquiring of the Quebec and Lake St. John Ry., Mar., 1908, he was also appointed General Superintendent of that railway.

Railway Finance, Meetings, Etc.

Alaska Central Ry.—The judicial sale of this uncompleted railway was made at Valdez, Alaska, Oct. 10, and press reports state that the purchaser was the Sovereign Bank of Canada. The bank holds $2,400,000 of the $4,000,000 of bonds issued, and F. G. Jemmett, the present manager of the bank, and D. M. Stewart, the former manager, were present at the sale to protect the interests of the bank. It is stated that the investment of its funds in this and some other railway bonds brought about the difficulties of the Sovereign Bank.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for Aug., $39,533, against $33,835 for Aug., 1908. Cumulative net profits for two months ended Aug. 31, $69,536. Railway traffic receipts for Sept., $33,567, against $32,315; and for three months ended Sept. 30, $88,189.

Canadian Northern Ontario Ry.—A supplementary trust deed, dated Sept. 29, amending the trust deed of June 28, by substituting one-tenth as the proportion of stockholders required to requisition a meeting instead of one-fifth as the original deed required, has been filed with the Secretary of State at Ottawa.

Dominion Atlantic Ry.—Gross earnings for Aug., $158,300, against $152,237 for Aug., 1908. Aggregate gross earnings for eight months ended Aug. 31, $787,150, against $767,789 for Aug., 1908.

Duluth, South Shore and Atlantic Ry.—The annual report presented at the meeting of shareholders, held at Marquette, Mich., Sept. 16, shows that the company owns 517.44 miles of main lines, 69.28 miles of branch lines, and has trackage rights over 6.66 miles, making a total of 593.38 miles operated. The equipment consists of 82 locomotives, 65 passenger cars, 2,839 freight cars, and 100 miscellaneous cars. For the year ended June 30, the net revenue from operation was $739,819.79, an increase of $26,125.26 over the previous year. the net revenue from outside operations was $7,866.21, a decrease of $12,610.96; making a total net revenue of $747,686.00. After deducting taxes accrued there remained an operating income of $544,-068.30, a decrease of $3,740.16; adding other income of $146,208.67, an increase of $115,803.45, the gross corporate income amounted to $690,294.97, an increase of $112,063.29. From this there was deducted $862,000 interest on bonds, $28,936.81 rents, etc., altogether $891,-741.81, an increase of $2,517.32. The net loss on the year's operations therefor was $201,446.84 against $310,992.81 for the preceding year. The liabilities to stock and bondholders, etc., amount to $52,046,459.18, including $5,262,235.18 to the C.P.R. on guaranteed interest account. The general ledger balances show assets of $48,787,478.96, the balance of loss standing at $3,258,981.22. The retiring directors were re-elected.

Grand Trunk Pacific Ry.—Following are the directors for the current year: President, C. M. Hays; Vice President and General Manager, E. J. Chamberlin; Second Vice President, W. Wainwright; other directors, Sir C. Rivers Wilson, A. W. Smithers, M. G. Carr Glyn, F. Firebrace, Lord Welby, W. H. Biggar, E. H. Fitzhugh, H. A. Allan, E. B. Greenshields, Hon. G. A. Cox, E. R. Wood and J. R. Booth.

Grand Trunk Ry.—A press report from Boston, Mass., states that the G.T.R. has secured an option on the Rhode Island Rd. as the first step towards establishing a terminal at Providence. An earlier dispatch from Rhode Island stated that the G.T.R. was to apply next session of the Rhode Island Legislature for power to construct a line into Providence. Other dispatches state that the reports are not taken seriously in local railway circles, though it is not said there is no truth in the report that G.T.R. representatives are conducting some negotiations in the territory.

The reports are also being revived that the G.T.R. is trying to arrange a purchase of the Lehigh Valley Rd.

Illinois Central Rd.—The report for the year ended June 30, shows that the income from operation was $57,145,512.19, a decrease of $815,215 from those of the previous year; expenses and taxes, $43,681,282.43, a decrease of $898,315.78; net income from operation, $13,464,229.76, an increase of $47,100.32. The income from investments and other sources was $3,874,708, making a surplus of $17,338,937.76. After deducting fixed charges, rentals, etc., the available surplus was $9,592,023.24, which has been applied as follows: 7% dividend on outstanding capital stock, $7,650,720; replacement of equipment, $232,266.92; surplus dividend fund $1,457,886.92; profit and loss, $251,149.40.

London and Port Stanley Ry.—At a meeting of the directors held in London, Ont., Oct. 1, it was decided to meet representatives of the Pere Marquette Rd. and discuss what terms that company is willing to offer the city of London for an extension of the lease of the line.

The present lease expires in about five years, but as certain betterments should be carried out at once, the lessee asks that an extension for 20 years be granted before the work is undertaken. There are several other questions involved in the matter which will have to be settled. The principal one has to do with the payment of the cost of reconstructing certain bridges which the lessee carried out, after notifying the city that it would be held liable for same. The city repudiates any liability, and it is urged that no extension be granted unless the P.M. Rd. pays for the bridges. Those who favor this view think the G.T.R., which at one time leased the line, in which it has a small interest, or the C.P.R. will make bids for a lease.

Maritime Coal and Ry. Co.—By an act passed last session of the Nova Scotia Legislature the company was authorized to increase the number of its directors from seven to eleven.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The New York Exchange has listed $1,005,000 additional first consolidated 4% bonds due 1938, making a total listed to date $45,891,000.

Nova Scotia Steel Co.—By an act passed last session of the Nova Scotia Legislature the company was authorized, in addition to the powers already possessed, to secure the payment of any money borrowed or raised by it by the issue of debentures or debenture stock charged upon its property, present or future, including its uncalled capital, and to redeem any such securities. The company owns lines in the vicinity of New Glasgow and North Sydney, N.S., and owns several steamships.

A contest for the typewriting championship of the world was held in New York on Sept. 30.

It was won by Miss Rose L. Fritz, the famous Underwood operator, who wrote 102 words a minute for one hour.

The Underwood has won the world's championship in thirteen successive contests. It has won every other contest of any importance in recent years.

Contests subject a machine to the severest strain. The logical deduction is that the Underwood is a good typewriter.

Orford Mountain Railway—We are officially advised that when the lease of this line to the C.P.R. Co., as announced in that company's annual report published in our last issue, goes into effect, the line will become a part of the C.P.R. system and be so operated.

Pere Marquette Rd.—New York press reports state that arrangements are in progress for the transfer of this railway to the Pennsylvania Rd.

Port Hood Richmond Ry. Coal Co.—Under its act of incorporation the company was authorized to issue mortgage bonds of $865,000, of which $585,000 are second mortgage bonds. By an act passed last session of the Nova Scotia Legislature the financial obligations of the company have been rearranged and provision made for additional working capital by the issue of prior lien bonds.

Quebec Central Ry.—The annual meeting was held in London, Eng., Oct. 13. The report shows that the gross earnings for the year ended June 30 were $1,021,682; expenses, $724,918; net earnings, $296,764; interest earned, $9,176; net income, $305,940, against $1,110,724 gross earnings; $787,293 expenses, $323,431 net earnings; $5,334 interest earned; $328,765 net income for the previous year. During the year, £25,000 of 4% debenture stock were issued, increasing the amount outstanding on this account to £529,837.

Quebec and Lake St. John Ry.—Gross receipts for Sept., $56,919.49, against $67,639.94 for Sept., 1908. Aggregate gross receipts for nine months ended Sept. 30, $444,750.21, against $465,497.48 for same period 1908.

Temiscouata Ry.—Gross earnings for Aug., $21,239.61, against $25,374.27 for Aug., 1908. Approximate gross earnings for Sept., $19,580.73, against $22,088.45, for Sept., 1908.

Following are the officers and directors for the current year:—President, F. Grundy; Vice President, J. H. Walsh; other directors, A. H. Cook, A. Laurie, A. Steele, W. N. Campbell, F. Murphy; General Manager, G. G. Grundy, Secretary, D. B. Lindsay.

Temiskaming and Northern Ontario Ry.—Gross earnings for Aug., $143,086; expenses, $73,728; net earnings, $69,360; ore royalties, $19,438. Net earnings for eight months ended Aug. 31, $449,049, against $117,258 for same period 1908.

Trans-Niagara Bridge Co.—Following are the officers and directors for the current year:—President, T. Penney, Buffalo, N.Y.; Secretary, A. M. Grier, K.C., Niagara Falls, Ont.; other directors, T. E. Mitten, N. Robinson, Buffalo, N.Y.; E. B. Osler, Toronto.

White Pass and Yukon Ry.—Gross earnings for Aug., $252,600. Aggregate gross earnings for two months ended Aug. 31, $476,257.

Wisconsin Central Ry.—The Bank of Montreal in London, Eng., made an issue of $2,500,000 of 4% bonds of this railway. Oct. 7. The issue price was £198 per $1,000 bond.

The members of the conciliation board to deal with the dispute between the Intercolonial Ry. and its fitters and mechanics consists of Judge Barron, Stratford, Ont.; J. O. H. Gilmore, Brockville, Ont., and J. G. O'Donoghue, Toronto.

T. McHattie, Superintendent Motive Power and Car Departments, Central Vermont Ry., St. Albans, Vt., writes:—"I hope the field is enlarging for the Railway & Marine World. My copies of the journal are read over with interest from month to month."

It is understood that the C.P.R. car repairing and building shops at Farnham, Que., will shortly be closed permanently Since the opening of the Angus shops, Montreal, the Farnham shops have been mainly employed in the building of freight cabooses and vans.

National Transcontinental Railway.

During Sept. there was expended on construction on the six sections of the line in New Brunswick $476,084.66, making $7,653,045.01. The returns to the end of Sept. show that the construction is well advanced; 90% of the ballasting has been completed. The foundation for the Upper Salmon River bridge, the largest on the line, has been completed, the steel work will not be gone on with until the spring.

A number of engineers representing bridge building firms have been visiting the site of the bridge across the St. Lawrence River, Quebec, with a view to the collection of information upon which to base tenders for the construction of the new bridge. A. E. Doucet, District Engineer of the National Transcontinental Ry., at Quebec, stated, Oct. 13, that work on the construction of the terminals in that city was to be resumed at once and continued to completion. The work to be done at present would be the rock cut at Point au Pizeau, and the building of a temporary trestle from that point to join with the viaduct construction at Dobell's cove. S. N. Parent, Chairman of the N.T. Ry. Commission, was in Quebec from Oct. 11 to 13, in connection with this matter.

Easterly from Cochrane Jct., Ont., the contractors are making good progress. The only trouble met with is at the crossing of the Abitibi River, where some difficulty is being experienced in getting sufficient hold for the piling for pier foundations. Eight miles of track have been laid up to the river, and on the other side about 50 miles of grading has been done. Westerly from Cochrane track has been laid for 50 miles, and a considerable mileage has been graded. About half the ballasting has been done on this 50 miles. The completion of this section will bring the line to the easterly end of the Davis contract upon which sub-contracts have been let. Fowler and O'Brien have a sub-contract starting at the Opazatica River. The work to be done on this sub-contract is not heavy. Work on the section north of Lake Nipigon is being pushed, and some of the sub-contractors have completed their work. In connection with the work of bringing in supplies, a spur line has been constructed from the western shore of Ombabika Bay, at the north end of Lake Nipigon, to the right of way. The materials are brought to the south shore and carried by steamer and barges to Ombabika Bay, where four warehouses have been erected for storage purposes, pending transfer to the construction camps.

The last spike of the section from St. Boniface, Man., to Lake Superior Jct., Ont., where connection is made with the G.T.P.R. Lake Superior branch, was driven Oct. 12. The section is 244 miles, and has been a most difficult one to construct. In all there have been moved nearly 6,000,000 ft. of solid rock. There are 13 bridges, of which eight are steel. The steel bridges are: Wabigoon River, 190 ft.; McFarlane River, 100 ft.; Winnipeg River, 400 ft.; C.P.R. overhead bridge at Rennie, 180 ft.; Whitemouth River, 180 ft.; East Brokenhead River, 90 ft.; West Brokenhead River, 60 ft.; Red River, in course of construction, 792 ft. The trestle bridges of wood are: Sturgeon River, 600 ft.; English River, 270 ft.; Long Lake, 550 ft.; Cross Lake, 1,100 ft.; Green Lake, 550 ft. The divisional points are at Redditt, 12 miles east of Winnipeg River, and at Pelican Lake, six miles west of Superior Jct. The contract was let May 15, 1906. S. R. Poulin, the district engineer, left Winnipeg Oct. 9, on a trip of inspection over the division.

It is upon this section that differences as to classification have arisen. G. Grant, Chief Engineer, has been appointed to the arbitration board to settle the matter. The other members of the board are H. H. Kelliher representing the G.T.P. Ry., and C. Schreiber, Government Consulting Engineer. The first two left Winnipeg to go over the section Oct. 4, and will agree on as many points as possible, the unsettled matters being reserved for consideration with the third arbitrator.

We are advised that the contract for the excavation and back filling of the pipe line, from the Red River to the locomotive shops, etc., east of St. Boniface, Man., has been let to the Western Contracting Co., Winnipeg. The work is to be completed by Dec. 31.

GRAND TRUNK PACIFIC RY.

Tracklaying has been completed on the main line into Elmonton, Alta., 755.3 miles. On Oct. 5, the Vice President and General Manager arrived in the city over the line, and construction trains are being regularly operated. H. A. K. Drury, of the Board of Railway Commissioner's engineering staff, left Winnipeg, Oct. 1, on an inspection of the whole line, and particularly of the newly completed portion from Wainwright to Edmonton, about 150 miles.

Construction was started Aug. 29, 1905, near Firdale station, 91.5 miles west of Winnipeg, Man. The general contracts were:—Winnipeg to Portage la Prairie, 54.3 miles, Treat and Johnston; Portage la Prairie to Touchwood Hills, 245 miles, McDonald, McMillan Co., and Treat and Johnston; Touchwood Hills to Saskatoon, 140 miles, Canadian White Co.; Saskatoon to Edmonton, 316 miles, Foley Bros., Larson & Co. The grading did not present any great difficulties, although the work was heavier than is usually the case in prairie construction, on account of the determination of the company to obtain the low uniform gradient set as the standard for the whole line. Six large steel bridges had to be constructed as follows:—Assiniboine River, three spans, 22 ft. above water level, 437 ft. long; Arrow River, 68 ft. long; second crossing of Assiniboine River, one span, 24 ft. above water level, 250 ft. long; South Saskatchewan River, eight spans, 74 ft. above water level, 1,501 ft. long; Battle River, 53 spans, 184 ft. above water level, 2,772 ft. long, and North Saskatchewan River, 19 spans, 136 ft. above water level, 1,665 ft. long. The track is laid with 80-lb. steel, of which 106,000 tons have been used in the main line, and 30,000 tons in the sidings, Stations, roundhouses, and other buildings have been erected along the line at divisional points and elsewhere, and eighty new towns have sprung up, and a good deal of settlement is taking place.

West of Edmonton, 66 miles of track has been laid to the Pembina River crossing, and on the other side of the river the grading is completed to Edson, a further 57 miles. Edson is at the crossing of the McLeod River, where another large bridge has to be constructed. W. E. Mann, Divisional Engineer, reports that the Pembina River bridge will be completed by Nov. 30. The substructure for the bridge at McLeod River is under construction, C. May, Edmonton, being the contractor. The Canadian Bridge Co., Walkerville, Ont., has the contract for the steel superstructures.

At the Prince Rupert end of the line, a contract has been let to Foley, Welch and Stewart for the construction of an extension along the front of the townsite to Seals Cove, 3.5 miles. The work will involve some very heavy rock cutting. Contracts have been let to C. H. Ferguson for the substructures, and to the Canadian Bridge Co., for the superstructures of bridges at points respectively 55, 60, 87 and 91 miles east of Prince Rupert.

STANDARD STEEL PLATFORMS
Used by all Canadian Railways

accomplished on branch line construction. On the branch from Melville to Regina, Sask., track has been laid for 20 miles, and it was expected that steel would be laid to Balcarres by Oct. 31. No grading has been done beyond this point. On the branch from Melville to Yorkton, about six miles of steel had been laid on Sept. 30, and it was expected to have it laid 25 miles out by Oct. 31. The grading of the line from Tofield towards Calgary, Alta., is progressing and it is expected to have the 50 miles to Camrose completed this fall.

Surveys are being made in the Duck Lake district in connection with the location of a line from Watrous to Prince Albert, Sask.

In connection with the surveys for the location of a line to Vancouver, B.C., three parties are in the field running trial lines via the Nicola valley and the Similkameen district. They are working on Campbell creek, south of Kamloops, and at Stump Lake with the object of securing a route into the Nicola valley. It is stated that the line may ascend the Tulameen River and reach the western slope of the Hope Mountains near Hope. (Oct., pg. 733.)

Canadian Northern Ry. Construction, Etc.

Canadian Northern Quebec Ry.—The question of terminals for the C.N.Q.R. and its allied line, the Quebec and Lake St. John Ry., in Quebec, is being considered by the officials. Reports state that traffic is increasing to such an extent that a considerable enlargement in the yard space is imperative. The question of the shops is also receiving consideration, but nothing definite will be done until a site has been settled on.

Canadian Northern Ontario Ry.—In reference to the entry of the line from Hawkesbury into Ottawa, the city council approved a plan involving the construction of a level crossing over Hurdman road. When the matter came before the Board of Railway Commissioners for final sanction, it was referred to the Board's engineer. It is understood that this official reported against the crossing being allowed, and recommended that instead of the route approved by the city council, the line enters the city over the Ottawa and New York Ry. and the C.P.R. bridge. The suggested route will necessitate the breaking of the line outside the city and putting in a curve to the C.P.R. about 300 yards south of the present approved route.

The route of the proposed line from Toronto to Ottawa, as far as Trenton, Ont., about 100 miles, was set out in our last issue. For this section a contract has been let to Angus Sinclair, C.E., Toronto, and preparations are being made for the construction. Beyond Trenton, the located line keeps along the lake shore line for some miles east of Belleville, and bears away northeasterly before passing out of Thurlow tp. The route is northeasterly through Tyendinaga and Richmond tps., until it crosses one of the old surveys in the middle of Campden tp. The Bay of Quinte Ry. is crossed south of Enterprise, and the Kingston and Pembroke Ry. a short distance north of Verona. Continuing easterly it passes north of Desert Lake and Mud Lake, crossing the Brockville, Westport and Northwestern Ry. at Newboro. Still proceeding easterly, Portland is reached, where the direction again becomes northeasterly, the route surveyed in 1906, being followed through Smith's Falls, and Richmond to Ottawa, where connection will be made with the Ottawa-Hawkesbury line, now practically completed. It is understood that there will be a branch line from some convenient point into Lanark. We are advised that some residents of Perth have surveyed a line for a branch to connect with the Toronto-Ottawa line at Newboro, crossing Rideau Lake at the Narrows. It is not at all certain that this line will be followed, as it involves a very elevated crossing of the Rideau Lake. Residents in Port Hope, Bowmanville, and other points are not satisfied with the route, and have made representations to the company with a view to some changes being made. At Cobourg, the people are asking that arrangements be made with the G.T.R. for the erection of a union station.

The Toronto board of control has approved a proposition by the company to purchase about half an acre on the Don Esplanade, south of Queen St., at a price to be fixed by the Assessment Commissioner. A condition of the sale is that any other railway can have running rights over the tracks to be laid on the land.

The Minister of Railways, Oct. 6, approved the location of the projected line from the Niagara River to Toronto, so far as it is located through Saltfleet and Barton tps. This portion of the line will start at Fruitland and following the route of the Toronto, Hamilton and Buffalo Ry. a short distance, through Stony Creek and Bartonville, entering Hamilton at practically the same point. It is reported that the surveys from Burlington into Hamilton have been completed. The route from Toronto follows the power line right of way to Burlington, and then branches off along the north shore of Burlington Bay to Carrol's Point, crosses over a trestle at the Desjardin's canal, under the high level bridge, and the G.T.R. to Coot's Paradise, and then runs southerly and joins the T.H. & B.R. at Garth St.

Canadian Northern Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of the following lines: from Strathcona, southerly, to Calgary; from Regina, southerly, to the international boundary; between Winnipeg and Ste. Annes, southerly, to the International boundary; from Regina to Humboldt and via the Carrot River to the Pas Mission, and between Humboldt and the South Saskatchewan River, crossing the same south of Prince Albert; from Prince Albert to Edmonton; from Swan River, westerly, to the main line at the crossing of the Saskatchewan River; from the authorized line of the Morden and Northwestern Ry. between Neepawa and the west boundary of Manitoba, northwesterly to the main line between Grand View and Battleford; from Regina, westerly, to the Red Deer River, with a branch to Carleton; from Gladstone to Fort Nelson or Fort Churchill; from Oak Point to the Grand Rapids on the Saskatchewan River; from Edmonton to the Pacific via the Pine River Pass or other feasible pass; from McCreary via Cartwright, southerly, to the International boundary; from Russell, westerly, via Yorkton to the Saskatoon-Calgary line.

The company will also ask for power to construct the following additional lines: Dundee, northerly and easterly, to the Winnipeg River; Portage la Prairie, southerly and easterly, to tp. 2, r. 7, e.p.m.; Hartney, westerly, to tp. 5, r. 7, w. 2 m.; Moose Jaw, southerly and easterly, to Bienfait, with a branch from near Estevan to Roche Percee. Between Davidson and Disley on the Qu'Appelle, Long Lake and Saskatchewan Ry., westerly and northwesterly, to the Saskatoon-Calgary line; Lashburn, westerly, to between Camrose and Edmonton; Saskatoon-Calgary line near tp. 28, r. 6, w. 4 m. to Rocky Mountain House; Saskatoon-Calgary line near the crossing of Red Deer River, northwesterly, through or near Innisfail and Rocky Mountain House to head waters of Brazeau and McLeod Rivers and to Yellowhead Pass; Winnipegosis, southerly, to constructed line near south end of Lake Manitoba; from authorized line between Prince Albert and Battleford near tp. 49, r. 3, w. 3 m., northwesterly and northerly to Great Slave Lake; from authorized line east of Lake Manitoba, westerly, via the Narrows to its constructed line between Grandview and Roblin.

The company proposes to spend $10,000 in improving the yards at Brandon, Man. The new freight sheds at the same point, costing about $10,000, have been practically completed.

Tracklaying was expected to be completed on the branch line from Maryfield, Sask., by Nov. 1. This line, it is proposed, will ultimately be extended to Lethbridge Alta., but at present only about 125 miles have been graded.

A water tank is being constructed at Hudson Bay Jct., near Etoimami, Sask. As soon as this is completed an 8-stall roundhouse will be erected. A yard is being laid out.

A deputation from Yorkton, Sask., was authorized, Oct. 5, to interview the C.N.R. management with a view to securing an extension of the Rosthern branch to Yorkton, Willowbrook and Beaverdale, Sask.

Survey parties are locating a route for a branch line into the Brazeau coal fields. It will be about 75 miles long, and it is expected the surveys will be completed this fall.

Plans have been filed showing the route of about 54 miles northerly from Kamloops, B.C., towards the Yellowhead Pass. A gradient of less than one-fifth of 1% has been secured. C. F. Hannington left Kamloops, Oct. 11, to complete location surveys for a further distance northerly. Another party has completed the location of the route from Kamloops to Agassiz on the south side of the river, about 60 miles east of Vancouver.

A number of reports are in circulation as to the location of the terminals in the vicinity of Vancouver and New Westminster. Every large sale of property there is stated to have something to do with the company's intentions. Among these unfounded reports is one that the company has purchased Anacis Island at the mouth of the Fraser River. The island has an area of 900 acres, and the report set out that it was proposed to lay out terminal yards, and to erect elevators, ships, etc., there.

D. D. Mann, Vice President, arrived in Victoria, Oct. 15, to confer with the Premier on the matter of aid for the proposed extension to the coast. It is understood that a definite understanding has been arrived at, and that a proposal will be submitted by the Government to the new Legislature as soon as it meets.

The B.C. Premier said, Oct. 21, that the Government had entered into a contract with the C.N.R. for the construction of a line from the Yellowhead Pass to Kamloops, by way of North Thompson River; from Kamloops to New Westminster and Vancouver, and from Vancouver to English Bluffs. From this point the company is to make a first-class connection with Victoria, for passengers and freight, and to construct a line from Victoria to Barclay Sound. The distance in all will be about 600 miles. To assist the company in the construction of the line the Government will ask the Legislature next session to guarantee interest at 4% upon bonds to the amount of $35,000 a mile. For security the Government will hold a first mortgage on the line in British Columbia, and a general covenant from the C.N.R. indemnifying it against any loss that may occur. It is stated that the understanding with the company is that at a future date it will construct a line from Victoria along the whole length of Vancouver Island to Quatsino Sound, where ocean terminals will be constructed. (Oct., pg. 763.)

NOTICE

To Men Interested in

Boiler Manufacturing,

Bridge Building,

all kinds of

Structural Steel Work

You are not getting value received for the money expended on construction unless you have

IMPERIAL RIVETERS CHIPPERS MOTOR HOISTS and RADIAL DRILLS

in your tool equipment. As a proof of this statement we give below comparison submitted to us by one of the many users of IMPERIAL RIVETERS showing comparative cost of riveting by hand and with this little money saver.

COMPARISON

With one riveter two men and one heater will drive 500 rivets per day (10 hours), while by hand three men and one heater average about 200.

WITH RIVETER

Cost, compressed air (inc. oil) per day.....	.1.15
2 men @ $2.50.....	5.00
1 man @ $2.25.....	2.25
Total.....	$8.40

BY HAND

2 men @ $2.50.....	$5.00
2 men @ $2.25.....	4.50
	$9.50
Cost per rivet by hand	.0380
Cost per rivet with riveter.	.0168
Saving per rivet	.0212

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Alberta Central Ry.—J. G. MacGregor has been appointed Chief Engineer of this projected railway. Office, Red Deer, Alta.

Boston and Albany Rd.—F. B. Freeman has been appointed Chief Engineer, vice E. E. Stone resigned. Office, South Station, Boston, Mass.

Canadian Northern Quebec Ry., Quebec and Lake St. John Ry.—C. H. N. Connell, heretofore Locating and Resident Engineer Alberta Ry. and Irrigation Co., Lethbridge Alta., has been appointed Engineer of Maintenance in charge of Maintenance of Way, Bridges and Buildings, and any other duties required of him in the Engineering Department, reporting to the General Manager, vice S. S. Oliver, assigned to other duties. Office, Quebec.

E. G. Roussin, formerly Travelling Freight Agent C.P.R., Lowell, Mass., has been appointed Travelling Freight Agent, Quebec.

Canadian Northern Ry.—R. Creelman, heretofore Commercial Agent, St. Paul, Minn., has been appointed Assistant General Passenger Agent, vice C. W. Cooper, General Passenger Agent, resigned. Office, Winnipeg.

Canadian Pacific Ry.—L. M. McTavish has been appointed Travelling Freight Agent Eastern and Lake Superior Divisions, vice W. S. Elliot, promoted. Headquarters, Montreal.

A. Mitchell, heretofore depot master G.T.R., Union station, Toronto, has been appointed platform inspector Sleeping, Dining and Parlor Car Service, C.P.R., Toronto.

W. S. Elliott, heretofore Travelling Freight Agent Eastern and Lake Superior Divisions, has been appointed District Freight Agent, with jurisdiction over the teritory Mattawa and west to Sault Ste. Marie and Port Arthur, including the Temiskaming and Kipawa branches, reporting to the General Freight Agent. Office, North Bay, Ont.

W. J. Singleton, whose appoinment as Trainmaster at North Bay, Ont., was announced in our last issue, was formerly in the Company's service as Superintendent at Montreal.

J. M. Mack has been appointed Locomotive Foreman, Arcola, Sask., vice S. M. Miller, who has been given employment in the Souris shop, Man.

J. S. Rugg has been appointed Locomotive Foreman at Neudorf, Sask., vice H. A. Keswick, transferred.

H. A. Keswick, heretofore Locomotive Foreman, Neudorf, Sask., has been appointed Locomotive Foreman at Field, B.C., vice A. E. Bennetts.

F. Walker has been appointed Acting Superintendent District 3, Pacific Division, vice A. Purvis, resigned. Office, Nelson, B.C.

W. H. Gardiner, heretofore Contracting Freight Agent, Vancouver, B.C., has been appointed City Freight Agent, Victoria, vice F. H. Clendenning, promoted.

Chicago Great Western Rd.—A. C. Gillespie, has been appointed City Freight and Passenger Agent, Winnipeg, reporting to the General Agent there.

Esquimalt and Nanaimo Ry.—W. H. Gardiner, City Freight Agent, C.P.R., Victoria, has also been appointed District Freight Agent E. and N. R., vice F. H. Clendenning, promoted.

Government Railways.—In continuance of the system of reorganization, being carried out in connection with the Intercolonial and P.E.I. Rys., as mentioned in our Sept. issue, L. Lavoie, heretofore on the Moncton staff, has been appointed Purchasing Agent. Office, Ottawa.

It is also intended to select a staff of three clerks from the Moncton office, for transfer to Ottawa. In this connection, we were advised, Oct. 15, that they had not then been decided on.

Grand Trunk Ry.—At the recent half-yearly meeting, in London, Eng., announcement was made of the resignation of the President, Sir C. Rivers Wilson, which will take effect at the end of the current half-year. C. M. Hays, Second Vice President and General Manager, will become President and General Manager, with office at Montreal, and A. W. Smithers, Vice President, will also be Chairman of the Board, with office at London, Eng.

W. P. Corking, heretofore clerk in General Baggage Agent's office, Toronto, has been appointed Baggage Inspector, vice W. J. Cockburn, deceased.

W. J. Dawson has been appointed Car Inspector at Brantford, Ont., vice A. Reid, transferred to Sarnia Tunnel.

A. Reid, heretofore Car Inspector, Brantford, Ont., has been appointed Car Foreman at Sarnia Tunnel, vice J. Morrison, acting Car Foreman, assigned to other duties.

The following Agents have been appointed: Vaudreuil, Que., P. Gibson; Goodwood, Ont., D. H. Thompson, Haliburton, Ont.; H. M. Bray (temp.), St. Pauls, Ont.; W. B. Rife, Port Robinson, Ont.; W. L. Colling, Nelles Corners, Ont.; J. A. Pollock, Lawrence, Ont.; J. A. Murray, Stevensville, Ont.; A. D. Johnson, Onondaga, Ont.; G. G. Skelton, Lucknow, Ont.; O. Martin, Brucefield, Ont.; B. Stobs, Caldwell, Ont.; M. G. Walsh, Whitney, Ont.; F. A. Bamber.

Intercolonial Ry.—E. S. Smiley has been appointed Division Freight Agent at Halifax, N.S., vice A. T. Weldon, resigned.

John Stewart, heretofore locomotive engineer, has been appointed Acting Master Mechanic Eastern Division, vice N. L. Rand, Master Mechanic, placed on the pension list. Office, Moncton, N.B.

See also Government Railways.

Michigan Central Rd.—H. Shearer, heretofore secretary to the General Manager, Detroit, Mich., has been appointed Superintendent Canadian Division, vice H. H. Adams, resigned to enter T. H. and B. R. service. Office, St. Thomas, Ont.

J. D. Curtis and A. C. Campbell have been appointed Chief and Assistant Surgeons respectively, at St. Thomas, Ont.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—Since the acquirement of the Wisconsin Central Ry., and its operation as the Chicago Division of the M. St. P. and S.S.M.R., its interests in Winnipeg will be represented there by the General Agent, J. C. Peterson, G. H. Anthony, General Agent W. C. Ry., having resigned to enter railway service in the U.S.

National Transcontinental Railway Commission.—W. S. Calvert, heretofore member of the Dominion Parliament for West Middlesex, Ont., has been appointed to the Commission, vice R. Reid, deceased.

Pere Marquette-Lehigh Valley Line.—G. H. Anthony, heretofore General Agent, Chicago Division M. St. P. and S.S.M.R., Winnipeg, Man., has been appointed General Agent P.M.-L.V. Line, with offices at St. Paul and Minneapolis, Minn. He has charge of Northwestern Territory, covering Minnesota, the Dakotas and the Canadian Northwest, also Superior and Ashland, Wis.

Pere Marquette Rd.—S. L. Merriam has been appointed General Solicitor, in charge of the Legal Department and land and tax matters. Office, Detroit, Mich.

The position of General Counsel is vacant. Angell, Boynton, McMillan and Bodman, Acting General Counsel, having resigned.

A. E. Plumer, heretofore in the Passenger Department, St. Thomas, Ont., has been appointed General Baggage Agent. Offices, Detroit, Mich.

Prince Edward Island Ry.—See Government Railways.

Quebec, Montreal and Southern Ry., Napierville Jct. Ry.—With reference to the appointment of G. H. Burgess as Chief Engineer Delaware and Hudson Co.'s lines, we are officially advised he is Consulting Engineer Q.M. and S.R. and N.J.R.

Temiscouata Ry.—G. G. Grundy, heretofore Superintendent, has been appointed General Manager, vice D. B. Lindsay, General Manager and Secretary, who retains the latter position only. Office, Riviere du Loup, Que. The position of Superintendent has been abolished.

F. X. Belanger, heretofore General Freight Agent, has been appointed General Freight and Passenger Agent. Office, Riviere du Loup, Que. The Passenger Department was formerly under the jurisdiction of the Superintendent.

C. A. Stewart, heretofore in the company's general office, has been appointed Accountant, and J. T. Lavoie has been appointed Cashier. These are new positions.

Toronto, Hamilton and Buffalo Ry.—H. H. Adams, heretofore Superintendent M. C. Rd. Canadian Division, St. Thomas, Ont., has been appointed General Superintendent T. H. and B. R., vice E. Fisher, General Superintendent and Chief Engineer, resigned. Office, Hamilton, Ont.

R. L. Latham, heretofore Assistant Engineer, has been appointed Chief Engineer. Office, Hamilton, Ont.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases from 1908-09, from July 1, 1909:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 843,500	$613,900	$229,600	$26,700+
Aug.	807,100	602,700	204,400	18,300+
Sept.	1,076,800	765,300	311,500	60,400+
	$2,727,400	$1,981,900	$745,500	$105,400+
Inc. or Dec.	$ 349,800	$244,400	105,400	.....

Approximate gross earnings for two weeks ended Oct. 14th, $598,800, against $511,700 for the same period 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1908-9, from July 1, 1909:

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
July	7,140,029.93	4,660,159.20	2,479,870.73	205,297.48+
Aug.	7,426,984.62	4,462,926.75	2,964,057.87	385,159.16+
	$14,567,014.55	$9,123,085.95	$5,443,928.60	$590,456.64+
Inc. or Dec.	$1,888,177.04	$1,297,720.40	$590,456.64	.....

Approximate gross earnings for Sept., $8,148,000, and for 3 weeks ended Oct. 21, $6,460,000; against $6,307,000 and $4,903,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Approximate gross earnings for Sept., $321,405, and for two weeks ended Oct. 14, $147,043, against $250,884 and $115,340 for same periods 1908.

MINERAL RANGE RD.—Approximate gross earnings for Sept., $75,866, and for two weeks ended Oct. 14, $31,548, against $73,253 and $31,272 for same periods 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Aug., $1,204,104.17; expenses, $714,493.84; net earnings, $489,610.33; against $961,360.27 gross earnings, $668,580.18 expenses, $292,780.09 net earnings for Aug., 1908. Aggregate gross earnings for two months ended Aug. 31, $2,348,625.99; expenses, $1,451,658.42; net earnings, $896,967.57, against $1,911,469.25 gross earnings, $1,287,145.28 expenses, $624,323.97 net earnings for same period 1908. Approximate gross earnings for Sept., $2,504,701, and for two weeks ended Oct. 14, $1,169,176, against $2,183,601 and $1,031,580 for same periods 1908.

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 - South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	" " "	73.46	" "	180.00
"	"	10.00	"	"	239.70	" " "	81 62	" "	200.00
"	"	11.00	"	"	263.60	" " "	89.78	" "	220.00
"	"	12.00	"	"	287.60	" " "	97.96	" "	240.00
"	"	13.00	"	"	311.55	" " "	106.10	" "	260.00
"	"	14.00	"	"	335.60	" " "	114.32	" "	280.00
"	"	15.00	"	"	359.50	" " "	122.44	" "	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum. Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-selected districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

WOVEN WIRE FENCING

ARE YOU INTERESTED IN THIS FEATURE OF RAILWAY WORK?

While we are not the only people who make a good wire fence, we are the only firm in Canada who make the best "wrapped stay" fence. Our "Safe Lock" is so constructed that we don't require to kink the strand wires to prevent stays slipping, therefore, the whole strength of the wire is preserved in the "Safe Lock" Fence.

Our "Monarch" is a "stiff-stay" fence similar to others of this style with the most of their objectionable features eliminated.

Telegraph and Cable Matters.

M. T. Quigley, Local Manager C.P.R. Telegraphs, Vancouver, B.C., died there, Oct. 7.

J. G. Davies, Manager G.N.W. Telegraph Co.'s office at Ottawa, has been transferred to Vancouver, B.C., vice J. P. Masters resigned.

J. Kent, Manager C.P.R. Telegraphs, left Montreal, Oct. 5, on an inspection tour of the company's telegraph lines in the Maritime Provinces.

J. Kent, Manager, and W. J. Clapp, Electrical Engineer C.P.R. Telegraphs, returned to Montreal recently after completing an inspection of the lines west of Montreal.

C. E. Davies, heretofore chief operator, has been appointed Manager G.N.W. Telegraph Co.'s Ottawa office, vice J. G. Davies transferred to Vancouver, B.C.

The C.P.R. has recently opened telegraph offices at Durban, Headingly, Kelwood, Moore Park, McAuley and Treesbank, Man.; Cavan, Midhurst and York, Ont., and Duval and Hume, Sask.

A. B. Smith, Manager G.T.P.R. Telegraphs, left Winnipeg, Oct. 5, for Prince Rupert, B.C., on a trip of inspection of the work in progress in that neighborhood, proceeding eastward along the Skeena River to Hazleton.

The Pere Marquette Rd. telegraph operators were placed on a new schedule Oct. 1, the chief item in which is an advance of $5 a month on wages, bringing the minimum up to $50 a month. Other items provide for an increase of 5c. an hour for overtime and Sunday work, and extra allowances for special work.

The erection of the new Marconi wireless telegraph station at Glace Bay, N.S., is proceeding rapidly. W. Marconi stated recently that it was hoped to have the towers in readiness for the transaction of business about the middle of Dec. The foundations and buildings are of ferro-concrete and steel, and the entire plant is fireproof. The contractors are Rhodes, Curry Co., Ltd.

The Great North Western Telegraph Co.'s annual meeting was held at Toronto, Sept. 29. The accounts showed that the revenue for the past year was considerably in excess of that for the previous year. Following are the directors for the current year:—President, H. P. Dwight; Vice President, Adam Brown; Vice President and General Manager, I. McMichael; other directors, H. N. Baird, J. Hedley, Hon. J. K. Kerr, W. C. Matthews, Toronto; L. C. Clowry, J. B. Vanevery, New York.

The Dominion Government will shortly have eight wireless telegraph stations completed along the Pacific coast, these being situated at Point Grey, Cape Lazo, Gonzales Hill, Estevan, Pachena, Skeeda Point, Triangle Island and Prince Rupert, B.C. The first five mentioned are already in operation, and it is anticipated that the chain will be completed by the end of the year. It is stated that when completed, a commercial business will be transacted, in addition to giving a marine signal service. The stations are equipped with the latest improvements of the Marconi system.

The Pacific Cable Board's report for the year ended Mar. 31 gives the total receipts as £113,093 3s 7d, and the expenditure as £96,435 15s 5d, leaving £16,657 8s 2d available for the reduction of the amount contributed annually for interest and sinking fund on capital advanced. The receipts exceeded those of the previous year by £2,933. Throughout the year the cable worked without interruption and no repairs were necessary, but the Canadian land line was interrupted on several occasions, and the Board's interests were in consequence adversely affected by the diversion of traffic to the eastern route. The number of messages dealt with was 243,922, of which 232,394 were ordinary, 9,086 Government and 2,532 press messages. The total number represented 2,739,544 words.

Press dispatches from London, Eng., state that the British Government has taken over all the Marconi wireless telegraph stations in Great Britain and Ireland, excepting the long distance stations at Poldhu, Eng., and Clifden, Ireland, which the company retains in connection with its trans-Atlantic service. It is stated that the price paid for the coast stations is $75,000, with the right to use all existing patents and all improvements made during the next 14 years. It is the intention to place these stations under the control of the Post Office Department, and they will be operated for communication with all vessels suitably equipped, regardless of the system adopted by each. It is said that the Government has also taken over all the coast wireless telegraph stations operated by Lloyds.

Among the Express Companies.

An ex-employe of the Northern Ex. Co., Butte, Mont., is reported to be passing forged money orders at various points, chiefly, so far as has yet been ascertained, in the U. S. The Canadian Ex. Co., among others, has been victimized.

The Canadian Northern Ex. Co., has opened offices at Barwick, Ont., Cremer, Lorette, and Oakburn, Man.; Candiac, Fairlight, Howell, Odessa, Vibank and Vandura, Sask., and has closed its offices at Vanscoy, Sask., and at Lake Joseph, Ont., the latter for the season only.

R. Ford, a former Canadian Ex. Co.'s employe, recently sued the company for $5,000 for false arrest in connection with a theft of express order blanks and forgery, at Toronto. He was awarded $1,500 for the arrest, $250 for subsequent detention, and $750 on the theft charge. The company has intimated that it will appeal.

The Express Traffic Association of Canada, recently filed with the Board of Railway Commissioners its tariffs of rates between U. S. points and Canada. The Chairman of the Board announced that though he had allowed the tariff to be filed, it would be subject to the forthcoming general enquiry into express rates in Canada.

Grain Elevator Notes.

The Security Elevator Co., Ltd., with head office at Winnipeg, has been registered at Edmonton, Alta., under the North West Territories Ordinance respecting foreign companies.

The Minister of Public Works while in St. John, N.B., recently, stated that he had some conversation with D. McNicoll, Vice President C.P.R., regarding additional elevator facilities at the port, Mr. McNicoll agreeing that some additional facilities were required, and that some steps would be taken in that direction very soon.

The Saskatchewan Premier, in response to the Secretary of the Saskatchewan Grain Growers' Association, on the subject of the Government ownership of elevators, recently wrote to the effect that after communications with the Premiers of Manitoba and Alberta, they were of the opinion that unless and until constitutional amendments are guaranteed to enable the provinces to undertake the grain growers' scheme on a safe basis, no end would be gained by any further conference on the subject.

The Canadian Northern Ry. elevator at Quebec was destroyed by fire, together with the contents, Oct. 16. The elevator which had a capacity of 1,000,000 bush., was built for the Great Northern Ry., of Canada, now forming part of the C.N.Q.R., in 1900. It was situated on the Louise dock, and equipped with conveyors for loading ocean-going vessels. The shipment of grain through Quebec for ocean-going vessels ceased in 1902, and since then the elevator has been leased to local storage concerns. An estimate of the damage to the structure and contents has been given at $450,000.

Land has been purchased in the east end of Vancouver, by L. P. Strong, acting for the Alberta Pacific Elevator Co., on which it is proposed to erect an elevator of 1,000,000 bush. capacity. The property is on the C.P.R., and has water frontage sufficiently large to accommodate several elevators. Tenders are reported to have been invited for the construction which it is anticipated will be ready for handling next season's crop. The elevator will be built up on the unit system, each with 250,000 bush. capacity. It is also announced that sites have been inspected at Victoria, but no statement has been made as to the company's intentions there.

In regard to the question of grain handling facilities on the Pacific coast, and the accusation of bad faith against the C.P.R. as to such provision, one of the company's officials is reported to have said recently that there was no change in the company's policy in regard to encouraging the movement of grain from Alberta through Vancouver, nor had the Second Vice President expressed any two views on the question. Last year, Alberta produced slightly over 7,000,000 bush. of wheat, and the estimate for this year's crop was slightly under that figure. Of last year's crop, only 215,000 bush. was exported through Vancouver, and though last year was regarded in the nature of an experiment, it was not anticipated, taking into consideration the large seeding and other local requirements, that any large quantity would move westward this year. Facilities would doubtless be provided in time, but not until there was sufficient volume to justify the expense, hence the policy of the C.P.R., to meet the conditions as they are, and to provide suitable sacking plants at Vancouver. This will be done in time to take care of any portion of this year's crop that will be moved for export through Vancouver, so that grain can go to the seaboard in bulk and be sacked at the lowest possible expense.

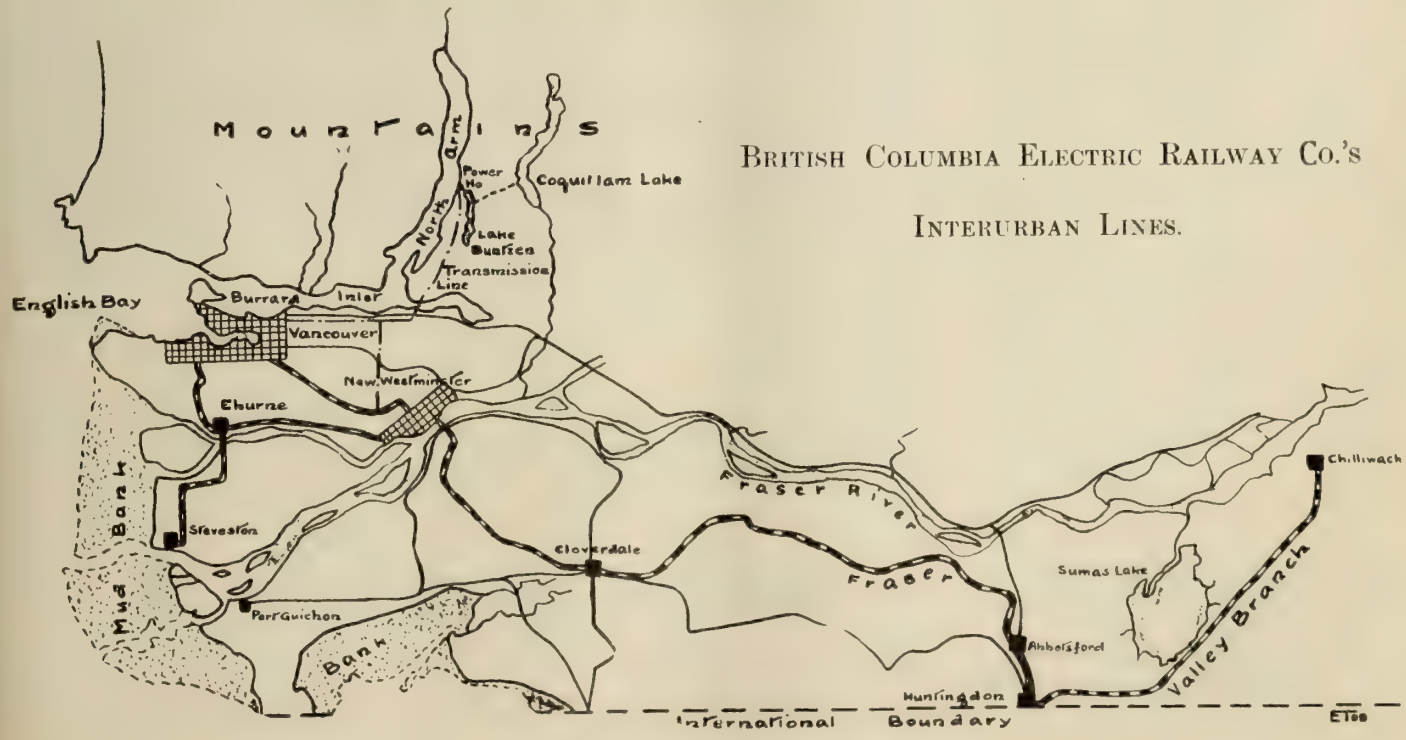
The B. C. Electric Railway Co.'s Fraser Valley Branch.

By Robert Howes, Electrical Engineer.

By natural location the southwest corner of British Columbia is the commercial outlet of a vast area. To the north, for hundreds of miles, a series of rugged mountain ranges forbid easy communication with the coast. On the south, the International Boundary line presents its limits. To the east and north in the foreground lies a vast mountainous area with virgin forests—already an important factor in the world's timber markets—and a mineral wealth as yet slightly explored, but of certain greatness; while in the distance stretch the great resources of the eastern provinces. To the west and south lies the Pacific Ocean, and the markets of the world. In the pioneer days, fur-trading, placer mining and salmon fisheries caused small towns to spring up on the banks of the Fraser River along the natural line of communication. Later, the more distant traffic coming over the railway required a terminal city located at a point where excellent salt water harbors could be obtained, hence the City of Vancouver. These conditions have caused the leading United States railways to seek and obtain railway connections with this young city and far sighted people have flocked in, until now the population is estimated at more than 80,000 persons, and the growth is at the rate of 20% per year. The older city of New Westminster, and lesser towns in the neighborhood, swell the present total of city poulation in the vicinity to a round figure of 100,000. The cultivated farm land immediately surrounding the city is entirely inadequate for supplying the local demand, and supplies of all kinds are shipped in from the east and from the United States. As a result, cultivated land is very valuable, provided ready communication with the city is supplied. Between the Fraser River and the International Boundary lies a strip of land measuring some 60 miles in an east and west direction, and averaging 10 miles in width. This could, if developed, supply all the farm products required by a large city. At present three lines of steam roads pass through portions of this region; but infrequent trains and the great distance between stations afford, to even the favorably located farms, entirely inadequate means of communication with the city. Communication along the river by steamboat has done something to develop the region, but this means is also entirely inadequate.

The B.C. Electric Ry. Co. operates a system of electric roads covering the territory in and around the cities of Vancouver and New Westminster. Realizing the possibilities of the tract mentioned above this company is building an entirely modern interurban electric road over 60 miles long and reaching from the City of New Westminster to the town of Chilliwack. This road is an extension of the older system, and passes lengthwise through the centre of the tract. It is designed for high speed operation and will carry passengers, express, baggage and freight, in fact carry everything to supply the needs of the region. The overhead trolley system with direct current at 600 volts will be used. A trip along the right of way shows a succession of partially developed farms and large tracts of virgin forests. For miles the clearing appears as a street between high buildings. The trees, 200 ft. high and straight as an arrow, give the appearance of a southern cane break on a magnified scale. Pine, fir, cedar, spruce, hemlock and alder are the principal woods. In the open ground and where persistent farmers have made a clearing, the rich black soil shows that the wealth in the forest timber is only the beginning. The present scattered population might appear insufficient to justify the expenditure entailed, were passenger traffic the only consideration. But the forest timber thus made so accessible to the terminal point should produce a remunerative freight traffic, and long before this source of business is exhausted the fertile soil will undoubtedly attract a large population. The materialization of the latter assumption is made doubly certain by the scarcity of other suitable farm locations in the region, and the existence of sufficient open land along the new line to permit a rapid agricultural development without awaiting the removal of timber and clearing away of stumps. The farms around the town of Chilliwack are already noted for their productiveness. From this, and other points, a fair amount of dairy and other farm products will require the operation of an express car from the start. The road has a ninety nine year franchise, and there is little doubt but that it will in a short time prove to be remunerative.

The B.C. Electric Ry. Co. and its subsidiary corporations, aside from operating electric railways as mentioned above, is engaged in a general electric light and power business, covering the territory occupied by its railway systems. Small towns, lumber and shingle mills and other prospective users of electric power and light are sufficiently numerous, so that the company decided to extend this branch of its business along with the railway and be prepared to supply a general light and power business throughout the territory. To this end a set of three phase power mains extending between substations and delivering current at 2300 volts will be installed. To minimize the likelihood of serious shut-downs, duplicate high tension lines will be used, the poles being placed on either side of the track. As good cedar poles can be economically obtained in the vicinity a normal spacing of 100 ft. and the use of span wire construction to support the trolley wire has been adopted. The wires being light and the poles very strong, the first wires are all arranged on the track side of the poles, leaving the outside entirely free for additions. This arrangement precludes the use of equilateral triangular spacing of the wires, but presents



BRITISH COLUMBIA ELECTRIC RAILWAY CO.'S INTERURBAN LINES.

Canadian Northern Railway Co.

Notice is hereby given that application will be made to the Parliament of Canada at its next session for an act authorizing the construction of the following lines, from:

(a) Dundee northerly and easterly to a point on Winnipeg River;
(b) Portage la Prairie southerly and easterly to a point in or near Twp. 2, Rg. 7, E.P.M.;
(c) Hartney westerly to a point in or near Twp. 5, Rg. 7, W. 2 M.;
(d) Moose Jaw southerly and easterly to Bienfait, with a branch from a point thereon near Estevan to Roche Percee;
(e) Between Davidson and Disley on the Q.L.L. and Sask. Ry. westerly and northwesterly to a point on the Saskatoon-Calgary line;
(f) Lashburn westerly to a point between Camrose and Edmonton;
(g) A point on Saskatoon-Calgary line near Twp. 28, Rg. 6, W. 4 M. to Rocky Mountain House;
(h) A point on Saskatoon-Calgary line near crossing of Red Deer River northwesterly through or near Innisfail and Rocky Mountain House to head waters of Brazeau and McLeod Rivers and to Yellowhead Pass;
(i) Winnipegosis southerly to constructed line near south end of Lake Manitoba;
(j) A point on authorized line between Prince Albert and Battleford near Twp. 49, Rg. 3, W. 3 M. northwesterly and northerly to Great Slave Lake;
(k) A point on its authorized line east of Lake Manitoba westerly via the Narrows to its constructed line between Grandview and Roblin;

And extending the time for commencement and completion of the following lines, from:

(l) Strathcona southerly to Calgary;
(m) Regina southwesterly to the International boundary between Rgs. 1 and 5. W. 3 M.;
(n) Between Winnipeg and Ste. Anne, southerly to International boundary;
(o) Battleford westerly to Brazeau River;
(p) Regina to Humboldt and via Carrot River to Pas Mission, and between Humboldt and South Saskatchewan River to crossing of same river south of Prince Albert;
(q) Prince Albert to Edmonton;
(r) Swan River westerly to main line crossing of Saskatchewan River;
(s) A point on authorized line of the Morden and North Western Railway between Neepawa and west boundary of Manitoba, northwesterly to main line between Grandview and Battleford;
(t) Regina westerly to Red Deer River, with a branch to Carleton;
(u) Gladstone to Fort Nelson or Fort Churchill.
(v) Oak Point to Grand Rapids on Saskatchewan River;
(w) Edmonton to the Pacific, via Pine River Pass or other feasible pass;
(x) McCreary via Cartwright southerly to International boundary;
(y) Russell westerly via Yorkton to a point in the Saskatoon-Calgary line;

Also varying the limit to the amount of securities which the Company may issue in respect of its land grant lands.

GERARD RUEL,
Chief Solicitor.

Toronto, October 8th, 1909.

"You say you know nothing at all about our railway?" said the official.

"Nothing whatever," answered the applicant for employment.

"Well, you come highly recommended. I suppose we'll have to put you in the bureau of information and let the travelling public educate you."

several advantages for the conditions. A careful analysis of the inductive effects and transposition requirements have led to the conclusion that triangular spacing would have no particular advantage in the case under consideration, providing the transpositions are correctly made; while the construction adopted permits the use of wide spacing with short cross arms, and the running on one set of poles of two high tension lines, either of which is accessible for repairs without shutting down the other, and from both of which taps can easily be lead off for branch connections.

Because of a considerable saving in price, stranded aluminum has been adopted for the high tension lines. The high tension insulators are of the three part porcelain type each being subjected to a factory test of 100,000 volts, and besides this, each individual part must stand a test of 30,000 volts. The following tests have been reported from the factory: Tops, 60,000 volts; second shells, 45,000 volts; centres, 55,000 volts; for the final proof test of assembled insulators 100,000 volts, which is well above the specified requirements. Besides the above, the porcelain base makes a further addition to the safety factor, hence no insulator troubles are anticipated excepting from actual breakage.

The power used by the company for all purposes on the main land is obtained from a hydro-electric plant located on the north arm of Burrard Inlet, 18 miles by transmission line from the centre of Vancouver. The power is transmitted from this source to the various substations through four transmission lines, at present delivering a line voltage of 20,000 volts with transformers connected in delta. As this voltage would be uneconomical for use with the lines required in connection with the extension here described and the voltage loss in the transmission to the City of Vancouver has also become considerable, it has been decided to re-insulate the old lines and increase the delivered voltage to 34,600 by connecting the transformers in Y. Nearly all of the high tension transformers in use are of the air blast type, and at some of the new substations there might be difficulty in obtaining an entirely satisfactory water supply for cooling purposes. For this reason and for the sake of uniformity, air blast transformers have been ordered for the new stationary substations. The factory insulation test guarantee is 88,000 volts from primary to secondary, and to core, and a spare transformer is supplied with each bank of three, hence the safety factor at these points will correspond approximately to that of the line. The high tension current in each case will be controlled by 45,000 volt oil switches, those in the substation being hand operated. Any bank of transformers may be operated from either line. Series tripping coils located in each wire and having a time limit feature, serve to automatically trip a spring mechanism which opens the switch in event of excess current flowing through the wires.

Power for the road will be supplied from a sub-station at each end of the line, i.e., at New Westminster and Chilliwack, and also from four others located at intermediate points so that the distance between sub-stations will average about 12 miles. Aside from these stationary sub-stations, there will be a portable sub-station with equipment similar to that of the railway part of each stationary sub-station, except that the apparatus will be of the air cooled oil insulated type. A three phase transformer being used instead of single phase transformers. Suitable arrangement for connecting to the lines will be provided near each of the stationary sub-stations, also at intermediate points where power is likely to be of the most value when special occasions require an excessive amount of power on a certain section.

In deciding which system of electrification to adopt, consideration was given to the following requirements: 1. The power will be obtained from an existing transmission system supplying three phase alternating current at 60 cycles. 2. Light and power will on occasions be supplied from the same transmission lines as the railway, although in normal operation one line will be used for railway purposes and the other for light and power purposes. 3. The rolling stock must operate over existing 500 volt d. c. systems. 4. Passenger and express cars will run at fairly high speed and make frequent stops. 5. Fifty ton electric locomotives hauling freight trains will be operated. 6. M.C.B. freight cars will be used in connection with the locomotives. After careful consideration the 600 volt d. c. system was adopted with rotary converters at the sub-stations which will deliver continuous current at 630 volts. The motors on all rolling stock are wound for 600 volts. As the 500 volt system is within the city or along the populous districts, these equipments will automatically operate at a slower speed when they enter the populous districts without the necessity of running all the time on the resistances, which is a desirable feature.

The passenger and express car electric equipments ordered are of the four motor type, each motor having a rated capacity of 75 h.p., and the cars equipped with multiple unit control. Three 50 ton electric locomotives, each equipped with four 160 h.p. 600 volt motors are being constructed in England. In order to collect sufficient current from the trolley wire for these locomotives each will be supplied with two trolley poles and special retrieving arrangements. As the curves will all be very easy, and the maximum grade will be only 2.7% for a short distance; these locomotives will handle freight trains of ample length, at excellent speed. Terminal arrangements are being provided to accommodate passenger trains of three cars, the policy being to divide the trains when more cars than three are required. A two hour schedule will probably be sufficient at the start, leaving the track relatively free for freight operation.

It is anticipated that the first 20 miles will be in full operation before the close of the present year, and work well progressed on the remainder of the line.

Projects, Construction, Betterments, Etc.

Brantford St. Ry.—The Brantford, Ont., city council has given the company a further extension of time for the reconstruction of its lines. A certain amount of work has been done, and the arrangement now is that the Colborne St., Market St. and Brant Ave. lines will be completed this year, and the remainder by Aug. 1, 1910. (Sept., pg. 683.)

British Columbia Electric Ry.—The condition of the lines in the eastern parts of Vancouver has been remedied by the construction of some extensions, which were opened for traffic Oct. 15.

Work will be commenced shortly on the construction of a new passenger station at New Westminster. Large additions will also be made to the car shops. The company has also in contemplation a large stores building and a new freight shed.

It was announced that the first section of the line to Chilliwack, extending from New Westminster to Cloverdale, would be opened for traffic early in November. Beyond this point the work has so far advanced that it is expected to have the line right through to Chilliwack opened for traffic by May, 1910. Tenders are under consideration for the erection of five sub-stations for power distribution along the line.

Negotiations are in progress for the extension of the Vancouver lines to Burnaby. The question whether the proposed line should go north or south of Burnaby Lake is at present under consideration.

The proposed agreement between the company and the Point Grey municipality is still under consideration. The municipality has offered a counter proposal to the terms suggested by the company, and these are now being discussed. (Oct., pg. 769.)

Cape Breton Electric Ry.—The Sydney, N. S., city council has asked the company to make several extensions in the city. (Dec., 1908, pg. 891.)

Chatham, Wallaceburg and Lake Erie Electric Ry.—Owing to the action of a farmer in Dover Tp., Ont., who refuses to allow the company to enter upon his property to continue construction work on the extension to Pain Court is held up. The company is appealing to the Board of Railway Commissioners. (July, pg. 522.)

The Chicoutimi Pulp Co. proposes to construct an electric railway from its mills to the timber limits in the River Du Moulin district, Que. The line will be for lumbering purposes only. Later it may be continued to River a Mars district connecting Alphonse with Chicoutimi, and give connection with the Quebec and Lake St. John Ry.

Grand Valley Ry.—The company has in view the making of a considerable extension of its line. This will consist of the connecting of the various pieces of line owned so as to make one continuous line to London. It will be undertaken in two sections, one starting at Brantford and running through Burford and Eastwood, connecting with the Woodstock, Thames Valley and Ingersoll Ry., at Woodstock; and the other will start at Ingersoll and run to London. The completion of these two pieces of line will make a continuous line from Galt via Paris, Brantford, Woodstock and Ingersoll to London. It is stated that the work will be proceeded with next year. (April, pg. 281.)

Guelph Radial Ry.—The Guelph city council is considering a by-law providing for an extension of the railway from Guelph to Puslinch Lake and Hespeler, Ont. The extension will be 11 miles long, and will connect with the two lines running into Hespeler. (Oct., pg. 769.)

Hamilton, Waterloo and Guelph Electric Ry.—Application is being made by J. Patterson, on behalf of the company, to the Hamilton city council for an extension of time for the starting of construction of this projected line. The by-law calls for the expenditure of $100,000 on construction by the end of the current year. Mr. Patterson informed the committee that he had spent $40,000 on surveys and was prepared to spend $35,000 on right of way by the end of the year. He stated that the money for construction would be forthcoming if the extension were granted, and construction would be started either this fall or early in the spring. (Aug., pg. 609.)

Kingston, Portsmouth and Cataraqui Electric Ry.—The company and the Kingston, Ont. city council have under consideration the terms of an agreement for the supply of power by the city for the operation of the street railway. The council offers power at a certain rate for a term of three years. The company accepts the rate, but asks that the term be five years. (Oct., 1908, pg. 666.)

Lethbridge, Alta.—At a meeting of the town council, Oct. 4, a letter was submitted from L. M. Johnston, on behalf of a company having a charter to construct an electric railway in the town and vicinity, asking for a franchise. The mayor and the town solicitor are interested in the company. The letter was laid on the table for further consideration.

London and Northwestern Ry.—Surveys have been made over a considerable portion of this projected railway. The company has authority to construct a line from London westerly, via Lobo Junction, to Sarnia, Ont., about 65 miles, with a branch from Lobo northwesterly to Grand Bend, 30 miles, and other branches, in all totalling 115 miles. Some of the right of way has been secured. W. G. Swan, London, Ont., is chief engineer. (Sept., pg. 684.)

Montreal and Southern Counties Ry.—It was expected that the first section of this electric railway would be opened for traffic by the end of October. Objection is being taken to the by-law recently passed by Montreal South, Que. A number of the objections made are of a technical character, and are to be submitted to the Governor in Council when it comes up for ratification. (Oct. pg. 769.)

Morrisburg, Ont.—The taxpayers passed a by-law recently, granting a right of way through the principal streets for an electric railway. (May, pg. 367.)

The Mount McKay & Kakabeka Falls Ry. Co. two years ago constructed 2.5 miles of line and graded an additional 2.5 miles. Further work has been delayed pending the settlement of the crossing of the C.N.R., C.P.R., and G.T.P.R. The Board of Railway Commissioners has now authorized this crossing so that the Mount McKay & Kakabeka Falls Ry. may connect with the Port Arthur & Fort William Electric Ry., at the city limits. It is not expected that any work beyond this will be done this year, except erecting transmission poles, but we are advised that it is hoped to resume construction in the spring, when track will be laid on the 2.5 miles of grading above referred to and the first 5 miles will then be put in operation. The company's cars will enter Fort William over the Port Arthur & Fort William Electric Ry. (June, pg. 449.)

Niagara, St. Catharines and Toronto Ry.—All arrangements have been completed for the extension of this line from Welland to Port Colborne, Ont., five miles. Preliminary work was started on the extension, Oct. 5. The construction work involves the placing of a lift bridge over the Welland Canal feeder. The rails for the track have already been delivered, and it is expected that the extension will be completed by the end of the year. (Oct., pg. 771.)

Nipissing Central Ry.—Grading from Cobalt to Haileybury has been completed, and the bridge over the T. & N.O.R., was expected to be completed by Oct. 30. Rails have been delivered, and much of the track laying has been done. The by-law granting the right to operate over Haileybury streets, has been passed. (Sept., pg. 684.)

Okanagan Valley, B. C.—The Coteau Power Co. is preparing plans for the construction of a tram line 25 miles eastward from Vernon, B.C., through an extensive fruit growing district. The company proposes to develop power from the Shuswap River falls, 25 miles from Vernon. Work on the power plant will be started at once.

Ontario West Shore Ry.—The Ontario Railway and Municipal Board has granted the company permission to cross the

---

Edmonton and Slave Lake Railway Company.

Notice is hereby given that application will be made to the Parliament of Canada, at its next session, for an Act authorizing the amalgamation of the company with the Canadian Northern Railway Company, and the extension of time for the completion of its line of railway from Edmonton to the Peace River.

GERARD RUEL,
Chief Solicitor.

Toronto, 8th October, 1909.

PEERLESS
The Fence that saves Expense

It is the best fence you can buy because it is the cheapest, when measured by the years of good service it will give. PEERLESS FENCING is made of all No. 9 hard, springy wire, which is not easily affected by weather, wear or unruly stock. Just the fence suited to railroads. Neat in appearance—conforms to topography of ground and at the same time upright wires are perpendicular. It will pay you to get the free book we are sending to all who write us. A postal will do.

highway in Dunlop village. Seven carloads of track material have been unloaded at Menesetung station, and additional supplies are coming forward. The right of way through Colborne and Ashfield Tps. is practically ready for tracklaying, and it is expected a start will be made at an early date. (July, pg. 523.)

Ottawa and St. Lawrence Electric Ry.—We are advised that an option has been given to a British syndicate on the company's charter and franchises, to expire Nov. 15. Representatives of the company are sanguine that the deal will go through. In that event it is expected that surveys will be gone on with this fall. A. H. N. Bruce, Ottawa, is Chief Engineer. (Oct., pg. 771.)

People's Ry.—A. N. Warfield, Chief Engineer, states that a good route has been secured for the line between Berlin and Stratford, Ont., and also on the proposed Wellesley and New Dundee branches. Surveys are being made for the line between Berlin and Guelph. As soon as they are completed the company will proceed with the securing of the passing of by-laws in the various municipalities for franchises and financial aid. The aid asked will be, that the municipalities take preference stock to the amount of $3,000 a mile of road. Negotiations are stated to be in a forward condition with Stratford, and it is expected to have the by-law ready for submission to the ratepayers at an early date. If it passes it is hoped to have the lines in the city in operation by Sept., 1910, and to New Hamburg by Nov., 1911. (Sept., pg. 685.)

Port Arthur and Fort William Electric Ry.—The extension of the lines on Arthur street, Port Arthur, is well advanced. Track has been laid from Algoma street to Court street. The conduits for the wires have been laid between Water street and Algoma street. (April, pg. 281.)

Quebec Ry., Light and Power Co.—Work is practically completed on the switches at the top of Palace Hill, for the line which it is proposed to run in continuation of the former transfer line. An extension to Cap Rouge is also contemplated. An engineer is now going over the route and his report is expected to be made at an early date. (Oct. pg. 771.)

Sydney and East Bay Ry.—The Nova Scotia Legislature has incorporated a company with this title, for the purpose of constructing an electric or other railway, from the Sydney city limits to the head waters of East Bay, with power to extend through districts 8 and 13, and to construct branch lines. The company is also given powers to generate electricity. The provisional directors are: T. Cozzilino, J. C. Larder and J. B. McCormack, of Sydney, N. S. (May, pg. 367.)

Toronto and York Radial Ry.—A proposition has been submitted to the Toronto city council for the admission of the company's lines into the city. The proposition is that the company will send its cars into the city if it is allowed to make running arrangements with the Toronto Ry., and is guaranteed that at the expiry of the Toronto Ry. franchise, a similar arrangement will be continued. The Toronto Ry. franchise expires in 1921, and the position which the city has always taken up is that no rights can be given to the Radial company which will run longer than that period. (Sept., pg. 685.)

Toronto Ry.—A permit has been granted by the Toronto city council for the erection of a car barn on Lansdowne Avenue, near Lappin Ave. The new building is to be of brick, and is estimated to cost $50,000.

Permission has been granted for the relaying of the tracks on Shaw St., along the centre of the street instead of at the side as at present. (Oct., pg. 771.)

Winnipeg Electric Ry.—Permission has been granted for the construction of a second track from the north end car barns to the city limits. The city council has also decided to ask for an extension of the Selkirk Avenue line for a couple of blocks, and then westerly to McPhillips' street.

Winnipeg, Selkirk and Lake Winnipeg Ry.—The Winnipeg city council has granted permission to the company to run its cars from the new city limits to the old city limits. This permission is given subject to it not being considered as giving any rights to operate in the city on the Winnipeg Electric Ry. tracks. (Oct., pg. 771.)

Yarmouth and Digby Electric Ry.—The Nova Scotia Legislature has incorporated a company with this title, for the purpose of constructing an electric railway from the northerly limit of Yarmouth, through Yarmouth county to Bear River Village, Digby county, together with all necessary powers. The provisional directors are: B. G. Burrill, B. B. Bowman, I. M. Lovett, I. A. Lovett, Yarmouth; J. A. Dickey, F. B. McCurdy, B. F. Pearson, Halifax; A. H. Comeau, Meteghan River; W. C. Clarke, Bear River; A. Bourneuf, W. Bourneuf, Haverhill, Mass., and the offices of the company are at Yarmouth. (May, pg. 369.)

Yarmouth and Eastern Ry.—The Nova Scotia Legislature has incorporated B. G. Burrill, B. B. Law, Yarmouth; J. A. Dickey, Halifax, with power to construct a railway, to be operated by electricity or other motive power, from Yarmouth to Tusket Wedge, and such branch lines as may be necessary. The company is authorized to enter into agreements with other companies and to carry on a number of allied businesses. (May, pg. 369.)

Electric Ry., Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Aug., $242,016; operating expenses, $128,442; net operating earnings, $113,574; renewal funds, $16,394; net earnings, $97,180; approximate income from investments, $16,500; net income, $113,600; against $180,945 gross earnings; $93,485 operating expenses; $97,460 net operating earnings; $14,962 renewal fund; $72,948 net earnings; $13,550 approximate income from investments; $86,048 net income for Aug. 1908. Aggregate gross earnings for two months ended Aug. 31, $462,681; net earnings, $211,698, against $355,355 gross and $168,020 net for same period 1907-08.

Calgary St. Ry.—Gross receipts for Aug., $9,265; sinking fund and interest, $3,996.33; operating expenses, $2,505; surplus, $2,754. Gross receipts for Sept., $10,179.

Halifax Electric Tramway—Traffic receipts for Sept., $21,020.91, and for two weeks ended Oct. 14, $9,389.61, against $21,084.64 and $6,650.88 for same periods 1908.

Montreal St. Ry.—The usual quarterly dividend of 2½% for the quarter ended Sept. 30, has been declared, payable Nov. 2, to shareholders of record, Oct. 13.

Port Arthur and Fort William Electric Ry.—Gross earnings for Aug., $12,951.66; expenses, $6,426.98; net earnings, $6,524.68.

Regina St. Ry.—The Regina, Sask., city council is applying to the Board of Railway Commissioners for authority to construct a street railway. We are advised that the construction and operation of the line will be undertaken entirely by the city.

St. Thomas St. Ry.—Total receipts for Sept., $1,387.47, against $1,463.98 for Sept., 1908. The decrease is chiefly due to the price of tickets which are now sold at 8 for 25c., against 7 for 25c. last year. The number of passengers carried in Sept. was 39,748, against 38,649 in Sept., 1908.

South-Western Traction Co.—At the sale, Oct. 20, the line was sold to J. E. McDougall, of the London Stock Co. The amount realized was $455,000. exclusive of lien, or a total of $535,067.

Toronto Ry.—Gross earnings for Sept., $379,981.08; net earnings, $199,146.97, against $354,095.42 gross earnings; $193,152.33 net earnings for Sept., 1908. Aggregate gross earnings for nine months ended Sept. 30, $2,857,291.30; net earnings, $1,407,655.21, against $2,629,222.04 gross earnings; $1,232,478.72 net earnings for same period 1908.

Winnipeg Electric Ry.—Gross earnings for Aug., $197,800; expenses, $100,800; net earnings, $97,000, against $155,800 gross earnings; $80,100 expenses; $75,700 net earnings for Aug., 1908. Aggregate gross earnings for eight months ended Aug. 31, $1,622,800; net earnings, $812,500, against $1,353,800 gross and $674,700 net for same period 1908.

Electric Railway Notes.

Four cars for the Nipissing Central Ry. have been delivered at Haileybury, Ont., and an order has been placed for four trailers for delivery next summer.

Two cars have been added to the rolling stock of the Winnipeg Electric Ry., making 25 cars added during the year. All these cars have been built at the company's shops.

The Winnipeg Electric Ry. has adopted a new transfer system, modelled on the same lines as that adopted some time ago by the Toronto Ry. The system went into operation Oct. 1.

The Quebec Ry. Light and Power Co., recently asked for tenders for the supply of 10 open cars, six closed cars and three additional sleepers for its City Division, two large cars and a 500 k. w. motor generator set for its Montmorency Division.

T. C. Taylor, formerly a motorman in the employ of the Winnipeg Electric Ry., who was recently admitted to bail in connection with a charge respecting the death of two pedestrians who were crushed between two cars in Winnipeg, July 26, has been committed to an asylum as insane. It is said that the nature of the charge has so preyed on him that his reason has given away.

Allan Purvis, who has been appointed Local Manager, British Columbia Electric Ry. Fraser Valley Branch, Vancouver, was born at Batavia, Java, June 29, 1878, and educated in Liverpool, Eng. He entered railway service at 12 years of age, being successively, Aug., 1890, to Feb., 1891, messenger Stores Department; Feb. to Nov., 1891, storesman; Nov., 1891, to Sept., 1892, junior clerk at Vancouver, B.C.; Sept., 1892, to Aug., 1893, timekeeper, Donald, B.C.; Aug., 1893, to Oct., 1894, clerk, Vancouver, B.C.; Oct., 1894, to Mar., 1895, assistant storekeeper, North Bend and Kamloops, B.C.; Mar., 1895, to Sept., 1896, clerk and operator, Car Service and Fuel Department, Vancouver, B.C.; Sept., 1896, to Jan., 1899, chief clerk, Fuel Department, Vancouver, B.C.; Jan., 1899, to Feb., 1908, chief clerk to General Superintendent, Vancouver, B.C.; Feb. to Nov., 1908, Superintendent District 4, Central Division, Souris, Man.; Nov., 1908, to Oct., 1909, Superintendent District 3, Pacific Division, Nelson, B.C.; all service with the C.P.R.

A press dispatch dated Oct. 22, states that the present lease of the G.T.R. air line division by the Wabash Rd. will expire in a few months, and it is also reported that an arrangement will be concluded with the M.C. Rd. to use its tracks from Detroit to Buffalo. G.T.R. officials, in denying the recent reports that it was considering the construction of a tunnel under the Detroit River, stated it was very likely that the Wabash Rd. would make an arrangement with the M.C. Rd. to use its tunnel, now nearly completed.

Notice.—The Canadian Pacific Railway Company will apply to the Parliament of Canada at its next session for an Act:—

(1) Extending the time within which it may construct the following lines of railway:—

a. From a point at or near Osborne to a point between Cartwright and Boissevain, Manitoba.

b. From Otterbourne to Stuartburn, Manitoba.

c. From Killam or some other point in Township 44, Ranges 13 and 14 West 4th to Strathcona, Alberta, with power to commence from a point in Range 12.

d. From a point at or near Napinka, westerly to a junction with the northwest extension of the Souris Branch.

(2) Authorizing it to construct a line from a point in Township 22, Range 2 East of the Principal Meridian in a northerly or north-westerly direction to a point in Township 34, Ranges 5, 6 or 7, west of the Principal Meridian, Manitoba, a distance of about 100 miles.

(3) Empowering the Directors to enact by-laws for the election or appointment of two or more Vice-Presidents of the company and defining their powers, duties, qualifications and terms of office.

(4) Amending the Company's Acts relating to the election of directors.

(5) To further interpret or define the meaning of the Company's Act relating to the issue of Preferred Stock and for other purposes.

W. R. BAKER,

ANDREW T. THOMPSON,
Ottawa Agent.

Dated at Montreal, 20th October, 1909

Notice.—The Esquimalt and Nanaimo Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the extension of its main line to Comox and the branches which it was authorized to construct by its Act of incorporation, chapter 14 of the Statutes of British Columbia, 1884, and the railways which it was authorized to construct by section 2 of chapter 92 of the Statutes of Canada of 1906, and for other purposes.

W. F. SALSBURY,
ANDREW T. THOMPSON, Secretary.
Ottawa Agent.

Dated at Vancouver, the 30th September, 1909.

Notice.—The Manitoba and North Western Railway Company will apply to the Parliament of Canada, at its next session, for an Act authorizing it to construct and operate the following lines of railway—

(a) From a point at or near Birtle, to a point at or near Hamiota, in the Province of Manitoba.

(b) From a point at or near Russel in the said Province of Manitoba in a northerly or north-easterly direction, a distance of about 150 miles, and for other purposes.

H. C. OSWALD,
ANDREW T. THOMPSON, Secretary.
Ottawa Agent.

Dated at Montreal, the 30th September, 1909.

NOTICE.

Pursuant to section 361 of The Railway Act, notice is hereby given that one month after the first publication of this notice application will be made to the Board of Railway Commissioners for Canada by The Canadian Northern Railway Company and The Northern Extension Railway Company for a recommendation to the Governor in council for the sanction of an agreement amalgamating the two companies.

GERARD RUEL,
Chief Solicitor for the companies.

Dated at Toronto, 6th October, 1909.

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

Salving the s.s. Turret Bell.

The recent salving of the s.s. Turret Bell, which has been mentioned in earlier issues, after having lain stranded at Cable Head, P.E.I., for almost three years, has some interesting points, the following description of which has been adapted from a recent issue of Shipping Illustrated. The underwriters, after paying a total loss, awarded the contract for the salvage work to S. M. Brookfield, Halifax, N.S., by whom it was subsequently surrendered to the Reid Wrecking Co., Sarnia, Ont., who carried out the work successfully. The vessel was thrown up on the beach during a heavy northeast gale and at low water during ordinary spring tides in May, she had only 3 ft. of water at her stem and 6 ft. at her stern post. The conditions governing the tides were carefully studied, and after a fair analysis the conclusion was arrived at that no reliance could be placed on the tides along the north shore of the island. It was also discovered that after the spring tides of the early part of June each year, the water shrank very rapidly, so that the high water spring tides of July were 15 ins. less than at the corresponding tides in May and June, and at the high water tides of Aug. there was 9 ins. less water than at the corresponding tides of July. The situation was carefully studied, and it was considered possible to float the vessel and deliver it in a dry dock. It was estimated that the work could be accomplished within three weeks from the time the plant was placed aboard the vessel, and had not a number of delays and disappointments occurred, this would have been done. During the course of the operations, the closing of the Welland canal in 1908, the loss of a car on the I.C.R., the failure of contractors to deliver certain equipment, and a fire and boiler explosion on board the wrecking steamer, were some of the troubles which were experienced, so that, with the exception of a few weeks work in Aug. and Sept., 1908, the actual work of floating the stranded vessel, was not commenced until July 1909. At that time it was discovered that the work which had been accomplished was altogether undone, and the vessel forced back about 100 ft. on to the point forming Cable Head. She had then to be literally carried by hydraulic jacks about 1,000 ft., until a sufficient depth of water was reached, when she was floated by means of compressed air and taken to Charlottetown, P.E.I., where temporary repairs were made, and subsequently to Quebec, where she was docked for examination and later berthed at Levis, where she now lies for sale. During the work, every care was taken of the machinery, and it is notable that the engines, boilers and auxiliary machinery were worked continuously without a hitch from the time she was floated until she reached Quebec. The vessel is a steel steamer of 2,211 tons gross, 1,376 tons net, built in 1894, and carrying 3,900 tons deadweight on a mean draft of 10 ft. 7 ins.

The Otonabee-Rainbow Collision.

An investigation was held at Peterboro, Ont., recently, by Capt. L. A. Demers, acting Dominion Wreck Commissioner, assisted by Capts. R. Jones and F. Nash, into the causes which led to the collision between the s.s. Otonabee and s.s. Rainbow. The Rainbow is a wood steam vessel of 34 tons, which was rebuilt in 1909, propelled by a left handed propellor, and manned by a master, mate, engineer and deckhand, the master and mate holding certificates, and the engineer having a permit. The vessel is owned by F. Burnett, of Birdsall, Ont. The Otonabee is a twin screw boat of 87 tons, owned by the Otonabee Navigation Co. The master and mate have certificates. On Aug. 11, about 10.30 a.m., weather being clear, the Otonobee left the wharf, a short distance above Hale's bridge, after having given the whistle for the opening of the bridge, proceeded to follow the course usually adopted, that is the left hand side of the channel, which is done owing to the fact that immediately below the bridge the river forms a sharp bend. On opening up the river ahead of the bend, it was seen that the Rainbow was coming from the opposite direction following the right hand side of the channel. Upon seeing the Otonabee, the master of the Rainbow, immediately hard ported the helm, but in the evolution, a link of the rudder chain parted, the rudder then returned to midship, and the current threw her head to starboard. Seeing that, the master of the Otonabee stopped the port engine and starboarded the helm, with the result that a glancing blow was made into the port side amidship of the Rainbow.

In the Court's point of view, the evolution performed was permissible under the circumstances, though the Otonabee acted contrary to the rules of the road, and yet at such close quarters, or in the moment of danger, the above rule says: "To act as judgment says is proper," which was done in this case by both captains, in view of which the Court finds that Capt. Burnett of the Rainbow, and Capt. Harris of the Otonabee, under the circumstances and to avoid a collision, performed the only evolution permissible when at close range. Therefore, the Court exonerates the masters and officers of both vessels from all blame, and recommends that a suggestion be made to the proper authorities, to cause the overhanging foliage which partly intercepts the view at the bend of the Otonabee River, below the bridge, to be cut down.

The Stigstad-Siraine Collision.

The enquiry into the circumstances attending the collision of the s.s. Stigstad and the schooner Siraine, near St. Lawrence Point, in the River St. Lawrence, Sept. 11, took place before Capt. L. A. Demers, acting Wreck Commissioner, assisted by Capt. A. Reid, Port Warden, Montreal, and R. Paquet, President Corporation of Pilots, Quebec, and the following judgment was delivered, Oct. 4, R. Paquet dissenting:—

The Court having carefully enquired into the circumstances attending the collision, finds Pilot C. Normand in default for not exercising necessary and adequate precaution to avoid collision, and holds that he acted in contravention to articles 20 and 28 of the Rules of the Road, and in consequence thereof, and in view of the facts as adduced, C. Normand, Pilot, C. Wahlquiss, second mate and Capt. O. Ellifsen, incur the Court's severe censure, and are held responsible for the collision, and as the Court is empowered with jurisdiction as to imposition of costs, it is ordered that the costs of this investigation be defrayed by the s.s. Stigstad.

Stranding of the s.s. Urania.

Capt. L. A. Demers, acting Dominion Wreck Commissioner, with R. Paquet and Jas. Bain, assessors, held an investigation recently into the grounding of the s.s. Urania, of the Norwegian register, which occurred on Aug. 7, on a reef extending from White Island, the vessel being engaged in the St. Lawrence coal trade, under charter to the Nova Scotia Steel and Coal Co. Following is the judgment:—

The Court after carefully reviewing the evidence which was of a somewhat contradictory character, finds that Pilot Jos. Dupil is not to blame for the grounding of the vessel, owing to the fact that the Captain, C. H. F. Jensen, was primarily responsible for the stranding through his interference with the pilot's intention of anchoring the ship, when it was deemed advisable in the pilot's opinion to come to an anchor. The pilot is, in consequence exonerated from the responsibility of the stranding, and Capt. Jensen is severely censured for interfering without cause.

Vessels Removed from the Register.

The following vessels were removed from the register during Sept., for the reasonsassigned:—Steam: Columbus, Sault Ste. Marie, Ont., 230 tons, destroyed by fire; Going, Windsor, Ont., 31 tons, burnt; Kathleen, Lindsay, Ont., 26 tons, burnt; Prescott, Montreal, 648 tons, burnt; Rupert, Quebec, 292 tons, broken up. Sailing: C.P.N. no. 1, Victoria, 91 tons, wrecked; Emily B. Maxwell, Port Hope, Ont., 327 tons, wrecked; Grace D. Day, Shelburne, N.S., 39 tons, transferred to Newfoundland; Laura C. Zwicker, Lunenburg, N.S., 85 tons, foundered; Ledee Adele, Charlottetown, P.E.I., 50 tons, wrecked; Letitia, St. Andrews, N.B., 10 tons, foundered; Oriole, Toronto, 50 tons, broken up.

Notices to Mariners

The Department of Marine has issued the following:—

No. 86. Sept. 30. 236.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Lotbiniere, daymarks at range lighthouses.

No. 87. Sept. 30. 237.—British Columbia, Vancouver Island, west coast, Carmanah, change in fog alarm. 238.—British Columbia, Jervis Inlet, Nelson Island, Vanguard Bay uncharted rock.

No. 88. Sept. 30. 239.—Ontario, Great Lakes and St. Lawrence River, dates to which lights will be kept in operation. 240.—Ontario, River St. Lawrence, Iroquois to Prescott, changes in buoyage.

No. 89. Sept. 30. 241.—British Columbia, Vancouver Island, west coast, Quatsino Sound, Entrance Island, new lighthouse.

No. 90. Oct. 1. 242.—Quebec, River St. Lawrence, chart Montreal to Sorel issued. 243.—Quebec, River St. Lawrence, chart Sorel to Batiscan issued. 244.—Quebec, River St. Lawrence, chart Batiscan to Quebec issued.

No. 91. Oct. 4. 245.—Ontario, Lake Superior, Caribou Island change in fog alarm.

No. 92, Oct. 6, 246.—Ontario, Lake Ontario, west end, Burlington channel, front range lighthouse rebuilt.

No. 93. Oct. 7. 245.—Quebec, River St. Lawrence, Cape Dogs light station, fog alarm established, corrections.

No. 94. Oct. 12. 246.—British Columbia, Vancouver Island, Quatsino Sound, west arm, and Bight Cove, uncharted rocks. 247.—British Columbia, Burrard Inlet, Vanouver harbor, Brockton Point, change in light. 248.—British Columbia, Finlayson channel, Heikish narrows, rock located, wreck. 249.—British Co-

No. 98. Oct. 16. 263.—Ontario, Lake Erie, Port Burwell, hydrographic information, aids to navigation.

An act passed last session of the Nova Scotia Legislature, authorized the town of Yarmouth to exempt from taxation for 20 years, property of the New Burrill-Johnson Iron Co. under certain conditions. The company is engaged in the construction and engining of vessels.

The Great Lakes and St. Lawrence Navigation and Improvement Association.

H. W. Richardson, President, has recently issued a circular letter to all organizations and municipalities in any way interested in the project for the general improvement of the waterway from the Great Lakes to the seaboard, as follows:—

"The time seems appropriate to press upon the attention of the Government the urgent need for a new Welland canal. The Northwest is demonstrating its possibilities, and we should not hesitate to increase and cheapen our transportation facilities. There is no easier or cheaper way to do this than to modernize this 26 miles of canal, so that the large freight steamers of the Upper Lakes may proceed to the foot of Lake Ontario. A reduction of two or three cents a bushel could thus be made in the freight rate on wheat, and the saving to the northwestern farmer on the present crop would thus be not less than $3,000,000, while in a few years the saving would be three or four times as great. The lake freight and the lake and rail freight from Fort William to Montreal, for the last half of Oct., is 6½c. a bush. One and one-half cents is the rate from Fort William to the foot of Lake Erie, either Buffalo or the head of the Welland canal. To load, proceed to Buffalo, discharge, and return, a large steamer takes nine days to earn this 1½c. With a new Welland canal she could proceed to Kingston, Prescott or Brockville, and only add two days to her voyage. One-half cent would thus be a fair return for this extra time, and accordingly 2c. would bring the grain from Fort William to the head of the St. Lawrence. The rate by barge down the river to Montreal is 1⅞c. at present, and would doubtless be reduced with increase in the traffic. The total cost from Fort William to Montreal would thus be at the most somewhere between 3 and 4c. a bushel, instead of 6½c. as at present. It goes without saying that while the total rate from Fort William or any Lake Superior port to New York, via Buffalo, approximates or exeeds the present rate to Montreal, a new Welland canal and the new freight rates possible would not fail to attract a large part of the export wheat now destined for Buffalo, and especially so as facilities for ocean transportation from Montreal are increased. Lake Ontario, instead of being sealed to the immense fleets of the Upper Lakes, would be able to share their traffic, every port on Lake Ontario would enjoy corresponding advantages, and the St. Lawrence River, the natural outlet from the lakes, would, as it should, become the highway for the freight of the lakes to the ocean. The Government is giving the matter consideration. Some surveys and estimates have already been made, and the practicability and moderate cost of the work have been demonstrated. Delay gives just so much advantage to the competitive route through New York State, and the expenditure of the $101,000,000 voted for the new Erie canal is being rapidly carried out. The Great Lakes and St. Lawrence Navigation and Improvement Association has been formed primarily to bring about the improvement advocated in this circular. At a meeting in Toronto recently it was decided to interview the Government at the earliest date possible, and at this interview the attendance of everyone interested is desired."

Canadian Northern Steamships, Ltd.

A company with the above title has been incorporated under the Dominion Companies Act, with a capital of $2,000,000, and office at Toronto, to construct, purchase, or otherwise acquire, operate and manage: (a) Steamships and boats of every description; (b) Buildings, hotels, stores, works appliances, mills, machinery, plant and equipment of every kind whatsoever, on land or water deemed necessary in connection with the construction, maintenance, navigation, renewal or repair of the company's vessels, works, or equipment, or in connection with the accommodation, care or conveyance of passenger traffic or the handling, forwarding, warehousing, elevation, storage, or care of freight, mails, express or other traffic; (c) Lands, water lots, docks, wharves, basins, slips, harbor and port works and terminal and other facilities, and privileges of every description; to carry on any business incidental to the full use of the work and facilities authorized or which may seem capable of being conveniently carried on in connection therewith or calculated to enhance the value of, and render profitable any of the company's properties or rights; to make traffic or other arrangements with any railway, steamboat or navigation company whose line of railway or undertaking communicates with or is contiguous to that of the company, or may be conveniently operated therewith, and to enter into agreements with such other companies for the conveying or leasing to it the undertakings or works of the company in whole or in part, or for amalgamation upon such terms and conditions as may be agreed upon; to acquire and undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which this company is authorized to carry on, or possessed of property suitable for the purposes of the company; to use any of the funds of the company to purchase or otherwise acquire, and hold shares, or other securities of any other company, and to promote any company having objects similar to those of this company, or carrying on any business capable of being carried on so as to benefit this company, and while holding the same to exercise all the rights and powers of ownership, including the voting powers; to amalgamate with any other company having objects similar to those of this company; to dispose of any of the assets or undertakings of the company by sale, lease or otherwise; to do all or any of the above things in Canada or elsewhere, and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere.

The provisional directors are, F. H. Phippen, K.C., G. G. Ruel, G. F. Macdonnel, R. H. M. Temple and A. J. Reid, Toronto, all of whom are connected with the Canadian Northern Ry. Co.

Atlantic and Pacific Ocean Marine.

W. Watson, Chairman Cunard Steamship Co., died in London, Eng., Oct. 4, aged 66.

The C.P.R. has announced the cancellation of the sailings of the s.s. Lake Erie, from St. John, N.B., Nov. 4, and from Liverpool, Eng., Nov. 10.

The Government s.s. Arctic arrived home Oct. 4, after a 14 months' trip to the Arctic regions. Capt. Bernier, who was in charge, states that about 24,000 miles was covered without accident.

It is reported that the Government will grant a subsidy for a new steamship line between St. John, N.B., and a Mexican port to be selected, with calling places at British West Indies ports.

It is reported that Manchester Liners, Ltd., intends to operate a weekly service between Canada and England, during the coming winter, instead of fortnightly, if berth accommodation can be arranged at St. John.

The St. John, Boston and Cuba Steamship Co., recently organized to operate a steamship service between St. John, N.B., Boston, Mass., and Havana, Cuba, commenced its service Oct. 5 with the sailing of the s.s. Karen from St. John.

The Allan Line announces that its first winter sailing from St. John, N.B., will take place Nov. 26, and the first from Halifax, N.S., Nov. 27. The first sailing of the winter season will be on Nov. 12, when the s.s. Virginian will leave Liverpool for St. John.

D. D. Mann, Vice President Canadian Northern Ry., is reported to have stated, Oct. 26, that as soon as the railway was completed and linked up from coast to coast, it was the intention to place lines of vessels on both the Atlantic and Pacific Oceans.

The C.P.R. is reported to have made arrangements with the Allan Line, whereby a number of its winter sailings from St. John have been cancelled, these being taken up by the Allan Line steamships Grampian, Corsican, Hesperian and Tunisian.

The Donaldson Line s.s. Alcides, which several years ago was on the St. Lawrence route, has been sold for breaking up. She was built at Glasgow, Scotland, in 1886, her dimensions, etc., being: length, 340 ft.; breadth, 42.1 ft.; depth, 30 ft.; tonnage, 3,421 tons gross, 2,181 tons register.

The White Star-Dominion steamships Laurentic and Megantic, which have been running on the St. Lawrence route between Montreal and Liverpool, Eng., during the summer, will be placed on the Liverpool-New York service during the winter, replacing the steamships Cedric and Celtic.

Montreal papers have printed recently what purports to be a balance sheet of the Allan Line, dated Aug. 21. The company being more or less of a private one, its balance sheet has never been made public, and it is claimed that the recent publication of the figures is the first made.

The following C.P.R. steamships are now equipped with Marconi wireless telegraph apparatus: Lake Champlain, Lake Erie, Lake Manitoba, Lake Michigan, Milwaukee, Montezuma, Mount Temple, Monmouth, Montrose, Montcalm, Montreal, Montfort and Mount Royal, in addition to the Empress of Britain and Empress of Ireland.

A movement has been started by the captains of the C.P.R. Atlantic fleet, for the supply of newspapers and periodicals to the isolated wireless telegraph operators at various points along the St. Lawrence route, during the season when navigation is open. The papers are packed in barrels, to which a flag is attached, and thrown overboard near the stations.

The C.P.R. s.s. Empress of Ireland, while inward bound, Oct. 14, struck what is presumed to be a submerged wreck between Cape Chatte and Matane, and damaged her hull considerably. She was examined at Quebec, where the damage was not considered to be serious, and eventually sailed for Liverpool, where she will be thoroughly examined and overhauled

The British owned s.s. Paradox is reported to have been picked up by the Hudson Bay Co.'s s.s. Pelican in the Bay and taken to Fort Churchill. The vessel is reported to have been badly crushed by ice last spring and to have been drifting since she was abandoned by the crew, all of whom were rescued by Revillon Bros.' s.s. Adventure and sent back to England early in the fall.

The Canadian-Mexican Pacific Steamship Co., in conjunction with the Jebsen Line, are giving a fortnightly service between Victoria and Vancouver, and Salina Cruz, Mexico, sailing on the 21st and 7th of the month respectively, making connections at the last mentioned port with the Tehuantepec National Ry., for transport across the isthmus to Puerto Mexico, for transhipment to Atlantic vessels.

Press reports emanating from the U.S. state that cable dispatches have been received to the effect that a conference of steamship owners operating between European and U.S. ports, held in London, Eng., has decided unanimously to increase ocean freight rates from U.S. ports. It is stated that the opinion prevailed at the conference that present rates are inadequate, and that agents and other representatives at U.S. ports must advance tariffs and improve their position generally.

The Allan Line s.s. Laurentian, which was wrecked on Mistaken Point, Nfld., Sept. 6, has been declared a total wreck, which is in accordance with the first reports as to her condition, though, at one time it was thought possible she might have been saved. Salvage operations on the cargo have been undertaken, but she is reported to be breaking up. We understand that she has been sold for $5,000, subject to the right of the underwriters to deal with any cargo that might be left, should opportunity arise for its salvage.

With reference to the recent acquirement of the steamships Cairo and Heliopolis, which have been engaged in the Mediterranean service, mentioned in our last issue, and which were reported to have been purchased by interests representing Mackenzie, Mann and Co., reports from the Pacific coast state that negotiations are in progress for their acquirement by the G.T.P.R., and also state that that company already has one vessel under construction, and one about to be commenced for the Pacific coast trade.

The Donaldson Line s.s. Hestia was wrecked in the Bay of Fundy, Oct. 25, and lies a total loss on the ledges about five miles from Grand Manan, N.B. In rescuing those on board, one of the boats was upset and 30 of the crew and four passengers were drowned. The Hestia was built at Sunderland, Eng., in 1890, her dimensions being: length, 365 ft.; breadth, 44.2 ft.; depth, 27.3 ft.; tonnage, 3790 gross, 2434 register. She was equipped with engines having cylinders 27", 44" and 72" diar., by 48" stroke, developing 390 n.h.p., driving twin screws.

Notwithstanding the Allan Steamship Line's official statement regarding the future management of the company, which was given in our last issue, rumors continue current as to the sale of the company's vessels, and the complete change of control. The C.P.R. has now been added to the list of those credited with the purchase of the company, but the statement was promptly denied by the President. A Montreal paper states that it has definite knowledge that a sale of the property has taken place, the consideration being $12,000,000, but that the name of the purchaser is not known.

H. and A. Allan, Ltd., has been incorporated under the Dominion Companies Act, with a capital of $300,000, and office at Montreal, to build, purchase and sell shares in, acquire, own and operate steam and other vessels, and to carry on the business of shipowners and shippers, steamship and forwarding agents, master porters, ship brokers, warehousemen, wharfingers, storekeepers, harbor masters, importers and exporters, and to employ such vessels for profit. The provisional directors are: Sir H. Montagu Allan, Hugh A. Allan, A. A. Allan, G. W. MacDougall, Montreal, and B. J. Allan, Boston, Mass.

In discussing the position of the proposed "all-red" route between Great Britain and the Antipodes, via Canada, the New Zealand Premier is reported to have said, in Wellington, N.Z., recently, that the original idea of securing a fast service on both oceans had been practically abandoned. The old difficulty of the present service between Canada and Australia, namely, that of Brisbane being a port of call, which prevented vessels calling at Wellington, still stood in the way. New Zealand must therefore either subsidize a fast connection with Australia and the Fiji Islands, or arrange with Canada for a fast service direct or from Sydney.

Maritime Provinces and Newfoundland

The final accounts of the liquidator of the Grand Lake Steamship Co., were submitted to a meeting of shareholders, at St. John's, Nfld., Oct. 26.

The Black Diamond Steamship Line, operated by the Dominion Coal Co., is reported to be about to add another steamer to its fleet, for service next year between Montreal and Newfoundland.

Lord Northcliffe, who is intimately associated with the Anglo-Newfoundland Development Co., stated while in Montreal recently, that a direct steamship line between Newfoundland and England would be established.

The Atlantic Shipping Co., Port Maitland, N.S., has sold its bark Kate F. Troop to an Argentine firm. She was built at Tynemouth, Eng., in 1881, her dimensions being: length, 187 ft.; breadth, 37.5 ft.; depth, 22.1 ft.; 1,097 tons register.

C. J. Stuart, Halifax, N.S., first officer of the cruiser Canada, J. A. Nicholson, Lunenburg, N.S., first officer of the cruiser Petrel, and H. P. Cousins, St. Andrews, N.B., first officer of the cruiser Curlew, have been appointed to the Fisheries Protection Service.

The Minister of Marine stated Oct. 18, that the icebreaking steamship Earl Grey, which recently arrived in Canada, and has been taken over by the Government from the firm who built her, will be operated this winter across the Northumberland Strait, replacing the s.s. Stanley, which will be used in the Bay of Fundy buoy and lighthouse service, etc.

A delegation from the Halifax and Dartmouth Boards of Trade waited on the Provincial Government, Oct. 14, to call the Government's attention to the suitability of Halifax for the construction of a shipbuilding plant, and to ask the Premier to make representations to the Dominion Government on the subject. Halifax and Dartmouth have each voted $100,000 in aid of such a project.

The Valley Steamship Co.'s s.s. Granville, some details of which we gave in our Oct. issue, is equipped with fore and aft surface condensing marine engine, 12" and 24" by 18", with horizontal two-furnace boiler 8' 6" by 9', and with all the auxiliary pumps, tanks, steam steering gear, etc. The hull was built at Shelburne, N.S., and the machinery and fittings installed and completed at Yarmouth.

The Edgett-Grady Co., Ltd., has been incorporated under the Prince Edward Island Joint Stock Companies Act, with a capital of $20,000, and office at Summerside, P.E.I., to carry on a general wholesale and retail mercantile business, and in connection therewith to own and operate steam and other vessels, and to conduct agencies for insurance, marine and mining companies, railway corporations, etc. W. H., J. F., and J. C. Edgett, Moncton, N.B., and J. Grady, Summerside, P.E.I., are provisional directors.

Bowring Bros. have sold their sealing steamer Terra Nova, to be used in connection with the Antarctic expedition which is being organized in England, under Capt. Scott, and which is to be undertaken next year. The vessel was sold subject to inspection, and on her return from the south, the original owners have the option of re-purchasing her. The Terra Nova was similarly sold and repurchased a few years ago, in connection with the relief expedition which followed up the first Scott voyage to the Antarctic in the s.s. Discovery, which vessel is now owned by the Hudson Bay Co.

Province of Quebec Marine

T. Beland has been appointed Agent for the Marine Department and Shipping Master for the port of Quebec.

J. N. Beaudry, a former Secretary-Treasurer of the Richelieu and Ontario Navigation Co., died at Montreal recently.

The Richelieu and Ontario Navigation Co.'s steamboats Montreal and Quebec have been berthed at Montreal for the winter.

The Richelieu and Ontario Navigation Co.'s steamboat Rapids Queen, which went aground near Vaudreuil, recently, and was re-floated, is being overhauled and repaired at Sorel.

The Government steamboat Montmagny, recently launched from the Government Dockyards, Sorel, and which is being constructed and fit up for work in the lower St. Lawrence, will, it is anticipated, be ready for the opening of navigation next spring.

Recent press reports to the effect that the Government proposed to ask Parliament to authorize a Government guarantee of bonds to the extent of $18,000,000 to enable the Montreal Harbor Commission to carry out a number of extensions and improvements, has been officially denied.

Capt. Daveluy, one of the oldest officers in the Richelieu and Ontario Navigation Co.'s employ, died at Montreal recently, aged 87. He had been engaged on the St. Lawrence since boyhood, and in 1837 he was left in charge of the vessel he was employed on, owing to the arrest of the captain during the war.

A delegation from the Quebec Board of Trade waited on the Minister of Marine, Oct. 14, to protest against the levying of a porterage charge on local import freight, as it was claimed that local import freight was being discriminated against by the imposition of a master porter's charge. The Minister promised to give the matter his careful consideration.

The Quebec Harbor Commission is about to undertake a number of improvements along the front. It is intended to extend the new wharf into the river about 65 ft., and bring it in line with the Point a Carcey wharf, and along the river front for 500 ft. Freight sheds will also be built, thus providing all the facilities for the berthing and accommodation of large ocean going vessels.

At a meeting of the Quebec Board of Trade, Oct. 12, it was agreed that the Board's proposal to organize a company for the purpose of constructing and operating dry and wet docks, etc., be abandoned, as the result of an interview, which a deputation had had with the promoters of a similar organization, in which it was assured that there was every prospect of the object being achieved in the near future.

A considerable amount of valuable property was destroyed by fire, which swept the Quebec harbor, Oct. 16. In addition to the C.N.R. elevator, there were also destroyed, either wholly or partially, several of the sheds and contents, bonded warehouse, custom house, and some rolling stock, while some of the larger ocean vessels, including the Empress of Ireland, had to be moved from their berths to places of safety. The damage is only partially covered by insurance.

It is reported that a company recently organized in Canada, in which M. J. and J. A. O'Brien and J. E. Roy, Montreal, are interested, for the construction of dry docks, etc., in Canada, has made certain proposals to Vickers Son and Maxim of England, with a view to that firm establishing a branch shipbuilding yard and docks on this side. Vickers Son and Maxim have built several vessels for the Government, the most recent one being the icebreaking steamship Earl Grey.

The dispute between the Montreal Parks Committee and the Harbor Commissioners as to the rights of each, in connection with the proposed construction of a wharf at St. Helen's Island, is to be laid before the Government. The city desire to build a wharf there, and as it has purchased the island from the Government, claims to have sole control of it, but the Harbor Commission claims that it owns the shore rights, and offers to build a wharf, at a cost of $25,000, provided the city lease it, for 20 years, paying 6% on the cost.

An application will be made at the next session of the Dominion Parliament for the incorporation of the Dominion Dry Dock and Ship Building Co., with power to carry out its operations throughout Canada and elsewhere, with a capital of $1,000,000, and office at Montreal; to carry on the business of ship building, ship repairing and salvaging; to construct, repair, acquire, own and operate dry and wet docks, harbors, slips, piers, wharves, elevators, steam and other vessels, and other similar constructions; and for other purposes. L. A. Cannon, Quebec, is acting for the company.

The franchise for the operation of the ferry service between Quebec and Levis was sold recently, to a new company, organized for the purpose, of which J. F. Demers is Manager. The price paid is given as $5,250 a year for 15 years, in addition to which the holder must pay $350 to each of the municipalities for rent of waiting rooms, and $1,500 wharfage charges. It is stated that some new boats will be built at Levis next year. The company which formerly had the franchise is now operating a railway car ferry service between the two points, but it is stated that the new company may enter a protest against this, as it claims to have the sole privilege to operate such service.

The Richelieu and Ontario Navigation Co. will apply at the next session of the Dominion Parliament to amend its act of incorporation, and for the following purposes: to increase its capital stock and add to its powers of owning real estate in Canada and elsewhere; to amalgamate with, control and manage other companies incorporated for any similar purposes; to obtain further powers to pass bylaws; to construct and establish terminals and obtain the necessary powers in connection therewith; to carry on the general business of common carriers by land and water; to purchase, build and operate dry docks, graving docks and to carry on the business of shipbuilders, and for other purposes.

Considerable speculation is rife throughout the Maritime Provinces and Quebec, as to the location of drydocks and shipbuilding plant, which Harland and Wolff of Belfast, Ireland, are reported to be about to establish in Canada. No definite proposals have, as yet, been made public, but it is understood that that firm has a representative in Canada for the purpose of settling on a likely site, or sites, for the construction of dry docks and shipbuilding yards. It is

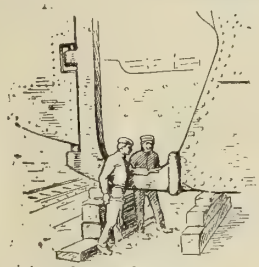
Automatic Acetylene Gas Buoys, Beacons and Fog Signals

Mariners describe our lighted buoys as "floating lighthouses."

GOLDSCHMIDT THERMIT CO.



A UNIQUE ADVANTAGE IN WELDING BROKEN STERNPOSTS

is offered by the Thermit Process, owing to the fact that a re-inforcement of steel is fused around the weld. This re-inforcement can be made as large as necessary so that the welded section will be as strong, if not stronger, than it was originally, thus guarding effectually against further breakage.

Another advantage of the Thermit Process, and a most important one, is the fact that the welds can be made ANYWHERE. All appliances are light and portable and may be brought to the job. Locomotive frames are welded without dismantling the engine. Stern-posts of steamships are repaired in place at a tremendous saving over other methods. The same advantages apply in the repairing of gear wheels, crank shafts and other machine parts.

Write for Pamphlet No. 20-N, which gives full information.

stated that there is every likelihood of their constructing duplicate plants at Levis and St. John, N.B. It was also stated that the C.P.R. was interested in the proposals being made, to a considerable financial extent, but Sir Thos. G. Shaughnessy, while recently denying that the company was financially interested, said that the company being shipowners, was naturally interested in any proposition of the nature mentioned.

Ontario and the Great Lakes.

W. H. Hacker has been appointed measuring surveyor of shipping for the port of Midland.

The name of the steamboat Saugatuck, no. 126193, registered at Windsor, has been changed by order in council to Alfred Clarke.

The captain of the Argyle Steamship Co.'s steamboat Argyle was fined $100 at Toronto, Oct. 2, for having sold liquor on his vessel.

The Otonabee Navigation Co. was fined $100 at Peterboro, recently, for carrying passengers in excess of the number allowed by its certificate.

A Welland deputation waited on the Minister of Inland Revenue, Oct. 12, with the request for a renewal of the ferry service between Fort Erie, Ont., and Buffalo, N.Y.

Plans are reported to have been prepared for the construction of a steamboat, similar to the Britannia for the Detroit, Belle Isle and Windsor Ferry Co.

The steamboat Rideau King ran aground on White Hall island in Mud Lake, Oct. 15, during a storm. She was floated and taken to Kingston for examination and repairs.

A committee of the Arnprior Board of Trade was recently appointed to interview the town council on the question of granting aid for the construction of the proposed Georgian Bay canal.

The Niagara Navigation Co.'s steamboat Corona made the final trip for the season, Oct. 16. This is the last of the company's vessels operating up the Niagara River to be berthed for the winter.

The Merchants' Steamship Co.'s steamboat Mapleton struck the stone abutment between locks 24 and 25 in the Welland Canal, Oct. 9, and sustained slight damage. She was able to proceed on her voyage to Kingston.

Capt. P. C. Robinson and C. O. Macdonald, Port Stanley, first officer of the cruiser Vigilant, have been appointed to the Fisheries Protection Service, the former with the rank of master marner.

The Northern Navigation Co.'s steamboats Hamonic and Huronic appear to be the only Canadian vessels operating on the Great Lakes, which have, as yet, been equipped with wireless telegraph apparatus.

The Argyle Steamship Co. is reported to be negotiating for the purchase of a steamboat in England to run next summer between Toronto and Olcott Beach, N.Y., in conjunction with its steamboat Argyle.

The vessels carrying package freight on the Great Lakes ceased accepting such freight at Fort William and Port Arthur, consigned to Brockville, Courtright, Kingston, Montreal, Sarnia and Windsor, Oct. 23; to Sault Ste. Marie and Georgian Bay ports, Nov. 20.

The Farrar Transportation Co.'s steamboat Collingwood, which was wrecked in the Detroit River about two months ago, was floated early in Oct., and taken to Detroit, where she was docked for repairs, which, it is stated, will be considerable.

Work on the Trent Valley canal continues to make good progress. The construction of lock 2 is completed, and the forces are being concentrated on dams 2 and 3, and lock 3. Lock 2 is 33 ft. by 175 ft., with a depth of 9 ft. over sills.

The Dominion Government is about to establish a life saving station at the Toronto harbor western entrance, which it is said will be a thoroughly up to date one, provided with a permanent and well trained crew, a lifeboat, and the most modern life-saving appliances.

It has been announced that immediately on the completion of the works of the Western Dry Dock and Shipbuilding Co., Port Arthur, probably about July 1, 1910, keels will be laid for the construction of two large lake freight vessels. These, it is stated, will be the largest built in Canada, each being 600 ft. long.

A deputation from Port Arthur waited on the Minister of Public Works, Oct. 8, to urge the carrying out of a number of harbor improvements there. The Minister assured the deputation that the Thunder Bay harbors would receive full attention, and that they would be deepened to 25 ft., and three sections of the breakwater at Port Arthur constructed.

The St. Clair and Erie Ship Canal Co. will apply at the next session of the Dominion Parliament to amend its Act of incorporation and acts amending same, to increase its bonding or borrowing powers, to authorize the substitution of other persons as provisional directors, and to extend the time for the construction of the authorized works.

The Dominion Marine Association has recently made strong representations to the Department of Trade and Commerce as to the advisability of stopping the Government issue of certificates of lading at Fort William and Port Arthur, on account of the difficulties arising in connection with alleged shortages between the head of the lakes and Georgian Bay and other ports.

Various U.S. vessel owners have registered strenuous objections to the tonnage tax, which is being levied at the rate of two cents a gross ton on vessels arriving from foreign ports. All U.S. vessels which in the course of their voyage may have touched at a Canadian port are subject to the tax. It is stated that the matter is to be brought to the attention of he Washington authorities.

Press reports state that the positions of Deputy Minister of Marine and Wreck Commissioner, which have been vacant for some time, will be filled shortly. It is anticipated that G. J. Desbarats, Acting Deputy Minister of Marine, and formerly Director of the Government Shipyards at Sorel, Que., and Capt. L. A. Demers, Acting Wreck Commissioner and Chief Examiner of Masters and Mates, will be appointed, respectively, to the positions.

An estimate of the cost of constructing a dry dock was submitted to the Owen Sound town council, Oct. 18. The figure has been placed at $225,000, and the plans and estimates are to be forwarded to Ottawa, with a view to the proposed application for a subsidy in aid of construction and operation. The Polson Iron Works, Ltd., Toronto, has offered to enter into a working agreement in connection with the dock, and it is understood that the town will vote financial aid.

The Great Lakes and St. Lawrence Navigation and Improvement Association has issued a pamphlet concerning the proposals of the Association for the improvement of the Welland canal and the St. Lawrence waterway generally. It has been decided to get up a deputation representing all the various municipalities and organizations interested in the matter, for the purpose of waiting on the Government to urge the adoption of the proposals.

The Montreal, Ottawa and Georgian Bay Canal Co. will apply at the next session of the Dominion Parliament for an extension of time within which it may construct the canals authorized by sec. 8, cap. 103 of the Statutes of 1894, and to repeal paragraph (a), substituting a new paragraph therefor, and to amend sec. 1, cap. 106 of the Statutes of 1900, by substituting the word "nine" for the word "eight," and the words "twenty-five" for the word "fifteen" in the eighth line, and for other purposes.

Capt. A. J. Tymon, one of the best known lake captains in Toronto, died there, Oct. 4, aged 66. He originated, and for many years operated the Island Park Ferry Co., and in 1885 several of his boats were destroyed by fire. The property was subsequently acquired by the Doty Ferry Co., and later by the Toronto Ferry Co., by which it is at present operated. Capt. Tymon was stepfather of S. J. Murphy, Travelling Passenger Agent, Niagara Navigation Co., Toronto.

A decision in the cross suits of the Parry Sound Lumber Co., Toronto, and the Pittsburg Steamship Co., Detroit,

Mich., for damages sustained by their vessels, the Seguin and the Sir Isaac Lothian Bell, respectively, in a collision which occurred in the St. Clair River, Nov. 14, 1906, was delivered at Detroit, Oct. 6. The judgment states that the Seguin was at fault, and to blame for the collision, and provides that the amount of damages shall be computed with the costs.

The U. S. Lake Survey reports the stages of the Great Lakes in feet above tidewater, for Sept., as follows:—Superior, 602.39; Michigan and Huron, 580.82; Erie, 572.38; Ontario, 246.28. Compared with the average stages for 10 years, Superior is nine inches lower, Michigan and Huron, 2½ ins. lower, Erie is equal, and Ontario three inches higher. During Oct., it was anticipated that Superior would fall a quarter of an inch, Michigan and Huron, 2¾ ins., Erie, three ins. and Ontario 4¼ ins.

The steamboat Newona, which recently arrived in Montreal, was specially built for the Canadian lake and canal traffic. Her dimensions are: length, 258 ft. over all; breadth, 42 ft. 6 ins.; depth, moulded, 25 ft., and she is estimated to be capable of carrying 3,350 tons deadweight on a draft of 18 ft. The machinery consists of tri-compound screw engines, with cylinders 21½", 34" and 55" diar., by 36" stroke, supplied with steam at 190 lbs. There are six large cargo hatchways, each 12 by 29 ft., and the hull is divided into three cargo holds by steel bulkheads.

The C.P.R. steamboat Athabasca ran aground on the Flower Pot Island, near Owen Sound, Oct. 14, and after having her cargo transferred to another vessel, was floated off, and taken to Owen Sound, where temporary repairs were made prior to her proceeding to Collingwood, where she will be thoroughly examined and overhauled. The cause of the accident is stated to be the wrong carrying out of an order by the wheelman. There was a heavy snowstorm at the time and the vessel was running in close for shelter. It is also said that the fog horn was not sounding.

Upon reference to the list of vessels registered in Canada during Sept., given on another page, it will be seen that the steamboats Donnacona, Dundee, Glenellah, Neepawah, Strathcona, Wahcondah and Winona have been transferred from the British register. These vessels, all

---

NOTICE—The Nicola, Kamloops and Similkameen Coal and Railway Company will apply to the Parliament of Canada at its next session for an Act extending the time within which it may construct the railways which it has been authorized to construct by Section 3 of Chapter 47 of the Statutes of British Columbia, 1891, and by Section 1 of Chapter 134 of the Statutes of Canada, 1905, and for other purposes.

H. C. OSWALD,
Secretary.

ANDREW T. THOMPSON,
Ottawa Agent.

Dated at Montreal the 30th September, 1909.

NOTICE—The Manitoba and North Western Railway Company will apply to the Parliament of Canada at its next session for an Act extending the time within which it may construct the railway which it has been authorized to construct by Section 1 of Chapter 126 of the Statutes of Canada, 1908, and for other purposes.

H. C. OSWALD,
Secretary.

ANDREW T. THOMPSON,
Ottawa Agent.

Dated at Montreal the 30th September, 1909.

NOTICE—The Calgary and Edmonton Railway Company will apply to the Parliament of Canada at its next session for an Act extending the time within which it may construct the railways which it was authorized to construct by section 6 of chapter 89 of the Statutes of Canada of 1903, and for other purposes.

H. C. OSWALD,
Secretary.

ANDREW T. THOMPSON,
Ottawa Agent.

Dated at Montreal the 30th September, 1909.

NOTICE—The Columbia and Western Railway Company will apply to the Parliament of Canada at its next session for an Act extending the time within which it may construct the second, fifth and sixth sections of the railways which it has been authorized to construct by Section 16 of Chapter 54 of the Statutes of British Columbia, 1896, and for other purposes.

H. C. OSWALD,
Secretary.

ANDREW T. THOMPSON,
Ottawa Agent.

Dated at Montreal the 30th September, 1909.

of which were built in Great Britain, have a register tonnage of 9,085 tons, and comprise a portion of the fleet of the Inland Navigation Co., Hamilton. The remainder of the vessels controlled by this company are on the Canadian register, with the exception of the Stadacona, built in Detroit, Mich., which it is understood will be registered in the U.S.

The Freeland property, of which the Yonge St. wharf forms a part, has been sold to E. B. Osler, M.P., for $270,000. A lease has also been secured of a water frontage of 92 ft., from the city at $12 a foot, which gives the purchaser control of the docks and wharves from the west side of Scott St., to the east side of Yonge St., a total water frontage of 312 ft. 4 ins. It is reported that the future management of the wharf may be by means of a combination of those at present using the wharf, with the possible addition of the Toronto Ferry Co., but in the meantime it will be controlled by the Niagara Navigation Co., and the Richelieu and Ontario Navigation Co.

The steamboat Port Colborne which recently arrived in Montreal with a general cargo, has been built with a view to her operation in the Canadian lake trade, and is similar in type to the Keyport Transportation Co.'s steamboats Keyport and Key West. Her dimensions are: length, 260 ft.; breadth, 42 ft. 6 ins.; and she has been built with the object of carrying the greatest possible cargo within the limitations of the canal locks. This is estimated at 85,000 bush. There are five hatchways, each 12 by 29 ft., and a sixth one 28 by 29 ft., with high coaming for trimming purposes. She is equipped with engines having cylinders 15", 25" and 42" diar., by 30" stroke, supplied with steam at 190 lbs. She is also fitted with forced draught and extra steering gear above the wheel house.

The Marine Department has issued a notice that all Canadian lights and fog alarms in Lake Superior will be kept in operation until Dec. 10, with the exception of those at Caribou Island, which may not be kept in operation after Dec. 5, subject to weather conditions or the early closing of navigation. It is also announced that all Canadian lights and fog alarms in Lake Huron, Georgian Bay, Lake St. Clair, Lake Erie, Lake Ontario and connecting waters will be kept in operation until Dec. 15, excepting those at Lonely Island, Western islands and Red Rock lights in Georgian Bay, which may be closed Dec. 10, if navigation closes early. All Canadian lights on the St. Lawrence River will be kept in operation as long as navigation is open, and all gas buoys will be kept at their stations as long as ice conditions permit, and when it is necessary to remove the buoys before the close of navigation, spar markers will be laid down where possible.

The Richelieu and Ontario Navigation Co., Ltd., is applying to the Dominion Parliament for an act amending its act of incorporation, for the following purposes; to increase its capital stock and to add to its powers for owning real estate in Canada and elsewhere; to amalgamate with, control and manage other companies incorporated for any similar purposes; to obtain further powers to pass by-laws; to construct and establish terminals and obtain the necessary powers in connection therewith; to carry on a general business of common carriers on land and water; to have power to do all and everything necessary for the accomplishment of any of the purposes or the attainment of any or more of the objects incidental to the powers of the company, either as holders or interested in any property or otherwise and for other purposes, and to purchase, build and operate dry docks and graving docks, and to carry on the business of shipbuilders.

Manitoba, Saskatchewan and Alberta.

The Hyland Navigation and Trading Co.'s steamboat Winnitoba was withdrawn from service for the season, at the end of Sept., owing to low water in the Red River.

The Stewart Lumber Co.'s steam tug Majestic, while running under full steam from Lake Winnipeg to the Selkirk docks, ran on the north end of the Point and sank. She was built at Bad Throat, Man., in 1904, and is equipped with engine of 4 n.h.p., driving a screw. Her dimensions are: length, 78 ft.; breadth, 16 ft.; depth, 7 ft.; tonnage, 64 gross, 44 register.

The Winnipeg and Western Transportation Co.'s steamboat Marquis was destroyed by fire at Prince Albert, Sask., Sept. 29. The Marquis was built at Grand Rapids, Sask., in 1882, and was a paddle wheel steamer, with engine of 84 n.h.p. Her dimensions were: length, 201 ft.; breadth, 33.5 ft.; depth, 5.3 ft.; tonnage, 754 gross, 475 register. She was utilized for the conveyance of troops from Battleford, Sask., in 1885, at the time of the Red River rebellion.

The Peace River Trade and Navigation Co., the incorporation of which was announced in a recent issue, has offered for public subscription 2,500 shares of 7% preference stock at par, with a bonus of one share of common stock for each two shares of preference stock. The lists were closed Oct. 27. The object of the company is the development of the Peace River district, and for this purpose steamboats will be built and operated on the connecting waterways; grain elevators will be erected at suitable points and other transportation facilities provided as necessity arises. F. S. Lawrence is General Manager.

B.C. and Pacific Coast Marine.

The last vessel for this year, conveying all classes of mail matter for the Yukon, left Vancouver, early in Oct.

The G.T.P.R. is reported to be making a survey and taking soundings for the construction of a wharf in the inner harbor at Victoria.

Mackenzie Bros.' steam tug Mystery, with a barge in tow, which were wrecked on Gossip Island, Sept. 30, were floated and taken to Vancouver Oct. 4.

The North Vancouver Board of Trade entertained the officers of the Canadian-Mexican Steamship Co.'s s.s. Lonsdale, recently, on the occasion of the opening of that port.

The Boscowitz Steamship Co. has placed an order for an additional vessel for its coast service, in Glasgow, Scotland. The chief engineer of the company's s.s. St. Denis left recently, to superintend the construction.

The existence is reported of a small boulder shoal in the Vancouver Narrows, in the channel for small craft. The shoal is covered with 15 ft. of water at low tide. It is stated to be a short one, but it verges on the course of the deep water vessels.

The B.C. Packers Association is reported to be negotiating for the purchase of the Canadian Fishing Co.'s steamboats Celestial Empire and Flamingo. Both vessels were specially built for deep sea fishing, and were brought to the coast from England, round Cape Horn, about ten years ago.

The work of the extension of the market wharf at New Westminster was commenced at the end of Sept. The new wharf will be 300 ft. long by 10 ft. wide, and there will be ample accommodation for ocean going vessels. Other wharves along the water front are also being extended and improved.

The steamboat R. J. Skinner, built in Vancouver, and engined from New Westminster, for the B.C. Government Crown Lands Department, arrived at New Westminster from Vancouver recently and went through a successful trial trip on the Fraser River. The vessel is to be used as a patrol boat to see to the carrying out of regulations in the timber limits along B.C. waters. Her dimensions are: length, 55 ft.; breadth, 11 ft. 6 ins.

The C.P.R. is reported to be planning the construction of a steamboat for the freight service between Victoria and New Westminster. At a recent meeting of the Victoria Board of Trade, the question of additional steamship service was discussed with Sir Thomas Shaughnessy, President C.P.R., who is reported to have promised that a new steamer would be put on the Victoria-Comox run and that the construction of a steamer to ply between Victoria and New Westminster would be dealt with at once.

Efficient Freight Service.

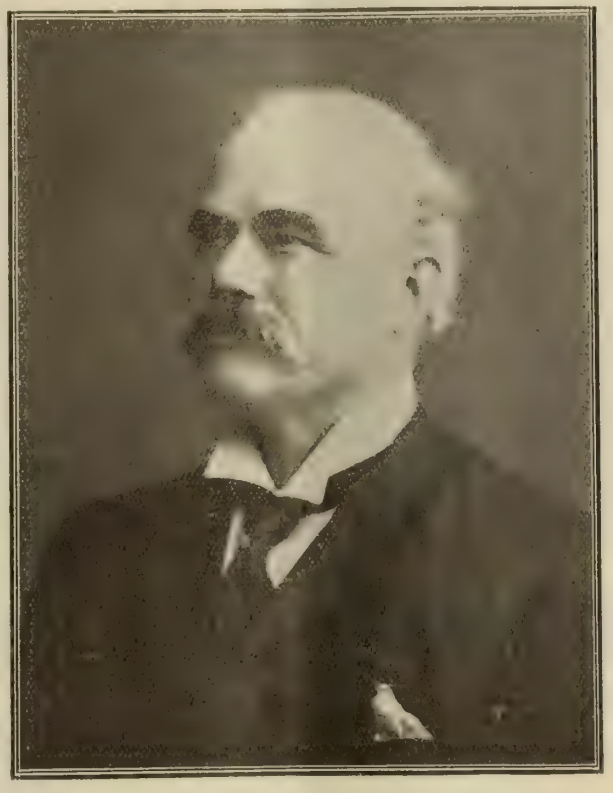
By Alfred Price, General Superintendent, Western Division, C.P.R.

In the securing of freight, competition in rates has ceased to be a factor, but in order that a transportation company may obtain and hold its fair share of the traffic available, it must be in a position to successfully compete with its rivals in the matter of time. Time is the all important element. In recognition of this fact, circuitous routes are being altered and short-cut diversions constructed; stronger and speedier locomotives and heavier and larger capacity cars are being built, the tracks and bridges are being strengthened, block signal systems installed, and extensions and improvements made in connection with terminal facilities.

What is needed to improve the average time of freight is not so much a higher speed of trains as the elimination of unnecessary delays at terminal and divisional stations. Fast freight trains should be run on schedules, which can be made under normal conditions. Some sacrifice of tonnage will be found to be necessary, but a continuous moderate speed movement is much more desirable than fast time between stops, and numerous delays at stations, including unnecessary dead time at terminals.

Terminal yards should be constructed with a view to passing cars through them in the least possible time. They should be sufficiently large to provide adequate accommodation for the maximum traffic handled during any period of the year. The larger terminals, where trains have to be broken up in order that the cars may be classified according to their destinations, should have separate receiving, classification and departure yards, and the switching should be done by passing the cars over a hump or by poling them. In designing a yard consideration should be given to the location of the engine house, stores, coaling plant, sand tower, ash pit, water tank, ice house, track scales and yard office. There should be ample track accommodation near the engine house for incoming and outgoing engines; tracks separate from the switching leads should, if possible, be provided for engines travelling between the yards and the engine house; repair tracks should be located convenient to the classification yard, and the departure yard should be air-piped for the testing of the brakes, so as to avoid the delay which takes place when the road engine has to do it.

Cars containing long distance freight should, as far as practicable, be kept separate from purely local loads. It is well to assemble all cars going into certain territories at a point where two or more lines converge—each territory to be restricted to the area to which an average of a train load per day moves—least, beyond the initial divisional station of the section to which they are consigned, and any cars of fast or long distance freight originating at intermediate stations, should be worked to the first divisional point, and there attached to the outgoing caboose of the fast train prior to the train's arrival. When, in order



J. CHRISTOPHER
Master Mechanic Toronto, Hamilton and Buffalo Ry.

table schedules the greatest distance possible without re-classifying them. No cars for stations between divisional points should be handled on these trains, at and run such cars in solid trains on time to provide sufficient tonnage, it is necessary to attach local cars to a fast freight train, they should be placed next to the locomotive, and the through cars kept en bloc immediately ahead of the caboose. This will facilitate switching at terminals, and when reducing is necessary, local, instead of through cars will be dropped off.

The importance of the prompt and careful handling of less than car load freight is sometimes not fully recognized. There are but few cars of l.c.l. freight that do not contain some consignment which is urgently wanted at its destination. Each car should therefore be considered as a fast freight load and treated accordingly. It should also be remembered that those cars contain freight for a great number of consignees, and should a delay take place many persons would be inconvenienced and feel annoyed, whereas, in most cases of car load freight only one consignee being interested only one would have cause for complaint.

Where there is sufficient l.c.l. business to warrant the building of separate sheds for incoming and outgoing freight, the latter should be not more than from 35 to 40 ft. wide. All the outbound shipments should be trucked direct from the drays to the cars through the shed, as the shorter the distance to be trucked the faster can it be done. Storage room in this shed is unnecessary, as no outgoing freight should be held on hand over night, but all should be shipped out on the day on which it is delivered at the shed. The freight should be stowed in cars in the order in which the consignments for the various destinations will be unloaded, and the shed plan should be so arranged as to provide for all freight for an intermediate station loaded during the day to go forward in one car. The stower should know from which side of the car the freight will be unloaded at its destination, and be governed accordingly. In order to ensure consignments being loaded in the right cars, one of the up-to-date systems in vogue for checking the work of the men should be adopted. Under these systems the freight checker, who is an experienced man, can be held solely responsible for the correct loading of cars, even when working with new and inexperienced truckers, and when any freight is loaded into the wrong car the mistake is discoverable before the car leaves the shed, and the checker responsible can be identified.

At certain terminals, preferably where lines converge or diverge, a transfer platform with tracks on either side should be provided, and freight arriving from the various lines grouped and classified according to destination and character. All shipments for the different stations and sections should be consolidated and loaded into separate cars so as to reduce to the minimum the number of cars to be handled by train crews over the way-freighting sections. When loaded the cars should be attached to fast trains and handled on such to the initial terminal of the section to which the freight is consigned.

On sections where there is sufficient freight to warrant it, way-freight trains

should be run six days per week in both directions, and the best practice is to assign crews with small engines to the service, running them on ratings sufficiently reduced to ensure, if possible, getting them over the sections in daylight.

Conductors of all freight trains should at the end of their trip be required to furnish the yard office with a list of all cars they take into the terminal, showing contents, destination, etc., so as to save delay on the part of the yard staff in beginning switching operations.

The prompt placing of cars at destination is important. The consignee should be promptly advised of the arrival of his goods, and when it is in order to make delivery, the car should be listed to the yard staff and the freight agent should then be held responsible to see that there is no unnecessary delay in having the car placed.

A common cause for the slow movement of freight at certain seasons of the year, is shortage of locomotive power. There is very little doubt that during recent years, when there was such an outcry throughout Canada and the United States because of a shortage of cars, the real difficulty in many cases was not that the railway companies did not have the cars, but rather that they did not have the power with which to move them. The building of additional cars, therefore, was not a remedy, but where the increases in such equipment were made the serious condition was intensified rather than relieved. It is not at all times possible to preserve an even balance between locomotives and cars, but a simple fact worth remembering and one which should be emphasized is, that, if either are to remain idle waiting upon the other, it is infinitely better that engines should always be available for cars, than that cars should be delayed for the want of power with which to move them. Apart from the necessity of promptly handling the freight which the cars contain, and many considerations of less importance, the relative amount of money invested in the engine and a train of say 50 cars should be taken into account when one or the other is forced to remain idle. There can be no doubt that the cry for more power is a chronic complaint, for very often an appeal is made when a little quicker movement at terminal and turn-around points would make such an appeal unnecessary. One having to do with the distribution of power might very well be reminded of the old negro in a protracted religious meeting who prayed fervently and lustily, "O Lor'! send down more power!" "O Lor'! send down more power!" when a nearby worshipper shouted, "Say brudder, 'tain't more power you need, its ideas!"

In order that the very best results in the movement of traffic may be secured it is of paramount importance that there exist between the transportation officers and the men under them the most perfect confidence. The superintendent should be the operating unit, and he should be held responsible not only for the movement of the traffic of his district, but as well for the maintenance of the track and bridges over which it is to run and the upkeep of locomotives that are to haul it. His staff of subordinate officers should be practical men, able to lead and to direct the operating forces. They must all be made to appreciate the fact that the railway company is doing a transportation business, and that its customers are the travelling and shipping public. They have to do with the quality of the goods the company has to sell. It is their part of the work to see that the traffic the company charges for handling is safely, speedily, and economically moved from its origin to its destination.

Inasmuch as the greatest delays to traffic occur in the terminal yards, the position of yardmaster is an important one. Someone has very aptly and truly said that yardmasters, like poets, are born and not made, and those who have had much experience in transportation matters will appreciate the statement that if freight is to be handled with any kind of system and dispatch through a large terminal, and disorganization, congestion, and sometimes profanity avoided a yardmaster of the heaven-born type, must be in command.

In this western country the railway officer is often hampered by the scarcity of experienced men. The demand for men of all kinds is so great that frequent changes take place, and it is a most difficult matter to secure and retain competent staffs. The opinion also prevails that there is not much to learn about railroad operation. W. F. Allen, the efficient Secretary of the American Railway Association, in referring to this fact, and in illustration of it tells of a farmer's son in Illinois who conceived a desire to shine as a legal light. Accordingly, he went to Springfield, where he accepted employment at a small sum from a fairly well known attorney. At the end of three days study he returned to the farm. "Well, Bill, howd 'ye like the law?" asked his father. "It ain't what it is cracked up to be," responded Bill gloomily. "I'm sorry I learned it."

There are many difficulties of a like nature to be encountered and overcome by the transportation officer. In these, however, the patron of the railway company is not interested. What he wants is an adequate service, and the officer who possesses the requisite qualifications will be able to provide this in spite of the difficulties which are inseparable from his position.

The foregoing paper was read before the Western Canada Railway Club recently.

An Australian Tribute

Thomas Tait, Chairman of the Victorian State Railway Commission, is well known in Canada, on account of his service with the C.P.R., in which he rose to one of the highest positions. As the chief official of the Victorian railway service, he has achieved marked success in his six years' work, having stopped the yearly deficits which previously occurred and turned the system into a paying one, which is now yielding a good rate of interest on the State's investment. He has been a subscriber to the Railway and Marine World ever since its inception, and we therefore highly appreciate the following letter from him to our Managing Director:—

Victorian Railway Commissioner's Office,
Melbourne, Australia,
August, 1909.

Dear Mr. Burrows,—

I look forward always to receiving your journal, and highly appreciate it, for it contains so much news and information about Canadian railway affairs and men, and generally about transportation matters in the Dominion.

Indeed, I do not know of any railway journal that gives so much information of the kind in respect of Canada or any other country.

You are to be complimented and congratulated on the Railway and Marine World and I hope that you are meeting with the financial success with it that it merits.

Yours faithfully,
THOS. TAIT.

Mr. Tait's opinion, coincides with that of our other subscribers, hundreds of whom have expressed in writing or verbally, the value they place on our paper, and their appreciation of the accuracy and the comprehensiveness of its information on every branch of transportation service. The thoroughness with which our paper is edited, and the great care exercised to ensure accuracy, has secured a circulation throughout the whole of Canada and Newfoundland of which we are extremely proud, and we have no hesitation in saying that no other transportation paper in the world has as subscribers so large a percentage of all the transportation officials in its particular field.

G.T.R. Semi-Annual Meeting.

The semi-annual meeting was held in London, Eng., Oct. 21, when the report for the half-year ended June 30, was presented. The following summary shows a comparison of the revenue for that period with that for the corresponding half-year, 1908:—

1908.		1909.
£2,854,787	Gross receipts	£2,866,468 8 7
	Deduct—	
2,069,144	Working expenses, being at the rate of 72.54%, as compared with 72.47% in 1908	2,079,196 14 10
785,643	Net traffic receipts	787,271 13 9
Dr. 3,738	Balance of income from rentals, outside operations and car mileage	*Cr.* 58,092 7 0
781,905	Total net revenue	845,364 0 9
	Add—	
16,013	Amount received from the International Bridge Co.	16,012 16 7
6,507	Interest on Central Vermont Ry. bonds	6,506 14 3
60,310	Interest on securities of controlled lines and on St. Clair Tunnel bonds acquired by the issue of G. T. 4% debenture stock	60,320 17 9
40,936	Balance of general interest account	33,997 2 4
£905,671	Net revenue receipts	£962,201 11 8

Following are the net revenue charges, compared with the corresponding period:

1908.		1909.
£77,603	Rents (leased lines)	£77,603 0 9
494,441	Interest on debenture stocks and bonds	503,481 1 8
37,667	Interest on debenture stock and bonds of lines consolidated with the G. T.R.	34,332 5 11
68,892	Canada Atlantic Ry. deficiency	41,103 5 5
46,574	D., G. H. & M. Ry. deficiency	25,749 4 10
725,177		682,268 18 7
180,494	Leaving a surplus of	279,932 13 1
£905,671		£962,201 11 8

Adding the balance, £12,226, 7s. 9d. at the credit of net revenue account, Dec. 31, 1908, to the above surplus of £279,932 13 s. 1 d., the total amount available for dividend is £292,159 0s. 10d., from which the directors recommend the payment of the following dividends, viz.:

Half-year on the 4% guaranteed stock	£196,800 4 3
Half-year on the first preference stock	85,420 15 0
	£282,220 19 3

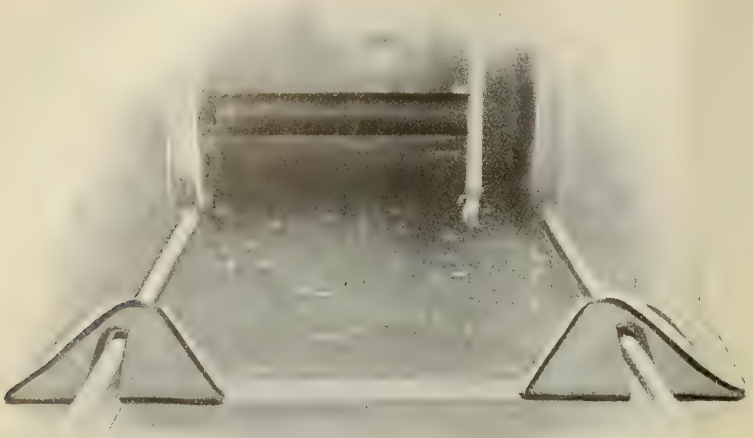
leaving a balance of £9,938 1s. 7d. to be carried forward to next half-year's account.

The actual expenditure on capital account, was as follows:

	£ s. d.
New works	215,432 13 5
Double track	22,922 0 8
Land purchased	128,888 8 2
	£367,243 2 3

This amount of £367,243 2s. 3d. was reduced by £85 15s. 10d., representing the premium on 4% debenture stock sold less accrued interest, thus making the total charges to the capital account, £367,157 6s. 5d.

During the half-year the cost of 15



"JOHNSON" Wrecking Frogs

will replace wheels on both sides of the rail at one setting

— ADVANTAGES —

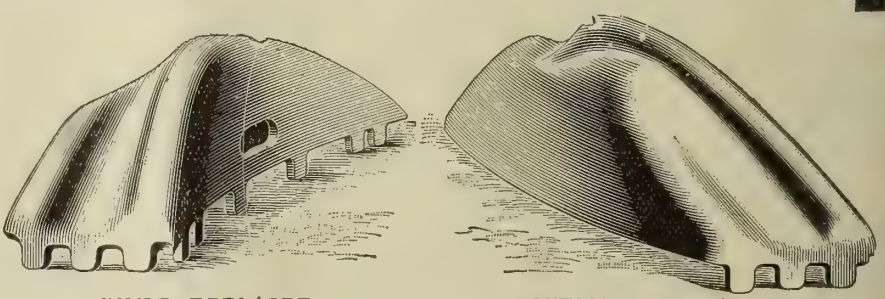
The Johnson Frog never forces the ties down from the rail when the road bed is soft.
It always gives perfect electric connection to motors when rerailing.
It requires no bolts, clamps, spikes, wedges, or other fastenings to hold it in place while in operation.
It does not require skilled labor to set it in working position.
It has three points of contact for support, which at all times insure a solid bearing under any conditions of track.
The frog is entirely supported at small end by the rail, while the broad end is supported by the rail and tie.
Straddles the rail and is prevented against flying from under the wheels in any direction.
It fits all sections of T rail from 6 inch down.

"Alexander" Car Replacers

will re-rail the heaviest locomotives

We do not offer to give you a derrick, but a device that can be used by a train crew in re-railing a car or engine without calling out the wreck car.

ALL TYPES IN STOCK



INSIDE REPLACER. OUTSIDE REPLACER.

F·H·Hopkins & Co

SUCCESSOR LATE JAMES COOPER

Montreal

baggage cars, £5,175 17s. 6d., has been debited to the engine and car renewal suspense account, and £92,117 3s. 2d. has been charged to revenue in reduction, leaving the balance £457,208 5s. 1d., of which £204,931 5s. 6d. was in respect of engines, and £252,276 19s. 7d. in respect of cars. No additions to rolling stock on capital account were made.

Following table is a comparison of the receipts for the half-years ended June 30, 1909 and 1908:

TRAFFIC STATISTICS

Description of receipts.	1909.	1908.	Increase.	Decrease.
Passengers	£789,162	£810,846	.....	£21,684
Mails and express	134,823	136,584	.....	1,761
Freight and live stock	1,861,785	1,836,838	£24,947	.....
Other receipts	80,698	70,519	10,179	.....
	£2,866,468	£2,854,787	£11,681	.....

	1909.	1908.	Increase.	Decrease.
Passengers carried	4,817,156	4,800,036	17,120	.....
Average fare per passenger	39.32d.	40.54d.	.....	1.22d.
Tons of freight and live stock	7,506,806	7,223,000	283,806	.....
Average rate per ton	59.52d.	61.03d.	.....	1.51d.
Tons carried one mile	1,374,618,422	1,299,205,532	75,412,890	.....
Earnings per train mile	75.77d.	72.42d.	3.35d.	.....

The average rate per ton per mile on the entire freight business was 0.66c., compared with 0.69c. in the corresponding half-year.

The working expenses, excluding taxes, amounted to £2,037,014 or 71.06% of the gross receipts, as compared with £2,027,910 or 71.03%; an increase in amount of £9,104, and in the proportion to the gross receipts of 0.03%.

Revenue expenditure, including taxes, for half-years ended June 30, 1909 and 1908:

Description of expenditure.	1909.	1908.	Increase.	Decrease.
Maintenance of way, and structures	£272,176	£240,668	£31,508	.....
Maintenance of equipment	449,110	380,453	68,657	.....
Traffic expenses	91,407	86,343	5,064	.....
Conducting transportation	1,135,172	1,236,121	.....	£100,949
General expenses	89,150	84,324	4,826	.....
Taxes	42,182	41,235	947	.....
Total	£2,079,197	£2,069,144	10,053	.....
Percentage of gross receipts	72.54	72.47	0.07	.....
Expenditure per train-mile	54.96d.	52.49d.	2.47d.	.....

The train mileage compares with that for the half year ended June 30, 1908, as follows:

Description of mileage.	1909.	1908.	Increase.	Decrease.
Passenger	4,086,109	4,304,902	.....	218,793
Freight	4,752,765	4,929,803	.....	177,038
Mixed trains	240,528	226,051	14,477	.....
Total	9,079,402	9,460,756	.....	381,354

CANADA ATLANTIC RAILWAY.

The following shows the results of the half-year's working of the Canada Atlantic Ry., compared with the corresponding period of 1908:

1908.		1909.
£163,054	Gross receipts	£168,073
175,834	Working expenses	161,482
Dr. 12,780	Net traffic receipts	6,591
5,991	Balance of income from rentals, outside operations and car mileage	12,419
Dr. £6,789	Total net revenue	£19,010

The interest charges for the half-year were £60,113, against £62,103, so that there was a net revenue deficiency of £41,103, compared with £68,892 in 1908.

GRAND TRUNK WESTERN RAILWAY.

The following summary shows the results of the half-year's working of the G.T. Western Ry., compared with the corresponding period of 1908:

1908.		1909.
£514,793	Gross receipts	£553,847
423,437	Working expenses	440,093
91,356	Net traffic receipts	113,754
Dr. 55,423	Balance of income from rentals, outside operations and car mileage	*Dr.* 39,996
£35,933	Total net revenue	£73,753

The net revenue charges for the half-year were £95,860, reduced by credits for rentals in Chicago to £87,641, so that there was a net revenue deficiency of £13,883 for the half-year, as compared with a deficiency of £2,846 for the corresponding half-year of 1908. Deducting this deficiency from the surplus for the half-year ended Dec. 31, 1908, of £24,323, there remains a surplus for the year to June 30, of £10,440, and adding to this amount the balance of £7,539 carried forward June 30, 1908, the net revenue balance amounts to £17,979 which will admit of the payment of the full interest on the second mortgage income bonds for the year, and leave a balance of £5,650.

DETROIT, GRAND HAVEN, AND MILWAUKEE RY.

The following summary shows the results of the half-year's working of the D.G.H. and M. Ry., compared with the corresponding period of 1908:

1908.		1909.
£143,586	Gross receipts	£160,223
143,215	Working expenses	136,955
371	Net traffic receipts	23,268
Dr. 8,443	Balance of income from rentals, outside operations and car mileage	*Dr.* 12,072
Dr. £8,072	Total net revenue	£11,196

The net revenue charges for the half-year were £36,945, against £38,502 in 1908, so that there was a net revenue deficiency of £25,749, as compared with £46,574 for the corresponding period of 1908.

GRAND TRUNK PACIFIC RAILWAY.

The present condition of construction work on the Western Division is as follows:—Of the total distance of 916 miles from Winnipeg to Wolf Creek (the Prairie Section), 793 miles between Winnipeg and Edmonton are completed and ready for operation, and it is expected that the remaining 123 miles west of Edmonton to Wolf Creek will be completed by the end of the present season. Of the remainder of the line west of Wolf Creek to Prince Rupert (the Mountain Section), the 100 miles from Prince Rupert east to Copper River will be completed early next year, and contracts have been let, and the work will be put in hand at once, for 135 miles east of Copper River and 179 miles west of Wolf Creek, leaving only about 425 miles still to be contracted for.

The Board regrets that owing to the backward condition of the work on the Government Section of 245 miles from Winnipeg to Lake Superior Jct., it is unable to report the completion of the connection between the Lake Superior Branch (which has been completed some time) and the Prairie Section at Winnipeg.

The President having intimated his intention of resigning his position at the end of the year, the Board has taken advantage of the opportunity to make an alteration which will bring the company into line with other Canadian and American railways. Mr. Hays, as the Chief Executive Officer, has hitherto held the title of Second Vice President and General Manager; the duties he has performed are those to which the title of President is now attached by Canadian and American railway companies, his subordinates being designated as First, Second, Third, Fourth, and Fifth Vice Presidents. The Board feels it is in the interests of the company and due to Mr. Hays that the Chief Executive Officer in Canada should have the same rank as is accorded to the similar office on other railways, and it therefore proposes to give him the title of President. In order to carry out this arrangement he has been elected a director of the company in place of M. G. C. Glyn, who has resigned his seat. The Board will continue to have the same control as before over the administration of the company, and will in future elect a Chairman and Vice Chairman, who will exercise the powers and perform the duties hitherto discharged by the President and Vice President. The necessary by-laws have been passed.

The Board has decided, on the retirement of Sir C. Rivers Wilson, to elect the present Vice President, A. W. Smithers, to be Chairman of the Board. He has been a director of the company for over 14 years, and Vice President for five years.

The resignation of Sir Charles Rivers Wilson requires more than a passing notice from his colleagues. He was elected to his present office in 1895, and his administration has been one of the most remarkable in the history of the company. During this period an immense improvement has taken place in the value of the property and in the service rendered by the railway in Canada. In addition, the great extension to the Pacific coast has been commenced, following the incorporation of the Grand Trunk Pacific Railway Company, and some 1,100 miles of the new road have been built. The directors consider it is only fitting that the great services rendered by Sir C. Rivers Wilson should be recognized in a material way, and a resolution asking the proprietors to sanction an allowance of £1,500 a year to him on his retirement will be sumitted to the meeting.

REPORTS OF OFFICIALS.

The Chief Engineer, H. G. Kelley, states that the expenditure for maintenance was $153,334.19 more than during the corresponding half-year, 1908.

The Superintendent of Motive Power, W. D. Robb, reports expenditure, mileage, etc., as follows:

Half-year ended	Total expenditure.	Train mileage.
June, 1909	$4,150,751	9,079,402
June, 1908	4,337,989	9,460,756

Half-year ended	Rate of expense per mile. Train.	Engine.	Car.
June, 1909	45.72c.	35.91c.	2.83c.
June, 1908	45.85c.	35.65c.	2.94c.

A decrease in expenditure of $187,238 or 4.32%, compared with a decrease in train miles of 381,354 or 4.03%.

	Passenger trains.	Freight trains.	Mixed trains.
The average number of cars moved per train was	4.5	26.7	6.8
And for the corresponding period	4.3	25.8	6.6

During the half-year, four locomotives were scrapped, leaving 49 old light capacity locomotives set aside to be scrapped. The actual stock at June 30, was 875 locomotives, against the official figure of 803.

The comparative cost of repairs per train, engine and car mile was:

Cost per mile	Repairs and renewals of locomotives		All repairing charges, including shop, machinery, tools, and marine equipment, &c.		Cost per mile	
	1909	1908	1909	1908		
	Cents	Cents	Cents	Cents		
Train	11.37	7.85	12.98	11.12		
Engine	8.94	6.11	10.19	8.65		
Car	0.70	0.50	0.80	0.71		

J. Coleman, Superintendent Car Department, reports expenditure, mileage, etc., as follows:

Half-year ended	Total cost of repairs and renewals	Total miles run by cars			Cost per mile	
		Passenger	Freight	Total	Car	Train
	$				Cents	Cents
June, 1909	1,094,178	18,817,467	127,871,131	146,688,598	0.705	11.39
" 1908	833,452	19,026,991	128,552,997	147,579,988	0.565	8.81

An increase in expenditure of $200,726, or 24.08%.

With a decrease in car miles of 891,390, or 0.60%.

The revenue account for the half-year, is as follows:

RECEIPTS.	£	s.	d.	£	s.	d.
Freight	1,944,511	11	8			
Less—						
Cartage, etc.	46,256	7	10

In moving the adoption of the report, the President said:

"The effects of the serious commercial depression during 1908 extended over into the first half of 1909, and therefore, you will not be surprised if the results of the working of last half-year show no great advantage over those of the corresponding half-year in 1908; but, as I ventured to predict upon the occasion of our meeting in April, the crisis has been of comparatively short duration, as compared with other cases of American business convulsions. The clouds have already lifted; there has been a great improvement in business. Since the beginning of the present half-year—up to the 14th of this month, that is for three and a-half months—the receipts of our company have increased by no less than £234,000, and there seems every expectation that the result of the year's working will prove to be satisfactory to the shareholders. Before coming to an examination of the accounts, I must point out that some modifications have been made in the form in which they have been usually presented, caused by the necessity of bringing them into agreement with the classification adopted by the Board of Railway Commissioners of Canada. The chief alterations are the elimination from the general receipts of the rentals received from other companies for the use of portions of our line and stations, and from the working expenses of the amount paid for the hire of equipment and car mileage, and the debit balance of the cost of the dining-car service, and the inclusion of those items specially in the income account. The figures of the corresponding period have been revised in the same way for the purpose of comparison. There are other minor alterations in the classification to which it is not necessary specially to refer. The gross receipts—which are now included under the heads of freight, passenger, mail and express, other revenue from transportation—amounted to £2,866,468, compared with £2,854,787, an increase of only £11,681. The receipts from freight traffic amounted to £1,861,785, compared with £1,836,838, an increase of £24,947. The tonnage moved was 7,506,806 tons, compared with 7,223,000 tons in 1908, an increase of 283,806 tons, but the average receipt per ton declined by about 1½d. a ton, or 2.47%. The average rate per ton per mile shows a reduction of 4.35%, and the disparity between the reduction in the rate per ton moved and the rate per ton per mile is owing to the fact that of the increased tonnage moved 206,000 tons was in through traffic, which is more competitive, and is hauled longer distances at somewhat lower proportionate rates. The ton mileage of the through traffic was 41% of the total ton mileage, as compared with only 36% in the corresponding period, and this, naturally, has the effect of reducing the rate per ton per mile. The receipts from passengers amounted to £789,162, compared with £810,846, a decrease of £21,684, although the number of passengers carried increased from 4,800,036 in 1908 to 4,817,156 in 1909. The falling off in receipts was due to the shorter average fare received, a decrease of 1.22d. per passenger. The receipts from mails and express freight showed a slight reduction of £1,761. The receipts from other revenue from transportation, which include the receipts from parlor and chair cars, excess baggage, milk traffic, special trains, and other passenger train revenue, previously, to a considerable extent, included under passenger traffic, amounted to £52,583, compared with £38,264, an increase of £14,319, and the revenue from operations other than transportation, previously included under miscellaneous receipts, amounted to £28,115, compared with £32,254, a decrease of £4,139. The classification of the working expenses has also been slightly modified, the principal alteration in addition to the diminution before referred to of the hire of equipment, being the inclusion under a separate heading as, traffic expenses, of certain items which were previously included under the head of conducting transportation. The total working expenses, including taxes, amounted to £2,079,197, compared with £2,069,144 in 1908, an increase of £10,053, the ratio of expenses to receipts being practically the same in both periods. There was an increased expenditure under the head of maintenance of way and structures, and maintenance of equipment, but it must be borne in mind that in 1908, owing to the great falling off in receipts, the expenditure under these heads had to be greatly reduced, or postponed, and the expenditure during the past half-year, although showing increases, can only be considered as of a normal character. The amount expended on maintenance of way and structures amounted to £272,176, compared with £240,668 in 1908, an increase of £31,508. The charges on account of maintenance of equipment amounted to £449,110, of which £236,608 was in respect of the locomotive department, and £212,502 in respect of the car department, and showed an increase of £68,657. The amount actually expended during the half-year was £23,460 less than in the corresponding period, but there was included in this account, £92,117 in reduction of the engine and car renewal suspense account, for which no charge was made in the corresponding period of 1908: I explained fully at the meeting in April, the position of that account, and the reasons for it, as also the advantages which the company had obtained in consequence of the renewal in advance of engines and cars, and I also stated that although, owing to circumstances at the time, we were unable to make any charge to revenue in respect of that account in 1908, it would be liquidated within the period originally intended, namely, the end of 1910, and the amount of £92,000 is the proportion chargeable in the June half-year in order to carry out that object. The items now included under traffic expenses show an increase of £5,064. The principal increase is £8,916, under outside agencies, and there were other small increases. There were decreases of about £1,600 for superintendence, and about £6,000 in respect of fast freight lines. I now come to what I consider the most satisfactory feature in the accounts, and that is the expenditure under conducting transportation. That expenditure, more than one-half of the total, showed a reduction of £100,949, having been £1,135,172, compared with £1,236,121 in 1908, and even this reduction would have been considerably increased had the accounts been made up under the old classification, as under that classification the expenditure on account of the balance of car mileage and hire of equipment was included under conducting transportation, whereas it is now included specially in the income account, and that item shows a credit of £1,929, compared with a debit of £51,804 in 1908, a saving of £53,733, or a total decrease of £154,682 in the cost of handling the business, and this notwithstanding that the tons carried one mile increased by 75½ millions, or practically 6%. The principal decrease is in fuel for road locomotives, which amounted to £354,731, against £411,088, a saving of £56,357. Of this saving about £16,000 is due to the lower price at which we were able to obtain our supplies, and the remainder, £40,000, to a decrease in fuel actually used, which showed a decrease of over 80,000 tons, notwithstanding the increase in the tonnage moved.

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

This decrease in fuel is one of the direct results of the policy of renewing as rapidly as possible the rolling stock, thereby obtaining increased haulage capacity of engines, and enabling more work to be lone at less cost. The wages of enginemen showed a decrease of £12,300, and the other items generally showed appreciable reductions. Of the items dealt with specially in the income account, the net income from rentals—which was the amount received from other companies for the use of our lines and stations, less amounts paid for the use of other companies' property—showed an increase of £6,900; the loss on dining cars was reduced by £1,200, and the hire of equipment showed a saving of £53,700, this latter being in a great measure due to the policy adopted in connection with the rolling stock. The result of the operations was a balance of £845,364 to be carried to the net income account, compared with £781,904 in 1908, an increase of £63,460, although the gross reecipts only showed an increase of £11,681. The net revenue credits amounted to £116,837, bringing the amount of net revenue to £962,201, and the net revenue charges were £615,416, leaving a surplus on the working of the G.T.R. proper of £346,785. From this there have to be deducted the deficiencies on the C.A.R. and D.G.H. and M.R. of £41,103 and £25,749 respectively, together £66,852, which was about £50,000 less than for the corresponding period, and leaving a balance of £279,932, compared with £180,494 in 1908, an improvement of practically £100,000. Adding the balance brought forward from the previous half-year, we arrive at a sum of £292,159 available for dividend, and a resolution will be submitted authorising the payment of dividends for the half-year on the 4% guaranteed stock and first preference stock, which will absorb £282,221, and leave £9,938 to be carried forward to the current half-year. The net expenditure on capital account was £367,157. The principal item was £189,310 for the new elevator at Tiffin. For some time past the elevator accommodation at our Georgian Bay ports has been inadequate for the storage and efficient handling of the large quantity of grain passing through them, and in view of the great increase in the traffic which will follow the opening of the G.T.P.R., it was necessary that increased accommodation should be provided, and it was decided to erect an elevator of 2,000,000 bush. capacity on the company's property at Tiffin, adjoining Midland, the company's principal port on Georgian Bay. The elevator has been completed, and is now working, and has already proved of great service, which will be greatly increased when the G.T.P.R. is opened to Lake Superior. The only other items of importance are those in respect of the purchase of the site and the erection of the new building in Cockspur st. It had long been felt that, as regards the traffic department, the company had been inadequately represented in London, and the construction of the G.T.P.R. rendered it imperative that the company should be placed in a position equal to that of its competitors. I may say that it is not intended to occupy the whole of the building for the purposes of the company. The lower portion will be so occupied, and the upper portion will be let in apartments or chambers or for offices, and the receipts will go largely in diminution of the interest on capital raised for the erection of this building. I daresay many of you have already passed before the building, or have, perhaps, visited it, and if you have done so I think you will agree with me that it is in every respect an admirable building, doing the greatest possible credit to the architect who designed it.

With regard to the subsidiary lines, the G.T. Western Ry., as usual, has earned the whole of its interest charges, and the C.A.R. and D.G.H. and M.R. have shown considerable improvement, in the case of the former to the extent of £27,000, and of the latter £21,000.

I will now turn to some subjects which are, perhaps, of more general interest, and I should like, first of all, to convey to you the impressions which I have formed from my recent visit to Canada of the progress and prospects of our great undertaking in the Northwest. In the first place, I will tell you what the mileage covered, or to be covered, by the railroad is. In the first place, starting from Lake Superior to Fort William, we have already built 188 miles northwest to join on to the National Transcontinental Ry., together with an additional 12 miles which have been taken over by the Canadian Government, making altogether about 200 miles. That constitutes the Lake Superior branch. I pass over the interval of 245 miles which separates the junction point with Winnipeg, as to which I shall have to say a few words by and by. Those 245 miles, as you may remember, are being constructed on behalf of the Canadian Government. Going thence on to our own line again at Winnipeg, we have completed the whole of the 793 miles between that city and Edmonton, and I cannot speak too highly of the manner in which it has been constructed. Passing west from Edmonton, the first contract of 123 miles is nearly completed; it will probably be ready for operation at the end of the present year. Then there has been let west of Wolf's Creek, which is the termination of that 123 miles and also the termination of the Prairie section, a further 179 miles. Then comes an interval through the mountains of 425 miles, the contracts for which have not yet been given out. At the end of that interval of 425 miles we again pick up a portion let under contract recently of 135 miles. Then we complete the Mountain section by the 100 miles from Copper River to Prince Rupert, which are practically constructed, and which will be ready for operation early next year. Now I will begin from the western portion of the road, and I will take you to Prince Rupert, which is the terminus of our new railroad. You have read and heard, I have no doubt, a great deal of this site and of the advantages which it presents. Well, I can assure you that nothing that has been said or written upon the subject can adequately describe its great advantages. It has been chosen with excellent judgment, and I may say it has been the greatest piece of good luck that it has fallen into our own hands and not into the hands of any of our possible competitors. Already the land has been cleared; it has been laid out in what I may call a most artistic manner. It has got already a population—it may appear to you to be a very small thing, but it is the beginning of big things—of 3,000 inhabitants. City lots have been sold at prices far exceeding what was expected, and altogether there is no doubt that this city of Prince Rupert is destined to be one of the great Pacific cities of the future. I could dilate for a long time upon the natural beauties of the situation, of the magnificent appearance which is presented when you approach Prince Rupert from the sea, of the picturesque appearance of the harbor, of the extensive accommodation which it possesses; I could also refer to the beauties of the Skeena River, the mouth of which is close to Prince Rupert. We ascended the river for 120 miles, and it is impossible to exaggerate the beauties of the scenery. The land in the immediate vicinity of Prince Rupert is not, at the present time, very well adapted for agricultural occupation, but it is surrounded by magnificent forests, and the sea teems with fish of every description. I must add that the comparatively small population that already occupies it are keenly alive to the advantages of their city. They are, all and everyone of them, impressed not only with its present advantages, but also with the great future which it presents, and they are zealous hard-working people. I proceeded then from Prince Rupert by way of Vancouver and Calgary to Edmonton. As regards the portion of the road from Edmonton west I told you just now about 123 miles of it are very nearly completed. I went over 60 miles of it, and found somewhat to my surprise, instead of an arid desert, a large portion of it taken up and farmed, and the harvest in process of being reaped. I then proceeded east from Edmonton to Winnipeg—793 miles—and I assure you that words fail me to express the magnificence of the country through which our road passes. For hundreds of miles, hundreds of thousands of acres were under harvest when I passed through in the month of September. The whole landscape is dotted already with farms and homesteads, and when you think that about only two years ago this land was an arid desert, I think you will agree with me that the transformation is something miraculous. There is, however, one unfortunate blot upon that otherwise happy state of things, which particularly affects our railway construction, and that is, the absence of labor. At the present we are under an obligation to complete our road through to Prince Rupert by Dec. 1, 1911. In consequence of the want of labor I am afraid there is very little chance of that being accomplished. When I was in British Columbia I had the advantage of an interview on this subject with the Premier, and I tried to impress upon him the desirability, under the peculiar circumstances of the case, of allowing us to introduce a certain amount of Oriental labor, but unfortunately I touched on a very delicate point, and I found little sympathy and little chance of assistance in that quarter. I tried to impress upon him the great advantage it would be to his province to see this road completed as speedily as possible. I pointed out to him that the introduction of a few thousand Japanese or Chinese would be no danger to the province if we would enter, as we were prepared to enter, into a bond to return these men to their own country at the termination of their work. I promised him that no single white man should be displaced from his labor, and that every white man should have priority over the colored man. Unfortunately, this is such a strong party question that I fear it would be difficult for any Government to give the permission which I asked for. Now, if as at the present time our road is being built chiefly by Italians and Scandinavians, you may ask, as I asked, where is the British navvy? Why is he not out there working, not only for the good of the province, but for his own advantage? Here is an opportunity for the capable and honest unemployed laborer of this country to go out there and earn his 10s. or 12s. a day. I saw foreigners of every sort and description, but somehow or other the Englishman was conspicuous by his absence. I think there is something wrong in this, and I think it is a matter which might fairly be taken up between the two Governments or by some of those benevolent and excellent institutions which are established for the benefit of the unemployed. There is work waiting for the laborer, but the laborer does not present himself, and I cannot help thinking that some strong efforts ought to be made in this country to point out to the unemployed laboring man the great advantages which emigration offers in that favored country.

PITTSBURG AND NEW YORK

I need say no more, I think, about that wonderful land which constitutes the Prairie section. I will return to our Lake Superior branch. I went over that branch, and I was pleased to find that the road itself was as well built and as well equipped as the best portion of the road through the prairie. I cannot say that the country through which the road passes affords the same advantages as the road to which I have alluded, but I am bound to say that I was rather agreeably disappointed in what I saw. For some distance out from Fort William the land is already taken up and being farmed. Further on there is little occupation, and I doubt very much whether it will ever maintain much of a population. On the other hand, there are prospectors at work all through the country, and there is every expectation that considerable deposits of minerals will be found. Now I come to what is an unpleasant matter to speak of, and that is, that while we have built the Winnipeg line on the one hand, and the Lake Superior junction on the other, there remains an unfortunate link of no less than 245 miles to complete the junction. I told you on previous occasions that there was little doubt that that link would be completed this autumn, and that we should be able to carry the grain from the prairies down to Lake Superior so as to ship it across to our Georgian Bay ports, to the great advantage of the Grand Trunk System. I told you that, and I told you it upon information I had received from the other side. I am sorry to say I misled you, but if I misled you I was grossly misled myself, and I may say more than that, the Government of Canada were also misled in its expectations that the road would be so completed. I tried to find out what were the reasons for this extraordinary delay in the completion of this portion of the road, and I am bound to say that the excuses and explanations offered me were altogether unsatisfactory. It is not for me to probe the real reasons for these laches.

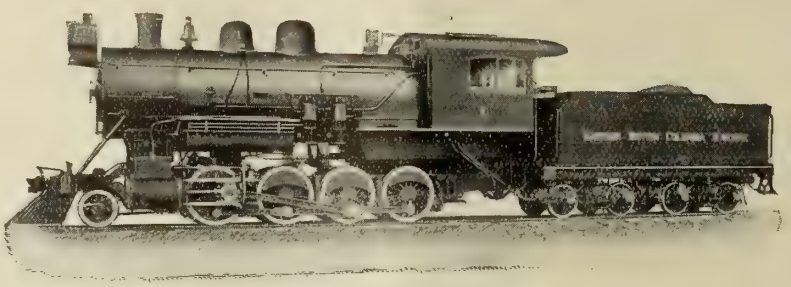
But there the matter remains. During three or four years, while we have built some 1,200 miles of road—some portion of which was at least as difficult of construction as that which I have spoken of—these 245 miles remain unfinished. I have some delicacy in speaking of this subject, because I do not wish to imply for one single moment that there has been any laches on the part of the Canadian Government. I saw the Premier on the subject, and took the liberty of saying that he had been badly served. That is absolutely the case. The Dominion Government has done all it possibly could. It put pressure upon the contractors, but the contractors did not do their duty, and, as I have said, the work is uncompleted, and we are the sufferers. I have been asked whether the road will be completed next year. I am very chary of making a prediction on the subject after what has taken place, but I should surmise, after all the pressure which has been put upon the contractors, that it will be finished next summer. I wish to be perfectly frank with you. I am sorry I have misled you, but it is no fault of my own. I received the strongest possible assurances that the road would be completed. It has not been completed, and we have to bear the loss, subject to any claim we may be able hereafter to establish against the Canadian Government. I should like also to mention this. Of course, our object is to link up the West with our eastern system. That will be done during the summer by the road going down to Lake Superior, which will enable us to communicate by water with our Georgian Bay ports, and during the winter, when navigation is closed, by the road the Government is building from Lake Superior Jct. to Cochrane, 540 miles, where we shall obtain communication with North Bay, and be brought in touch with our own Ontario road. That we are within measurable distance of communication by Lake Superior there is no doubt whatever. As regards the completion of the road, the 540 miles to Cochrane, I am afraid we shall have to wait for some time. I am afraid that there again there is not that activity and anxiety to progress which ought to characterise the contractors who are working under the Government.

This is the last occasion on which I shall have the pleasure of addressing you as President of this company. At the end of the year I shall resign the position to which you did me the great honor of electing me 14 or 15 years ago. It has been to me a period full of interest, not without frequent moments of anxiety, no doubt, but much has been achieved, and in resigning my trust into your hands I have the satisfaction of reflecting that the company to-day stands, as regards the material condition of the property, its financial position, its credit, and its future, on a far higher level and on a very much firmer basis than it did in 1895. With your permission, I will in a short retrospect, summarise some of the work which has been accomplished; and first of all let me say that the road itself has been, so to speak, entirely rebuilt and re-equipped. Beginning with our double track, in 1895, 404 miles of double track had been completed. To that we have added since, 636 miles, making 1,040 miles. You have now a magnificent straight road of double track running from Ste. Rosalie, 32 miles east of Montreal to Chicago, no less than 880 miles, and which I believe is the longest double track in the world. As regards bridges, a question which has been frequently brought under your notice, we have spent no less than £1,600,000 since we have been in office in strengthening, improving and reconstructing the bridges. You will remember that we have entirely rebuilt the superstructure of the Victoria Bridge and double tracked it; we have rebuilt the International Bridge across the Niagara River to Buffalo. That fine single-arch bridge on the Niagara River has been built, and all the bridges, in fact, have been rebuilt or strengthened, so that at the present time engines of the highest capacity and drawing the heaviest load can run direct from Portland to Chicago, 1,140 miles. We have added enormously to our yard accommodation at Toronto and Montreal. We have built shops up to date and well equipped at London, Stratford, and Battle Creek. When I come to the rolling stock you will see that the improvement has been almost greater. I find that in 1895 the number of our locomotives was 1,036. We have only added 75, making the total 1,111; but the haulage capacity in 1895 was only 1,947,000 tons, whereas it is now 3,577,000 tons, an increase of 1,630,000 tons, or 33%; and that has been done without any charge to capital. As regards cars, we have increased the number by 6,500. The number in 1895 was 25,515; it is now 33,019; but the tonnage capacity of those cars in 1895 was only 473,000 tons, and it is now 896,000 tons, an increase of 422,000 tons, or about 89%, and the average capacity per car, which in 1895 was about 18½ tons, is now 28 tons, an increase of 9.43 tons, or 50%.

I should like to say a word also upon what has been done with some of our subsidiary companies. In 1899 the Central Vermont Ry. was in considerable difficulty. It was greatly in debt to our company, and in a very bad condition. It was one of the first operations of our general manager, Mr. Hays, when he took hold of the situation, to reconstruct that company. We received valuable bonds for its indebtedness, it was placed in an excellent financial position, the road was put into good condition, and it continues to be one of our best connections. Then, you have not forgotten what took place in 1900 with regard to the reorganisation of the old Grand Trunk and Chicago line. At that time the mortgage expired, and a new mortgage was contracted, by which not only were we relieved from the heavy burden to which we had been subject three or four years previously, but sufficient money was obtained for rebuilding the road and double tracking it. The G. T. Western not only now pays, but has a considerable surplus, which has enabled it to build at a cost of $900,000 the new Battle Creek shops. It is no charge upon the G.T.R., and it remains one of the most important feeders of the system. With regard to the Canada Atlantic Ry., which we acquired in 1904, I will only say that we had very good reason for the acquisition of that property. It has already proved, and will prove hereafter, to be a most valuable adjunct to our system, and I may say that it was as much for strategical as for financial reasons that we found it necessary to acquire that road. We have had to put a good deal of money into it since we acquired it, but the expenditure is nearly completed, and every year is showing an advance. With regard to the G.T.P.R., I need say no more than what you are acquainted with. As proprietors, I hope you are satisfied with what has been done, and with the physical situation of the company's property.

I will now appeal to you as shareholders rather than as proprietors, and here, too, I think, you will say that our record is not an unsatisfactory one. In 1895, when the present board came into office, as you will remember, the company was on the verge of bankruptcy. A sum of very nearly £200,000 had been advanced to meet the fixed charges. We came into office in May, 1895, and it was not until the end of 1897 that we emerged from that condition of insolvency, and were able to begin to pay our way. In 1898, for the first time, we resumed the payment of dividends, and in that year the whole interest on the 4% guaranteed stock was paid, and also 3% upon the first preference. Since then we have had a continued progression of prosperity, with an occasional set-back, no doubt, until we have arrived at what I may consider our present flourishing condition. Beginning with 1898, when we resumed the payment of dividends, I find that we have paid up to the present time in dividends no less than £6,672,000, and we have also distributed in fixed charges, in interest, upon our bonds, £14,750,000, that is to say we have emerged from a state of absolute insolvency since 1898, and have distributed amongst the proprietors a sum of over £21,000,000. I should like, going back to that period, to recall to you that it was proposed, and was strongly urged upon me, that we should take advantage of the depression of the company and of the feeling of disappointment amongst the proprietors to reconstruct the capital, the result of which would have been to sacrifice to a large extent the interest of the holders of the senior securities. The proposal, no doubt, had its attractions, and I believe that at the moment, the shareholders having trust and confidence in the board they had just called into office—I believe it is possible that the shareholders might have accepted that proposal. I was strongly opposed to it. I thought it was our duty to try and extricate the company from its difficulties without having resort to what I may call a policy of despair. I thought we were in honor bound to take that course, and I had that faith in its recuperative powers to make me believe that the thing was unnecessary. I was supported by my colleagues in that view, I am happy to say, and I think we are thoroughly justified in the result, and at the termination of

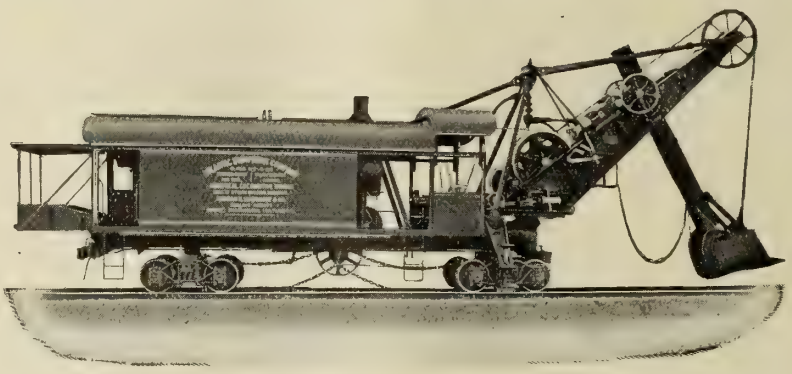
LOCOMOTIVES FOR ALL CLASSES OF SERVICE



Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39,200 pounds.

ATLANTIC STEAM SHOVEL



Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

MONTREAL LOCOMOTIVE WORKS, LIMITED

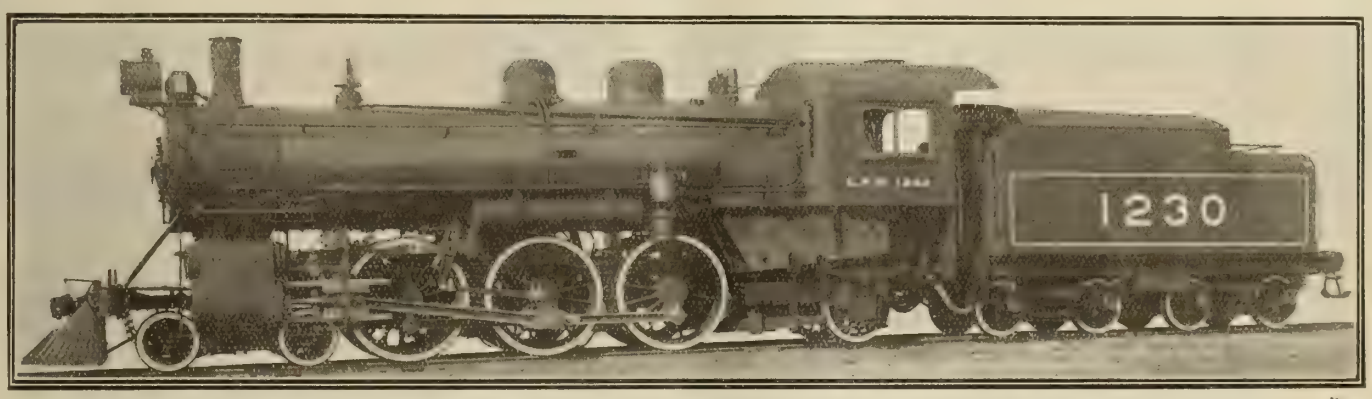
BANK OF OTTAWA BUILDING, MONTREAL, CANADA

my period of office I should look back with deep regret had I accepted such a policy as was pressed upon me at the time. Of course, these improvements to the property have not been carried out without a considerable expenditure of money. The improvements and developments, however, have been carried out with the greatest possible regard to economy, but you will not be surprised that some increase to the capital has been made. Our capital has been increased to the extent of about £7,500,000. But here again, I may mark a note of satisfaction, there has been practically no increase whatever on our fixed charges, and I only ask you in the future to keep your eye strictly and severely upon that question of capital expenditure, and see to it that we are not likely to fall into such a position as that which we occupied in 1895. As regards the receipts, which indicate in a very striking manner the progress of the company. I find that the gross receipts in 1895 amounted to £4,417,000. In 1907, which was, of course, a very good year, the gross receipts were £9,224,000, and in last year, which was a bad year, they were £8,106,000. The proportion of fixed charges to gross receipts in 1895 was 27.57%. In the bad year of 1908 they were 16.49%, and in the good year of 1907 they were 14.32%. I may also mention that, taking the present market prices, which are lower than they were a couple of years ago, the increased value of your securities is something like £20,000,000. I find that the ordinary stock when we took office was quoted at 5½, and now it stands at between 23 and 24, and it has been very much higher. The 4% guaranteed stock stood at 42½ in 1895 in the market, and it now stands at 95. The third preference, a very favorite security for our shareholders, which stood at 12, is now at 57, and our 4% debenture stock, which was then at 75, stands now at 101½, and has been very much higher. I think, therefore, I am justified in looking back with some satisfaction upon the financial record of the past few years. In 1853, when the company was formed, a board was constituted in Canada, consisting of 12 members, with a financial committee of six in London, and the head of the board in Canada was designated the President, and the chief executive officer was known as the General Manager. After the board, for very good reasons, was removed to London in 1862, no change was made in the designation of those officers, and that remained the case from that time to this. It has been thought, however, that the present opportunity should be availed of to change the designation of the President and General Manager respectively, and to place Mr. Hays, our General Manager, as regards title, upon the same footing as that of the executive officers of all other American and Canadian railways. Mr. Hays is so well known and so much appreciated throughout the railway world on the other side of the Atlantic, that it may not appear to be a matter of very great consequence what his designation may be; but at the same time, we think that it is due to him, and it is only fair that he should be placed upon the same status as all his brother chief executive officers; and, therefore, we think it is only right that he should, like all those officers, have the title of President. My successor will be known by the more familiar title in this country of Chairman of the Board, and you will understand that in making these titular changes no change whatever is contemplated in the relative responsibilities, either of the executive officer or of the board. The executive officer will not have greater power or authority or responsibility, and the board will not have less authority and control than at present.

I shall lay down my work with regret, but the regret will be softened and diminished if I may be allowed to indulge the hope that I may sometimes be remembered as having taken part in the regeneration and development of your company—and especially as an earnest promoter of that great undertaking now rapidly approaching completion which will have so great an influence upon the future of our company, and will at the same time contribute in so large a measure to the welfare and prosperity of Canada."

After some little discussion, during which an amendment was proposed, but not seconded, relative to the appointment of an advisory committee to act in Canada, the report was adopted.

A resolution was also adopted granting a retiring allowance of £1,500 a year to the President.



CANADIAN PACIFIC RY. PACIFIC TYPE LOCOMOTIVE.

Railway Lands Patented.—During Aug., letters patent were issued in respect to railway lands in Manitoba, Saskatchewan, Alberta and British Columbia, as follows:—

	Acres.
Calgary and Edmonton Ry.	6.55
Canadian Northern Ry.	.03
Canadian Pacific Ry. grants	68.59
Grand Trunk Pacific Ry.	19.23
Manitoba and North-Western Ry.	2.10
Total	96.50

The Western Trunk Lands Building and Development Corporation, Ltd., has recently been incorporated at Winnipeg, by a number of railway employes, with the chief object of building homes and engaging in real estate business on a co-operative plan, at divisional points where they are obliged to reside. The stock, which is in shares of $100, is to be sold, two-thirds to railway employes, and the remainder to the public.

C. P. R. Pacific Type Locomotives.

The C.P.R. has received recently from the Montreal Locomotive Works 30 Pacific type (462 class) locomotives of the railway company's G-2d class. They are equipped with the Vaughan-Horsey superheater and Walschaert valve gear. The boiler is of the extended wagon top type, 67⅜" outside diameter at the front end. The barrel is built with three rings, the second of which is tapered, with the dome on the third ring. The horizontal seams are butt jointed, sextuple riveted with welt strips inside and outside. The circumferential seams are double riveted. The fire box has a sloping throat and back head and is radially stayed. Flexible staybolts are located in the breaking zone of throat, sides and back head. Flexible staybolts are also used for the four rows at the front of fire box crown sheet. The fire box ring slopes from front to back and is supported at each end by an expansion sheet and brackets. The fire box ring is 5" wide at the front, 4½" at the sides, and 3½" at the back. The injector check valve is located on the top of the first ring of the boiler under the bell stand. The water is discharged from the valve direct without any internal pipes. A deflecting plate prevents the cold water from striking the dry pipe. The smoke box is of a self cleaning type. The superheater is the Vaughan-Horsey type with two cast iron headers in the smoke box, one being for saturated steam and the other for superheated steam. The five inch boiler tubes contain four seamless steel superheating pipes 1¼" diameter, arranged in pairs, the two pipes in each being connected at the rear end by cast steel return bend. The pipes on emerging from the tubes are carried to the connections at the headers. The superheater pipes reach within 30" of the fire box tube sheet. Cast iron steam pipes connect the superheated header with the cylinder. The passage of the gases through the five inch tubes is controlled by a damper, which is automatically operated by steam cylinder located on the outside of the smoke box. This cylinder is directly connected to the steam passage of the cylinder and is operated by the pressure in the cylinder. When the throttle is open the pressure in the cylinder opens the damper, but when the steam is shut off a counterweight closes it. The cylinder is the railway company's standard pattern and has a bushing ¾" thick. The piston valves are 11" diameter, inside admission. For the Walschaert valve gear an auxiliary reverse shaft is used. A cast steel crosstie supports the link bearers.

The main frames are cast steel, 4½" wide with double front rails and single rear sections of wrought iron. The main frames and rear sections are bolted to

KILINDO
NON-ROTATING WIRE ROPE

"Kilindo" Wire Rope

Kilindo Wire Rope is absolutely free from any tendency to rotate with or without the load. Kilindo Wire Rope, being constructed throughout of entirely round wires, thereby embodying the advantages of the manufacture of a smooth surface rope, presenting the very largest wearing surface to wear. Kilindo Wire Rope does not kink.

"Kilindo" Wire Rope

Cannot be excelled for

a cast steel crosstie just back of the rear pedestals. The frames are braced in a very substantial manner by cast steel crossties. The trailing truck, which has outside boxes, requires but a single slab section frame 2" thick. The boxes are of cast steel fitted in cast steel pedestals. The load is transferred to the truck by semi-elliptic spring connected at one end to an equalizing beam from the rear driving spring, and at the other end to a steel casting bolted to the frame. The spring rests in a cast steel spring seat, which has projecting ends fitting into the top of the front and back pedestal. The load is transferred from the spring seat to the box by means of three point bearing swing links, which are also used to bring the truck back to the normal centre after passing a curve The front truck has a swing centre casting with three point hangers. Two cab turrets are used and each one has a separate dry pipe extending to the dome. The driving boxes are cast steel with bronze gibs in the shoe and wedge fit, and are equipped with hard grease lubricator. The driving wheels are the railway company's standard cast steel centre and have cast iron hub liners. The front truck is equipped with steel tired wheels having cast steel spoke centres and the tender with steel tired wheels having wrought iron disc centres.

A 5,000 Imperial gallon semi-water bottom tank is applied to the tender and space provided for 10 tons of coal. The frame is built of 13" channels for centre sills and 10" channels for side sills. The tender trucks are the equalized pedestal type with a cast steel bolster and semi-elliptic springs. The leading particulars are as follows:

Service	Passenger
Fuel	Bituminous coal
Tractive effort	33,460 lbs.
Weight in working order	214,200 "
" on drivers	135,000 "
" on leading truck	42,700 "
" on trailing truck	36,500 "
" of tender (loaded)	133,200 "
" of engine and tender in working order	347,400 "

E. A. Walberg, contractor, Montreal, has been awarded $53,205 by the Exchequer Court, in the settlement of his claim of $105,940 for extras in connection with the construction of the I.C.R. shops at Moncton, N.B.

December Birthdays.

Many happy returns of the day to—

E. Alexander, Assistant Treasurer C.P.R., Montreal, born in Yorkshire, Eng., Dec. 8, 1862.

J. H. Barber, Engineering Department C.P.R., Montreal, Que., born at Cobourg, Ont., Dec. 20, 1856.

N. E. Brooks, C.P.R. Division Engineer, Calgary, Alta., born at Sherbrooke, Que., Dec. 25, 1866.

J. C. M. Buntzen, Director British Columbia Electric Ry. Co., Copenhagen, Denmark, born there Dec. 16, 1859.

T. C. Burpee, Engineer of Maintenance of Way, Intercolonial Ry., Moncton, N.B., born at Sheffield, N.B., Dec. 11, 1852.

W. W. Butler, Vice President Canadian Car and Foundry Co., Ltd., Montreal, born at Danville, Ohio, Dec. 9, 1862.

H. P. Dwight, President Great Northwestern Telegraph Co., Toronto, born at Belville, Jefferson Co., N.Y., Dec. 23, 1828.

R. Forget, M.P., President Richelieu and Ontario Navigation Co., Montreal, born at Terrebonne, Que., Dec. 10, 1861.

W. H. Gardiner, City Freight Agent C.P.R., and District Freight Agent Esquimalt and Nanaimo Ry., Victoria, born there, Dec. 6, 1859.

H. H. Gildersleeve, Manager Northern Navigation Co. of Ontario, Collingwood, born at Kingston, Ont., Dec. 15, 1865.

A. J. Gorrie, ex-General Superintendent Canadian Northern Quebec Ry., now Managing Director Geo. Hall Coal Co., Montreal, born at Raith, Kirkcaldy, Scotland, Dec. 10, 1868.

W. H. Grant, Manager of Construction, Mackenzie, Mann and Co.'s Eastern Lines, Toronto, born at Acton, Ont., Dec. 8, 1858.

F. P. Gutelius, General Superintendent Lake Superior Division C.P.R., North Bay, Ont., born at Mifflinburg, Pa., Dec. 21, 1864.

D. B. Hanna, President Quebec and Lake St. John Ry., Third Vice President Canadian Northern Ry., Toronto, born at Thornliebank, Scotland, Dec. 20, 1858.

S. P. Howard, General Freight Agent Eastern and Lake Superior Divisions C.P.R., Montreal, born there Dec. 30, 1865.

B. B. Kelliher, Chief Engineer Grand Trunk Pacific Ry., Winnipeg, born in Ireland, Dec. 26, 1862.

J. T. McGrath, Master Mechanic, G.T.R., Battle Creek, Mich., born at Toronto, Dec. 6, 1869.

A. T. McKean, Soliciting Freight Agent C.P.R., Winnipeg, born at St. John, N.B., Dec. 18, 1886.

L. Macdonald, Division Freight Agent G.T.R., Toronto, born at Montreal, Dec. 10, 1871.

J. Niblock, ex-Superintendent C.P.R., Calgary, Alta., born in York County, Ont., Dec. 21, 1849.

A. Price, General Superintendent Western Division C.P.R., Calgary, Alta., born at Toronto, Dec. 6, 1861.

G. D. Robirson, Assistant Export and Import Freight Agent C.P.R., Toronto, born at St. John, N.B., Dec. 7, 1877.

C. Schreiber, C.M.G., Consulting Engineer Department of Railways and Canals, Ottawa, Ont., born at Bradwell, Essex, Eng., Dec. 14, 1831.

F. P. Smith, Secretary Richelieu and Ontario Navigation Co., Montreal, born there, Dec. 23, 1873.

C. E. E. Ussher, Assistant Passenger Traffic Manager C.P.R. Western Lines, Winnipeg, born at Niagara Falls, Ont., Dec. 29, 1857.

H. H. Vaughan, Assistant to Vice President C.P.R., Montreal, born at Forest Hill, Essex, Eng., Dec. 26, 1868.

W. Wood, locomotive foreman C.P.R., Megantic, Que., born at Montreal, Dec. 6, 1863.

Canadian Northern Ry. Stock Issue.

Sperling & Co., of London, Eng., issued recently a prospectus of £850,000 Canadian Northern Ry. 4% perpetual debenture stock, at 93. This stock is perpetual and irredeemable, and ranks pari passu in all respects with the 4% perpetual consolidated debenture stock now officially quoted on the London Stock Exchange. The trust deed provides that the total amount of debenture stock shall not exceed £2,000 per mile of line for the time being open and operated, and an amount not exceeding the cost price of securities of independent corporations from time to time deposited with the trustees, but the company cannot issue any debenture stock against such securities without the consent of the trustees. The debenture stock is secured by a general charge upon the undertaking, property and assets (other than land and money subsidies) of the company, subject to £1,180,600 of bonds primarily charged on the Ontario division of the railway (287 miles), and to charges created, or to be created, not exceeding $10,000 per mile of line, other than the above-mentioned 287 miles of line in Ontario, or $15,000 per mile if guaranteed by the Dominion Parliament, or any of the Provinces, and is a specific first mortgage upon certain securities deposited with the trustees. We are advised that the issue was largely over subscribed.

A Railway to Hudson Bay.—The Governor General in his speech at the opening of Parliament, Nov. 10, said: "The exploratory surveys for a railway from the western wheat fields to Hudson Bay were pushed energetically during the whole of last summer. It is hoped that a report of the operations will be placed before you at an early date." The Railway Department's report for the year ended March 31, 1909, contained the preliminary report of the engineers who made the survey, the most important details of which have already been published in these columns. The report which is expected to be laid before Parliament shortly will cover the special surveys made in connection with the selection of a terminal—Port Nelson and Fort Churchill both being advocated—and the more detailed estimates as to the cost of the line. Reports from Pas Mission, Sask., Nov. 3, state that 20 miles of the final location of the line from that point had been completed. (Nov., pg. 821.)

Railway Subsidy Contracts.—A subsidy contract was entered into, Oct. 20, between the Dominion Government and the Atlantic, Quebec and Western Ry., for the construction of 26 bridges on the company's line under construction between Paspebiac and Gaspe, Que.

Further evidence was taken during Nov., in the case of the Government against the C.P.R., for recovery of $239,000, alleged to be due for customs duties in connection with the false invoices passed some time ago, by D. M. Hobbs, who was convicted and sentenced to a term of imprisonment, and has since died.

The Secretary of the Board of Railway Commissioners has issued a circular stating that it is the present practice for the Board's inspectors to forward to the superintendent or other official of the railway company interested a copy of report made by the inspector re station buildings and safety appliances. Hereafter, the railway official receiving the inspector's report is to acknowledge receipt direct to A. J. Nixon, the Board's Chief Operating Officer, advising him what action is being taken in connection therewith.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments.

Alaska Northern Ry.—A company with this title has been formed to take over and complete the Alaska Central Ry., whic was recently sold by orders of the courts. The Sovereign Bank of Canada held practically the entire bond issue, and the line was bought at the sale in the interests of the bank, which itself is in process of being wound up. The line is in operation from Seward, 72 miles inland, and it is intended to continue it to the Tanana River, 370 miles further. It is also proposed to construct a branch line from mileage 146 to the Matauooska coal fields, 38 miles; and a branch from Susitna through the Kuskumin country to the gold fields at Itidarod. The present southerly terminus at Seward is to be changed to Resurrection Bay. O. G. Larebee, Spokane, Wash., is President of the new company. (Nov., pg. 829.)

Alberta and Great Waterways Ry.—The Deputy Attorney General and the Deputy Treasurer of Alberta reached Toronto, Nov. 9, on their return from New York, where they had been in connection with the placing of a provincial loan to aid in the construction of this railway. They stated that they had succeeded in placing the loan upon satisfactory terms. It was announced from London, Eng., Nov. 12, that the issue of £1,500,000 of 5% fifty year first mortgage bonds of this company had been over subscribed. The arrangement for the placing of this issue on the market was made by the Province of Alberta with J. P. Morgan & Co., New York. The amount of the issue represents the amount of bonds which the province agreed to guarantee in order to secure the construction of the line. The guarantee is at the rate of $20,000 a mile of railway, and $400,000 for terminals in Edmonton, the whole not to exceed $20,000 a mile on 350 miles. (Nov., pg. 829.)

Alberta Central Ry.—The organization of this company has recently been completed, the officers being:—President, J. T. Moore, Red Deer, Alta.; Chief Engineer, J. G. MacGregor, Red Deer; acting Secretary, H. W. Raphael, Montreal. The shareholders authorized the directors to go on with surveys for the first 75 miles of the projected lines, for which there is a Dominion subsidy. The line will start at Red Deer and proceed westerly. It is intended that this westerly line will be extended to a junction with the G.T. Pacific Ry. in the Yellow Head Pass country. The company has power also to construct a line easterly from Red Deer to Moose Jaw, and a branch thereform, from near the Battle River to Saskatoon or Warman, Sask. The present surveys show that the construction work will be fairly difficult. The maximum gradient is to be 0.4% and the maximum curvature three degrees. There will be three steel bridges on the line, at the crossing of the Red Deer, Medicine, and Saskatchewan rivers. (Oct., pg. 743.)

Algoma Central and Hudson Bay Ry.—Application is being made to the Dominion Parliament for an extension of time for the construction of the line authorised by chap. 50 of the statutes of 1899, as amended by chap. 49 of the statutes of 1900.

We are advised that three survey parties have been locating a line between the Michipicoten branch and the C.P.R. transcontinental line, and that it is expected to have this work under contract in the near future. The company has under consideration the question of starting work upon the completion of the section of the line between the present end of steel on the main line and the Michipicoten branch. (Nov., pg. 829.)

Athabasca Ry.—The Canada West Construction Co. has been incorporated under the Dominion Companies Act with a capital of $500,000 and offices at Winnipeg, Man., to carry on a general construction and development business, and particularly to acquire any rights and interests under the provisions of the act to incorporate the Athabasca Ry., being chap. 58 of the statutes of Canada of 4 and 5 Edward VII. The provisional directors are:—G. D. Minty, C. S. Tupper, H. W. Hollis, W. F. L. Edwards and A. D. Smith, of Winnipeg. (July, pg. 473.)

Atlantic, Quebec and Western Ry.—We are advised that excellent progress has been made during the present season of construction on this line, which is yet in the hands of the general contractors, the New Canadian Co. Twenty miles, from Paspebiac, the terminus of the Baie des Chaleurs Ry, or the Atlantic and Lake Superior Ry. as it is also called, to Port Daniel, is open for traffic, and it is expected to open a further 20 miles in Dec. This will bring the line to Pabos, but it is possible that a further 10 miles, to Grand River, may be opened this year. The whole of the line to Gaspe Harbor, mileage 102, is under construction, with rails laid most of the way. Foundations of bridges, etc., are in most cases completed; some of the 28 steel bridges to be erected are of considerable size. The contract for their supply and erection is held by the Dominion Bridge Co., Montreal. Arrangements have been completed for the transfer of the Baie des Chaleurs Ry., extending from Matapedia to Paspebiac, with which the company will have a through line, from the Intercolonial Ry. at Matapedia to Gaspe Harbor, of over 200 miles. As soon as the transfer is made the Baie des Chaleurs Ry. will be put under repair and brought up to the standard of the line now being constructed. (Sept., p. 649.)

British Columbia and Manitoba Ry.—A meeting of shareholders has been called to be held at Lethbridge, Alta., Dec. 18, for the purpose of receiving the report of the provisional directors, organizing the company, electing directors, and transacting all other business which may properly be brought before such meeting. The notice is signed by H. Roy, F. W. Rolt, J. J. Fleutot, J. B. T. Caron, E. Hoffman, and J. J. B. Gosselin, for the provisional directors. (May, pg. 355.)

Central Ontario Ry.—We are advised that the balance of the extension from Lake St. Peter to Whitney, on the G.T.R. Canada Atlantic line, has been surveyed and located. Considerable grading has been done this season and one mile of track laid. No new contracts have been let. It is expected that the extension will be completed enxt season. (May, pg. 355.)

Cheticamp to Port Malcolm, N.S.—A press report says a railway will soon be constructed to be known at the St. Rose Ry., to run from Cheticamp to Port Malcolm, which is an all the year round harbor, and that it will tap the Intercolonial Ry. at Orangedale. (See Cape Breton railways, June, 1908, pg. 401.)

Chicago, Milwaukee and Puget Sound Ry.—A press report from Missoula, Mont., says that work on a line from that point to the Crow's Nest Pass country in Canada will be commenced in the spring, and continued until completed. The directors returned to Missoula recently, from a trip to Kalispell, Swan River and Swan Lake. They report that they are pleased with the country which the line will open up. Surveys have already been made on the Canadian side of the boundary. It is stated that tenders will be called for at an early date. (July, pg. 475.) (See also Canada Western Ry.)

Chicago, Milwaukee and St. Paul Rd.—A press dispatch from Grand Forks, N.D., Nov. 12, said F. D. Hughes, of Larimore, N.D., had returned there from Chicago, where he had been in consultation with the President of the C.M. and St. P. Rd. in connection with the route of the proposed extension from Fargo to Winnipeg. He stated that there was no doubt that it was the company's plan to start the construction of the extension in the spring. As to the exact route which would be taken, it was a little early to state definitely, as it had not been all gone over carefully. The idea was that the line would start from Fargo, running midway between the Casselton branch and the main line into Grand Forks, then west to Larimore, and from there directly north into Winnipeg. (July, pg. 475.)

Detroit River Tunnel.—We are advised that all the sections of the subaqueous work are in position and surrounded by exterior concrete. All of the water has been removed and 75% of the lining of the two tubes, forming the tunnel, completed. The approach tunnel work on both sides of the river is practically done. There is some little work to do in the vicinity of the shafts on both sides of the river, but this will not in any way interfere with the progress and completion of other sections. A very large amount of preliminary work in connection with electrification has been done, but work has not been actively commenced at the tunnel itself. (Oct., pg. 743.)

Dominion Atlantic Ry.—The question of the construction of a line connecting with the D.A.R., through its Cornwallis Valley Branch at Centreville, N.S., and touching the main line at some western point, has been under consideration for years. A public meeting was held at Woodville recently, when it was stated that the Dominion and Provincial subsidies on the usual terms were available for any company which would construct the line, and the Minister of Militia said he had been given to understand when in London, Eng., recently, by the President of the D.A. Ry. that that company was ready to arrange with the company now holding the charter to construct this line, and was prepared to enter upon the construction of a ten mile section from Centreville. A committee was appointed to take up the matter with the various interests concerned. (Sept., pg. 649.)

Dominion Central Ry.—Application is being made to the Dominion Parliament for authority to increase the bonding powers to $50,000 a mile, to extend the time for the commencement and completion of the projected railway. Smith and Johnston, Ottawa, are the solicitors. (July, pg. 475.)

Farmers Ry.—A press dispatch from Prince Albert, Sask., Nov. 10, said D. W. Hines, President of the Company, was brought into that city the previous day from Melfort charged with being insane, and was placed in jail, pending his removal to the asylum at Brandon, Man. The company has completed five miles of grading on its line from Melfort towards Regina. It is intended to elect a new President at once. (Sept., pg. 649.)

Graham Island, B.C.—Application is being made to the B.C. Legislature to incorporate a company with power to construct railway lines, to be operated by steam, electricity or other motive power, from Skidegate Inlet, near lot 15a, northeasterly to Miller Creek, thence northwesterly to Stewart or Kundis Bays, Masset Inlet, with branches, not to exceed 20 miles in any one case.

Power is also asked to own and operate steam and other vessels, wharves, docks, etc., including water power for railway and other use. Barnard and Robertson are solicitors for applicants.

Ha Ha Bay Ry.—The construction of this line is being proceeded with, and it is expected, will be completed and in operation by Sept., 1910. It starts at St. Alphonse and proceeds to Jonquieres, Que., where it connects with the Quebec and Lake St. John Ry. A branch will also be constructed from St. Alphonse to Grande Bay. The main line will be 24 miles long, and the branch three miles. At St. Alphonse the Government has constructed a wharf providing for a deep water harbor with 60 ft. of water, so that there is excellent berthing for large steamers. The railway will provide an outlet for the lumber mills of Chicoutimi county. It is estimated that it will cost $24,000 a mile. The Dominion and Quebec Governments have given subsidies towards construction. Senator Choquette is President of the company, and Mr. Dubuc, of the Chicoutimi Pulp Mills, Vice President. (Sept., 1908, p. 615.)

Hudson's Bay and North Western Ry.—Application is being made to the Dominion Parliament for an act authorizing the company to amalgamate with the Manitoba and Keewatin Ry., and for an extension of time for the construction of the lines authorized in connection with the said companies. S. S. Martin, Toronto, is solicitor for the company. (July, pg. 477. See also Manitoba and Keewatin Ry., July, pg. 479.)

Intercolonial Ry.—The annual report of the Department of Railways for the year ended Mar. 31, states that a remeasurement of the line was carried out during the year, with the result that the length was found to be 1,447.13 miles, instead of 1,448.62 miles, and the revised figures are now being used. There are 17.67 double tracked. The total mileage is irrespective of spur lines and sidings and tracks in yards, the aggregate length of which is 364.04 miles. (Oct., pg. 745.)

International Ry. of New Brunswick.—At Montreal Nov. 3, T. Malcolm, general contractor for this railway, stated that if the weather held good the line from Campbellton to St. Leonards, N.B., 114 miles, would be completed by Nov. 30. Track has been laid, and the ballasting completed, on 80 miles, while the grading has been completed on the remaining 34 miles. As soon as the line is finished preparations will be made for the construction of the bridge across the Restigouche River, to connect with the Atlantic and Lake Superior Ry. and its extension the Atlantic, Quebec and Western Ry. (Sept., pg. 649.)

James Bay and Eastern Ry.—Application is being made to the Dominion Parliament to incorporate a company with this title to construct a railway from the Canadian Northern Ontario Ry.'s authorized line near Lake Abitibi, easterly and southeasterly, passing south of Lake St. John, to the mouth of the Saguenay River, with a branch from Chicoutimi county to Ha Ha Bay on the Saguenay River. G. F. Macdonnell, Toronto, one of the Canadian Northern Ry.'s assistant solicitors is solicitor for the applicants.

Kettle Valley Lines.—Application is being made to the Dominion Parliament by the Kettle River Valley Ry. Co. for authority to construct an extension of its line from its authorized railway near Coldwater River, to the navigable waters of the Fraser River, and for an extension of time for the construction of its various lines, and for other purposes.

The provisions of the agreement between the B.C. Government and the Kettle River Valley Ry. Co., whereby the province agrees to bonus a line from Midway, in the Boundary country, to Merritt, in the Nicola valley, 150 miles, are embodied in a signed document which requires ratification by the Legislature to make it effective. The Attorney-General in explaining the contract at a meeting in Vancouver said, the new company was the successor to the Midway and Vernon Ry., to which the Legislature granted a bonus of $5,000 a mile, and which the courts had determined the Province should pay. The new company having acquired this bonus, had represented to the Government that it would not be profitable to construct and operate the line between Vernon and Midway in face of the competition of the steamers running on Okanagan Lake, and agreed for $600,000 to construct a line from Midway to Penticton, and on to Merritt in the Nicola Valley, 150 miles. The company also agreed to construct a line up the north fork of the Kettle River and down the Coquihalla River to the Fraser River. By winding through the passes of the Hope Mountains this would bring Midway within 325 miles of Vancouver, or about 12 hours run by train. The company also agreed to employ no Asiatics, and pay a fair wage, and to have the service between Midway and Vernon in operation within four years. The company further agreed to pay the debts left by the Okanagan Construction Co. on the Midway and Vernon Ry.; to pay a tax of $90 a mile to the Government, and to put up a deposit of $250,000. The lines to be constructed according to the signed agreement are as follows:—from Grand Forks up the north fork of the Kettle River, not less than 30 miles; from Midway to Penticton; and from Penticton to a junction with the Nicola, Kamloops and Similkameen Ry. near Nicola. Merritt, which was mentioned in the Attorney General's speech as the terminus of the line in the Nicola valley, is a station on the Nicola, Kamloops and Similkameen Ry., seven miles from Nicola. The agreement provides that the lines to be constructed are to be practically uniform with the C.P.R. or Great Northern Ry. lines when first constructed. The company is to have a free right of way through provincial lands, and also the right to take from all public lands adjacent to the lines, stone, gravel and other material which may be necessary for construction. A press report states that surveys made over the route show that the maximum gradient will be 1.5% in crossing the summit between West Fork and the Okanagan valley, and for the remainder of the distance less than 0.5%. (July, pg. 477.) See also Midway and Vernon Ry. (Nov., 1908, pg. 793.)

Manitoulin and North Shore Ry.—Application is being made to the Dominion Parliament for an extension of time, for the completion of the part of the line between Sudbury and Little Current, Ont.; for the commencement and completion of the part of the line between Owen Sound and Meaford, Ont., and for the commencement and completion of the lines authorized by the company's various acts, except those portions particularly mentioned above; and declaring the company's lines to be works for the general advantage of Canada. (Sept., pg. 651.)

Margaree Coal and Ry. Co.—In 1907 an agreement was made between the company and the Nova Scotia Government for the construction of this line in Inverness county, which was ratified by chap. 13 of the statutes of the same year. Under an order in council of March 27, of the present year, a new agreement was made changing certain of the conditions, and granting an extension of time within which the railway may be constructed. This new agreement was ratified and confirmed at the last session of the Nova Scotia Legislature.

The county of Inverness in 1905 made an agreement with the company by which aid was to be given towards the construction of the line through the county, the construction to be completed by Jan., 1908. An extension of time to Jan., 1909, was granted subsequently, and a further extension last session.

A third act affecting the company authorised the increase of its capital stock from £500,000 to £600,000, and the number of its directors from five to seven. (Sept., 1908, pg. 617.)

Maritime Coal, Ry. and Power Co.—We are advised that the extension of this company's line from Joggins Mine to the Bay of Fundy Shore, 1.5 miles, has been completed. The extension has a maximum gradient of 1.5% and a maximum curvature of four degrees. There are no special features of construction on this piece of line. (Oct., pg. 745.)

Michigan Central Ry.—The subway on Ross St., St. Thomas, Ont., under the M.C.R. tracks, has been completed, and the company is now grading the sides of the track at the subway in preparation for sodding them in the spring.

A recent press dispatch from St. Clair, Mich., stated that the company was contemplating the establishment of a car ferry service between that point and Courtright, Ont., and that some of the car ferries released from the Detroit-Windsor service will be used on it. We are officially advised that nothing of the kind is at present contemplated by the company.

It is stated that a site has been secured for a new terminal station south of Michigan Ave., Detroit, Mich., between Fifteenth and Twentieth streets. The plans for the new building are under consideration, but details are not sufficiently advanced to allow of any description being given. (Oct., pg. 744.)

Midway and Vernon Ry.—See Kettle Valley Lines. (Nov., 1908, pg. 744.)

Montreal Central Terminal Co.—Application is being made to the Dominion Parliament to authorize and confirm agreements with other companies, to authorize the company to amalgamate with other companies whose property or undertaking it is authorized to acquire, and to increase the capital stock of the company. F. E. Came, Montreal, is Secretary of the company. (See Montreal Bridge and Terminal Co., June, pg. 415.)

New Brunswick Coal and Ry. Co.—We are advised that the work for the payment of which the New Brunswick Legislature authorized a loan at its last session, including some additional ballasting, fencing, new tanks, and a new steel bridge at Washademoak, has all been completed by the staff employed by the Commissioners. The line is operated for the New Brunswick Government by a commission, A Sherwood, Norton, N.B., being the Manager. (Oct., pg. 745.)

Nickel Range Ry. Co.—Application will be made to the Ontario Legislature to incorporate a company with this title for the purpose of constructing a railway from near Onaping station, on the C.P.R. transcontinental line, through the northerly part of Dowling tp.; thence northeasterly through Laveck, Morgan, Lumsden or Foy and Bowell tps.; thence easterly through Wisner tp., connecting with the C.N.O.R. in the easterly part of Wisner tp.; thence easterly and southeasterly to a connection with the C.P.R. near Falconbridge tp. Power to construct branch lines is also asked, also the right to connect with the C.P.R., the C.N.O.R. or other railways at points other than those named, and to operate the lines by steam, electric or other motive power. Masten, Starr, Spence and Cameron, Toronto, are solicitors for applicants.

Northern Empire Ry.—A metting of of shareholders is to be held at Edmonton, Alta., Dec. 15, for the purpose of receiving the provisional directors report organizing the company, and tran-

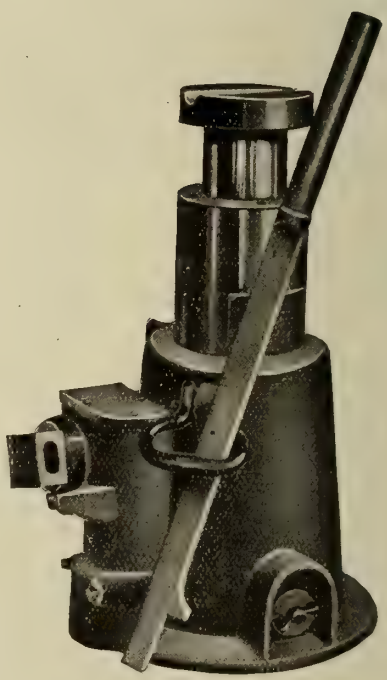
Inside Pump Type

Quick Action Hydraulic Jacks

Joyce-Cridland Hydraulic Jacks have a speeding device whereby they can be run quickly up to load, where the speeding device automatically cuts out, leaving only the power pump in action This device adds no extra pump or complicated parts to the jack. These jacks are so built that they may be used in any position and the filling liquid will not escape. The outside pump type has a short barrel, adapting it for use in cramped quarters.

Full description and explanation of the working parts of the Joyce-Cridland Hydraulic Jacks are given in Bulletin 33.



Outside Pump Type

A. R. Williams Machinery Co., Limited

Toronto, Winnipeg and Vancouver. WILLIAMS & WILSON, Montreal

sacting other business. The notice is signed by H. Roy, R. Balfour, J. J. Fleutot, E. Hoffman, and J. J. Gosselin. (July, pg. 479.)

Ottawa Valley Ry.—The Dominion Parliament is being asked to authorize and confirm agreements with other companies, to increase the bonding powers and to acquire, use and dispose of electric and other power. A Langlois, Montreal, is Secretary. (May, 1904, pg. 145.)

Pacific and Atlantic Ry.—The Dominion Parliament is being asked to extend the time for the construction of the lines authorized by sec. 1, chap. 138 of the statutes of 1906. (April, 1908, pg. 245.)

Prince Edward Island Ry.—We are advised that a contract was let to Whitehead Bros., Fredericton, N.B., for the construction of the branch line from Harmony to Elmira. The right of way has been cleared, and the culverts, which are of concrete, have been completed. Some little grading has been done, but owing to heavy rains construction has been closed down for the winter. The branch will be 10 miles long, mostly through a heavily wooded country. The maximum gradient is 1.2% and the maximum curvature four degrees. H. F. Laurence is engineer in charge of construction. (Aug., pg. 575.)

Prince Edward Island Tunnel.—The Premier of Prince Edward Island returned to Charlottetown from a visit to Ottawa, Nov. 5. In an interview he said the Dominion Government had promised to make a survey to determine the feasibility of a tunnel between the island and the mainland, and to estimate the cost. This was the next step, and the result of the enquiry was being awaited. The tunnel would have far-reaching consequences and advantages. The Island was pressing for it, and it should be constructed if the cost was reasonable. He did not believe it should be constructed if the cost was found to be unreasonable. (July, pg. 479.)

Quebec Central Ry.—The construction of the extension from St. George, Beauce, to Ste. Justine, Dorchester County, Que., is being energetically pushed forward. We were advised Nov. 6 that 12 miles of track had been laid and fully ballasted. A large bridge over the Black Stream, mileage 13, is being erected by the Dominion Bridge Co. It was expected that this would be completed Nov. 10, when the laying of track would be continued on to Ste. Justine, thus completing 30 miles in one season. The management expects to have the line in condition to operate a train service over about Jan. 1. It is, however, so late in the season that the final section of the line cannot be completely ballasted, but this will be done in the early spring, and with the summer change of time the new 30 miles will be added to the company's regular train service schedule. There will be four stations located on this new line, the first, 10 miles from St. George, will probably be called Morisset Bridge; the second, 15 miles from St. George, called Racquette River; the third, 20 miles from St. George, called Le Detour, and the fourth, at the end of the line, Ste. Justine. This extension follows the valley of the Famine River, through a rich lumber and agricultural country with reported indications of asbestos and copper. A considerable quantity of gold has been washed from the gravel of the Famine River. Ste. Justine is located seven miles from the boundary line of the State of Maine, on the watershed of the St. John river. It has not been decided when further construction beyond Ste. Justine will be commenced, but engineers are now making the location surveys. (Nov., pg. 829.)

Regina Southern Ry.—The Saskatchewan Legislature is being asked to incorporate a company with this title to construct a railway from Regina southwesterly to Rouleau, and on to tp. 12, r. 23, w. 2nd mer., thence southeasterly to the International boundary in tp. 1, r. 11 or 12, w. 2nd mer.; from tp. 12, r. 23, southwesterly to Willow Bunch, thence southerly to the International boundary in tp. 1, r. 1, w. 3rd mer. The company will also ask for considerable powers as a general development company, among them being the right to construct tramways for the transportation of coal, ore, minerals and other freight to or from the company's lines. A. Ross, Regina, Sask., is solicitor for applicants.

Reid Newfoundland Co.—Some information as to the contract between the Newfoundland Government and the Reid Newfoundland Co., with respect to the construction of branch lines, has been made public. It is stated that several branch lines are to be constructed, and that the company is to receive a subsidy of $15,000 a mile.

Of the lines to be constructed, that to Bonavista is now under way. A report from St. Johns, Nov. 3, stated that 10 miles of grading had been completed, and that as 1,400 men were at work there was every reason to hope, that with favorable weather conditions, the line would be completed early next year. (Nov., pg. 831.)

St. John Valley Ry.—The question of the construction of this projected line was brought before the House of Commons, Nov. 16, through a question asked by O. S. Crockett, as to the deputations which waited on the Dominion Government during the last session of the New Brunswick Legislature. The Minister of Public Works stated in reply that no proposition was made to the N.B. Government, but a proposition was made by a company to the Dominion Government. It was stated by the delegation that the company had that it would ask the Legislature for authority to guarantee the company's bonds up to $25,000 a mile, provided the Dominion Government would agree that the Intercolonial Ry. would operate it as a part of the Government lines, and pay to the province 40% of the gross earnings. The Government took the matter into full consideration, and subsequently the company was informed that before a definite reply could be given, detailed information as to the proposition was required. The Mayor of Fredericton, who is President of the company, was subsequently told of the position the Government took. The company had recently asked for a conference, and a reply had been sent to the effect that when a definite proposition, giving full details as to the route, gradients, curvature, bridge structures, etc., was submitted, the Government would give it the fullest consideration. (Oct., pg. 745.)

Temiskaming and Northern Ontario Ry.—A contract has been let to the Canadian Contracts, Ltd., Toronto, for the construction of a spur line of about a mile to connect the main tracks in New Liskeard, Ont., with the wharf at the mouth of the Wabis River. The work is to be proceeded with at once.

J. H. Black, Superintendent, stated in Cobalt, Nov. 3, that it was the intention of the Commissioners to construct a second track between Cobalt and North Cobalt in the spring.

The new station at Cobalt is expected to be completed early in Dec. A 650 ft. siding is being laid in front of the freight sheds and extending to the right of way siding at the north end of the yard. Additional sidings are being laid along the Kerr Lake branch. Supt. Black was in Cobalt, Nov. 8, inspecting the various works in progress, including the construction of a second track between Haileybury and North Cobalt. The portion of this work between Haileybury and North Cobalt has been completed, and progress is being made on the remaining distance between North Cobalt and Cobalt. There is a good deal of rock work to be done on this section, which will be gone on with during the winter. It is expected that the whole of the work will be completed early in the spring. (Nov., pg. 831.)

Vancouver and Coast-Kootenay Ry.—The Dominion Parliament is being asked to incorporate a company with this title for the purpose of constructing a railway from Vancouver, southeasterly to New Westminster and across the Fraser River, thence easterly to Midway, in the Boundary Creek district; from the main line of railway south of the Fraser River to its mouth; from the main line east of Hope to Nicola Lake; and from the line near Vancouver northerly across Burrard Inlet to North Vancouver, thence westerly to the mouth of Capilano River. The company is also asking power to construct and operate telegraph and telephone lines along its railway. D. G. Macdonnell, Vancouver, B.C., is solicitor for applicants.

A company was incorporated in 1902 by the B.C. Legislature, and subsequently by the Dominion Parliament to construct a line following a similar route. Extensions of time for construction were granted by both Legislature and Parliament. When the application was last made to Parliament for an extension of time for construction, in 1907, the applicants withdrew, and the charter lapsed. The present application does not disclose whether the applicants are in any way connected with the holders of the old charter.

Vancouver and Nicola Valley Ry.—The B.C. Legislature is being asked to revive, ratify and confirm this company's act of incorporation, to extend the time for the commencement of construction, and for expending 10% of the capital, and to give other powers. The company was incorporated by the B.C. Legislature in 1908, with a capital of $5,000,000 and office in Vancouver, to construct and operate a railway from Nicola Lake, along the Nicola River valley to the junction of the Nicola and Coldwater Rivers, and following the Coldwater River to the divide of the Coquihalla River, thence down the Coquihalla Valley to the junction with the Fraser River near Hope, and along the south shore of the Fraser River to the railway bridge, crossing the river at New Westminster and continuing to Vancouver, with power to construct branch lines, bridges, ferries and other works connected with railway operation. The provisional directors named in the act of incorporation were: H. W. Armstrong, J. Hendry, L. N. MacKechnie, R. P. McLennan, F. R. Stewart, and F. H. Lantz, Vancouver, B.C.

Vancouver Island, B.C.—Application is being made to the B.C. Legislature for the incorporation of a company to construct and operate railway lines, from near Robson Bight or Beaver Cove on the east coast westerly across the island, with power to construct and operate all necessary bridges, ferries, wharves, docks, telegraph and telephone lines, steam and other vessels, etc. Taylor, Hume and Innes are solicitors for the applicants.

Vancouver Island and Eastern Ry.—Application is being made to the Dominion Parliament to authorize the company to construct a railway from Seymour Narrows on Vancouver Island northerly to Quatsino Sound, in extension of the line authorized by its act of incorporation, and to apply the provisions of that act to the extension; to continue the act of incorporation, and to extend the time for the construction of the lines authorized. R. C. Lowe, Victoria, B.C.,

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from _____ the Master Mechanic here, that an engineer running between _____ and _____ discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

Vancouver, Westminster and Yukon Ry.—The Dominion Parliament is being asked to extend the time within which the company may construct the various lines authorized. It is also desired to change the route of the authorized line from Squamish Valley to Hazleton or some other point in the Skeena River valley to a route, as follows: from Vancouver or some other convenient point on the shore of Burrard Inlet to New Westminster (such line being in addition to the railway authorized by the act of incorporation), and from New Westminster to the south side of the Fraser River, and thence through the New Westminster district and easterly and northerly through the Yale, Lillooet and Cariboo districts to the branch line from Willow River to Edmonton, authorized by chap. 176 of the statutes of 1906, at or near Tete Jaune Cache; thence north easterly following the railway authorized by chap. 196 of the statutes of 1906, along the south fork of the Fraser River to between Fort George and Fort McLeod; thence to Hazleton or some other point on the Skeena River. The company also asks for power to enter into agreements with other railway companies. (July, pg. 483.)

The Western Canadian Collieries, which was empowered by the Dominion Parliament to take over the properties of the United Gold Fields of British Columbia, owning the Frank and Grassy Mountain Ry., is making considerable extensions to its coal mining plant at the Lille and Bellevue mines, near Frank, Alta. It is also opening a new mine at Blairmore. The shipping plant at the Bellevue mines is also being added to, and for the accommodation of the new facilities a new railway yard is being laid out. There will be 8,000 yards of sidings, and the line at the pit mouth will be double tracked. Two tracks will be laid in the upper yard for empties, and three in the lower yard for loads, giving accommodation for 60 empties and 75 loads. The company is handling 1,200 tons of coal a day, and with the increased facilities will be able to handle 2,000 tons. It is expected that the new handling plant and the increased accommodation in the yards will be ready for use by Jan. 1. (See United Gold Fields of British Columbia, Aug., pg. 577.)

Winnipeg and Northern Ry.—At the last session of the Manitoba Legislature an act was passed extending the time for the commencement of the construction of the line authorised by the act of incorporation, chap. 122 of the statutes of 1906, for one year, and for seven years the time within which the line is to be completed. (April, pg. 251.)

Winnipeg, Salina and Gulf Ry.—United States press reports state that a British syndicate has agreed to finance the construction of this projected railway. The company plans to construct a line from Winnipeg, Man., south to the Gulf of Mexico. The first section to be constructed, it is reported, is from Superior, Wis., via Beloit, Grand Bend, Kan., Woynoka, Okla., and Matheford, Tex., to Wichita Falls, with an extension from Woynoka to Oklahoma city, Okla. Among those interested are F. H. Taylor, G. E. Graves, Philadelphia; and J. W. Wagner, formerly connected with the Milwaukee Southern Rd. The company proposes to open offices at St. Louis, Mo., Kansas City, and Salina, Kan. In 1908 a company with the title of the Winnipeg, Yankton and Gulf Rd. was formed to construct a line over the same route. There have been numerous proposals to construct such a line as projected above, reference to them will be found under the heading of American Midland Ry., Aug., pg. 573, and Sept., 1907, pg. 663.

Pending Legislation Affecting Railways.

The House of Commons gave the first reading, Nov. 16, to three bills introduced by E. A. Lancaster. The first one is for the purpose, as he explained, of making it clear and distinct that it was the intention of Parliament that section 340 of the Railway Act should make absolute the Board of Railway Commission's jurisdiction in regard to certain freight contracts. The section provides that the shipper shall not be bound to accept anything less than his ordinary and actual damages unless he signs a contract which must be approved of by the Commission. The Ontario Court of Appeal held in a case that the shipper was bound by the contract he had signed notwithstanding the fact that it had not received the Commission's sanction. The bill also includes a section providing that where the railway company insists on a higher rate of freight in order to guarantee against full loss, but wants the shipper to take the lower rate and lower liability the company must allow the shipper the choice of paying the higher rate of freight, and being fully protected against loss if he wants to, and not compel him to accept a reduced liability without any option.

The second bill has for its object the limiting of appeals from the Board of Railway Commissioners' decisions. At present, he explained, it was very doubtful if any time limit existed. The bill provides that the Board shall not grant leave to appeal after 30 days from the making of the order; that leave to appeal to the Supreme Court shall not be given unless some doubtful question of law is involved and unless serious loss and injury will result from immediate compliance with the order sought to be appealed from, and that no appeal, even should leave have been granted, should lie if it is not prosecuted within 60 days, that is within 30 days after leave to appeal has been granted.

The third bill deals with the question of level crossings, and was introduced for the purpose of changing the amendment to sec. 238a passed last session. The proposed amendment reads:—"And where the railway has been constructed before the passing of this Act and is permitted by the Board to pass over any highway crossing at rail level, the municipality shall not be ordered to pay any portion of the cost or expense of protecting such crossing unless and except it is othewise provided by agreement, approved by the Board, between the company and the municipal corporation." The Minister of Railways said the proposed amendment was subversive of one of the principles of the Act passed last session.

Great Northern Ry. Lines in Canada

Crow's Nest Southern Ry.—The G.N.R. annual report makes reference to the extension of this line from Fernie to Michel, B.C., 20.98 miles, which was substantially completed by May 1, 1908. The line had not been formally opened for operation when it was seriously damaged by the fire at Fernie, on Aug. 2. The damage was repaired and the line opened Nov. 30, 1908.

New Westminster Southern Ry.—In the G.N.R. annual report reference is made to the opening of the new line between Blaine, Wash., and South Westminster, B.C. The completion of this line, the report says, will permit of the abandonment and removal of the larger portion of the old heavy grade line, the Canadian portion of which is owned by the New Westminster Southern Ry., between the same points. (See also Vancouver, Victoria and Eastern Ry. and Navigation Co.)

Vancouver, Victoria and Eastern Ry. and Navigation Co.—The Dominion Parliament is being asked to pass an act extending the time within which the company may complete its railway and extensions.

The G.N.R. annual report says the extension from Cloverdale to Sumas, B.C., 29.29 miles, has been completed, but is not yet formally opened for traffic. Work on the extension from Keremeos to Princeton, B.C., 41 miles, has been continued during the year. The grading had been completed and 1.5 miles of track laid to June 30. It was expected that the line would be completed to Princeton about Nov. 1. On March 15 the V. V. and E. Ry. and N. Co.'s line from South Westminster, via Olivers, to the International boundary, 21.05 miles, was put in operation. On the same day the new line from Blaine, Wash., to the International boundary, 2.96 miles, was put in operation. This gives a new through line between these points and does away with the New Westminster Southern Ry.'s old line. In connection with the new line from Blaine to the International boundary a new passenger station, custom house and water station was erected at Blaine, and the freight station enlarged. On June 4 the company completed the laying of track on its branch line at Vancouver to Baurrard Inlet. This takes the company's tracks to the shipping district of Vancouver, where it has valuable property which will shortly be developed.

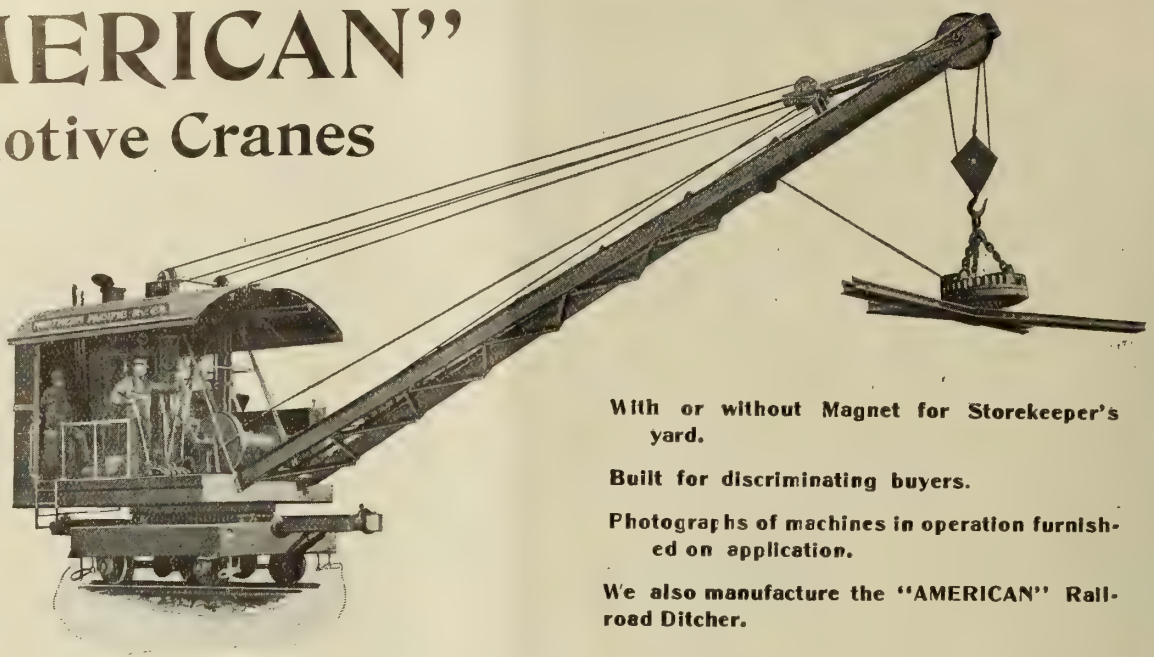
We were advised Nov. 5 that track laying had been completed into Princeton, thus completing this year 45 miles of new track on this line. The tracklaying work for the year was commenced at Keremeos. The company will complete a spur to the V.M. coal mine, 0.75 mile. The surfacing and bridging on the Keremeos-Princeton section was expected to be completed by Nov. 25. No further tracklaying will be gone on with this year. The question of the proposed tunnel from Tulameen to Coquihalla river, 7.49 miles, is still under consideration.

Recent reports from Hedley, B.C., state that the track laying gang had reached close up to Princeton at the end of October, and that ballasting and surfacing was being carried on with all the help available. It was expected that the regular train service would be put on by Dec. 1. The line has been fenced to Hedley; a station building and tank have been completed at Bradshaw, and the wires for the telegraph-telephone line have been strung between Keremeos and Hedley. Survey parties are still at work on the revision survey of a route from Otter Flat to the summit. The question of further construction between Princeton and the coast has not been decided. Chief Engineer Hogeland, of the Great Northern Ry., was in Hedley recently and made an inspection of certain portions of the proposed new route through the Hope Mountains. He made no statement as to when work would be gone on with beyond Princeton, but said that the men would shortly be engaged on new contracts. (Nov., pg. 851.)

The Temiskaming and Northern Ontario Ry. has increased the demurrage charges on freight cars from $1 to $3 a day, and the storage charges on package freight from 5c. to 10c. per package a day.

The British Government, a London, Eng., cable of Nov. 11 states, has decided to grant £135,000 towards the construction of the Collooney and Blacksod Bay Ry. in Ireland. The construction of this piece of line is a part of the project for the establishment of a fast All-Red rail and steamship line round the world, via Canada and Australia.

"AMERICAN"
Locomotive Cranes



With or without Magnet for Storekeeper's yard.

Built for discriminating buyers.

Photographs of machines in operation furnished on application.

ST. PAUL, U.S.A.

CHICAGO NEW YORK PITTSBURG NEW ORLEANS

Sheffield-Johnson Flexible Spout Standpipe installed on the C.P.R. at St. Clet, P.Q.

SHEFFIELD-JOHNSON
—THE—
IDEAL STANDPIPE

It meets with the approval of practical railway men and its popularity is assured. It has a range of flexibility of 5 ft. or over as desired and can be introduced directly into the highest as well as the lowest tender. Nothing could be simpler, more easily operated or more convenient than the type of telescopic spout shown. This, in connection with our horizontal main valve and other special features, makes a combination that is far ahead of all other standpipes on the market.

THE CANADIAN FAIRBANKS CO., LTD.

Fairbanks Standard Scales—Fairbanks-Morse Gas Engines

Montreal Toronto St. John, N.B. Winnipeg Calgary Vancouve

C.P.R. Betterments, Construction, Etc.

An Entrance to Halifax.—The council of the Halifax Board of Trade appointed a committee Nov. 2 to go to Montreal and interview the C.P.R. Executive. They were instructed to ask the company two questions, first if the company wants to come to Halifax, and second on what terms. The committee had a conference with Sir Thos. G. Shaughnessy, President, and D. McNichol, Vice President, Nov. 10. The matter was thoroughly discussed and an arrangement was made for a further conference after the company's officials have looked into the plans in detail. The question has been discussed by the Board of Trade at great length and several plans have been considered. In summarizing the suggestions of the Board, A. Johnson, the President, said after the conference:—"It is calculated that a line from St. John, N.B., to Halifax, 275 miles, could be built without equipment for $20,000 a mile. This would mean $5,500,000. It was reported some time ago the C.P.R. was willing to give $135,000 for running rights over the Intercolonial. Suppose they are willing to give $160,000. Capitalized this would amount to $4,000,000 at 4%, so that the C.P.R. should be willing to contribute $4,000,000 towards the building of this line. The question is, where would the balance, $1,500,000, come from? In my opinion it could be readily raised. Cumberland should give $150,000; Colchester, $150,000, and the Province of Nova Scotia at least $5,000 a mile for 141 miles, which is the distance from Halifax to the New Brunswick line. This would amount to $710,000. Halifax city should give $400,000 and Halifax county $100,000. This would make $1,510,000, which, added to the capitalized $4,000,000, would build a road from St. John to Halifax. The road between Painsec and Amherst could be shortened 12 miles. Sir Sandford Fleming informed me on one occasion that probably the greatest mistake made in locating the I.C.R. was not adopting this route rather than the one via Dorchester. The new road from Amherst to Truro would pass through prosperous country containing coal mines, great lumber interests, and producing large quantities of agricultural products. It, however, would be about as much longer than the present road as, say, the distance saved between Painsec and Amherst, but it would pass through the prosperous Stewiacke Valley and a better route could be secured than the present I.C.R. one."

Place Viger Extension.—The Road Committee of Montreal City Council adjourned the further consideration of the C.P.R. proposal to stop up certain streets in the vicinity of the Place Viger station until the Dec. meeting, in order that D. McNicoll, Vice President, could be present to fully explain matters.

Northern Colonization Ry.—The extension from Nomining to L'Orignal Rapids, Que., now called Duhamel, 35 miles has been completed, and passed by the Department of Railways inspecting engineers. A train service has been placed in operation. It is intended to construct a further extension to a junction with the old Gatineau Valley Colonization Ry. (Ottawa Northern and Western Ry.) now terminating at Maniwaki.

St. Marys and Western Ontario Ry.—The bylaw granting aid for the construction of this railway through Blanshard tp. was resubmitted to the taxpayers Nov. 19. This is the third time it has been voted upon; on the last occasion it was carried by a majority of 76, but owing to some informality it is being submitted a third time at the company's instance and cost.

Fort William Station,—A contract has been let to J. McDiarmid & Co., Winnipeg, for the erection of a station building at Fort William, Ont., to cost about $100,000. It will be of fireproof construction, 50 by 105 ft., three stories high, with a train shed 34 by 167 ft.

New Western Lines.—Application is being made to the Dominion Parliament to extend the time within which the following lines of railway may be constructed:—from Osborne to between Cartwright and Boissevain, Man.; from Otterburn to Stuartburn, Man.; from Killam or some point in tp. 44, ranges 13 and 14 west of the 4th meridian, to Strathcona, Alta., with power to commence in range 12; from Napinka, westerly to a junction with the northwest extension of the Souris branch, with power to terminate at Griffin on the Weyburn-Stoughton branch. Power is also asked to construct the following additional lines:—from tp. 22, range 2, east of the principal meridian northerly and northwesterly for 100 miles, to tp. 34, ranges 5, 6, or 7, west of the principal meridian, and from the Pheasant Hills branch near Asquith, Sask., northerly or northwesterly to tp. 38 or 39, range 10, 11 or 12, about 20 miles.

Brandon, Man.—Estimates have been prepared for the construction of a subway under the C.P.R. and the Brandon, Saskatchewan and Hudson Bay Ry., to cost $120,000, and for a bridge over the same tracks at a cost of $105,000. No decision has been reached as to which will be constructed by the city.

Birtle to Brandon.—Local press reports state that the company is considering the desirability of constructing a line from Birtle, via Hamiota, to Brandon, Man.

Saskatoon to Wetaskiwin.—The first train over the newly completed line connecting up the line running westerly from Saskatoon to a junction with the branch running easterly from Wetaskiwin to Hardisty, was run Oct. 26. W. Whyte, Second Vice President, together with a number of officials and public men were on the train. Mr. Whyte explained that there was yet 40 miles of skeleton work to be completed between Wilkie and Hardisty. This means that the rails have been laid on the dump for this distance, and that the ballasting and surfacing work has to be done. Every effort would be made to have this done before the freeze-up. It would, he added, depend wholly upon the weather whether it would be possible to put on a regular train service this year.

Lacombe Branch.—Tracklaying on the extension of the branch running easterly from Lacombe, Alta., is being proceeded with from Stettler, and it was expected that the extension of 35 miles would be completed by Nov. 30.

Weyburn Westerly.—Track has been laid on the line under construction from Weyburn, Sask., westerly for 30 miles. Two towns—Trossachs, 15 miles out, and Forkard, at the present end of the line—have sprung up. Hon. A. Buchanan recently stated that W. Whyte, Second Vice President, had informed him that it was intended at an early date to start construction at Lethbridge on a line easterly to meet the line coming from Weyburn. Mr. Whyte, at Lethbridge, Oct. 30, stated that no decision had been reached as to the construction of the line easterly from Lethbridge, but the question of its construction would be taken up in Jan., when the construction programme for 1910 was under consideration.

Lethbridge - Macleod Cut - off.—W Whyte, Second Vice President, arrived in Lethbridge, Alta., over the new cut-off, Oct. 30. It was reported to be in good condition although the ballasting has not yet been fully completed.

Carmangay Branch.—The branch line northerly from Lethbridge was expected to be completed into Carmangay, Nov. 30. It was not intended, said W. Whyte, Second Vice President, at Lethbridge, Oct. 30, to continue the construction of this branch any further this year. The work northerly from Carmangay would probably be started in the spring.

Electrification of Boundary Lines.—G. J. Bury, General Manager Western Lines, Grant Hall, Superintendent of Motive Power, Western Lines, and F. F. Busteed, General Superintendent Pacific Division, recently completed an inspection of the lines in the Boundary District. It was stated that the object of their inspection had to do with the proposal to adopt electricity as a motive power. The sugestion is that the power will be obtained from the West Kootenay Power and Light Co., and that the line upon which the experimental work will be done will be that extending from Phoenix to the Granby smelter.

Hotel at Nelson, B.C.—Plans are reported to be in preparation for the construction of a tourist hotel at Nelson, B.C.

Hartford Junction to Wellington Camp.—A contract is reported to have been let to W. P. Tierney & Co., for the construction of a spur line from Hartford Junction to the Athelston and Jackpot mines of the Wellington camp. G. Tierney, one of the contractors, said the route is a very rough one, but he expected that the three mile stretch to the two mines would be completed by Feb. 1, 1910. There are a number of mines further on, and when necessary the spur will be extended to them, ultimately becoming a branch line of about 20 miles.

Esquimalt and Nanaimo Ry.—R. Marpole, Vice President, recently completed a trip of inspection over the line under construction from Nanaimo to Alberni. He stated that it was expected to have the extension completed and in operation by the spring of 1911. But for the heavy gradients which prevail in the Cameron Lake district the work could be completed at an earlier date. All the surveys had been completed for the Cowichan branch, but it had not been decided when work would be started on it. The company's operations in clearing land were being pushed, and it was expected to have 800 acres in the neighborhood of French Creek and Parksville ready for occupation in the spring, when the first batch of 12 families were to arrive for settlement.

The contractors for the last 27.5 miles of the line into Alberni have let a number of sub-contracts and work is being gone on with at various points between Cameron Lake and New Alberni. Track laying is being proceeded with from the Nanaimo end, and the material for the steel bridge work is being brought in.

Location surveys for the projected line to the north end of Vancouver Island are in progress, the work for the section of the line from Parksville to Union Bay having been completed. The remaining sections under survey are from Union Bay to Campbell River, and thence to the north coast of the Island.

An unconfirmed press report says the C.P.R. will in the near future operate its trains between Montreal Jct. and Windsor St. station, Montreal, by electric locomotives.

The Court of Appeal gave judgment recently in the cross suits of the C.P.R. and the city of Montreal, in which the latter claims $8,888.08 for assessments and taxes, and the former claims $9,422.50 for land taken by the city. The decision gives the city $8,711.97, with certain interest and costs, and the C.P.R. appeal from the decision of the Superior Court was dismissed.

Canadian Car and Foundry Co., Ltd.

This company was incorporated recently under the Dominion Companies Act with the following capitalization:—Six per cent. bonds, redeemable in 30 years with sinking fund of 2% per year and interest on bonds redeemed beginning on July 1, 1911, authorized and issued, $3,500,000; preference stock, 7% cumulative, authorized $7,500,000, issued $5,000,000; ordinary stock, authorized $5,000,000, issued $3,500,000. The preference stock is preferred as to dividends and assets, participating equally with the ordinary shares in all dividends after payment of a 7% dividend on the ordinary shares. The prospectus states that the company was incorporated for the purpose of acquiring the properties and business, or capital stock of the following companies, all free from debt and unencumbered:—Rhodes-Curry Co., Ltd., Dominion Car & Foundry Co., Ltd., Canada Car Co., Ltd.

N. Curry, who becomes President of the new company, states as follows:—"The Dominion Car and Foundry Co. is located at Blue Bonnets, Montreal. Its works were erected less than three years ago; buildings constructed of reinforced concrete and steel, equipped with the most up-to-date machinery for the construction of steel cars, also for the manufacture of bolsters, brake beams and other railway specialties; these specialties being standard on all Canadian railways. The Canada Car Co. is located about a mile from the Dominion Car and Foundry Co. This plant was erected less than five years ago; construction similar to the Dominion Car and Foundry Co.; equipped with the most up-to-date machinery for the manufacture of wood passenger and freight cars, including wheel foundry, grey iron foundry, forging shops, machine shops, etc. The Rhodes-Curry Co. is located at Amherst, N.S., the geographical centre of the Maritime Provinces. This plant started the manufacture of cars in a small way 17 years ago, but has grown to be a large concern. It is equipped for the manufacture of wood, passenger and freight cars with a wheel foundry, grey iron foundry, forging and machine shops, etc.; also rolling mills, malleable iron foundry and axle shop. This company also owns 20,000 acres of timber lands, and operates saw mills and planing mills with branches at Halifax and Sydney. The Dominion Car and Foundry Co. has a capacity of 30 steel freight cars a day, and also for the manufacture of bolsters, brake beams and other specialties for 100 cars a day manufactured under valuable patents. The Canada Car Co. has a capacity for the manufacture of 100 passenger cars a year, and 25 freight cars a day. The Rhodes-Curry Co. has a capacity for the manufacture of 60 passenger cars a year and 20 freight cars a day. Rolling mill capacity, 80 tons a day of bar iron and steel. Axle shop capacity, 200 axles a day. Malleable iron foundry capacity, 20 tons of finished malleable castings a day. The present capacity of these combined works is sufficient to take care of the requirements of the railways for several years to come, but it is the intention of the management to add to the capacity of the works when necessary to keep pace with the demands of the railways for additional rolling stock. It is the general policy of railways in Canada to buy all new rolling stock, doing repairs only in their own shops. The combined capacity of all other car companies in Canada is probably not over 10 cars a day. The net earnings of these three companies for the past two years have averaged $1,000,000 per year. This period has been a very dull one for car builders, and business was obtained under keen competition, with plants running at only half capacity. The savings in buying, selling, freight, administration and manufacture with these three concerns combined should add at least 40% to the net earnings without charging any more for the output. Car builders in Canada are protected from foreign competition by a duty of 30% on rolling stock and parts thereof. In my opinion the replacement value of these properties is over $7,500,000."

Accountants and auditors certify that the net earnings of Rhodes-Curry Co., the Canada Car Co., and the Dominion Car & Foundry Co., after making adequate provisions for depreciation and after paying all interest charges were as follows: 1907-8, $1,091,037.23; 1908-9, $962,456.33 The prospectus adds that on this basis of earnings, after paying bond interest and preferred dividends, the surplus would amount to over 11% upon the Canadian Car and Foundry Co.'s common stock. It is estimated that, as a result of this consolidation and the present improvement in trade, the earnings for next year will amount to at least $1,500,000. The net liquid assets of the combined companies are certified as $2,880,115.02. Prior to the transfer of its assets the Dominion Car and Foundry Co. will pay a dividend to its shareholders, and subsequent to the transfer of the Canada Car Co.'s assets a further payment will be made to its shareholders, both such payments amounting to $651,090. After making these payments the Canadian Car and Foundry Co.'s net liquid assets will be $2,229,025.02.

The directors of the Canadian Car & Foundry Co. are as follows:—President, N. Curry, heretofore President Rhodes-Curry Co.; VicePresident, W. W. Butler, heretofore Vice President Dominion Car & Foundry Co.; Second Vice President, N. S. Reeder, heretofore General Manager Canada Car Co.; W. M. Aitken, G. E. Drummond, T. J. Drummond, H. S. Holt, J. Redmond, Montreal; I. H. Benn, London, Eng. Mr. Curry will remove from Amherst, N.S., to Montreal, where the company's head office will be located. Mr. Butler, who has spent most of his time in Montreal for the past few years, will continue to reside there, and will have charge of sales. Mr. Reeder will have charge of manufacturing. Other officers have been selected as follows:—Secretary-Treasurer, F. A. Skelton, heretofore Secretary-Treasurer Canada Car Co.; Purchasing Agent, A. H. Chave, heretofore Secretary-Treasurer Dominion Car & Foundry Co. The superintendents of the various plants are:—Canada Car Co., S. King; Dominion Car & Foundry Co., F. Ditchfield; Rhodes-Curry & Co., — McCollum.

W. W. Butler, in a recent interview, said:—"The consolidation of these car plants makes the business more self-contained, as before the consolidation each plant was more or less handicapped by reason of certain features of manufacture contained in the other plants that were not contained in the individual plants. For instance, the Rhodes Curry plant at Amherst has a rolling mill, axle forge and malleable iron plant, which the Canada Car plant at Turcot and the Dominion Car and Foundry plant at Blue Bonnets have not had, but which they will now have the benefit of. The Dominion Car and Foundry plant has also been handicapped by reason of not having its own grey iron foundry and wheel foundry. Both the Canada Car and the Rhodes Curry plants have grey iron foundries and wheel foundries sufficient to take care of the capacity of the combined plants, as well as having a surplus capacity of wheel manufacturing for outside customers. We have in mind the building of an open-hearth cast steel plant on our property at Blue Bonnets, which will make our plants still more self-contained, and will enable us to manufacture our couplers, truck frames,

G.T.R. Betterments, Construction, Etc.

Kingston, Smiths Falls and Ottawa Ry.—Application is being made to the Dominion Parliament for an act extending the time within which the company may commence and complete the railway it was authorized to construct by its act of incorporation, chap. 88 of the statutes of 1887 and amending acts.

Toronto Terminals.—C. M. Hays, Second Vice President and General Manager, accompanied by a number of officers, visited Toronto, Nov. 1, and made an inspection of the terminals. It is said that as a result it has been decided to remove all the shops in the yard between John and Bathurst Streets as early as possible. When these buildings are removed all the locomotives will be housed at Mimico, only two being kept at Toronto, one for making up passenger trains, and the other for shunting freight cars in and out of the John St. freight yard.

Port Credit Yards.—The company has purchased several acres of land south of its present tracks at Port Credit station for yard extensions. Surveys have been made for laying out several new tracks, and it is expected that grading operations will shortly be started.

Brantford Improvements.—U. E. Gillen, Superintendent Middle Division, was in Brantford, Ont., Nov. 3, in connection with the laying out of the station park, and the construction of the proposed subway at Market St. The park work he said would be completed in the spring, and plans would be prepared for the subway and submitted to the city council. The subway would do away with the Market St. level crossing, and he pointed out to the council that under the act passed last year the Dominion Government would contribute towards the cost.

Guelph, Ont.—Vice President Fitzhugh told the chairman of the Railways Committee of the Guelph City Council, Nov. 12, that the construction of the overhead bridge over the company's lines at Metclafe St. would be taken in hand at once, and pushed forward to completion.

Electrification of Lines.—At a meeting of the Berlin Board of Trade, Nov. 12, the railway committee was instructed to enter into negotiations with the G.T.R. regarding the electrifying of its Galt and Elmira branches.

London Improvements.—The Chief Railway Commissioner wrote to the Mayor of London, Ont., Nov. 12, asking as to the present condition of the negotiations between the city and the G.T.R. for an elevation of the tracks in the city. The Mayor informed the council that it would not obtain such favorable terms as were offered in 1906, when it declined to entertain the company's offer. He understood that the company was not at all unwilling that the matter should go before the Commissioners. (Nov., pg. 811.)

The Canadian Railway Club held its regular monthly meeting at Montreal, Nov. 2, when a paper was read on Maintenance Regulation Cars, by R. W. Burnett, General Master Car Builder C.P.R.

During Sept., 16 employes were killed and 11 injured, in the course of their work on Canadian railways. Of the fatalities, six were due to being run over, four to falls, two to a derailment and one each to being struck by an object when passing, to being caught between cars, to falling material and to machinery; while of the other accidents, three were due to falls, two each to being run over and to falling material, and one each to a collision, to machinery, to an explosion of dynamite and to being caught between cars.

N. CURRY, President

National Transcontinental Railway.

Quebec Bridge.—Tenders were received to Nov. 15 for the removal of the wreckage of the Quebec Bridge on the anchor arm, and on that portion of the cantilever arm down to low water mark. The Minister of Railways also received tenders to Nov. 30 for the building of the substructure of the Quebec Bridge. The general specifications and forms of tender were given out by the Quebec Bridge Board of Engineers. Contractors putting in tenders had to deposit an accepted bank cheque for $120,000. The work to be done under this contract will include the removal of one of the piers on the north side of the river, and to replace it by one going down to the solid rock 25 ft. below the gravel bed on which the present pier rests. The pier on the Levis side of the river will be enlarged.

As to the superstructure it is said that the Board of Engineers has reported that the question of whether or not the new bridge shall be of the suspension or cantilever type is simply a matter of cost, both plans being feasible.

Quebec Union Station.—A suggestion has been made that the site of the Quebec union station should be in close vicinity to the Point-a-Carcey wharf instead of the Champlain market site, previously decided upon.

Moncton to Winnipeg Line.—The Minister of Railways in reply to questions in the House of Commons, Nov. 18, said the amount of money expended to date by the N.T.R. Commissioners, exclusive of sums paid to contractors having construction of roadbed under contract, was $18,118,133.58. The contract for the construction of the section of the line from Winnipeg to Lake Superior Junction was let to J. D. McArthur, Winnipeg, and the contract signed May 15, 1906. The estimated cost of the construction at contract prices was $13,000,000. All the work on the section is not finished, but track has been laid and trains have been run; the contractor expects to have the work all completed and to hand it over to the Commission in the spring. The first train went over the section Nov. 6, and among the freight hauled was 10 cars of grain. The Minister also gave particulars showing the date of letting of contracts and the date of completion as fixed in the contracts of 11 sections of line between Superior Jct. and Quebec. The time limit for three of these sections had expired before the work contracted for was completed. Upon the others the time limit expires on Sept. 1, 1910, in four instances, and on Dec. 31, 1910, in the remaining four instances.

The first train went over the newly completed section of the line from Winnipeg to Superior Junction, Nov. 6, and on Nov. 9 Commissioner Young reported that he had travelled over the line at the rate of 20 miles an hour. The traffic is being handled by the contractor, but it is said that arrangements will be made for a regular service to be operated throughout the winter. The line will not be transferred to the G. T. Pacific for operation until the spring.

GRAND TRUNK PACIFIC RAILWAY.

The Governor General in his speech at the opening of Parliament said the Western Division of the N. T. Ry. has been extended 66 miles beyond Edmonton, completing 861 miles west of Winnipeg. Contracts have been let for 399 miles in the Mountain Division, and good progress has been made on this work.

In an interview at Fort William, Ont., Nov. 12, E. J. Chamberlin, Vice President, said:—"The work of laying out the yards at the Fort William terminals will be commenced as soon in the spring as the weather will permit. As soon as the elevator men get out of the way the work will be gone on with. The conditions for the yard work are very favorable, as there will be practically little or no filling to do. The yards will have a capacity for 1,500 cars and will be ready for the fall traffic of 1910."

The work of fencing the line from Winnipeg westerly has been completed to Wainwright, Alta., and the work is being proceeded with as fast as possible. E. J. Chamberlin, Vice President, stated Nov. 4 that the work could not be completed this year and that it would be some time in the spring before a regular train service could be operated between Wainwright and Edmonton, as the regulations of the Board of Railway Commissioners had forbidden the running of through trains until lines were properly fenced.

It was expected that the erection of the steel superstructure of the bridge across the Pembina River, west of Edmonton, Alta., would be completed Nov. 30. Beyond this point about 70 miles of grading has been completed to the MacLeod River, and the substructures for a bridge are being built. As soon as the track is laid from the Pembina River crossing to the MacLeod River crossing, the steel work for this latter bridge will be got in. It is expected that the erection of this bridge will be started early in the spring.

Work has been started on the second section at the Prince Rupert end of the line, viz., from Kitsilas canyon to Aldermere, about 140 miles. G. A. McNicholl, Purchasing Agent, on his recent return to Vancouver, from Prince Rupert, stated that tenders would be asked for the supply of ties for this section at an early date.

A report from Prince Rupert, Nov. 1, gives a list of the construction camps at various points on the second 100 miles easterly from the ocean terminus. The subcontractors with the mileage where their work commences are as follows:—McDougall & Rankin, 102; D. A. Rankin, 112; M. Sheedy, 122; Moran & Chiene, 124; A. L. McHugh, 138; P. Salvus, 142; Bostrum & Kullander, 145; Sheedy & Paget, 155; Dan Stewart, 159; Norman McLeod, 162; Freebery & Stone, 8-172; Foley, Welch & Stewart, 5-175; Duncan Ross, 3-178.

The Dominion Parliament is being asked to authorize the Grand Trunk Pacific Branch Lines Co. to construct the following additional lines:—from near Watrous, Sask., to near Calgary, or to the line authorized to be constructed from some point on the line between the 111th and 113th degrees of longitude to Calgary; from the proposed line mentioned above within ranges 4, 5 or 6, west of the third meridian, southeasterly and easterly to Regina, Sask.; and from the first mentioned line within ranges 21, 22, 23, or 24, west of the third meridian, northerly or northeasterly to Biggar, Sask.

W. P. Hinton, General Passenger Agent, who returned to Winnipeg, Nov. 5, from a trip of inspection over the G.T.P.R. lines, said he found the branch from Melville to Balcarres in good shape. Track had been laid for 30 miles southerly from Melville, and grading had been practically completed to within 50 miles of Regina. It was intended to construct a bridge across the Qu'Appelle valley next summer, and it was hoped to have the line completed into Regina by the end of 1910. A report from Melville states that owing to the scarcity of labor the track laying plant has been idle for considerably over a month. The final surveys for the location of the branch are reported to be in progress between Qu'Appelle and Regina. Track has been laid northerly from Melville to Yorkton, and grading is in progress from that point towards Pas Mission. Surveys are in progress southerly from Regina to the International boundary at Portal.

Vice President and General Manager Chamberlin has written to the President of the Board of Trade, Saskatoon, with respect to the company's plans. Local reports state that a temporary agreement has been made with the Canadian Northern Ry. under which G.T.P.R. trains will enter Saskatoon over C.N.R. tracks.

Surveys are being made for a line from Watrous to Prince Albert, about 100 miles. The line would be an almost direct one, and would cross the south branch of the Saskatchewan River, about 18 miles from Prince Albert.

The Pacific Pass Coal Co. is developing coal areas on the Little Pembina River, 180 miles west of Edmonton. The coal fields of the district have been reported on by a mining engineer from Pennsylvania, to the G.T.P. Ry. management, which is considering the construction of a branch line, about 60 miles, to reach them.

C. C. Van Arsdol was in Kamloops, B.C., Nov. 5, to meet the engineers who have been making surveys for the projected line from west of the Yellowhead Pass to Vancouver. As a result of the conference it is reported locally that there is a probability of the location paralleling the Canadian Northern Ry. survey being abandoned in favor of a route via Nicola and the Hope Mountains. Another report states that there is a probability of adopting a line down the main Thompson River to Lytton, thence ascending the Fraser River to Lillooet, where a level country would provide access via Seatin and Anderson Lakes to Pemberton Meadows. From this point the company would have the choice of three routes into Vancouver, namely, via the Squamish and Howe Sound into Vancouver; Pemberton meadows via the low divide to Harrison Lake, and thence down the Fraser River to Vancouver; or via Pemberton Meadows and Slave River.

A Turbine Locomotive.

A press report says that the North British Locomotive Co. has under construction in Glasgow an electric locomotive on a self-contained principle—that is to say, it will generate its own motive power as it travels and be altogether independent of such familiar and cumbrous adjuncts as rail slots, storage batteries, or charged cables. This arrangement has been made possible by an ingenious application of the steam turbine to the work of generating electric energy while in motion. Steam will be got in the ordinary way from a copper-tubed boiler, but after doing its work in the turbines it will be condensed and pass direct again to the boiler instead of up the funnel. A great reduction in the coal bill will be the result. The turbine will work at a speed of 3,000 revolutions, and be directly coupled to a dynamo which will supply the electric energy. The engine is intended for express passenger main line work, and comparisons of its actual working alongside locomotives with ordinary reciprocating engines will be made.

The Quebec Transportation Club held its annual euchre party and dance, at the Kent House, Montmorency, Que., Nov. 9, to wind up the summer season.

A cable from London, Eng., Nov. 19, announces the incorporation in Paris, France, of the Canadian Coal Consolidated with a capital of £400,000. The details are not given, but French capital is invested in a number of coal properties in the vicinity of Frank and Blairmore, Alta., in connection with which there are charter powers to construct and operate railways.

Canadian Northern Ry. Construction, Etc.

Canadian Northern Quebec Ry.—The question of the reconstruction of the elevator at Quebec has been under consideration, and it is said that it has been definitely decided not to utilize the site of the burned structure. A proposition is under consideration to utilize a site at Cap Rouge, in connection with the laying out of the company's proposed new yards. The suggestion is that the elevator be constructed on the brow of the promontory with the loading spouts inclined toward the cove, which would be dredged so as to accommodate steamers of large tonnage. The question of the yards at Quebec is also under consideration, the general idea being to centralize the Quebec yards and freight stations at Cap Rouge.

In connection with the recent construction of a branch from the main line through Limoilou to the Montmorency River, the Board of Railway Commissioners, Nov. 10, ordered the demolition of seven miles of grading on the ground that work had been started without the Board's consent. The municipality of Beauport objected to some road crossings and brought the matter to the Board's attention.

Canadian Northern Ontario Ry.—The extension of the line from the C.N.Q.R. at Hawkesbury into Ottawa has been completed and it was announced that it would be opened for traffic Nov. 28. The completion of the line was considerably delayed on account of the difficulty of securing an entrance into Ottawa. All the questions involved in this matter have not been settled, but temporary terminal facilities have been arranged for. On Nov. 1, when the company's application for the approval of a route within the city came before the Board of Railway Commissioners, in the form of an agreement with the city council, it was refused owing to it involving a level crossing.

The construction of the section of the Toronto-Ottawa line, which is under contract, viz., from the Don Valley near Toronto to Trenton, Ont., is being proceeded with. Several subcontracts have been let, and work has been started at various points. The general contractor, Angus Sinclair, is getting his plant on the ground. A new steam shovel has been placed on the work.

The town of Orillia, Ont., has sold a portion of Lakeside park to the C.P.R., in order that it may construct a spur line from Atherley to Orillia, over which the Canadian Northern Ry. will get into the town. The Board of Railway Commissioners recently made an order directing the C.P.R. to construct this spur.

Canadian Northern Ry.—M. H. McLeod, General Manager and Chief Engineer, was in Port Arthur, Ont., Nov. 3, inspecting the terminal facilities, with a view to deciding on the extensions necessary. It is said that a new roundhouse to accommodate 40 locomotives, with the necessary repair shops, and storehouses will be started in the spring. The coal hoisting plant now in the yards is also stated to be inadequate to meet the present requirements.

The relaying of the track between Port Arthur, Ont., and Winnipeg with new and heavier steel has practically been completed. On Nov. 1, Superintendent Murphy (who has since resigned) made a trip of inspection over the line, and on his return to Port Arthur, stated that there was only the 15 miles between Banning and four miles west of Laseine to be relaid.

A contract has been let at Port Arthur for 350,000 ties for delivery at various points on the line.

The question of the construction of a subway at Pembina Ave., Winnipeg, is still delayed owing to the action of one of the property owners. The C.N.R. is ready to proceed with construction, but as an agreement cannot be made with this one property owner expropriation proceedings will have to be resorted to. General Manager McLeod informed the council, Nov. 10, that the company would let the contract for the subway as soon as it got possession of the Blackwood property. The company has done some work in the way of raising tracks and putting in a temporary crossing from Jessie Ave., east of Pembina Ave., to the track.

Application is being made to the Board of Railway Commissioners for a recommendation to the Governor in council to sanction an agreement amalgamating the Northern Extension Ry. with the C. N. Ry. The N. E. Ry. was incorporated by the Manitoba Legislature in 1904 to construct a line from Oakland northerly and westerly to the boundary of the province, with branch lines.

The Shell River branch, extending from Prince Albert to Shellbrook, Sask., is expected to be completed early in Dec. The bridge building gang started out from Prince Albert, Oct. 28, to construct the bridges, the largest of which is that over the Shell River.

Some difficulty is being experienced in the construction of the branch from Vegreville southerly to Camrose, Alta., with reference to the right of way through the Stettler townsite. The branch in this town site will cross the branch of the C.P.R. running easterly from Lacombe. The C.P.R. practically holds all the land which would be necessary to effect the crossing and it is said to be holding it at a high figure. A press report states that Stettler residents have offered to provide $12,000 for the land required by the C.N.R.

The tracklaying gang on the branch being constructed southwesterly from Maryfield, Sask., reached Carlyle, Oct. 28. A diamond crossing was put in at the C.P.R., and tracklaying is being proceeded with in the direction of Bienfait. This branch is to be extended to Lethbridge, Alta., which place it is expected to reach by the end of 1910.

The extension known as the Goose Lake branch is now in operation from Saskatoon to Rosetown, 72 miles. Grading has been completed for 126 miles further and several miles of track have been laid.

A press report states that the company is arranging for the starting of surveys from the line near the MacLeod River, southerly to the coal fields in the Brazeau valley, about 150 miles west of Edmonton.

Application is being made to the Dominion Parliament for an act authorizing the amalagamation of the Edmonton and Slave Lake Ry. Co. with the C.N.R. Co. and the extension of time for the completion of its railway from Edmonton to the Peace River.

D. D. Mann recently told a deputation from Kamloops, B.C., that the company's line would follow the north side of the Thompson River, and that a branch line would be constructed from Kamloops southerly concurrently with the construction of the line to New Westminster. Construction would be started in the spring, and would be proceeded with in both directions from Kamloops. Surveys for the line are being proceeded with in the Chilliwack valley. The route being followed enters the valley at Popcum, runs along the eastern side of the valley to Vedder Crossing, and thence parallels the B.C. Electric Ry. line to Abbotsford.

The agreement between the company and the B.C. Government, which requires ratification by the Legislature, provides for the construction of a railway to connect the C.N.R. main line through the province from the Yellow Head pass to the city of Vancouver, via the North Thompson River to Kamloops, thence down the South Thompson and Fraser Rivers to New Westminster, to Vancouver and to English Bluff, south of the Fraser River, the total distance not to exceed 500 miles; to establish a first-class passenger, mail, express and carrying service between English Bluff and Victoria; to construct a railway from Victoria to Barclay Sound, about 100 miles; construction work to be started within three months after the agreement has been ratified, and to be completed within four years thereafter. The Province agrees to guarantee the company's bonds to the amount of $35,000 a mile together with interest at 4%; to exempt the railway from taxation for 10 years after completion, and to give free right of way, free timber and gravel for construction purposes out of Provincial lands. The Province will hold a mortgage of the line within the province, and the general guarantee of the C.N.R. to indemnify as security for its guarantee.

A Vancouver, B.C., press report states that Mackenzie, Mann & Co., Ltd., have acquired the charter rights of the Portland Canal Short Line Ry. Co. T. F. Hopkins, Seattle, Wash., one of the provisional directors of the company, is quoted as having made the statement. The company was incorporated by the British Columbia Legislature last session, and was given power to construct a line from the head of Portland Canal along Bear River, 30 miles, and also up American Creek, with power to construct branch lines not exceeding 10 miles in length. Mr. Hopkins further stated that the new owners of the charter would start on the construction of the first 20 miles of the line in the spring. (Nov., pg. 839.)

Belleville and North Hastings Railway.

Replying to questions in the House of Commons, Nov. 16, the Minister of Railways stated it was hoped that the provisions of chap. 61 of the statutes of 1907-08, as amended by chap. 32, sec. 1, of the statutes of 1908-09, would provide an efficient remedy in preventing a recurrence of any such a grievance as complained of by W. B. Northrup, M.P., viz., the non-operation of the old Belleville and North Hastings Ry. branch from Madoc to Eldorado, Ont., by the G.T.R. To meet this and similar cases Mr. Northrup introduced a bill which was read a first time Nov. 16. He explained that under the existing law, if a contract is entered into between a municipality and a railway, and the railway receives subsidies under the contract but afterwards breaks the obligation entered into, the municipality can apply to the Board of Railway Commissioners and obtain relief. But as the law stands, if the railway which has received the benefit happens to have sold out to another railway, which then has the property and enjoys that benefit, there is no relief to be obtained through the Board, because it has no jurisdiction in relation to the matter over the company that did not make the contract. The object of the bill is to place it in the Board's power to consider such questions either at the instance of the railway, the Crown, the corporation or an individual.

M. Tatterinsky, who it is stated is the leader of a gang, who have been making bogus claims for personal injuries against several transportation companies, a number of which gang were recently sentenced to various terms in the penitentiary, has been committed for trial on charges of fraud and conspiracy against the C.P.R. and G.T.R. at Montreal

Railway Commissioners' Traffic Orders.

Summaries of other traffic orders are given on another page under "Orders by Railway Commissioners":—

G.T.R. SWITCHING AT HESPELER, ONT.

8631. Nov. 10.—The order 6531, March 17, 1909, directing the G.T.R. to construct, maintain and operate a spur line of railway from its main line to Christie, Henderson & Co.'s premises between Hespeler and Guelph, Ont.; and order 6734, March 26, 1909, amending said order by adding a clause authorizing the railway company to collect such additional sum for switching and handling traffic to and from the spur line as shall be agreed upon between the parties, or, in the event of their failure to agree, as shall be fixed by the Board; and in the matter of the application of the G.T.R. for an order fixing the rate to be charged for such service; upon the hearing of the application in the presence of counsel for the G.T.R. and Christie, Henderson & Co., and upon its appearing that it has, for a number of years been the G.T.R.'s custom to perform such switching services without making an extra charge, it is ordered that, notwithstanding order No. 6734, the G.T.R. is not, and shall not be, entitled to make any extra charge for the switching performed by it at the said spur.

INTERCHANGE SWITCH AT BRAMPTON.

8636. Nov. 11.—Re application of town of Brampton, under sec. 228 of the Railway Act, for an order directing the G.T.R. and the C.P.R. to provide and construct a suitable interchange switch at the intersection of the two companies' lines at Brampton, upon hearing the application at the Board's sittings in Toronto, Oct. 16, 1909, in presence of counsel for the applicant, the railway companies, and interested shippers, the evidence adduced, and what was alleged by counsel, and upon the report and recommendation of the Board's traffic officers, it is ordered that the railway companies provide and construct a suitable interchange switch in Brampton; the companies to agree, if possible, upon the location and building of the connection, and if such an agreement is arrived at, to prepare and file a plan showing the track so agreed upon, for the approval by an engineer of the Board. If unable to agree, each company to file a plan showing its own proposal, and the Board will decide between the two, or try and locate a satisfactory connection. The railway companies to agree, also, upon the division of cost of the construction. In the event of their failure to so agree, the Board will apportion the cost. And it is further ordered that the plan agreed upon, or the plans of each as the case may be, be filed within 30 days from the date of the order; the Board at the same time to be advised of the agreement, or otherwise, of the division of cost, as the case may be; the said connection to be completed within 30 days after the location has been agreed upon or approved by the Board.

GREAT NORTHERN RY. SHINGLE RATES.

8683. Nov. 4.—Re complaint of Kootenay Shingle Co., Salmo, B.C., that the Great Northern Ry. has departed from tariffs fixed by Board with respect to rates, weights and shortage on shipments of shingles originating at Salmo and consigned to points in British Columbia, Alberta and Ontario; the complaint having been heard at Nelson on Nov. 4, the complainant company being represented by its manager and the Great Northern by Messrs. Kistler and Fortier, and upon the report of the Board's Traffic Officer, it is declared that on shipments from Salmo to Toronto and intermediate main line points in Ontario the legal rate was that of 67½c., as provided in Tariff C.R.C. A6, effective Sept. 15, 1906, and that the railway company be authorized to refund to the complainants on the basis of the 67½c. rate. That, in respect of shipments from Salmo to Ontario points, other than main line points, intermediate to Toronto, the rates complained of are in violation of the Railway Act in that a joint tariff has not been filed with the Board as required by sec. 335 of the Act. That the complaints respecting the allowance of 500 lbs. per car on shipments prior to Jan. 24, 1907, when Great Northern supplement 82 to C.R.C. 84 became effective, be dismissed. That the complaints in respect of weights on shipments from Salmo to Lethbridge be dismissed. That the rates charged by the Great Northern from Salmo to Fernie and to Lethbridge, being in accordance with the rates filed under tariff C.R.C. A70, the complaints in respect of departure from the legal rates from Salmo to the above mentioned points be dismissed.

Irondale, Bancroft and Ottawa Ry.

The I. B. and O. Ry., which starts from the G.T.R. Haliburton branch, at Kinmount Junction, and runs generally northerly and westerly for 50 miles to Bird's Creek, near Bancroft, has been acquired by Mackenzie, Mann & Co., in connection with the Canadian Northern Ontario Ry. The I.B. & O.R. Co. was incorporated in 1880 for the development of the northerly portions of Peterborough and Hastings counties. It was first operated to Irondale, nine miles from the junction with the G.T.R., in 1887, and by the construction of a few miles one year and a few miles again, Bird's Creek was reached in 1906. The gradients and curvature are considerable. The steepest gradient has a rise of 60 ft. to the mile, and the sharpest curve a radius of 1,000 ft. The track is laid with 56 lb. steel, and there are 2,640 ties to the mile. There are 2.50 miles of sidings. The company had power under its original charter to construct its line easterly across the G.T.R. to the Georgian Bay, and under the last amending act the Ontario Legislature granted a subsidy for the construction of the line easterly to Renfrew, a special condition being attached to the effect that the terminus of the line must be in Renfrew.

The line has never been a profitable one, although it has been of service in opening up a section of central Ontario and bringing it into connection with the G.T.R. The I. B. and O. Ry. bonds were held principally in New York, although Z. A. Lash, General Counsel for Mackenzie, Mann & Co., was largely interested. The I.B. and O.R. has outstanding $53,500 of common stock and $450,000 of bonds. It received $144,000 as aid from the Dominion Government, and $135,000 from the Ontario Government, and there is still available $180,000 of subsidies granted by the Ontario Legislature. The operation of the line for the year ended June 30, 1908, showed a loss of $3,329.

The acquisition of this line gives Mackenzie, Mann & Co. a charter from the vicinity of Ottawa to the Georgian Bay in the vicinity of Tiffin, Midland and Victoria Harbor, at which points the G.T.R. and the C.P.R. are developing ports for handling the grain traffic. The C.N.O.R. has power to construct a line from Udney into Orillia. L. B. Howland was President and General Manager of the I.B. & O.R. succeeding to that office some years ago on the death of his father-in-law, C. J. Pusey, the original promoter of the line. The offices of the company were at Irondale, Ont.

It is said that the line will be reconstructed and extended westerly to Georgian Bay and easterly to Renfrew and Ottawa. In this connection application has been made to the Dominion Parliament for an act to incorporate a company with the title of the Ontario and Ottawa Ry., with power to construct lines from the authorized line of the C.N.O. Ry. near Lake Couchiching generally easterly to the Snowdon tp.; and from near Bird's Creek or Bancroft, in Hastings county, generally easterly to or near Renfrew, thence crossing the Ottawa River generally southeasterly to Hull, Que., or recrossing the Ottawa River to Ottawa. Power is also asked to fix the amount of securities to be issued with respect to such lines, to authorize the amalgamation with other companies, acquire capital stock of other companies with which it may be authorized to amalgamate, and to consolidate the securities issued by other companies, with all the other usual and customary powers. G. F. Macdonnell, Toronto, one of the Canadian Northern Ry.'s Assistant Solicitors, is solicitor for the applicants. The points mentioned in this application are those necessary to connect up the I. B. and O. Ry. with the C.N.O. Ry. near Orillia, on the west, and the connecting link from Bird's Creek to Ottawa on the east. The I. B. and O. Ry. only had an Ontario charter. The concluding sentence of the application is in almost identical words with the C.N.O. Ry. application for power to amalgamate with other companies.

Intercolonial Ry. Branch Lines.

The Governor General in his speech at the opening of the Dominion Parliament, Nov. 10, said:—"In order to improve the facilities already afforded the public by the Government railways, and to enhance their value as part of the great transportation system of Canada, a bill will be submitted to you for the purpose of enabling the Minister of Railways, on the recommendation of the Government Railways Managing Board, and subject to the approval of Parliament, to lease any line or lines connecting with the Intercolonial Ry."

Hon. H. R. Emmerson, M.P., ex-Minister of Railways, has given notice that he will move the following reslution in the Commons:—"That in the opinion of this House it is desirable in furtherance of the transportation interests of this Dominion, that the sphere of influence of the Intercolonial Ry. as a Government operated railway should be widened and extended by securing by lease or otherwise such of the branch lines of railway now connecting the Intercolonial as will serve as direct and profitable feeders to the traffic of said railway."

The Minister of Railways introduced a bill in the Commons Nov. 19 empowering him to enter into negotiations for the lease of branch lines that may be considered by the I.C.R. Board of Management as likely to be benficial to that road. One of the provisions is that before a lease is entered into there must be a report by the Chief Engineer of the Department certifying that the line is in good condition, and there is an additional stipulation that no lease shall become operative until it is ratified by Parliament. The bill received its first reading.

The action of the Bay of Quinte Ry. against the C.P.R. for $2,189 for damage done to a locomotive and four cars in a collision at Tweed, Ont., in 1906, was dismissed, Nov. 10, on the ground that there was contributory negligence.

The appeal of the City of Toronto against the G.T.R. and the C.P.R. upon a case stated by the Board of Railway Commissioners upon what is known as the Toronto commutation tickets case, was argued before the Supreme Court at Ottawa, Nov. 19, and the court reserved judgment on the following day. In this connection the Toronto committee on suburban traffic is arranging for a deputation to discuss the whole question with the Minister of Railways.

Builders of Simple and Compound **LOCOMOTIVES** Adapted to every variety of service

MAINLY ABOUT PEOPLE.

F. C. Salter, European Traffic Manager G.T.R., London, Eng., is on a visit to Canada.

Lady Shaughnessy returned to Canada, Oct. 28, from England, where her daughters are at school.

Lord Strathcona has contributed $10,000 for Father Lacombe's home for aged and infirm people at Caigary, Alta.

G. M. Bosworth, Fourth Vice President C.P.R., has ben elected a director of the Crown Trust Co., Montreal.

Mrs. Weatherston, wife of N. Weatherston, Agent Intercolonial Ry., Toronto, died there Nov. 11, and was buried at Guelph, Ont.

Miss G. M. Camp, daughter of W. J. Camp, Electrical Engineer C.P.R. Telegraphs, Montreal, was married, Nov. 9, to L. Jackson, Westmount.

Sir H. Montagu Allan will spend the winter in England, where he has taken a house at Hatfield.

Janet Hume, infant daughter of W. H. Grant, Manager of Construction, Mackenzie, Mann and Co.'s Eastern Lines, died at Toronto, Nov. 2.

E. B. Osler, M.P., and W. D. Mathews, directors of the C.P.R., have been elected to the board of the Hamilton Steel and Iron Co., Ltd., Hamilton, Ont.

J. E. Hutcheson, Superintendent Ottawa Electric Ry., returned to Ottawa recently from the Black River district, where he and his party had a successful shooting trip.

H. M. Gower, Supervisor of Apprentices, C.P.R. Angus shops, Montreal, was married to Miss M. L. Brewster, Nov. 17. He was presented with a silver tea service and tray by the Angus shop staff.

Sir Thos. G. Shaughnessy, President C.P.R., was a guest at Government House, Ottawa, Nov. 9, on the occasion of a State dinner in celebration of King Edward's 68th birthday.

H. H. Vaughan, Assistant to the Vice President C.P.R., delivered a lecture recently to the Science Undergraduates Society of the McGill University, on Machine Design.

B. J. Coghlin, of B. J. Coghlin and Co., manufacturers of railway springs, etc., Montreal, died there, Nov. 10, of heart failure, aged 73. He was also a Canadian Agent of the White Star Line.

J. A. McLardy, Trainmaster G.T.R., Stratford, Ont., was presented with a gold watch, chain and locket by a number of G.T.R. local officials, recently, at St. Thomas, Ont., where he was formerly stationed.

J. S. Kennedy, one of the original syndicate, responsible for the construction of the C.P.R., who died Oct. 31, in New York, bequeathed about $25,000,000 to various charities, out of a total of about $60,000,000.

W. A. Cooper, General Superintendent Sleeping, Dining and Parlor Cars, C.P.R., Montreal, was elected President of the American Association of Dining Car Superintendents, at its recent annual meeting in Chicago, Ill.

We have been officially advised that the report that C. Murphy, General Superintendent Eastern Division, and J. Oborne, General Superintendent Ontario Division, C.P.R., will exchange positions is without foundation.

J. H. Gordon, G.T.R. Agent at London, Ont., was recently presented with a gold watch and chain and an address by the Board of Trade and a gold mounted cane by the office staff, on his appointment as Freight Agent G.T.R., Toronto.

E. W. Smith, Superintendent Sleeping, Dining and Parlor Cars, G.T.R., Toronto, was elected on the Executive Committee of the American Association of Dining Car Superintendents, at its recent annual meeting in Chicago, Ill.

L. Harold, who has been appointed G.T.R. Agent, London, Ont., was born in 1864, and has been in G.T.R. service since boyhood. Since 1889 he has been Agent at Hensall, Wingham and Brantford, Ont.

F. B. Nixon, formerly train dispatcher, Central Vermont Ry., St. Alban's, Vt., and latterly dispatcher for the Atchison, Topeka and Santa Fe Rd., at Cripple Creek, Colorado, has been appointed to a similar position in the company's service at La Junta, Colorado.

A. H. Brandon, G.T.R. Representative at North Bay, Ont., died there Oct. 31, after a few days' illness, aged 39. He had occupied the position in North Bay for about three years, prior to which he had occupied various positions in the same service.

A. T. Weldon, who resigned the position of Divison Freight Agent, Intercolonial Ry., Halifax, N.S., to enter the Black Diamond Steamship Line's service, was presented with a gold watch by a number of friends at Halifax, recently.

The rumored retirement of R. Kerr, Passenger Traffic Manager, and W. Stitt, General Passenger Agent Eastern Lines, C.P.R., has been officially denied.

F. H. Probert, who has been appointed Roundhouse Foreman I.C.R., St. John, N.B., was born at Acadia Mine, N.S., May 4, 1862, and entered I.C.R. service Jan. 6, 1882, since when he has been, to Feb., 1862, wiper; Feb., 1862, to Feb., 1885, fireman; Feb., 1885, to Nov. 1, 1909, engineer.

D'Arcy Tate, Assistant Solicitor G.T.P.R., Winnipeg, who was on an inspection trip over the line westerly to Edmonton, Alta., with E. J. Chamberlin, Vice President and General Manager, was compelled to return to Winnipeg, Nov. 3, owing to an attack of muscular rheumatism.

G. W. Vanderslice, at one time Superintendent Manitoba Division Northern Pacific Ry., and latterly Superintendent of a division of the NNational Railway of Mexico at Chihauhua, Chi., has been appointed Superintendent Western Division Chicago Great Western Ry. at Clarion, Iowa.

A. J. Roberts was presented with a gold watch, Nov. 6, by men employed at the G.T.R. shops at Stratford, Ont., on resigning his position as foreman of the erecting shops to remove to North Bay, Ont., where he will have charge of the erecting department of the Temiskaming and Northern Ontario Ry. shops.

R. J. Mackenzie, railway contractor; H. Sutherland, Executive Agent Canadian Northern Ry.; and W. Whyte, Second Vice President C.P.R., are among the provisional directors of the Manitoba Jockey Club, which was recently incorporated under the Dominion Companies' Act, with a capital of $500,000, and office at Winnipeg.

A. W. Smithers, Vice President G.T.R., who will take the position of Chairman of the Board, Jan. 1, 1910, has been officially connected with the company since 1896, in which year he made his first inspection trip over the company's lines. He has been Chairman of the English Association of American Bondholders since 1904, having succeeded J. Price, a former G.T.R. Vice President.

E. G. Roussin, whose appointment as Travelling Agent Canadian Northern Quebec and Quebec and Lake St. John Rys. was announced in our last issue, was born at Rochester, N.Y., Aug. 3, 1873. During his railway career, all of which, prior to his present appointment, has been in the U.S., he has acted as clerk to his father, then C.P.R. Agent at Lowell, Mass.; clerk, Boston and Maine Rd., Boston, Mass.; and Travelling Agent under the District Passenger Agent C.P.R., Boston, Mass.

Sir R. W. Perks has announced that he will not seek re-election to the Imperial House of Commons, one of the reasons given being pre-occupation due to important contracting work in Canada. He is the principal promoter of the Montreal and Georgian Bay Canal project, and is also interested in the dry dock projects on the St. Lawrence River and at St. John, N.B., recently submitted to the Dominion Government. The other reason is that he does not approve of the Government's fiscal policy, which he considers to be socialistic.

F. X. Belanger, whose appointment as General Freight and Passenger Agent Temiscouata Ry., Riviere du Loup, Que., was announced in our last issue, was born at Chlorydormes, Que., Jan. 20, 1876, and from May, 1893, to Nov., 1896, was operator Great North Western Telegraph Co., there; Nov. 18, 1896, to Aug., 1901, consecutively telegraph operator, agent, relieving train dispatcher Temiscouata Ry.; Aug. 22, 1901, to Nov., 1904, Train Dispatcher; Nov. 1, 1904, to Mar. 15, 1908, chief clerk General Manager's office; Mar. 15, 1908, to Oct., 1909, General Freight Agent.

E. A. Wigren, who has been appointed Auditor of Disbursements M.C.R., Detroit, Mich., was born at Andover, Ill., July 20, 1876, and entered railway service Oct. 6, 1891, since when he has been, to June 1, 1898, in Freight Auditor's office, Chicago, Burlington and Quincy Rd., Chicago, Ill.; June 1, 1898, to Oct. 1889, in Treasurer's Department, same road; Oct., 1889, to Aug., 1901, in office of Auditor of Expenditure, same road; Aug., 1901, to Feb., 1906, in General Auditor's office, same road; Feb., 1906, to May 1, 1907, tariff clerk Traffic Department, same road; May 1, 1907, to Oct. 1909, Chief Clerk Audit Department, M.C.R., Detroit, Mich.

R. Creelman, whose appointment as Assistant General Passenger Agent C.N.R., Winnipeg, was announced in our last issue, entered railway service Sept., 1891, since when he has been to 1893, messenger City Freight Agent's office, G.T.R., Toronto; 1893 to 1897, ticket clerk G.T.R. city office, Toronto; 1897 to 1900, chief clerk District Passenger Agent's office, G.T.R., Toronto; Jan. 1, 1900, to Aug., 1901, in General Passenger Agent's office, C.P.R., Winnipeg; Aug., 1901, to Sept. 1, 1903, in Passenger Traffic Department C.N.R., Winnipeg; Sept. 1, 1903, to July 1, 1906, City Ticket Agent, Northern Pacific Ry., Winnipeg; July 1, 1906, to July 1, 1909, Travelling Passenger Agent C.N.R., St. Paul, Minn.; July 1 to Oct., 1909, Commercial Agent, C.N.R., St. Paul, Minn.

W. H. Gardiner, whose appointment as City Freight Agent C.P.R., and District Freight Agent E. and N.R., Victoria, was announced in our last issue, was born there Dec. 6, 1859, and entered C.P.R. service July 7, 1886, since when he has been, to Nov. 1, 1886, freight checker at Port Hammond, B.C.; Nov. 1, 1886, to July 1, 1897, shed foreman at New Westminster, B.C.; July 1, 1897, to July 1, 1900, Contracting Freight Agent, Vancouver, B.C.; July 1, 1900, to Oct. 1, 1901, Chief Clerk General Freight Department, Vancouver, B.C.; Oct. 1, 1901, to May 15, 1904, General Agent Freight Department, Seattle, Wash.; May 15, 1904, to Sept. 1, 1909, General Agent Freight Department, New Westminster, and latterly Contracting Freight Agent, Vancouver, B.C.

Deputy Minister of Marine since the retirement of Col. F. Gourdeau, has been appointed, by order in council, Deputy Minister of Marine. He is a native of Quebec City, and received his education in Montreal, graduating from the Polytechnic Institute in 1879, after which he entered Government service as an engineer of canal construction and other public works. For several years he acted as assistant to the Chief Engineer of Canals, and from 1892 to 1896 was Inspector of Railway Construction in British Columbia; 1896 to 1899, Engineer in charge of the Galops Canal construction; 1899 to 1901, employed on hydrographic survey work on the St. Lawrence River, and in 1901, he was appointed to supervise the work of re-building and enlarging the Government shipyards at Sorel, Que., and continued to act as Agent for the Department there until his appointment as Acting Deputy Minister of Marine in 1908. He is a brother-in-law of D'Arcy Scott, Assistant Chief Railway Commissioner.

C. M. Hays, Second Vice President and General Manager G.T.R., who will succeed Sir Charles Rivers Wilson as President, Jan. 1, 1910, was born at Rock Island, Ill., in 1856. He entered railway service in 1873, since he has been, to 1877, clerk, Atlantic and Pacific Rd. (now part of the Frisco Lines), St. Louis, Mo.; 1877 to 1884, secretary to Vice President and General Manager Wabash and Missouri Pacific systems; 1884 to 1886, secretary to Vice President and General Manager Wabash, St. Louis and Pacific Rd.; 1886 to 1887, Assistant General Manager same road; 1887, he was appointed General Manager Wabash Western lines, comprising all the lines west of the Mississippi River and that portion of the lines east, between Chicago and Detroit, and on the consolidation of the Wabash lines, he was appointed General Manager of the entire system. In 1894 he was elected also Vice President, and resigned Dec. 31, 1895, on his appointment as General Manager G.T.R., which position he resigned in 1901 to become President Southern Pacific Rd., but on that railway changing hands, he returned to the G.T.R., as General Manager, and was also elected Second Vice President in 1902.

John Niblock, who recently resigned his position as Superintendent District 3, Western Division C.P.R., with headquarters in Calgary, was born in York County, Ont., Dec. 21, 1849. He entered railway service with the G.T.R. Aug. 21, 1870, as switchman, served two years as brakeman and two years as conductor, resigning to go into fruit and ornamental tree business, in which he continued for five years. In 1880 he entered the Dominion Government railway service on the original C.P.R. as conductor, and as such made the first crossing of the Louise bridge at Winnipeg in August, 1880, and ran the first train between Winnipeg and Portage la Prairie, Dec. 1, 1880. He entered the C.P.R. service at its inception in 1881 as conductor; was appointed Trainmaster, Sept. 9, 1882, and Superintendent of the Port Arthur-Winnipeg section, Sept. 14, 1883. On May 21, 1887, he was transferred to Medicine Hat, Alta., as Superintendent, and in Oct., 1899, was transferred to Calgary, Alta., as Superintendent, in which position he remained until Nov. 1, 1909. During his superintendency west of Winnipeg he assisted in the building of about 1,000 miles of line. He will always be remembered as the founder of the Medicine Hat General Hospital, which proved a great blessing in the earlier days of settlement when there was no other hospital on the line of railway west of Winnipeg, and to which he contributed liberally personally, and raised a considerable sum by his persistent personal exertions. Mr. Niblock is already interested in fruit growing in the Okanagan Valley, B.C., and will settle there and engage in the fruit tree business.

Railway Finance, Meetings, Etc.

Alaska Northern Ry.—When the Alaska Central Rd. was sold recently at Valdez, Alaska, the purchaser was F. G. Jemmett, trustee for the shareholders of the Sovereign Bank, which held $2,500,000 of the $3,500,000 of bonds issued. The purchase price was $600,000. In order to take over and complete the line, a new company has been formed with the title of the Alaska Northern Rd. Co.

Alberta Ry. and Irrigation Co.—The report for the year ended June 30, presented at the annual meeting in London, Eng., shows a total revenue of $465,953.01, including balance brought forward from the previous year of $36,925.91; disbursements of $215,634.61, leaving a surplus of $250,318.40, from which it was proposed to pay a dividend of 5% on the share capital, absorbing $162,500, leaving $87,818.40 to be carried forward. The gross railway earnings for the year were $320,936.27, against $228,775.07 for the previous year. During the year land sales aggregated 131,000 acres, realizing $888,474, and the company also sold 11,386 acres in which it has an interest jointly with the C.P.R., its proportion of the profit being $37,712.40. At the end of the year, the company held 296,085 acres unsold, in addition to several lots in towns already located.

The directors for the current year are: President, E. T. Galt, Montreal; Vice President, Col. K. R. B. Wodehouse, London, Eng.; Managing Director, A. M. Nanton, Winnipeg; Sir E. S. Clouston, W. M. Ramsay, Montreal; J. Galt, Winnipeg; W. Burdett-Coutts, J. H. Dodgson, London, Eng.

Approximate net profits from all sources, exclusive of land sales for Sept., $39,020, against $35,468 for Sept., 1908. Cumulative net profits for three months ended Sept. 30, $108,556. Railway traffic receipts for Oct., $46,505, against $31,052 for Oct., 1908. Aggregate railway receipts for four months ended Oct. 31, $134,694.

Atlantic, Quebec and Western Ry.—We are officially advised that arrangements have been completed for the transfer to this company of the Baie des Chaleurs Ry. The line taken over extends from Matapedia, on the Intercolonial Ry., to Paspebiac, Que., 100 miles. The Baie des Chaleurs Ry. Co. was the original name of the company, and it constructed the line as far as New Carlisle, 98 miles. Then the Atlantic and Lake Superior Ry. Co. was formed to take over the line and some others, and to construct the connecting links, so that a line from Gaspe to Lake Superior would be completed. Under this latter title the line was extended to Paspebiac. The concern got into difficulties, the other lines were not taken over, and for a number of years the B. des C. Ry. was operated by the bondholders. There have been numerous appeals to the law to straighten out matters under both titles, but it is now said that all difficulties have been cleared out of the way. The A. Q. and W. Ry. was incorporated to complete the lines in the Gaspe Peninsula, and to take over the old B. des C. Ry. with its extension made by the A. and L. S. Ry. The remainder of the A. and L. S. Ry. Co.'s plans have been abandoned.

Bay of Quinte Ry.—Press reports state that Mackenzie, Mann and Co. have purchased the Bay of Quinte Ry. While it is not unlikely that the line will be acquired in the Canadian Northern Ontario Ry. interests, the purchase has not been made up to the present.

The Canadian Northern Ry. Co. is making application to the Dominion Parliament for power to amalgamate with other companies and to acquire the capital stock and securities of other companies with which it may be authorized to amalgamate, and declaring that the company has had the power to and may consolidate the securities issued by the company or such other companies, with all other usual and customary powers in that behalf.

Brockville, Westport and Northwestern Ry.—Following are the officers and directors for the current year: President, E. R. Thomas; Vice President and Treasurer, F. T. Lewis; Secretary and Manager, C. Heilshorn; General Superintendent, W. J. Curle; other directors, C. F. Holm, A. P. Van Tuyl, R. Bowie, W. S. Buell, W. H. Comstock, J. Cumming, W. C. Fredenburg.

Canadian Pacific Ry.—The Dominion Parliament is being asked to empower the directors to enact by-laws for the elevation or appointment of two or more Vice Presidents, and defining their powers, duties, qualifications and terms of office; amending the company's acts relating to the election of directors; and to further interpret or define the meaning of the company's act relating to the issue of preferred stock.

Central Vermont Ry.—The report for the year ended June 30 shows gross receipts $3,795,332.27; operating expenses, $2,883,624.31; net earnings, $911,707.96; receipts from parlor car service, $9,128.60; interest in securities held by the company, $22,980; total credits, $943,816.56. Taxes, $119,477.91; rentals, $11,488.01; hire of equipment, $96,706.86; fixed charges, $713,026.68; total debits, $940,699.46; net result, $3,117.10. There was an increase in the revenue from all sources of $70,045.86, and a net decrease in expenditure of $11,737.17. The amount spent in additions and improvements during the year was $30,274.92, which was included in the operating expenses. During the year, the control of the Central Vermont Transportation Co. was obtained, and the steamships NeNw York and New London placed in operation June 28. The additions and improvements mentioned comprised new tracks, sidings and spurs, $662.32; new fuel and water stations, engine houses and turntables, $2,984.33; new stations and warehouses, $7,976.111; steel rails (difference between the old and the new), $7,954.96; new tools and machinery, $2,081.21; ballasting, $2,837.80; new freight cars, $5,553.19; new crossings, $225. The company operates 702.4 miles of track, made up as follows:—main track, 203.2 miles; second main track, 6.2 miles; branch lines, 173.7 miles; yard tracks, sidings and spurs, 110.8 miles, all of which are owned, and main track, 123.5 miles; branch lines, 36 miles; yard tracks, sidings and spurs, 49 miles, which are leased.

Dominion Atlantic Ry.—This company having changed the date of closing its accounts so as to conform to the requirements of the Department of Railways, the report just issued covers 18 months to June 30. For the six months ended June 30, 1908, there was a loss of £23,800, including debenture interest, so that after deducting £1,800 brought forward there remained a deficit of £22,000, which has been charged against suspense account. For the 12 months ended June 30 last there was a surplus of £8,400 remaining after meeting interest charges. The directors have transferred £7,000 of this to suspense account, and the remaining £1,400 is carried forward. The first six months of the year never make a good showing, even in the best years the earnings scarcely more than meet operating expenses. In the six months ended June 30, 1908, there was a period of acute depression, owing to the financial posi-

The Longest Continuous Double Track Railway in the World under One Management and the only Double Track Line Between Montreal, Toronto, Niagara Falls, Detroit and Chicago.

Sole Canadian Agent—MR. GEORGE HOLLAND, M.C. Soc. C.E., P.O. Box 529, MONTREAL

tion of the United States, which made its influence felt all over North America, to say nothing of other parts of the world. There has been a reduction of 0.9% in the working expenses. At the recent annual meeting, in London, Eng., J. M. Denny, Vice President, who recently visited Canada, reported that the rolling stock and vessels had been kept in a thorough state of efficiency, and that the system was being operated most economically. The directors were re-elected.

Gross earnings for Sept., $173,000, against $177,261 for Sept., 1908. Aggregate gross earnings for three months ended Sept. 30, $474,000, against $338,552 for same period 1908.

Grand Trunk Ry.—Application is being made to the Ontario Legislature to confirm an agreement, dated June 12, between the company and Tay tp., fixing the total annual amount of taxes to be paid on the company's asessable property there, for a term of years.

Guelph Junction Ry.—The report of the operations of this railway for the three months ended Sept. 30, presented to the Guelph, Ont., city council, show that the proportion of the receipts payable to the corporation is $7,492.26, making a total of $25,756.79, against $22,378.10 for the year ended Sept. 30, 1908.

Lake Superior Corporation.—The income account for the year ended June 30 shows total receipts of $566,511.69, of which $501,424.46 was from subsidiary companies. These include the Algoma Central and Hudson Bay Ry., the Manitoulin and North Shore Ry. and the Algoma Central Steamship line, but no separate figures are given for them, or for the earnings of any of the subsidiary companies. There was paid for interest and general expenses, including interest on first mortgage and collateral trust bonds, $543,516.14, leaving a balance of income for the year of $22,995.55.

London and Port Stanley Ry.—The city auditor of London, Ont., has completed his audit of this company's financial condition. It appears that the city holds the company's bonds for $1,332,854 upon which it does not receive any interest. It also advanced $125,000 for terminal and other purposes, upon which it is paying interest and providing a sinking fund. The income from rental, etc., amounts to about $17,000 a year, more than sufficient to meet these charges. The city bore the greater part of the cost of the line, and in return took the company's bonds. The London Advertiser, in reviewing the statement, says any debt incurred by the city in respect of the original cost of the line has been practically wiped out. The share capital of the company is held as follows: G.T.R., 2,317 shares; City of London, 1,828 shares; private owners, 270 shares, but the city, by reason of its ownership of the bonds has 8,361 votes, thus controlling the company.

Pere Marquette Rd.—The control of the P. M. Rd. is reported to have passed into the hands of the Bessemer and Lake Erie Rd. The P. M. Rd. owns the Lake Erie and Detroit River Ry. in Canada, and operates under lease the London and Port Stanley Ry.

Quebec and Lake St. John Ry.—Gross receipts for Oct., $52,982.85, against $64,835.24 for Oct., 1908. Aggregate for 10 months ended Oct. 31, $497,733.06, against $530,332.72 for same period 1908. Mileage operated during latter periods, 286.5 to 285 miles against 240 to 285.4 miles.

Quebec Central Ry.—Gross earnings for Sept., $94,673.06; expenses, $62,777.03; net earnings, $31,896.03, against $102,-623.33 gross earnings; $64,697.99 expenses; $38,015.34 net earnings for Sept., 1908. Aggregate gross earnings for three months ended Sept. 30, $311,105.96; expenses, $195,567.80; net earnings, $115,-538.16, against $335,543.45 gross earnings; $213,641.40 expenses; $121,902.08 net earnings for same period 1908.

St. Marys and Western Ontario Ry.—A duplicate of the mortgage entered into between the company, the Royal Trust Co., and the C.P.R., securing an issue of bonds, has been deposited with the Dominion Secretary of State. A duplicate of the original lease of the company's line to the C.P.R., dated Feb. 25, has also been deposited.

Temiskaming and Northern Ontario Ry.—Operating revenue for Sept., $151,-787.49; expenses, $87,710.38; net operating revenue, $64,067.11; less hire of equipment, $2,441.08; balance, $61,636.03; ore royalties, $10,000.46; total net revenue, $71,636.49. Approximate operating revenue for Oct., $161,366, against $91,276 for Oct., 1908.

White Pass and Yukon Ry.—Gross earnings for three months ended Sept. 30, $726,111.

Report of Railways Department.

The report of the Department of Railways and Canals for the year ended Mar. 31, 1909, shows that the total railway expenditure was $41,569,184.26 of which $29,414,227.34 was charged to capital, $2,390,370.41 to income and $9,764,-586.51 to revenue. The expenditure on capital included $24,892,422.68 for the eastern division of the National Transcontinental Ry. and $92,427.83 for surveys for a railway to Hudson Bay. The expenditure on income included $1,785,-887.39 paid as subsidies to railways other than the Government roads; $136,969.11 for the Board of Railway Commissioners; $355,279.07 to pay the shareholders of the Quebec Bridge Co., which work was taken over by the Government; $31,-765.44 for the Quebec Bridge Commissioners, and $35,822.61 for preparing plans for the reconstruction of the bridge. The expenditure on the Intercolonial Ry. was $13,195,253.71, namely, on capital account, $3,867,232.16, and on revenue account, $9,328,021.55. On the maintenance of the Windsor branch $36,234.55 was evpended on revenue account. The expenditure on the Prince Edward Island Ry. aggregated $961,-537.31, of which $561,206.90 was charged to capital and $400,330.41 to revenue. The total revenue received from the Government railways was $9,654,420.42. The total Government expenditure on railways prior to and since Confederation to Mar. 31, amounts on capital account to $215,148,689.38, which includes $25,000,000 granted to the C.P.R. for its main line. In addition there has been expended from the consolidated fund $191,176,638.48, which includes $39,402,-019.23, paid as subsidies to railways in addition to the above for the C.P.R., making a total expenditure of $406,325,-327.86. This total, it is explained, does not include certain annual payments in connection with the line between Ottawa and Quebec, which is dealt with by the Finance Department. Of the total amount $13,881,460.65 was expended, prior to Confederation, on the construction of portions of what is now the Intercolonial Ry.

Dealing with the operations of the two Government lines—the Intercolonial Ry. and the Prince Edward Island Ry.—the report shows that the gross earnings were $8,894,420.42, and the working expenses $9,764,586.51, leaving a deficit of $870,-166.09. On the Intercolonial Ry. the earnings were $8,527,069.46 and the expenditures $9,328,021.55, showing a deficit of $800,952.09. The Windsor branch showed earnings of $56,031.33 and maintenance expenses of $36,234.55, showing a profit of $19,796.78. The Prince Edward Island Ry. showed earnings of $311,319.63 and expenditures amounting to $400,330.41, leaving a deficit of $89,-010.78.

The accounts of the Intercolonial Ry. show receipts:—passenger traffic, $2,628,-218.57; freight traffic, $5,502,550.58; mail and express traffic, $350,478.58; miscellaneous receipts, $45,821.73. The expenditures are classed under the following headings:—Maintenance of way and structures, $1,780,931.83, against which there is a credit item of $9,535.10 for maintaining joint yards, tracks, etc.; maintenance of equipment, $2,096,491.97; traffic expenses, $186,749.69; transportation expenses, $5,115,842.25, against which there is a credit of $69,755.93 for operating joint yards, terminals, etc.; general expenses, $227,296.84. The gross earnings were $5,892.40 per mile of railway, 92.60 cents per engine mile, $1.24 per train mile, and 9.13 cents per car mile. The total engine mileage was 9,208,327 miles; the total train mileage was 6,865, 204 miles, and the total car mileage 93,374,119 miles. The expenditure per mile of railway was $6,445.89; per train mile, $13,587; and the ratio of expenses to gross earnings was 109.39. Compared with the twelve months ended Mar. 31, 1908, there was a decrease in gross earnings of $646,489.34 and an increase of $170,586.02 in working expenditure. The number of passengers carried was 2,907,237, an increase of 117,866; there were 3,573,972 tons of freight carried, a decrease of 560,092 tons. The train mileage was: passenger trains, 2,706,214 miles; freight trains, 4,159,990 miles; loaded car mileage, 57,381,108 miles; empty car mileage, 16,356,184 miles; caboose car mileage, 3,776,649 miles; steam motor car mileage, 21,997 miles; total car mileage, passenger, 15,680,178 miles; freight, 77,513,941 miles.

The Windsor branch is operated by the Dominion Atlantic Ry., under an agreement by which the company pays all charges in conection with the working of the traffic and takes two-thirds of the revenue, the Government bears all cost of maintenance of the line and works, and receives one-third of the earnings. This agreement was made in 1871 and was renewed Dec. 13, 1892, for a further 21 years.

The accounts of the Prince Edward Island Ry. show passenger earnings, $136,534.04; freight earnings $149,150.61; mails and sundries $25,634.98; total $311,319.63. The expenditures were:—Maintenance of way and structures, $114,473.32; maintenance of equipment, $62,250.46; traffic expenses, $1,314.58; transportation expenses, $209,997.20; general expenses $12,294.85. The statistics show:—passengers carried, 332,758; freight carried 106,090 tons; engine mileage, 152,534 miles; train mileage, 234,982 miles; car mileage, 2,098,701 miles; gross earnings per mile of railway, $1,165.99; gross earnings per engine mile, 68.79c.; gross earnings per train mile, 92.94c.; gross earnings per car mile, 14.83c.; working expenses per mile of railway, $1,499.36; working expenses per train mile, 119.51c.

In order to encourage the development of agriculture in Newfoundland, the Reid Newfoundland Co., upon the invitation of the Government, has put in effect a rate of 25c. a barrel or sack, upon produce from any rail point to the port of call of any of its steamers in Newfoundland, and of 50c. from all rail points in Newfoundland to all points reached by its steamers in Labrador. Where there are lower local rates at present in force they are not to be increased. From all steamer ports in Newfoundland a rate of 25c. a barrel for agricultural produce to St. Johns has been put in force. This latter rate is practically a reduction of 30% upon the rates laid down in the government schedule.

The annual conference of C.P.R. Master Mechanics was held at Fort William, Ont., Nov. 5 and 6, and presided over by H. H. Vaughan, Assistant to the Vice President C.P.R.

Press reports state that it has been decided to abandon the experiment tried at St. John, N.B., by the Intercolonial Ry., of owning houses to rent to employes. The Western Trunk Lands, Building and Development Corporation has been incorporated in Winnipeg by officials of the Brotherhood of Locomotive Firemen and Engineers, to purchase land at divisional points, erect houses, and let them to railway employes.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearing took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

8355. Oct. 15.—Ordering C.P.R. to construct suitable highway crossing over its right of way where it crosses road allowance marked "proposed street," lots 23, 24 and 25, first con. Ottawa front, Nepean tp., Carleton Co., Ont.

8356. Oct. 15.—Authorizing United Fuel Supply Co. to lay gas pipe under C.P.R. on lot 7, con. 3, Raleigh tp., Ont.

8357. Oct. 9.—Ordering C.P.R. to maintain highway crossing at East St., Ignace, Ont.

8358. Oct. 11.—Ordering C.N.R. to carry out provisions of par. 1 of Board's order of Oct. 16, 1905, with respect to diversion of Thibault St., St. Boniface, Man.

8359. Oct. 11.—Ordering C.N.R. to commence construction of subway at Pembina St., Winnipeg, Man., on or before Nov. 1, 1909.

8360. Oct. 11.—Dismissing application of St. Boniface, Man., to carry Provencher Ave. across C.P.R.

8361. Oct. 11.—Authorizing C.N.R. to open for traffic its line from Benito, mile 18.8, to Pelly, mile 35.6, on its Thunder Hill branch, Man.

8362. Oct. 11.—Dismissing complaint of F. C. Berry, Austin, Man., against G.T.P.R. for alleged improper fencing.

8363. Oct. 11.—Dismissing application of merchants, farmers and residents for order directing C.P.R. to erect a station and appoint agent at Purves, Man.

8364. Oct. 11.—Dismissing complaint of Laing Bros., of Winnipeg, Man., that the C.N.R. charge excessive interswitching rate with C.P.R.

8365. Oct. 19.—Authorizing G.T.R. to connect its track west of Fielden St. with track or siding being constructed by the Department of Railways and Canals to reach Government Elevator No. 2, Port Colborne, Ont.

8366. Oct. 18.—Authorizing the town of Yellow Grass, Sask., to lay water pipe under C.P.R.

8367. Oct. 18.—Authorizing St. Clair Bros. to lay gas pipe under G.T.R. at Beverly St. and Stone Rd., Galt, Ont.

8368 to 8372. Oct. 8.—Authorizing Volcanic Oil & Gas Co. to lay pipe line under M.C.R. at four points in Essex tp. and one point in Maidstone tp., Ont.

8373. Oct. 19.—Authorizing United Fuel Co. to lay pipe under P.M.R. between lots 15 and 16, 1st and 2nd cons., Chatham tp., Ont.

8374. Oct. 13.—Extending time within which G.T.R. may apply to the Supreme Court of Canada for leave to appeal from order 7613, July 22, directing it to provide station accommodation where its line from Hamilton to Niagara Falls crosses the town line between Clinton and Louth tps., Ont.

8375. Oct. 12.—Approving plans for improvement of Trigger Drain to be constructed under Canada Southern Ry., West Lorne, Ont.

8376. Oct. 15.—Authorizing G.T.R. to construct branch line to Colonial Fur Co.'s premises, Middlesex Co., Ont.

8377. Oct. 14.—Ordering that Thamesville village, Ont., be made a party to the proceedings re E. F. Best's complaint re dangerous condition of G.T.R. and Wabash Rd. level crossings.

8378. Oct. 18.—Approving N.B. Southern Ry. Standard Passenger Tariff C.R.C. 20.

8379. Oct. 18.—Authorizing Harwich tp. council to construct drain under Lake Erie and Detroit River Ry., Ont.

8380. Oct. 19.—Authorizing Quebec, New Brunswick & Nova Scotia Ry. to construct its line across public road between St. Foye and Lorette parishes, Quebec Co., Que.

8381. Oct. 15.—Authorizing C.P.R. to construct spur to the waterfront, Parry Sound, Ont.

8382. Oct. 19.—Authorizing C.P.R. to open for traffic that portion of the Ontario and Quebec Ry. double track, mileage 41.6 to 44.9, Smiths Falls sec., Ont.

8383. Oct. 15.—Authorizing C.P.R. to construct an extension of its siding across Arthur St., Elmira, Ont.

8384. Oct. 19.—Authorizing Manitoba Government Telephone System to erect wires across C.P.R. at Hanbury Siding, Brandon.

8385. Oct. 15.—Authorizing Miniota rural municipality to erect wires across C.N.R. at p.c. between secs. 10 and 11, tp. 15, r. 25, Man

8386 to 8391. Oct. 19.—Authorizing C.N.Q.R. to erect telegraph wires under wires of Portneuf County Telephone Co., Bell Telephone Co., G.N.W. Telegraph Co. and St. Maurice & Champlain Telephone Co. at various points.

8392. Oct. 7.—Setting forth conditions for the carrying of wires and cables across the railway tracks under the Board's jurisdiction and subject to its control.

REDUCE YOUR LABOR THREE-FOURTHS

If you could reduce your force 75 per cent. without curtailing the efficiency of your system, wouldn't you do it?
You CAN lessen, that much or more, the labor involved in handling your oils by installing

The Bowser System of Oil Storage

Storage Tanks filled direct from car—
Self-measuring pumps, drawing and measuring EXACTLY the amount desired at one operation—
Automatic Power Pumps that measure accurately from one to one thousand gallons—
That's the Bowser System; more about it in Bulletin 18.

S. F. BOWSER & COMPANY, LIMITED, - 66-68 FRASER AVENUE, TORONTO

8436. Oct. 20.—Authorizing C.N.R. to cross C.P.R. Arcola branch at Carlyle, Sask.

8563. Nov. 4.—Authorizing Orford Mountain Ry. to deviate p.c. across its track on lot 23, r. 7, Melbourne tp., Que.

8564. Nov. 3.—Extending for one month time within which V. V. & E. Ry. & Nav. Co. was directed to install interlocking plant required by order 7479, July 6, to the Fraser River Lumber Co., New Westminster, B.C.

8565. Nov. 3.—Authorizing Chatham, Wallaceburg & Lake Erie Ry. to construct spur, on several streets in Chatham, Ont.

8566. Nov. 3.—Authorizing C.P.R. to change its line at Ste. Agathe, Que., and remove its station buildings.

8567, 8568. Nov. 3.—Authorizing Hydro-Electric Power Commission of Ontario to erect transmission wires across C.P.R. on part of lots 12 and 13, B. F., North Oxford, and lot 35, Gore Con., Puslinch tp., Ont.

8569. Nov. 3.—Authorizing city of Calgary, Alta., to erect wires across C.P.R. at 15th Street.

8570, 8571. Nov. 3.—Authorizing Nipissing Power Co. to erect wires across C.P.R. at Callander, Nipissing Jct., Ont.

8572. Oct. 29.—Rescinding order 5907, Dec. 23, 1908, authorizing G.T.P.R. to construct bridge between Watson's and Kaien Islands, B.C., the B.C. Government objecting.

8573. Oct. 27.—Authorizing Vancouver and Lulu Island Ry. to cross Grenville St., Point Grey, B.C.

8574. Oct. 27.—Authorizing C.P.R. to construct spur to Great Northern Transfer Co.'s premises, Vancouver, B.C.

8575. Oct. 27.—Authorizing V. V. & E. Ry. and Nav. Co. to join its tracks with the B.C. Electric Ry. near Front and Columbia sts., Vancouver, B.C.

8576. Oct. 27.—Dismissing city of Vancouver's application for an order authorizing the opening of Clarke Drive across C.P.R.

8577. Nov. 3.—Authorizing Nipissing Power Co. to erect wires across G.T.R. at Nipissing Jct., Ont.

8578. Nov. 3.—Authorizing G.T.P.R. to carry freight over its line from Battle River to Edmonton, Alta.

8579. Nov. 2.—Authorizing C.N.Q.R. to take parts of lot 213, St. Charles Borromee parish, and parts of lot 2, Joliette, Que., for the purpose of securing the efficient operation of its railway.

8580. Nov. 2.—Dismissing C.P.R. application for order extending provisions of order 7813, July 3, authorizing the city of Toronto to construct bridge to carry the highway and Toronto Ry. tracks over C.P.R., G.T.R., and C.N.O.R., at Queen St. East, so as to provide that when said bridge is completed it be closed for pedestrian and vehicular traffic.

8581. Nov. 2.—Dismissing city of Toronto's application to construct high level bridge over Don improvement and C.P.R., G.T.R., and C.N.O.R. at Queen St.

8582. Nov. 9.—Authorizing C.P.R. to load and unload on the Lord's Day, car ferries plying between Port Burwell, Ont., and Ashtabula, Ohio.

8583. Nov. 5.—Authorizing, temporarily, Bell Telephone Co.'s tariff of tolls and form of agreement to be made with several rural telephone companies in Ontario.

8584. Nov. 5.—Approving Temiscouata Ry. by-law authorizing F. X. Belanger, General Freight and Passenger Agent, to prepare and issue tariffs of tolls.

8585. Nov. 4.—Approving plan showing proposed overhead crossing at mileage 13.5, C.P.R. Mountain section, B.C.

8586. Nov. 4.—Approving G.T.P.R. Standard Freight Tariff C.R.C. 5, applying between stations, Saskatchewan and Alberta.

8587. Nov. 5.—Approving and sanctioning C.N.O.R. location through unsurveyed territory in Sudbury Mining Division, 120 miles from Sudbury Jct.

8588. Nov. 4.—Directing conditions under which Grand Valley Ry. may double track its line along Colborne St., and re grade revision at intersection of Colborne and Market st., Brantford, Ont.

8589. Nov. 4.—Authorizing Montreal Park & Island Ry. to construct spur in Rosemount, Que.

8590. Nov. 5.—Approving C.N.R. location through tps. 5-2, and r. 6, w. 2nd m., mileage 0.00 to 16.38, Sask.

8591. Nov. 4.—Authorizing C.N.O.R. to construct bridge over ravine on lot 30, con. 5, Whitby tp., Ont.

8592, 8593. Nov. 4.—Authorizing Calgary Power & Transmission Co. to erect wires across C.P.R. at Exshaw, and across C.P.R. telephone lines and siding near Kananaskis, Alta.

8594. Nov. 5.—Authorizing city of Lachine, Que., to lay water pipe across National Transcontinental Ry. at Twentieth Ave.

8595. Nov. 5.—Amending order 8314, Oct. 12, authorizing G.T.P.R. to cross certain highways in West Saskatchewan district by striking out crossings 1 and 3.

8596. Nov. 9.—Authorizing G.T.R. to construct an additional track on Romeo St., Stratford, Ont.

8597. Nov. 13.—Authorizing Grand Valley Ry. to cross G.T.R. with its second track in Brantford, Ont.

8598 to 8603. Nov. 4.—Authorizing Manitoba Government Telephones to erect wires across C.N.R. at six points.

8604. Nov. 9.—Authorizing C.N.Q.R. to erect wires under City of Quebec Telephone Co.'s wires at Quebec Aqueduct, St. Sauveur parish, Que.

8605 to 8609. Nov. 4.—Authorizing Consolidated Telephone Co. to erect wires across C.P.R. at five points in Caledon tp., Ont.

8610. Nov. 4.—Authorizing Bethesda & Stouffville Telephone Co. to erect wires across C.N.O.R., Markham tp., Ont.

8611. Nov. 4.—Authorizing Mount Albert Telephone Co. to erect wires across C.N.O.R. near Mount Albert station.

8612. Nov. 5.—Authorizing Bell Telephone Co. to erect wires across G.T.R. ¾ mile east of Paris Jct., Ont.

8613. Nov. 4.—Authorizing town of Berlin, Ont., to lay sewer on Wilhelm St. across G.T.R. Elmira branch.

8614. Nov. 10.—Authorizing C.P.R. to construct a Standard 5 station at Wilcox, Sask.

8615. Nov. 5.—Authorizing C.N.Q.R. to erect telegraph wires under C.P.R. wires at Deschambault, Que.

8616. Nov. 8.—Authorizing C.P.R. to construct an additional line across Park Ave., St. Louis, Que.

8617. Nov. 5.—Authorizing C.P.R. to construct spur for Massey-Harris Co. and Turpin Fur Co., Lethbridge, Alta.

8618, 8619. Nov. 11.—Authorizing C.N.Q.R. to construct across public road in r. 3, Ste. Julienne parish, and across private crossing, St. Jacques parish.

8620. Nov. 8.—Dismissing complaint of L. Vallee, E. Belisle and O. Courchesne, of La Baie du Febvre, Que., against condition of Quebec, Montreal & Southern Ry. crossings.

8621. Nov. 8.—Dismissing application of C.N.Q.R. for leave to build across highways in Beauport parish, Que.

8622. Nov. 10.—Authorizing Tilbury Telephone Co. to erect wires across M.C.R. 2½ miles east of Tilbury station, Ont.

8623. Nov. 10.—Authorizing Alberta Government to erect wires across C.P.R. near Bawlf station, Alta.

8624. Nov. 3. Authorizing C.N.Q.R. to open for traffic the portion of its line from St. Jacques to the junction with its line near Dugas, Que.

8625. Nov. 8.—Dismissing complaint of E. Lyster as to the alleged unsatisfactory and dangerous train service of G.T.R. at Gore, Que.

8626. Nov. 8.—Dismissing complaint of Dominion Park Co., Montreal, alleging excessive rates charged by Bell Telephone Co. for the use of telephones at the Park.

8627. Oct. 21.—Authorizing G.T.R. to expropriate lands in Guelph, Ont., upon which to erect a passenger station.

8628. Nov. 5.—Authorizing town of Palmerston, Ont., to construct a drain under G.T.R. on its Kincardine branch.

8629. Nov. 10.—Authorizing C.P.R. to construct branch line for Lombard Bros. & Marshall, near Milan station, Que.

8630. Nov. 11.—Authorizing Saskatchewan Government Telephones to erect wires across C.P.R. at Estevan.

8631. Nov. 10.—Ordering that G.T.R. shall not be entitled to make any extra charge for switching performed at spur to Christie Henderson & Co.'s premises, Hespeler and Guelph, Ont. This order is given in full on another page.

8632. Nov. 15.—Authorizing town of Hanover, Ont., to lay water main across portion of G.T.R. yard.

8633. Nov. 15.—Authorizing city of Toronto to construct a sewer on Davenport Road, under C.P.R.

8634. Nov. 15.—Authorizing H. Cauchon to construct drain and water pipes across Quebec Ry. Light & Power Co.'s property, at Beauport, Que.

8635. Nov. 15.—Authorizing Guelph, Ont., Board of Light and Heat Commissioners to erect electric light wires across G.T.R. at Duke St.

8636. Nov. 11.—Ordering G.T.R. to provide interswitch at Brampton, Ont.

8637. Nov. 12.—Approving M.C.R. interlocking plant to be installed at east end of its yard, Windsor, Ont.

8638. Nov. 12.—Authorizing G.T.R. to conect its line with the Niagara Peninsula Ry. in lot 31, con. 1, Humberstone tp., Ont.

8639. Nov. 12.—Authorizing G.T.R. to connect with C.N.Q.R. in Hawkesbury, Ont.

8640. Nov. 12.—Authorizing G.T.R. to construct iron foot-bridge over its line at Metcalfe St., Guelph, Ont.

8641. Nov. 15.—Authorizing Cie Fenciere Suburbaine de Montreal to construct sewer under C.N.Q.R. at Longue Point, Que.

8642. Nov. 16.—Authorizing Guelph, Ont., Board of Light and Heat Commissioners to erect electric light wires across G.T.R. at Huskisson St.

8643. Nov. 16.—Approving C.N.R. location through tp. 5, r. 6, w. 2nd m., Sask., mileage 65.16 to 70.29.

8644. Nov. 16.—Authorizing C.P.R. to divert road allowance between n.w. ¼ sec. 23, and s.e. ¼ sec. 22, near Exshaw station, Alta.

8645. Nov. 16.—Authorizing city of Winnipeg to erect electric light wires across C.P.R. at Grey St.

8646. Nov. 16.—Authorizing St. Maurice Valley Ry. to diverge slightly the highway at station 239-03, and construct an undergrade crossing at Grand Mere, Que.

8647. Nov. 16.—Authorizing Nipissing Power Co. to erect transmission wires across G.T.R. at Callander, Ont.

8648. Nov. 16.—Approving C.P.R. proposed deviation from mileage 54 to 54.22, Woodstock station, Ont.

8649. Nov. 16.—Approving location and plans of C.P.R. station at Midale, Sask.

8650 to 8652. Nov. 16.—Authorizing Bell Telephone Co. to erect wires across C.P.R. near Islington station, and at Dufferin St., Toronto.

8653. Nov. 16.—Authorizing Theodore, Springside and Beaverdale Rural Telephone Co. to erect wires across C.P.R. at Springside, Sask.

8654. Nov. 16.—Authorizing Saskatchewan Government Telephones to erect wires across C.P.R. at Richardson.

8655, 8656. Nov. 11.—Authorizing the town of Penetanguishene, Ont., to lay pipe, to replace defective culvert under G.T.R. at Queen St., also to place sewer pipe under G.T.R. at Burke St.

8657. Nov. 16.—Authorizing East Middlesex Telephone Co. to erect wires across G.T.R. on con. 6, Missouri tp., on its London and St. Mary's branch, Ont.

8658 to 8661. Nov. 16.—Authorizing Bell Telephone to erect wires across G.T.R. ½ mile south of Port Robinson, at Waterloo St., New Hamburg, Ont., and across C.N.Q.R. south of Joliette, Que.

8662. Nov. 16.—Authorizing C.P.R. to construct spur for Imperial Oil Co., Red Deer, Alta.

8663, 8664. Nov. 16.—Authorizing C.N.Q.R. to construct its line across public roads on lot 134, Cap Rouge parish, east of Cap Rouge River, and at Cap Rouge station, mileage 12.08 and 12.77 west from Quebec Bridge.

8665. Nov. 16.—Authorizing Guelph, Ont., Board of Light and Heat Commissioners to erect electric wires across G.T.R. at Norwich St.

8666. Nov. 16.—Authorizing C.P.R. to construct an extension of spur to Brandon Brewing Co.'s premises, Brandon, Man.

8667. Nov. 17.—Approving location of portion of C.P.R. Langdon branch from mileage 80 to 106.96., Alta.

8668. Nov. 17.—Authorizing C.N.Q.R. to construct its line across Little River road, St. Sauveur parish, Que.

8669. Nov. 17.—Authorizing Brandon, Saskatchewan & Hudson's Bay Ry. to construct spur on 15th Street, Brandon, Man.

8670. Nov. 17.—Authorizing village of Brussels, Ont., to erect wires across G.T.R. at intersection of con. line between 5th and 6th divisions, Morris tp.

8671. Nov. 17.—Authorizing village of Brussels, Ont., to erect wires across G.T.R. at Ethel station, mileage 21.87 from Palmerston.

8672, 8673. Nov. 17.—Authorizing Horton & McNab Telephone Co. to erect wires across G.T.R. one mile west of Glasgow station, and at lot 19, con. 8, McNab tp., Ont.

8674 to 8676. Nov. 17.—Authorizing Manitoba Government Telephones to erect wires across G.T.P.R. three miles west of Portage la Prairie; and across C.N.R. 100 yds. east of Rapid City station, and three miles west of Portage la Prairie.

8677, 8678. Nov. 17.—Authorizing Saskatchewan Government Telephone System to erect wires across C.N.R. 1-6 mile north of Dundurn station, and at Disley.

8679. Nov. 17.—Authorizing H. A. Clemens Co., Guelph, Ont., to construct water pipe under C.P.R. near Eramosa bridge.

Grain Receipts at the Dual Ports.

Following is a summary of the grain received, in carloads, at Fort William and Port Arthur, Ont., for the period Sept. 1 to Oct. 31:

	C.P.R.		C.N.R.	
	1909	1908	1909	1908
Wheat	14,057	8,919⅔	7,714⅓	5,321⅓
Oats.....	1,438⅓	589	612	304
Barley ...	461⅓	255	559⅔	384⅓
Flax	130⅔	104⅓	222⅓	6
Totals ...	16,087½	9,868	9,108½	6,016

The McGill University Department of Railways courses comprise the operating department or executive offices, the mechanical department, and the engineering department. Students entering in this department are expected to, as far as possible, take service with a railway company, during the summer vacation, with the intention of continuing such service after graduation. G. C. Wells, Assistant General Passenger Agent, C.P.R. Eastern Lines, and A. A. Goodchild, Auditor of Stores and Mechanical Accounts C.P.R., are two of the lecturers for the current year, the subjects dealt with being the passenger department, its organization, methods and general principles governing passenger business, baggage system, mail and express, by the former, and organization and work of the various departments, duties of officers, the principles of accounting, earnings and expenses, shop material and cost, labor and methods of paying for same, statements, their nature and value, by the latter.

The G.T.P.R. has filed with the Board of Railway Commissioners its Standard Passenger Tariff S1, C.R.C. 10, on a basis of 3c. a mile, Wolf Creek, Alta., and east, and 4c. a mile west of Wolf Creek.

At the recent annual meeting of the Brotherhood of Railway Car Men of America, at Atlanta, Ga., A. Chartrand, Car Inspector C.P.R. Outremont yards, Montreal, was elected Second Vice President.

Toronto Terminal Railway.

Application is being made to the Dominion Parliament for an act incorporating a company with this title with power to construct and maintain passenger and freight stations, warehouses and other terminal facilities in and about the city of Toronto; to construct and operate branch lines of railway to connect them with the different railways entering Toronto; to construct such tunnel viaducts, subways and bridges as may be necessary in connection with such facilities; to enter into agreements with railway and other companies; to acquire land and water powers, to construct electric power plants and generally to carry on the business of a terminal company. Hogg and Magee, Ottawa, are solicitors for the applicants.

Among those interested in the proposed company are J. W. Wood, P. Howland, H. Blain, merchants of Toronto, and L. B. Howland, C.E., who for some years past has been President and General Manager of the Irondale, Bancroft and Ottawa Ry. Mr. Howland stated in an interview Nov. 19 that the object of the applicants for the charter was to obtain the right to construct the facilities for every railway, steam or electric, already in operation to obtain an entrance into the city on an equal basis, and to provide for future extensions. The company proposes to provide the necessary terminal facilities in the city, and to leave it to the individual lines to take advantage of them. The centralizing of all traffic in the hands of one company would be an added convenience to the general public, and all differences as to freight sidings would be prevented, as any car once coming within the company's jurisdiction would be transferred to any siding or other line irrespective of ownership. The question of the location of such a central station would be a matter for the joint consideration of all the transportation companies interested. It is also claimed on the part of the applicants that by the adoption of the plans of this company the viaduct problem would be satisfactorily adjusted. This matter is at present being delayed owing to the appeal against the order of the Board of Railway Commissioners.

Sir Thos. G. Shaughnessy, President C.P.R., and C. M. Hays, Second Vice President and General Manager G.T.R., on being interviewed stated that neither of their companies had been approached by those interested in the new proposition upon the subject and they could not say whether either company would have anything to do with it.

E. M. Sawyer, Manager International Correspondence Schools, wrote recently: "I am pleased to testify to the pleasure I receive in perusing The Railway & Marine World, and assure you it is of great interest to those interested in transportation matters."

A. A. G. Lauder, State Agent, Canadian Pacific Ry., Milwaukee, Wis., writes: "The Railway and Marine World is certainly appreciated by me. There is scarcely an issue from which I do not obtain valuable information which I have not previously secured from any other source."

THE VICTORIA ROLLING STOCK CO., OF ONTARIO, LIMITED

Notice is hereby given that a dividend of three per cent. on the paid-up capital stock of the Company for the half-year ended Nov. 30th, 1909, has been declared payable Dec. 1st, 1909, to the shareholders on record as of the 30th of Nov., 1909.

By order of the Board,

R. A. SMITH, Secretary.

Toronto, Nov. 19th, 1909.

PEERLESS
The Fence that saves Expense

Because it saves repairs. It does not sag, bag, snap, or break, and when once put up it stays in good shape. Adjusts itself to all irregularities of the ground and resists weather—wear and stock especially well. Makes the best railroad fence you can possibly put up, both in appearance and lasting qualities. You can do no better than to erect Peerless Fencing. It will always be a standing example of your good judgment. The free book we are sending out is very interesting to people in your field. Shall we send you a copy—a postal request will bring one promptly.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Canadian Northern Ontario Ry.—J. W. Nicholson, heretofore train dispatcher, Toronto, has been appointed Local Freight Agent, Toronto, with jurisdiction also extending over Rosedale station, vice W. E. Ireland, transferred to the office of General Eastern Agent, Toronto, as chief clerk.

Canadian Northern Ry.—M. A. Murphy, Superintendent Division 1, Port Arthur, Ont., has resigned.

Canadian Pacific Ry.—E. N. Johnson has been appointed Resident Engineer District 1, and Fort William Terminals, Central Division, Fort William, Ont., vice C. L. Bates, who has been transferred to construction department.

F. Stamelen has been appointed acting Locomotive Foreman, Winnipeg, vice W. Webster on leave.

T. R. Flett, heretofore Superintendent District 5, Saskatoon, Sask., has been appointed Superintendent District 4, Central Division, Souris, Man., vice J. A. Macgregor, transferred.

J. A. Macgregor, heretofore Superintendent District 4, Souris, Man., has been appointed Superintendent District 3, Central Division, Brandon, Man., vice W. J. Uren, transferred to the Western Division.

E. L. Chudleigh, heretofore Trainmaster District 4, Western Division, Macleod, Alta., has been appointed acting Superintendent District 5, Central Division, Saskatoon, Sask., vice T. R. Flett, transferred.

W. J. Uren, heretofore Superintendent District 3, Central Division, Brandon, Man., has been appointed Superintendent District 1, Western Division, Moose Jaw, Sask., vice J. G. Taylor, transferred.

J. G. Taylor, hertofore Superintendent District 1, Moose Jaw, Sask., has been appointed Superintendent District 2, Western Division, Medicine Hat, Alta., vice C. S. Maharg, transferred.

A. C. Harshaw, heretofore conductor, Ontario Division, has been appointed Trainmaster District 4, Western Division, Macleod, Alta., vice E. L. Chudleigh, transferred.

C. S. Maharg, heretofore Superintendent District 2, Medicine Hat, Alta., has been appointed Superintendent District 3, Western Division, Calgary, Alta., vice J. Niblock, retired from active service.

H. A. Keswick has been appointed Locomotive Foreman at Field, B.C., vice F. D. Warner, transferred.

R. G. McNeillie, heretofore chief clerk General Passenger Agent's office, Winnipeg, has been appointed acting District Passenger Agent in charge of Kootenay district west of Kootenay Landing, and south of, and including Arrowhead, B.C. All correspondence and statements heretofore sent to Calgary office will be directed to him. Office, Nelson, B.C.

J. C. Reed, heretofore acting Locomotive Foreman at Kamloops, B.C., during the absence of A. E. Bennets, on leave, has been appointed shop foreman there, the latter having returned.

Government Railways.—O. O. LeBlanc, F. H. Kinnear and G. A. Harshman, heretofore on the General Storekeeper's staff, Moncton, N.B., have been transferred to the staff of L. Lavoie, General Purchasing Agent, Ottawa.

Grand Trunk Ry.—E. Walton and J. C. Talmage have been appointed Travelling Car Service Agents, for the Eastern, Ottawa and Northern Divisions, and Middle, Southern and Western Divisions, with headquarters at Montreal and Detroit, Mich., respectively. They will investigate and report upon the car service conditions generally at all stations, and perform such other duties as may be assigned to them from time to time. It is not the intention to appoint a successor to J. C. Talmage as General Inspector of Transportation.

R. L. Nelles, heretofore freight agent, Toronto, has been appointed General Agent, Toronto Terminals, to perform such special work as may be delegated to him by Terminal Superintendent.

The following agents have been appointed:—Vaudreuil, Que., I. Z. Carriere; Aubrey, Que., J. O. Prefontaine, (temp.); Uptergrove, Ont., J. Mahoney; Goodwood, Ont., J. A. Cusack; Haliburton, Ont., R. Johnson; Craigvale, Ont., T. J. Oakley; Lisle, Ont., L. G. Armstrong; Toronto (freight), J. H. Gordon; St. Mary's Jct., Ont., J. Egan; Winona, Ont., W. J. Sneath (temp.); Woodstock, Ont., A. R. Huston; London (freight), Ont., L. Harold; Wyoming, Ont., D. O'Neil; Tillsonburg, Ont., J. Boughner; Brantford, Ont., M. C. Dickson; Brule Lake, Ont., G. A. Thurston; Edgington, Ont., J. J. Freeman.

Intercolonial Ry.—F. H. Probert, heretofore locomotive engineer, has been appointed Roundhouse Foreman at St. John, N.B., vice D. A. Sinclair, retired from the service.

Michigan Central Rd.—W. C. Thoms has been appointed Commercial Agent at Toledo, Ohio, vice W. S. Rodger, transferred.

N. B. Ackley, heretofore Auditor of Disbursements, has been appointed Assistant Auditor. Office, Detroit, Mich.

N. D. Chapin has been appointed Chief of Tariff Bureau. Office, Detroit, Mich.

E. A. Wigren, heretofore chief clerk Audit Department, has been appointed Auditor of Disbursements, vice N. B. Ackley, promoted. Office, Detroit, Mich.

J. M. Eedson has been appointed Freight Claim Agent, with headquarters at Detroit, Mich., in place of T. Eedson, who continues as Auditor of Freight Accounts.

E. M. Cornell has been appointed Assistant Freight Claim Agent.

R. R. Richards has been appointed Assistant Auditor of Disbursements.

A. S. Dutton has been appointed Assistant Auditor of Freight Accounts.

G. E. Smith has been appointed Assistant Auditor of Passenger Accounts.

J. H. Brown has been appointed Assistant General Freight Agent at Bay City, Mich., vice W. C. Lewis, transferred to Chicago, Ill.

W. C. Lewis, heretofore Assistant General Freight Agent, Bay City, Mich., has been appointed Assistant General Freight Agent, Chicago, Ill., vice F. Zimmerman, resigned.

Minneapolis, St. Paul & Sault Ste. Marie Ry.—W. M. Stephenson, General Agent, Chicago Division, St. Paul, Minn., has resigned to enter private business.

New York Central & Hudson River Rd.—T. Mahar has been appointed Master Mechanic, Harlem and Putnam Divisions, which latter has been transferred from the Hudson Division, vice H. B. Whipple, Master Mechanic Harlem Division, resigned.

Pere Marquette-Lehigh Valley Line.—G. A. Gamble, heretofore Agent Lehigh Valley Rd., and Lehigh Valley Transportation Co., Kansas City, Mo., has been appointed Manager Pere Marquette-Lehigh Valley Line, Buffalo, N.Y., vice F. A. Butterworth, resigned.

Pere Marquette Rd.—A. Patriarche has been elected Vice President in charge of traffic. The position of Assistant to President, heretofore held by him, has been abolished.

F. A. Butterworth has been appointed Assistant General Freight Agent, Chicago, Ill., vice J. R. Veitch, resigned.

Trade and Supply Notes

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The International Marine Signal Co., Ottawa, has issued an illustrated pamphlet describing the Willson Flare Light, which is specially adapted for construction work of all kinds.

The Robb Engineering Co., Ltd., Amherst. N.S., anounces that it has changed its Montreal office from 709 Power Bldg. to 607 Canadian Express Bldg., and has appointed R. W. Robb as its District Manager, vice Watson Jack.

The British Corporation for the Survey and Registry of Shipping of Glasgow, after exhaustive tests has sanctioned the use of the Thermit process for repairs to fractured stern posts, lower portions of rudder frames and damages of a similar character.

The Dougall Varnish Co., Ltd., Montreal, manufacturers of railway and other varnishes, has formed an alliance with the Murphy Varnish Co., Newark, N.J., for the purpose of enlarging its business in certain directions. The company's products are already well known throughout Canada, and they will be maintained at their present high quality, and improved where possible, by the adoption of other formulae and processes. All the prducts of the company will be manufactured in Montreal, and the business will be carried on as heretofore.

THE CANADIAN NORTHERN ONTARIO RAILWAY COMPANY.

Notice is hereby given that the Canadian Northern Ontario Railway Company will apply to the Parliament of Canada at its next session for an Act authorizing the Company to amalgamate with other Companies, and empowering the Company to acquire the capital stock or securities of other Companies with which it may be authorized to amalgamate, and declaring that the Company has had the power to and may consolidate the securities issued by the Company or such other Companies, with other usual and customary powers in that behalf.

GEORGE F. MACDONNELL,
Assistant Solicitor.

Toronto, Ontario, November 10, 1909.

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

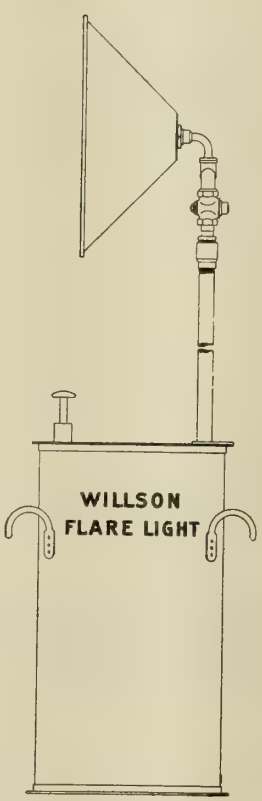
IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.



THE WILLSON PORTABLE FLARE LIGHT

Brilliant Powerful Economical

Specially adapted for use in all kinds of construction work.

Its candle power varies from 1,000—8,000 according to the size of apparatus. The cost of 8,000 candle power is less than 6c. per hour.

O'Brien & Fowler, Contractors to the G.T.P., say:—

"During the past two or three years we have used various kinds of lights, but none of them have proved the equal of yours, either in the matter of economy or usefulness. The effectiveness of your light is beyond dispute."

Canadian Northern Ry. Report.

The following directors' report, over the signature of W. Mackenzie, President, was submitted at the annual shareholders' meeting in Toronto, Oct. 30:

The result of operations for the year ended June 30 is as follows:

GROSS EARNINGS—	
Passenger traffic	$1,928,686.35
Freight traffic	7,481,325.94
Express, mail, telegraph, dining and sleeping cars, interest and profits from elevators and other subsidiary companies	1,171,755.64
	$10,581,767.93
WORKING EXPENSES.	
Working expenses, including taxes, etc.	$7,015,405.76
Net earnings	$3,566,362.17
Fixed charges	2,919,617.13
Surplus	$646,745.04

The average mileage operated was 3,013 miles, compared with 2,866 miles for 1907-8. The gross earnings increased $872,305.22, or 8.98%, and net earnings $533,675.28, or 17.60%, over the preceding year. The working expenses were 72.55% of gross earnings of the railway proper, and 66.30% of the gross earnings from all sources, compared with 74.10% and 68.77% respectively last year. The increase in gross earnings, while comparing favorably with the increased mileage operated, is not as large as your directors hoped. This is explained in part by the unusually quiet conditions of business generally throughout the Dominion, which was reflected in a substantial decrease in the movement of westbound commodity traffic, a standard of traffic which earns for all railways the highest rates. Since the close of the fiscal year, however, there has been a very gratifying increase in the four months' business to Oct. 31, over the corresponding period of 1908, of $561,300, and to this increase the westbound traffic has contributed largely; indeed, the volume of business received from the manufacturing sections of Eastern Canada and from Great Britain is quite as large as in the buoyant years of 1905 and 1906.

Your directors are confident that a proportionate increase over last year's figures will continue, for the grain crop of 1909 is one of the best for several years, and grades uniformly higher than any previous year. This opinion is fully sustained by the larger milling interests and the elevator companies operating in Western Canada. While the increase in yield and quality extends over the entire territory served by your railway, the outstanding fact of the year is the leading position gained by Saskatchewan in the production of wheat and other grains. The following figures are taken from the last estimates of the Saskatchewan Minister of Agriculture, published Oct. 2: Wheat, 84,000,000 bush.; oats, 102,800,000 bush.; barley, 8,000,000 bush; flax, 3,800,000 bush. The rapid rise of Saskatchewan to pre-eminence is especially gratifying to your directors, because it is chiefly in that province that they have extended the mileage during the last four years. It has been their aim to acquire the advantages of first construction in the best districts of all sections of the province; and their efforts to pre-empt, as it were, the most advantageous positions for the company have been co-existent with the desires of the farming population, expressed through their representatives in the legislatures, to be served by your railway. The case of the extension from Saskatoon towards Calgary admirably illustrates this aspect of your directors' policy. During the year 60 miles were opened for traffic, and it is estimated will furnish your railway with 2,000,000 bushels of grain for shipment to Port Arthur, 1,000 miles distant. The line has recently been extended an additional 60 miles to Kindersley, and grading has been completed for a further 60 miles. The railway traverses the most fertile section of the great Saskatchewan plains, in which your company has heavy holdings of land in the vicinity of the homesteads and pre-emptions which constitute the greatest remaining block of surveyed unoccupied wheat lands of this continent. The extension of your lines in Saskatchewan is the logical outcome of the methods adopted in Manitoba, which have proved so satisfactory in every way. In Alberta, following a demand to connect Edmonton with Calgary and the southern portion of the province, the construction of a line has been rapidly pushed forward; steps are also being taken towards reaching the Brazeau River coal fields, in which are most extensive deposits of easily mined high-grade coal. It is expected that your railway will reach Calgary from the north and east next year, and that Southern Alberta will be served in the following year. These extensions in territory which affords a large and expanding market for British Columbia, have already produced a widespread demand for the speedy continuation of your railway to the Pacific coast.

Your directors are glad to note the further justification of their policy of selling lands to the homeseeker as against the speculator that is seen in the substantial increase in the areas under cultivation in all the districts tributary to your newer branch lines. Adjacent to the line between Saskatoon and Calgary, now completed, your directors have sold large quantities of land, on which the increase in cultivated areas, since the railway was built, is phenomenal. At Rosetown, to take one example, which has only since the close of the present fiscal year been placed under the Operating Department, three elevators have already been built to receive the grain now being threshed. The land sales during the past year were 116,662 acres, and realized $1,091,722.37—an average of $9.36 an acre. Whilst the acreage sold was less than that of the previous year, the average price realized has been increased by $1.04 an acre. Very satisfactory sales have been made since the close of the fiscal year at still higher prices, and negotiations are now going forward for numerous sales at further enhanced values. The increase in facilities for the production of grain, cattle and other farm product has the double advantage of increasing the demand for lumber, and other building materials, the manufacture of which, at various points on your railway, becomes each year a more important traffic factor. At Fort Frances large pulpwood and paper mill industries are being established in connection with the development of the water power at that point; but a notable feature of the recent expansion of the western provinces is the multiplication of general manufacturing plants, chiefly in Winnipeg, where there are now 144 operating factories of all kinds.

During the last five years certain allied companies have been amalgamated with your company, in addition to which a large amount of new mileage has been added to the system in respect of all which an adjustment of the capital stock has been made during the year. During the year £1,027,400 4% land grant bonds were issued on the security of 1,250,000 acres of selected lands, the proceeds of which have been applied to general purposes. Your directors have exercised their authority under the mortgage to redeem part of the issue, and from payments received on land sales have retired £40,000 of bonds, so that the liability is now £987,400 or $4,805,346.66. Additional car trust obligations were incurred amounting to $2,500,000 to provide the necessary equipment of all kinds to meet the requirements of traffic. Obligations incurred for the same purpose were repaid to the extent of $2,350,000 during the year, so that the liability on this account has been increased by only $150,000.

In pursuance of your directors' policy of keeping pace in every way with the development of each section of country served by your railway, it has been necessary to incur further large expenditures in maintaining and improving the physical conditions of your property as a whole. At Port Arthur additional docks and sheds for the accommodation of both passenger and freight traffic carried over the Great Lakes have been constructed. Interests closely allied with your railway are building a palatial hotel in close proximity to your station at Port Arthur, which will be ready for next summer's tourist business. Industrially the city continues to make satisfactory progress. The Atikokan Iron Co.'s furnaces are continuing to produce an excellent quality of pig iron, the ore for which is hauled by your railway. The construction of an extensive shipbuilding plant within the city's limits has been started; and other enterprises requiring large quantities of iron for the western market will be commenced shortly. In Winnipeg the completed Fort Rouge shops have proved of great value in the economical maintenance of equipment. The Fort Garry station, in which the Dominion Government and G.T.P.R. will be your tenants, is nearing completion, and will, it is expected, be in full use next spring.

The connection of your railway at Fort Frances with the Duluth, Rainy Lake & Winnipeg Ry. has induced a satisfactory traffic from the middle western States through Duluth. This connection gives to your railway a much longer haul than heretofore from the growing passenger and freight business originating in the U.S. The lines under construction in Alberta will furnish abundant traffic immediately they are opened; for in the central and southern parts of that province the need for additional railways has been strongly represented to your directors. To the north of Edmonton and in the extensive Peace River District there is already the nucleus of prosperous agricultural settlement; and a general trade throughout a territory five times as large as the United Kingdom, at present without railway service.

The accounts and statistical tables appended to the report are submitted by D. B. Hanna, Third Vice-President, as follows:

GENERAL BALANCE SHEET.

ASSETS.

Cost of railway and equipment		$116,260,250.61
Acquired securities (cost)		5,725,060.21
Advances to other companies		1,420,423.62
Advances to lines under construction and terminals at Winnipeg		4,667,128.76
Value of material and supplies on hand	$1,347,631.60	
Due from agents, station balances, etc.	418,113.34	1,765,744.94
Deferred payments on land sales	7,273,229.58	
Cash with National Trust Co., account of land sales	4,302,637.08	11,575,866.66
Cash on hand		982,534.64
		$142,397,009.44

In addition to the above assets the company owns 1,398,013 acres of land in Manitoba and Saskatchewan.

LIABILITIES.

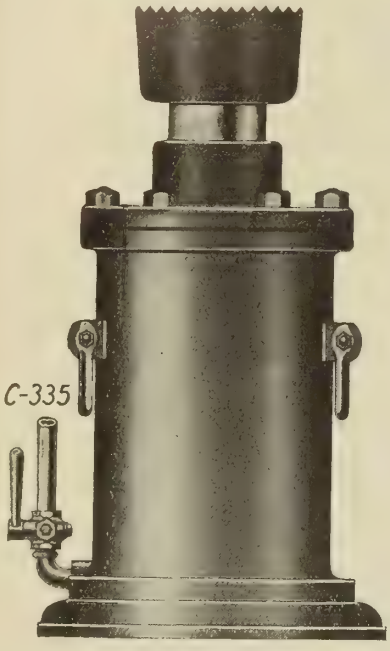
Compressed Air-Jacks



For short lifting around car and repair shops and manufacturing plants.

Rand Jacks are built in several styles from 4 to 30 thousand pounds capacity.

All of the latest construction, fitted with safety check valves for holding the load if the hose becomes detached or burst.

We carry in stock or can make quick delivery of all compressed air appliances and Rand Air Compressors.

TRAINING FOR PROMOTION

The most practical way for ambitious employes to secure promotion is through the Courses of Training of the International Correspondence Schools, of Scranton, Pa. These Schools have special contracts with over 200 American railroad companies for the instruction of their employes. The I. C. S. Railway Courses cost in their preparation over $35,000. These Courses have been written by the best experts in the country anl are edited after a manner that 18 years' experience in training ambitious men for promotion has proved to be the most practical and efficient. The I. C. S. own seven special instruction cars which travel over different railroads for the purpose of assisting in the instruction of the I. C. S. student-employes. The Railway Courses contain over 1,200 pages and over 600 illustrations. The following subjects are included:

Air-Brake Pumps, Triple Valves and Brake Valves, Air-Brake Troubles, Operating and Testing Trains, Foundation Brake Gear, Air-Signaling System, High-Speed Brake, Locomotive Boilers, Boiler Attachments, Heat and Steam, The Locomotive, Valves and Valve Gears, Locomotive Management, Breakdowns, Train Rules, Vauclain Compound Locomotives, Cross-Compound Locomotives, Tandem and Balanced Compound Locomotives, New York Air-Brake Pumps, New York Triple Valves and Brake Valves, New York Air-Brake Troubles, Train Operation, New York Foundation Brake Gear, New York Air-Signal and High-Speed Brakes, Car Lighting, Car Heating, Electric Headlight, Arithmetic, Westinghouse Air-Brake.

No other school has the equipment or Courses anywhere equal to the I.C.S. If you really wish to secure promotion make some definite attempt to get it. It puts you under no obligation to use the coupon. The advice and information it brings are free. **MAKE A START NOW.**

SUMMARY OF EQUIPMENT.

	June 30, 1909.	June 30, 1908.
Locomotives	346	290
Sleeping and dining cars	39	35
Passenger coaches	164	122
Baggage and mail and express cars	72	70
Business cars	7	6
Freight, refrigerator and stock cars	9,465	8,065
Conductors' vans	118	104
Boarding, tool, auxiliary cars, steam shovels and snow equipment	355	126

The total number of miles of railway owned and operated, including leased lines, at June 30, was 3,140.1, located as follows: Ontario, 353.7; Manitoba, 1,522.1; Saskatchewan, 1,006.4; Alberta, 214.2; Minnesota, 43.7. The average mileage operated during the year was 3,013.

The report was unanimously adopted and the directors re-elected, as follows: W. Mackenzie, President; D. D. Mann, Vice-President; Z. A. Lash, K.C., F. Nicholls, Toronto; R. M. Horne-Payne, London, Eng.

Railway Rolling Stock Notes.

The G.T.P.R. has received four baggage cars from Rhodes, Curry Co., Ltd., Amherst, N.S.

The Intercolonial Ry. has ordered 10 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.

The C.P.R., between Oct. 14 and Nov. 15, ordered at its Angus shops, Montreal, ten D-10 locomotives, four wing plows and two flangers.

The Michigan Central Rd. has ordered five Pacific type, 10 consolidation (236) and one consolidation (274) locomotives from the Montreal Locomotive Works.

The Canadian Locomotive Co., Kingston, Ont., has delivered two mogul locomotives to O'Brien, Fowler and McDougall, G.T.P.R. contractors, Fort William, Ont.

The Intercolonial Ry. has ordered six baggage cars from Rhodes, Curry Co., Ltd., Amherst, N.S., and 10 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.

The Temiskaming and Northern Ontario Ry. has recently added to its equipment, two switching, two passenger and four freight locomotives, all from the Canadian Locomotive Co., Kingston, Ont. Details of these locomotives have been published in previous issues.

The Montreal Locomotive Works, between Oct. 23 and Nov. 18, delivered eight locomotives to the C.P.R., one to the Pacific Coast Coal Mines, Ltd., two to the Michigan Central Rd., and one to the New Canadian Co., the latter being for the Atlantic Quebec & Western Ry.

The C.P.R., between Oct. 14 and Nov. 15, received the following additions to rolling stock.—186 box cars, one refrigerator, one baggage car, two baggage and express cars, one colonist car, two store supply cars, four flangers and four M-4 locomotives from its Angus shops, Montreal; five vans from its Farnham shops, Que., and four D-10 locomotives from the Montreal Locomotive Works.

The C.N.R., between Oct. 15 and Nov. 15, received the following additions to rolling stock:—one baggage car and three cabooses from Rhodes-Curry Co., Amherst, N.S.; three first-class coaches from the Silliker Car Co., Halifax, N.S.; three consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont., and three sleeping cars from the U.S.

The G.T.P.R., we were advised Nov. 2, had then outstanding orders for rolling stock, for delivery in 1910, as follows:—700 box cars, 200 stock cars, 200 refrigerator cars and 300 flat cars, with the Canada Car Co., Montreal; and five snow plows, ordered in the U.S. A number of passenger and freight cars are still to be received from the Canada Car Co., and Rhodes-Curry Co., on 1909 delivery.

The Temiskaming and Northern Ontario Ry. has ordered 50 forty ton steel underframe box cars from the Dominion Car and Foundry Co., Montreal, of which the following are the chief particulars:

Length, over all	37′ 9½″
Length, inside	36′ 0″
Width, over all	9′ 10⅜″
Width, inside	8′ 6″
Height, over all	14′ 6″
Height, inside	8′ 0″
Axles	N. S. Steel & Coal Co.
Bolsters, truck	Simplex.
Brakes	Westinghouse.
Brake beams	Simplex.
Brasses	Canadian Bronze Co.
Couplers	Tower, 5″ by 7″
Door fastenings	National Mall. Castings Co.
Journal boxes	McCord & Co.
Side bearings	Susemihl.
Trucks	Arch bar.
Wheels	Cast iron.

The Baldwin Locomotive Works has just completed for the Atchison, Topeka & Santa Fe Ry. the most powerful passenger locomotive now in use. Apart from its tender it weighs 376,450 lbs. and is 65 ft. long. The tender carries 12,000 gallons of water and 4,000 gallons of oil, which will be used as fuel. The length of the locomotive and tender is 105 ft. The tractive power of the locomotive is 53,000 lbs. There are five pairs of driving wheels, 73 ins. in diameter, working in sets of two, the locomotive being of the Mallet articulated type. The locomotive is the first for passenger service to be built of this type, and is the first to combine feed-water heater, superheater, and reheater in one machine. Its firebox is built on an entirely new plan which eliminates staybolts.

The Silliker Car Co., has been awarded a gold medal for its exhibit at the Nova Scotia exhibition, Halifax.

Lord Northcliffe on the I.C.R.

Lord Northcliffe, who is better known as Sir Alfred Harmsworth, proprietor of a number of English newspapers and periodicals, and who is largely interested in Newfoundland, where he is operating as the Anglo-Newfoundland Development Co., went over the Intercolonial Ry. from North Sydney to Montreal early in November and gave out an apparently prepared interview condemning the railway in sweeping terms. Among other things he said:—

"The Intercolonial Railway seems to me like a chain round the neck of this fair part of the Empire. It is a warning to any one like myself, who sometimes indulges in the dream of state ownership of British railroads. With its army of officials, its late trains, its antique locomotives, it reminds me of the railroads of Spain, which are a good deal quicker than those of the Intercolonial. I have had five years' experience of the Intercolonial now and have not yet arrived promptly at any point at which I have aimed. I see that some of your papers call it 'the people's road.' They must be a strange sort of people if they are satisfied with it. I hope to escape it next year on my way to Newfoundland by going by yacht from Montreal to Point aux Basque, or to the port we are making at Batwood, Nfld."

Lord Northcliffe said he hoped, with a fair amount of luck, to arrive in Montreal by Friday. But as the train pulled out of the station he said: "When you travel by the I.C.R. you never can tell. Our car is provisioned for a month."

The extravagance of Lord Northcliffe's tirade shows evident animus. A moderately worded criticism might have secured some credence, but his absolute unfairness and untruthfulness is evident, and savors plainly of yellow journalism. Lord Northcliffe has not had very much experience of travelling on the I.C.R., and is not therefore a competent authority in regard to it or its service. As far as officials are concerned—and by the term "officials" we mean officials, not ordinary employes—the I.C.R. has no "army," and it may be remarked here that the I.C.R. officials generally are notoriously underpaid, getting much less than they would on a line owned by a company. In regard to employes, including station staffs, etc., there is no doubt whatever that the road has been and perhaps still is overmanned, owing to political pressure on whatever government may be in power, but we believe the new Managing Board is doing its best to remedy this, though it has met with much opposition and unfair criticism from local politicians and newspapers.

The writer of this article has travelled over the I.C.R. for a number of years, and during the current year covered more miles on it than Lord Northcliffe has done in all his Canadian trips put together, and has no hesitation in saying that the charge about general lateness of trains is altogether unfounded. The records of train movement will substantiate this denial. The Ocean Limited, which runs between Montreal and Halifax, both ways, in summer, is an excellent train in equipment and in speed, making splendid time with some few exceptions in the most crowded portion of the rush season. The Maritime Express, an all the year round train, also gives good service. The branch line services are as good as the traffic warrants.

The allegation about "antique locomotives" is absurd. Every road has some antiques which are used for branch line or other suitable service. But the I.C.R. management has no reason to be ashamed of its motive power, which is, generally speaking, up-to-date and in good condition.

There are some features of the I.C.R. which Lord Northcliffe carefully avoided, such as its excellent, and for the greater portion at least of its main line route, dustless roadbed, and its dining car service, which is not excelled in America at the price charged.

Lord Northcliffe may have struck bad luck in going over the I.C.R., as travellers on any road are liable to do occasionally. As a matter of fact it appears that when going east he was delayed by washouts in New Brunswick, but notwithstanding this he was put into North Sydney in time to take the steamship Bruce to Newfoundland. On his return trip, which resulted in his lurid interview, the steamship was several hours late in reaching North Sydney. The regular train was held three-quarters of an hour, but was then dispatched as it would otherwise have been unable to make connections and a number of non-steamship passengers would have been greatly inconvenienced. In consequence of this late arrival at North Sydney he had to remain there over night, and when he reached Truro he had to wait to connect with the Maritime Express for Montreal, where he arrived 59 minutes late, 14 of which were occupied in watering and other attentions to his private car.

We believe the Managing Board is handling the I.C.R. as well as it is possible to do under existing conditions, but the members are no doubt hampered in many ways. We are convinced that the line could be better and more economically run under private ownership, but that is because of the absolute impossibility of divorcing a government controlled railway from political influence and not owing to any fault of the Managing Board or of the officials generally.

Edmonton Radial Ry.—The net revenue from operation in Oct. was $10,224. The railway was put into operation, Nov., 1908.

Hamilton St. Ry.—Total earnings for nine months ended Sept. 30, $251,933.01, against $235,915.64 for same period 1908.

Toronto Ry.—Gross earnings for Oct., $332,577.10, against $306,457.10 for Oct., 1908.

At a recent conference at Ottawa, it was decided that the Canadian Brotherhood of Railway Employes would amalgamate with the Canadian Federation of Labor.

A. J. Mitchell, Comptroller Mackenzie, Mann & Co., Ltd., who was operated on in Toronto General Hospital for appendicitis towards the end of October, is convalescing satisfactorily and was able to go out for a drive on Nov. 25.

The Howe Sound and Northern Development Co., Ltd., has been incorporated under the B.C. Companies Act with a capital of $500,000, for the development of lands in the Pemberton Valley and elsewhere, and in connection therewith to own and operate steam and other vessels, and to carry on the business of merchants, carriers by land and water, shipowners, warehousemen, wharfingers, forwarding agents, etc.

"Pardon my ignorance," said the lady passenger to the captain, "but how do you manage to find your way across the trackless ocean?"

"By means of the compass, madam," answered the captain, "the needle invariably points to the north."

"But," queried the lady passenger, "suppose you wish to go south?"

"I hope," said the captain, addressing the passengers on a small coasting steamer, "that all of us 25 will have a pleasant trip." Just then the soup appeared. "I trust, too, that we—er—24 will reach port much benefitted by the trip, and as I look on your—22 smiling faces, I am sure that this group of—er—17 will be a happy family. Will all of you—er—13 that I see at the table join me in drinking a toast to our coming trip? We seven, that is three—well, you and I, my dear sir—here steward, clear away these dishes."

C. P. R. Ambulance Association Work.

For giving prompt assistance in case of accidents there is an organization called the Canadian Pacific Railway Centre of the St. John Ambulance Association, which includes in its scope all C.P.R. employes. Its object is not to rival, but to assist, the medical profession. First aid is quite distinct from the work of the surgeon, for where the work of the ambulance man ends that of the surgeon commences. Lord Strathcona, Sir Thos. Shaughnessy and R. B. Angus are its patrons; D. McNicoll is president; J. W. Leonard, H. H. Vaughan, W. E. Fowler and Dr. G. P. Girdwood, Vice Presidents; L. R. Johnson, Chairman, and S. A. Gidlow, Secretary Treasurer.

During a recent three months first aid was rendered to more than 100 personal injuries at the Angus shops, Montreal, including fractures to different parts of the body, dislocations, electric shocks burns, scalds, severed arteries, injuries to the eye, and many more or less severe accidents. Many cases of blood poisoning have undoubtedly been prevented by having at immediate call men who can treat wounds by antiseptic dressings before bleeding has entirely stopped, as it is after bleeding has stopped that bacteria find their way into an open wound. In cases of severed arteries there was an undoubted saving of life, as it is practically impossible for medical aid to reach the patient in time to save life in case of arterial bleeding. A great deal of suffering has been avoided by treating for shock immediately after the accident has occurred. Quite a number of men at the Angus shops have obtained certificates of qualification certifying to their ability to give first aid in any kind of accident likely to occur in connection with their occupation.

All men who work with tools or machinery are peculiarly liable to cuts, burns, sprains broken bones and injuries generally that may or may not be dangerous, but are at least painful and inconvenient. Therefore, the C.P.R. considers it is well for men engaged in such occupations to know something of the way in which such injuries should be treated in the interval which must elapse before medical attendance can be ordinarily obtained. The knowledge how to bandage a sprain, how to reduce pain from a burn, how to handle a broken limb, and how to carry a man unable to walk, means a great deal, both to the injured and the company. Instruction in first aid gives a man an intelligent conception of the nature of his injury, and by reason of the spreading of this important knowledge the old custom of applying cobwebs, tobacco juice, greasy waste and other filthy things to open wounds would not be allowed in any C.P.R. workshop. Ambulance instruction thus systematically organized means a saving of many lives, and much unnecessary suffering. It is the intention of the company to organize ambulance classes throughout its entire system.

The names of the steamboats Rita and Wanda have been changed by orders in council to Birnie and Tenno respectively.

At the time of the construction of the North Sydney Branch Ry., now part of the Intercolonial Ry., the town of North Sydney provided a right of way and land for station grounds, terminals, etc. For this purpose a sum of money was borrowed on debentures, of which $3,200 is at present outstanding. Under an act passed last session of the Nova Scotia Legislature, the town council is authorized to borrow $3,200 necessary to retire the debentures, pending the settlement of the council's application to the Dominion Government for a refund of the amount originally provided.

Telegraph and Cable Matters.

A. MacNaughton, one of the oldest employes of the G.N.W. Telegraph Co., died at Montreal, Nov. 1, aged 71. He had been connected with the telegraph service for 58 years.

The Western Associated Press complaint against the C.P.R. telegraph tolls was heard before the Board of Railway Commissioners, at Winnipeg, Nov. 15, and judgment reserved.

W. C. Furness, Local Manager G.N.W. Telegraph Co., London, Ont., who has not been well for some time, is reported to be seriously ill at Victoria Hospital, and his recovery is considered doubtful.

The C.P.R. Telegraph department has announced that cable rates from Manitoba to Great Britain and European countries have been reduced three cents a word.

The G.N.W. Telegraph Co.'s line between Goderich and Kincardine, Ont., has been purchased by the Ontario West Shore Ry., for use as a telephone line, chiefly in the operation of its cars. It is also intended to adapt it for public use.

One of the witnesses in giving evidence before the West Indies Commission, sitting at Montreal, recently stated that the cable service with the West Indies was bad and expensive, and that it was about as quick to communicate by letter.

H. Smith, local manager Great North Western Telegraph Co., at Berlin, Ont., was reported to be missing, recently, and it was stated that a considerable sum of money was also missing. The company is reported to have offered a reward for information leading to his arrest.

The control of the Western Union Telegraph Co. has passed into the hands of the American Telephone and Telegraph Co. The Western Union Telegraph Co. operates 2,638 miles of lines, with offices at 219 points in Canada, and is one of the largest holders of stock in the G.N.W. Telegraph Co.

Press reports state that a number of wireless telegraph stations are to be erected across Canada, those which it is proposed to take in hand almost immediately are to be situated at Port Arthur, Ont., Winnipeg, Man., Regina, Sask., Calgary and Edmonton, Alta. It is anticipated that the stations at Port Arthur and Winnipeg will be completed and in operation by Jan., 1910.

W. Marconi, while in Montreal recently, is reported to have said that the company was looking to the Government, acting through the Board of Railway Commissioners, to grant the same privileges to his company on the land lines through Canada, as the cable companies have, and should those terms not be accorded, the company would have to establish its own land lines and stations.

The Direct Cable Co. is reported to be looking for a suitable site for the landing of a cable in the neighborhood of St. John's, Nfld. If such a site can be settled on, the Government will be approached for permission to land, and a suitable office building will be erected in St. John's. The company's cable is at present landed at Halifax, N.S., but it is stated that by locating in Newfoundland, a higher speed and an improved service can be obtained.

I. McMichael, Vice President and General Manager Great North Western Telegraph Co., Toronto, while in New York recently, was the guest at dinner of E. J. Nally, Vice President and General Manager Postal Telegraph Cable Co., to meet H. A. Tuttle, Vice President and General Manager North American Telegraph Co., in remembrance of the time when all three were telegraph workers in Minneapolis, Minn., in the early eighties.

Press reports state that a petition is to be sent to the C.P.R., asking that a telegraph line be constructed and operated to Cobalt, via Temiskaming station, at the foot of the lake, in opposition to the existing line operated by the Temiskaming and Northern Ontario Ry., on account of the alleged high rate at present charged. It is said that should the petitioners not succeed in getting either of the railways to erect an independent commercial line, an application may be made for a charter for a new company with that object in view.

A committee of the Winnipeg Board of Trade called on J. Kent, Manager, and B. S. Jenkins, General Superintendent, C.P.R. Western Telegraph Lines, recently, in connection with complaints regarding telegraph and cable tolls from points west of Fort William. The cable rate to Europe, which was reduced from 37 to 34 cents a word, last month, is considered to be too high, and the committee proposed a 30c. rate, and also suggested the reduction of the telegraph rate to eastern points, from 75c. to 60c. for 10 words. It was promised that consideration would be given to the proposals.

W. E. Earle, Manager of the Western Union Telegraph Office, North Sydney, N.S., recently celebrated his 50th anniversary as a telegrapher. He was born at St. John's, Nfld., in 1847, and commenced his telegraph service, in a casual manner, in 1858, with the New York, Newfoundland and London Telegraph Co., at the time of the laying of the first Atlantic cable. He entered the service permanently, Oct. 27, 1859. In 1866 he was appointed manager of the repeating station at Grandys Brook, Nfld.; in 1868, manager of the call station, Placentia, Nfld.; in 1869, assistant manager main cable station, Port Hastings, N.S.; 1875, assistant manager North Sydney, for Western Union Telegraph Co., which had assumed control of the old lines; 1899, on the death of the manager, he was appointed to succeed, which position he still holds.

The opening of the recently inaugurated institute for the treatment of tuberculosis at Montreal, by His. Majesty, by cable, took place successfully. J. Kent, Manager C.P.R. telegraphs, explained recently that two circuits were used, one for the exchange of messages between the King and the Institute, these being relayed at Waterville, Ireland and Canso, N.S., and the other circuit connected through from Chichester, Eng., where the King was staying, to the Institute by means of automatic repeaters, the land lines in Great Britain working through repeaters into one of the Commercial Cable Co.'s cables at Waterville, and re-translated at Canso into one of the C.P.R. wires which was continued to the Institute. The total distance covered was 4,225 miles. The signal was received in Montreal about four o'clock, thus starting the machinery which unfurled the flag and opened the doors.

The dispute between the Newfoundland Government and the Commercial Cable Co., as to the latter's rights and privileges in respect to the landing and operating of its cables in Newfoundland, has not yet been ended. By its agreement with the previous Government, the company claims it has the right to land cables in the Colony, and that the Government is compelled to hand over, for 25 years, all messages collected by its land line system, and that a yearly payment is to be made by the Government for the establishing of an office at St. John's, which, but for this provision, would not have been established, as the company was debarred from dealing directly with the public. It also claims that all materials required by it be imported duty free. The Government view, appears to be that the agreement mentioned is not valid until ratified by legislation, which ratification has not taken place, and that it is fully justified in taking time to consider the matter before embarking on such legislation. The Premier recently stated that the Government has not felt justified in granting, by Act of Parliament, the further concession attempted to be given in the agreement of 1909, namely, a monopoly for 25 years and freedom from taxation, while it is taxing the Anglo-American Co., $20,000 a year. The Anglo-American Co., until recently, had the sole rights of operating telegraphs to Newfoundland, the agreement having come to an end by the effluxion of time.

Dominion Government Telegraphs.

The report of the Public Works Department for the year ended Mar. 31, shows that the amount expended on Government telegraph lines was $535,480.12, and the receipts, $113,175.34. The General Superintendent states that there are 6,973.75 miles of land lines and 259 knots of cables. There are 401 offices, at which were received and dispatched 149,649 messages. There was constructed, during the year, an extension of the Eskasoni branch line on Cape Breton Island, N.S., to the Grand Narrows, 16 miles. The Grand River branch to Enon, also on Cape Breton Island, was extended 12 miles towards Victoria Bridge, and it is proposed to extend this line to Gaberous. One mile of cable was added, to connect with the new buildings of the Main a Dieu-Scatterie Island cable. In Quebec, the Chicoutimi-St. Charles line was extended to Peribonka, and a new line was completed from Baie St. Paul to St. Placide, 8.5 miles. In Alberta, a line is under construction, from Athabasca Landing, for 70 miles towards Peace River. Contracts for the supply of poles and material for the extension of this line for 100 miles have been let. Extensions in British Columbia have been completed, as follows: Vancouver Island and Salt Spring Island line to Galiano Island, 20 miles; Nanaimo to Gabriola Island, 18 miles; Courtney to Campbell River, 40 miles; Victoria to Metchosin, 14 miles.

Among the Express Companies.

W. J. Kirby, formerly in the Dominion Ex. Co.'s service, has been appointed Great Northern Ex. Co.'s agent at Vancouver, B.C., vice F. A. Korner.

C. Rattray, a former agent for the Dominion Ex. Co. at Victoria, but who has for the past few years been in private business, died in California recently.

W. S. Burgess, when charged, Nov. 1, with the robbery of the Canadian Ex. Co.'s office at Truro, N.S., in the early part of the year, made a full confession. Of the $14,000 stolen, it is stated that, at least, $10,000 has been recovered.

T. Thompson, employed at the C.P.R. station, Headingly, Man., was arrested recently charged with theft of a book of Dominion Ex. Co.'s money orders, and also with having forged and obtained payment of several orders for various sums.

Scott Griffin, Manager Canadian Northern Express and Telegraph Companies, on his recent tour of inspection over the C.N.R. western lines, stated that several extensions were in contemplation throughout the west, following the extension of the railway.

J. H. Moore, heretofore acting route agent Western and Southern Divisions Canadian Ex. Co., has been appointed Line Inspector, reporting direct to the Vice President and Manager. No appointment will be made to the position of acting route agent.

WILLIAM JESSOP & SONS, Limited, SHEFFIELD, ENG.
CHAS. L. BAILEY, Agent, 80 BAY STREET, TORONTO, ONTARIO

Ill., have protested against the charges made by express companies on ladies' hats. It is contended that they should be charged by weight and not by size, as at present. The matter has been set down for hearing before the Illinois Railroad and Warehouse Commission, on Dec. 9.

The steamships Cairo and Heliopolis, the purchase of which for Canadian service has been mentioned in earlier issues, are to be taken to the Clyde shipyards, Scotland, where several important structural alterations will be made, so as to fit them for the transatlantic trade. It is stated that they will run between Hamburg, Rotterdam, Cherbourg, and an English port, probably Southampton, and Halifax, N.S. These vessels were built in Glasgow, Scotland, in 1908 for the Mediterranean service. Their dimensions are as follows: length, 545 ft.; breadth, 60 ft. 3 in.; depth, to shelter deck, 38 ft.; tonnage, 11,000, with engines of 18,000 i.h.p.

Grain Elevator Notes.

Melfort, Sask., has now five elevators, with a total capacity of 155,000 bush.

The Alberta Grain Co., Ltd., has increased its capital stock from $100,000 to $300,000.

Kennedy & Co., Toronto, are erecting a grain elevator at Pontypool, Ont., with a capacity of 10,000 bush.

The Western Terminal Elevator Co., Winnipeg, has increased the number of its directors from five to seven.

The Lake of the Woods Milling Co. has declared a bonus of $10 a share, payable out of the surplus profits, Nov. 8, to holders of common stock on record Oct. 30.

The Fillmore Farmers' Elevator Co., Ltd., has been incorporated under the North-West Territories Companies Ordinance, with offices at Fillmore, Sask.

The ratepayers of Swift Current, Sask., have passed a bylaw, granting $10,000 to J. W. Ford, for the erection of an elevator and flour mill there.

The Cummings Grain Co., Ltd., has been registered at Edmonton, Alta., under the North West Territories Ordinance respecting foreign companies, with head office at Calgary, Alta.

The National Elevator Co., Ltd., with head office at Winnipeg, has been registered at Edmonton, Alta., under the North West Territories Ordinance respecting foreign companies.

Included in the extensive scheme of improvements proposed by the Montreal Harbor Commission, at that port, is the construction of an elevator of 2,000,000 bush. capacity, with conveyor system as applied to the existing elevator there.

The Thunder Bay Elevator Co., which has recently completed the construction of a large elevator plant at Port Arthur, Ont., is reported to be considering the question of duplicating the plant during next year.

The Western Terminal Elevator Co.'s new elevator at West Fort William, Ont., received its first grain Nov. 8. It has a storage capacity of 900,000 bush., and can load 65 cars a day. The cost of the construction is about $300,000.

The Saskatchewan Premier visited Ottawa early in November, and took the opportunity of urging his views of the question of the Dominion ownership of terminal elevators on the Government, considering such to be the first step towards the better regulation of grain inspection in the west.

The National Elevator Co.'s plant, which is under construction at Port Arthur, Ont., by the Barnett-McQueen Co., will, it is stated, by the contractors, be of 50,000 bush. capacity as a start and will not be a shipping elevator. It is intended to deal with poor grades of grain only, and a milling plant will be installed to convert the grain into cattle feed. etc.

The Port Arthur Elevator Co., in response to a request that, like the other local elevators, it operate on Sundays, is reported to have stated that its plant is large enough to handle all the grain that is offered, during the six days of the week, and that the operation on a seventh would be an unnecessary expense.

Speers, Ross, Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $50,000, and office in Winnipeg, to own, operate and construct grain elevators, warehouses and grain handling facilities, and to conduct a general grain and grain elevator business. The provisional directors are: R. J. Speers, Wilkie, Sask.; L. Kennedy, W. S. King, D. M. King, T. J. Murray, Winnipeg.

At a recent meeting of the Grain Growers' Association, at Winnipeg, a resolution was passed urging on the grain growers to use every means to impress upon the Government the need for legislation having for its object the establishment of Government owned storage elevators, and to support only those candidates who may present themselves for election to the Legislature, who will give a pledge to endeavor to bring about such legislation.

Leitch Bros. Flour Mills, Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $400,000, and office at Oak Lake, Man., to carry on a general milling business, and in connection therewith to erect and operate grain elevators, and carry on a general grain elevator business in all its branches. The provisional directors are: A. Leitch, Cranbrook, B.C.; M. Leitch, M. Moore, G. B. Connor, and J. Black, Oak Lake, Man.

The Continental Grain Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $250,000 and office at Winnipeg, to construct, own and operate grain elevators, sheds, stores and warehouses for the elevating, reception and storage of grain and other produce, and to carry on a general grain and grain produce business. The provisional directors are: J. S. Lovell, W. Bain, R. Gowans, H. Chambers and R. M. Coates, Toronto.

A sample of rapid and economical grain handling took place at the Government Port Colborne elevator recently, when the steamboat, Keyport, was loaded with 2,500 tons of wheat in 1 hr., 15 mins. The grain was drawn from the storage bins, elevated 175 ft., passed through the automatic weighing machine, transferred over the conveyors and discharged into the vessel, loading her right up without hand trimming. The mechanical trimmers, with which this elevator is equipped made this possible, and it is said that the total cost for power and labor for loading this vessel was less than half a cent a ton.

Since the amendments made to the Manitoba Grain Inspection Act last year, and the placing of the eastern transfer elevators under Government supervision, the weighing facilities have all been overhauled, in an endeavor to correct, or place the responsibility for the shortage in outturns, which has been of such frequent occurrence. The following figures show the returns for Sept. and Oct.:—

	B. lading, bush.	Outturn, bush.	Shortage, bush.
Wheat	8,470,287-30	8,463,925-40	5,956-46
Oats	2,377,311-08	2,375,096-21	2,214-21
Barley	245,121-14	245,189-08	*67-42
Flax	74,823-04	74,738-20	64-40

*Overage.

The grain handling plant which the C.P.R. has installed at Vancouver, B.C., is capable of sacking twenty 3-bushel sacks a minute. The cars are received at the bins and unloaded into a large steel receiving hopper, with a capacity of 1,000 bush. or one carload, by means of an automatic electric power shovel. The receiving hopper contains the boot of a vertical elevator, which is 75 ft. high; the elevator consists of a 36 in. belt, to which steel buckets are attached at intervals, and is operated by a 30 h.p. motor, connected by rope to the first countershaft. There are four bins, each 24 by 40 by 50 ft. high, with a capacity of 16,000 bush. Beneath the bins are four automatic sackers and weighers.

There appears to be a probability that the terminal elevators at the head of the lakes will be operated in the near future by the Manitoba Grain Growers' Association. Some proposals to that effect have been made to the C.P.R., and in response thereto, a letter from W. Whyte, Second Vice President C.P.R., to the following effect, has been given publicity:—"The season is so far advanced now that it would not be convenient to lease any of our terminal elevators this year. In any event we would not care to lease a single elevator, and I should be glad to know if you have any proposition to make in respect to taking over all our elevators at Fort William, so that if we decide to lease them all, the negotiations could be undertaken and arrangements completed to handle next year's crop." For the purposes of an investigation which took place before the Board of Railway Commissioners last July, into the question of elevator operation, a valuation of $2,398,947 was placed on the C.P.R. elevators at Fort William, and it was stated that the earnings represented a return of about 3% on the capital outlay. From this, it is assumed that the Grain Growers' Association will be able to secure a lease on moderate terms, should the C.P.R. be willing to lease them.

Western Elevator Capacity.

The Department of Public Works in its report for the year ended March 31 states that for the storage and handling of the western grain crop there were 1,341 interior elevators, 36 warehouses and 13 terminal elevators having a total capacity of 58,535,700 bush. On the C.P.R. there were 919 elevators and 2 warehouses having a total capacity of 28,752,000 bush.; on the Canadian Northern Ry. 358 elevators and 11 warehouses with a capacity of 10,231,000 bush.; on the Midland Ry. of Manitoba and the Brandon, Saskatchewan and Hudson's Bay Ry., 18 elevators with a capacity of 520,000 bush.; on the Alberta Ry. and Irrigation Co., 10 elevators with a capacity of 274,000 bush.; Ontario terminal elevators, C.P.R., 11 elevators with a capacity of 11,758,700 bush., and the Canadian Northern Ry., two elevators with a capacity of 7,000,000 bush. During the past season, additional elevators have been constructed along the Grand Trunk Pacific Ry. as well as along the older lines. The harbors on Georgian Bay have now a combined elevator capacity of 7,499,000 bush. 4,000,000 of which is at Midland and Tiffin. The C.P.R. has under construction at Victoria Harbor a large terminal elevator which it is expected will be ready and thoroughly equipped for the handling of grain by the summer of 1910. A marked increase in traffic is also rapidly developing at Goderich, which has two elevators with a combined capacity of 700,000 bush. Kingston and Prescott have an elevator capacity of 1,506,000 and 1,000,000 bush. respectively, and the capacity at Montreal is 4,081,000 bush.

ASSISTANT SECRETARY, Aubrey Acton Burrows. Secretary and Business Manager, Railway and Marine World.

Montreal Street Railway Co. Report.

The report for the year ended Sept. 30, was presented at the annual meeting, Nov. 3, as follows:

Gross earnings		$3,874,838 51
Operating expenses		2,255,019 20
Net earnings		$1,619,819 31
Interest from M. P. & I. Ry.		55,606 67
Total income		$1,675,425 98
From which deduct:—		
City percentage on earnings	$260,203 42	
Interest	179,724 70	
Rental leased lines	5,821 35	
		445,749 47
Net income		$1,229,676 51
Dividend, 10%		976,332 08
Surplus		$ 253,344 43
From which has been appropriated for:		
Contingent account	$175,000 00	
Fire insurance fund	25,000 00	
		200,000 00
Transferred to general surplus		$ 53,344 43

The gross earnings increased during the year $197,406.06, or 5.37%, the operating expenses $96,625.11, or 4.48%, the net earnings $100,780.95 or 6.63%. The gross earnings continue to show satisfactory increases. The per cent. of expenses to gross earnings is 58.20 against 58.69 for the previous year. The increased payment to the city for the percentage on earnings being $17,772.27, 7.33% over the previous year.

Your directors appropriated during the year from the surplus earnings, $175,000.00 for renewals to property. This amount added to the balance of $29,352.72 carried forward from previous years, made a total credit to the account of $204,352.72. Against this amount there has been charged during the year $173,815.61. Your directors appropriated the sum of $25,000.00 from the surplus earnings as a credit to the fire insurance fund. The interest on the investments for the year amounted to $21,731.93. The amount now at the credit of this fund is $470,109.45.

The premium on the last issue of new stock paid up during the year, amounting to $142,684.50, has been credited to the general surplus account. The amount of $59,027.07, representing the taxes on poles, rails, wires and machinery due the city, in accordance with the recent judgment up to 1907, has been debited to this account. The amount due for the last two years has been charged against operation. The company has expended during the year on construction account, $121,865.58, on equipment account, $43,837.41 and on real estate and buildings, $23,745.17, a total of $189,448.16. Owing to the increase of the system the present shops at Hochelaga are inadequate to take care of the repairs and construction work of the company, and as there is no further property adjoining that can be had, your directors have purchased 75 acres in the north-east end of the city, on which it is proposed to erect the new shops. The purchase of this land will secure for many years to come ample room for all extensions that may have to be made from time to time.

The company having in view the better accommodation for the employes at the different depots have under construction rooms and offices at St. Denis St., St. Henry and Hochelaga stations. These buildings, when completed, will furnish comfortable quarters for the men. The company was again obliged to refuse payment of a portion of the city's accounts for snow removal, owing to the wasteful manner in which the work was carried out. The snow fall according to the McGill records was nearly two feet less than the previous year, but notwithstanding this the city claims to have expended the sum of $208,435.75, an increase over the previous year of $5,901.37, and an increase over two years ago of $77,799.08, with 20.2 inches less snow fall. The increase in street mileage during this latter period was one mile, which at the average cost would only amount to $4,222.48. The company has paid to the city the usual property taxes and percentage on earnings, amounting to $286,085.82, on account of the snow removal $83,158.17, and taxes on poles, rails, wires, etc. machinery for the year $16,941.17, a total of $386,185.16, being an increase of $45,653.43 over the previous year.

The Montreal Park and Island Railway Co.'s earnings have been somewhat disappointing during the year, owing chiefly to the effect of last year's depression in business in the various factories, etc., situated on its lines. The gross earnings remained about the same as the previous year. The operating expenses were higher owing to a larger amount being spent on the maintenance of the property and to the new extensions that have been constructed and operated during the past year. It was not expected by your directors that these extensions would prove immediately profitable, but owing to the growth of the suburbs, and the building up they have [illegible] will induce, it is only a matter of a short period when they will show good earning capacity. The extension of the Sault-au-Recollet line to opposite St. Vincent de Paul was completed during the summer and is now in operation. During the year the company entered into an agreement for a franchise with the town of Rosemont for a period of 50 years. The gross earnings show a gross increase of $2,858.92, the operating expenses an increase of $16,947.10, the net results being $57,057.56 against $71,145.74 for the previous year.

The Montreal Terminal Railway Co.'s gross earnings increased $11,260.86; the operating expenses increased $308.02, and the net surplus for the year was $5,477.08, against a deficit in the previous year of $5,162.12.

At the annual meeting, Nov. 3, the directors were re-elected. The officers and directors for the current year are:—President, Hon. L. J. Forget; Vice President, K. W. Blackwell; Managing Director, W. G. Ross; other directors, Sir H. Montagu Allan, G. Caverhill, P. Galibert, and R. Meighen; Secretary, P. Dubee.

Tube Railways for Toronto.

At the Toronto municipal elections in January the electors will be asked to vote on the question, "Are you in favor of the city applying to the Legislature for power to construct and operate a municipal system of subway and surface street railways, subject to the approval of the qualified ratepayers?"

The proposal came before the council in the form of a letter from a firm of engineers in London, Eng., outlining plans. These were submitted to a special committee and J. W. Moyes, who was one of the principal promoters of the Metropolitan Ry., and who is now constructing the Ontario West Shore Ry., was appointed as Consulting Engineer. After examining the plan as outlined by the English engineers, and looking into the whole matter Mr. Moyes reported to the sub-committee and his suggestions were approved. He recommended the adoption of certain routes which would entail the construction of 3.75 miles of subway, and about 18 miles of surface lines. The cost of the construction of these lines, together with the rolling stock necessary for their operation, is estimated at $4,885,000. This estimate is based upon competitive cash prices for work of a similar character, and for the special equipment. It does not, however, provide for the generation of the motive power, but looks to the purchasing of power from the Hydro-Electric Commission. The cost of construction will be reduced by the utilization of the material excavated in the subways for filling out of the wharves on the bay front to the windmill line. The committee expressed an opinion that the question of the entrance of the radial railways into the city would be rendered easy of solution by the adoption of the proposed lines.

F. H. Probert, Roundhouse Foreman, I.C.R., St. John, N.B., writes: "The information contained in the Railway and Marine World is very useful."

Projects, Construction, Betterments, Etc.

Berlin to Port Dover.—J. S. Clarke, who has been identified with the promotion of electric railways in the vicinity of Brantford, submitted a proposal to the County Council of Waterloo, Nov. 10, for the building of an electric railway from Port Dover to Brantford, passing through Ayr and Roseville to Berlin and Waterloo, with branches to other municipalities in the county. A special committee was appointed to consider the matter and to report at the December meeting. A bylaw is under consideration in Ayr granting a franchise to Mr. Clarke for the construction of the line in that village.

Brantford, Ont.—T. R. Varding, Buffalo, N.Y., has made application to the municipal council of Brantford tp., Ont., for a franchise for an electric railway within the township. Details of the routes were not submitted.

British Columbia Electric Ry.—A contract has been let for the construction of a line about three miles long from North Vancouver up the Lynn Valley. The Paterson Lumber Co. will do the grading and tracklaying and the company will do the overhead work itself. The line will run out to some timber lands which are being developed.

A gang of men was put at work Nov. 1 clearing land in D.L. 118, on the far side of Hastings tp. along the line of the projected extension. Plans and specifications are being prepared, and it is expected that tenders will be called for the construction of the line early in Dec. The projected line will be about seven miles long and will traverse Burnaby tp. At the last meeting of the Burnaby tp. council the question of the construction of one or two lines from Hastings townsite to Port Moody, north of Burnaby Lake, was discussed. One route suggested was from D. L. 206, running along the northern part of lots 135, 141, 144, and 147; and the other was from the townsite to the north road, running on or parallel to the Johnson Road.

The New Westminster City Council on Nov. 3 gave the company permission to construct a temporary track to connect up with its Fraser Valley line, and to construct a temporary shed for use as a station while the new station is being built. The electric work on the line to Cloverdale was sufficiently advanced on the Fraser River bridge Oct. 30 to permit of the passing over it of the electric locomotive, which will be used to further the work of construction. It was expected that the line as far as Cloverdale would be placed in operation by Dec. 1. A. Purvis, the local manager of the line, has opened his office in New Westminster, and has made an inspection of the line. He will have charge of the operation as well as of construction work. A contract has been let, for the construction of five reinforced concrete substations along the line, to T. R. Nickson and Co.

The extension of the Vancouver and Lulu Island Ry. to Eburne has been taken over from the C.P.R. and it was expected to be used for traffic Nov. 15. (Nov., pg. 847.)

Cape Breton Electric Co.—A contract has been let for the erection of a one story stockroom and freight shed, 45 by 60 ft., at Sydney, N.S. (Nov., pg. 847.)

Chatham, Wallaceburg and Lake Erie Ry.—The Board of Railway Commissioners has authorized the construction and operation of a branch line or spur, on several streets in Chatham, by the company.

Grand Valley Ry.—The Simcoe, Ont., town council passed a resolution Nov. 1 granting permission to the company to construct its Brantford-Port Dover line through the town. The President, Chief Engineer and some of the directors were in Simcoe recently. It was stated that the financial affairs of the company were all settled and that the line would be placed under construction at an early date and that it was expected to have it completed by the end of 1910. (Nov., pg. 847.)

Hamilton Street Ry.—A draft agreement has been completed between the company and the city Board of Works for the betterment of the street railway in the city. The new agreement was approved of Nov. 3 and was sent forward to the council for final adoption. The company agrees to reconstruct the lines on a number of the streets, and the city proposes to raise $200,000 for the purpose of repaving the streets upon which the track is to be relaid. The new tracks will be laid with 80 lb. steel. It is provided that work will be gone on with next year. (Sept., pg. 684.)

Hamilton, Waterloo and Guelph Ry.—Application is being made to the Dominion Parliament for an act granting an extension of time for the construction of its lines, and for power to extend its line from Hamilton to Toronto; or in the alternative in part to enter into an agreement with the Hamilton Radial Electric Ry. for a lease of, or running powers over its lines from Burlington to Toronto, for special powers relating to terminals in Toronto, and for special powers to issue bonds for providing for the cost of terminals. The notice is signed by J. Patterson, Secretary.

The company has filed plans in the Registry office at Hamilton showing the proposed route within the county of Wentworth. The route from Dundurn Park to the county boundary was approved by the Board of Railway Commissioners in 1907. The route east from Dundurn Park has not been approved. Skirting the hill at Dundurn Park, the plans show the route crossing the following streets on an easterly angle:—Locke, Crooks, Barton at McGill, Locomotive, Oxford, Queen, Hess, Caroline, Railway, Canon, Bay, Park, McNab, Vine, James on the Copp property and Richter estate, crossing Vine to the Quimby estate. (Nov., pg. 847.)

Hull Electric Co.—A contract has been let for the steel work for the bulkhead at the power house at Lake Deschenes, Que., in connection with the reconstruction of the plant, which was destroyed by fire, Oct. 19. (Feb., pg. 135.)

Kingston, Portsmouth and Cataraqui Ry.—The city council of Kingston, Ont., decided, Nov. 23, that it could not grant a five year agreement for the supply of power to the company. It was, however, finally decided to offer an agreement for five years at $1.20 per killowatt hour, the city to have the right of cancelling it at the expiration of three or four years. (Nov., pg. 847.)

Lethbridge, Alta.—The city council has under consideration a bylaw granting a franchise for the operation of a street railway. The bylaw provides for the granting of an exclusive franchise for 20 years to a company, the company to have completed and in operation 10 miles of line within two years, and a further three miles within six years. If the company fails to operate the lines constructed for a period of four months the city shall have the right to purchase the entire plant, as provided for at the expiration of the contract. The provisions for purchase at the end of the 20 years are that six months notice of intention shall be given, that a board of arbitrators shall ascertain the actual value of the plant at the time, and that this amount plus 10% shall be the purchase price. During the currency of the franchise the company shall pay to the city 1% annually of the gross receipts up to $40,000 and 1% additional upon each additional

$20,000 until the gross receipts amount to $100,000, and a flat rate of 5% upon all receipts over that amount. The bylaw provides for the construction of a line from Westminster Road, westerly along Redpath to Round St., south to London Road and west to the city limits. Other lines are to be constructed as desired, but it is provided that parallel lines shall be at least two blocks apart. The bylaw does not specify any particular company, but simply authorizes the council to make an agreement with a company. It is said that negotiations are in progress with a company. (Nov., pg. 847.)

London and Lake Erie Ry. and Transportation Co.—The purchaser of the South Western Traction Co.'s property, franchises and rights at the recent sale was J. E. McDougall, representing the London Stock Co., which has been provisionally organized to take over the concern, and to obtain legislative authority to operate and extend the lines. The purchase price was $455,000 plus liens amounting to about $80,000. The provisional directors are: W. K. George, G. B. Woods, S. Jones, Toronto; A. McKay, Ingersoll, Ont; F. G. Rumball, J. Purdom, London, Ont.; A. E. Thompson, Cleveland, Ohio.

Application is being made to the Ontario Legislature to incorporate the London and Lake Erie Ry. and Transportation Co., to acquire the South Western Traction Co.'s undertaking, together with all its property and franchises; to acquire or construct the lines intended to be constructed by the S.W.T. Co., or any other company, viz.: from Brantford through Paris to Woodstock; from Woodstock to Ingersoll; from Ingersoll to London; from London to Strathroy and Glencoe; from Delaware to Lambeth, and from Aylmer to St. Thomas, Ont. The company also asks for power to charter and operate steam vessels from Port Stanley to Cleveland, Ohio, and other places; and to carry on various other businesses in connection with its lines and steamships. It is also asking for a declaration that its works are for the general advantage of Canada. The capital is fixed at $2,000,000 and the provisional directors are the same as the directors of the London Stock Co. named above. (See South Western Traction Co., Mar., pg. 215.)

Montreal and Southern Counties Ry.—The formal opening of the first section of this line connecting Montreal and St. Lambert, Que., took place Oct. 30. The inaugural car started from the corner of McGill and Youville Streets, and ran to the corner of St. Denis and Ste. Elizabeth Streets in St. Lambert, 3.5 miles. The route in the city is along Grey Nun St. and Common St. crossing Black's Bridge, along Riverside St. and then across the Victoria Jubilee bridge. The party was welcomed by the Mayor of St. Lambert, and after some congratulatory speeches refreshments were served, and the party returned to Montreal.

The company's future plans include the construction of a line from St. Lambert to Chambly, 12 miles; from St. Lambert to Longueuil, three miles; and from St. Lambert to Laprairie, 7.5 miles. A good start has been made on the extension to Longueuil, over 100 men being engaged in the work of grading in the vicinity of Brooklyn Park towards Cote Rouge. It is hoped to have this line completed by the middle of June, 1910. It was announced at the gathering that the old Central Vermont line would be electrified and used as the Chambly section. The principal officers of the company are:—President, S. T. Willett; Vice President, T. Craig; Second Vice President, W. B. Powell; Secretary-Treasurer, H. W. Cooper.

Referring to the question of the St. Lambert bylaw, W. B. Powell, Second Vice President, said Nov. 12, certain formalities which were not included in the document submitted to the Lieutenant-Governor had since been complied with, and the company expected that the bylaw would be approved in the course of a few days. (Nov., pg. 848.)

Montreal to Longueuil.—A proposition has been submitted to the Montreal City Council for the construction of a trolley line from Montreal, along the guard pier to St. Helens Island and across a bridge, to be constructed, into Longueuil. It is proposed by the applicants to take advantage of the dam and locks across St. Mary's Current, between the guard pier and St. Helen's Island, which it is proposed to construct in connection with the harbor improvements.

Nelson Electric Tramway.—A reorganization has been completed. The new company has raised $25,000 of new capital, and an issue of $25,000 of bonds, guaranteed by the city, has been made. With the new capital it is proposed to repair the line and to re-open it for traffic in Jan., 1910. Plans for the construction of an extension are under consideration.

The shares above referred to are of the par value of $5 each, and the entire issue has been taken up locally, there being 228 shareholders, the largest investment made being $500 and the smallest $10. The shareholders decided to accept an offer of 99.25% for an issue of $25,000 of bonds. A bylaw has been passed by the city council guaranteeing this bond issue. (Jan., pg. 53.)

Niagara, St. Catharines and Toronto Ry.—A press report states that it is expected that the extension from Port Colborne to Welland, Ont., will be completed and opened for traffic early in Jan., 1910. (Nov., pg. 848.)

Ontario West Shore Ry.—Tracklaying was expected to have been started on the first section of this line Nov. 15. One hundred carloads of rails, together with fastenings and other material had been delivered, Nov. 1. This material is sufficient to lay one-third of the mileage between the Guelph and Goderich Ry., near Goderich, where the line starts, and Kincardine, Ont. An order has been obtained from the Board of Railway Commissioners authorizing a connection with the G. and G. Ry., and the operation of its cars over that line into Goderich. As the O. and W.S. Ry. is a provincial corporation, the approval of the Ontario Railway and Municipal Board will also have to be obtained. (Nov., pg. 848.)

Ottawa and St. Lawrence Electric Ry.—J. McFarlane, a director, stated in an interview Nov. 1 that arrangements would be made with the New York Central and Hudson River Rd. for a direct connection with its system. Options had been secured on several falls on the Ottawa River, west of the city, from which the necessary power would be developed for the operation of the company's lines. The location surveys had been completed for 18 miles, and estimates were in preparation, so that the grading could be started at an early date. The preliminary surveys showed the line would be almost straight from Ottawa to Morrisburg. (Nov., pg. 849.)

Winnipeg Electric Ry.—The City Council has notified the company that it must proceed with the extension of its line on Selkirk Avenue, along Manitoba Avenue to McPhillips St. (Oct., pg. 771.)

People's Ry.—The City Council of Stratford, Ont., gave a first reading Nov. 15 to a bylaw and an agreement with the company for the construction of five miles of lines in the city and a number of radial lines. A special meeting of the council was held Nov. 22, when further consideration was given to the matter. It is hoped to have the bylaw in shape to have it voted upon at the regular municipal elections. The agreement was reached after a good deal of correspondence and several meetings between the company and a special committee. The company agrees to construct a line from New Hamburg to Stratford via Tavistock as authorized by its present act, and to apply for legislative sanction to construct the following additional lines:—from Stratford to Exeter by as direct a route as practicable via Avonton, Avonbank, Anderson and Kirkton, or such other route as will be satisfactory to the council, and extending from Exeter to Lake Huron; also from Stratford or a point on the last mentioned line to St. Marys; a line from Stratford to Goderich passing through Mitchell, Seaforth and Clinton. Within four months of the passing of the bylaw the company is to begin the construction of the New Hamburg to Stratford line, and on its completion to proceed with the construction of lines on streets in the city, such city lines to be completed and in operation by Dec. 15, 1910. The line to Mitchell and Seaforth is to be completed by Nov. 15, 1910, but an extension of time may be granted in the event of the Legislature not passing the act to be applied for. The whole of the lines mentioned in the agreement are to be completed and in operation by Jan. 1, 1912. The city agrees to subscribe for $90,000 of the company's preferred stock, $40,000 on the completion of the lines to New Hamburg and Seaforth and the city lines; $10,000 on the completion of the line to St. Marys, and $40,000 on the completion of the line to Exeter. The city will have two directors on the board. The agreement contains numerous section dealing with fares, rights of the various parties, and provisions as to appeals to the Ontario Railway and Municipal Board. (Nov., pg. 849.)

Port Arthur and Fort William Electric Ry.—Commissioner Cooke stated Nov. 13 that the council has authorized the commissioners to proceed with the work of completing the Arthur St. extension. The switch, he said, would be put in at once; and progress was being made with the overhead work. The extension will be completed within a very short time. The City Council has under consideration a plan to extend the line from Dawson St. along Hill St. to Oliver Road. J. J. Carrick, who is interested in some building land which he is placing on the market, offers to pay half of the cost of the extension. (Nov., pg. 849.)

Quebec Ry., Light and Power Co.—A press report states that the company expects to let at an early date a contract for the erection of a substation at Ste. Anne de Beaupre. The municipal council of Montcalmville has under consideration a proposal from the company to extend its tracks from the Quebec city boundary through the municipality to Cap Rouge and St. Foye church. (Nov., pg. 849.)

St. Thomas St. Ry.—Track has been laid on Ross St., St. Thomas, Ont., in the subway under the Michigan Central Rd., and the line on the new route was opened for traffic, Nov. 6. (Sept., pg. 685.)

Southwestern Traction Co.—See London & Lake Erie Ry. & Transportation Co.

During Oct., 250,563 passengers were carried on the Port Arthur and Fort William Electric Ry., against 203,497 during Oct., 1908.

The British Columbia Electric Ry. has ordered five double truck semi-convertible pay-as-you-enter cars, two 55 ft. combination passenger, smoking and baggage cars, and two 55 ft. combination passenger and smoking car bodeis, from the Ottawa Car Co., Ottawa.

Electric Ry., Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Sept., $240,185; operating expenses, $130,426; net operating earnings, $109,759; renewal funds, $16,394; net earnings, $93,365; approximate income from investments, $16,500; net income, $109,865, against $182,226 gross earnings; $93,698 operating expenses; $88,528 net operating earnings; $14,550 renewal funds; $73,978 net earnings; $13,550 approximate income from investments; $87,528 net income, for Sept., 1908. Aggregate gross earnings for three months ended Sept. 30, $702,866; net earnings, $321,563, against $537,581 gross earnings and $255,548 net earnings for same period 1908.

Cape Breton Electric Ry.—Gross earnings for Aug., $22,005; expenses, $11,504; net earnings, $10,501; against $22,958 gross earnings; $11,886 expenses; $11,072 net earnings for Aug., 1908. Aggregate gross earnings for eight months ended Aug. 31, $148,388, against $159,817 for same period 1908.

Guelph Radial Ry.—The commissioners have paid the Guelph, Ont., city council $4,860 as the profits for the past year's operation.

Halifax Electric Tramway.—Traffic receipts for Oct., $17,803.09, and for two weeks ended Nov. 14, $6,477.93, against $14,901.76 and $6,208.99 for same periods 1908.

Kingston, Portsmouth and Cataraqui Ry.—A letter from the company was read to the Kingston, Ont., city council, Nov. 8, stating that not having received any reply to the offer to sell the line it was presumed that the city did not wish to purchase. As the company was desirous, if possible, of continuing to operate the line a new proposition as to the supply of power was made. Further consideration will be given to the matter by the corporation committee.

London St. Ry.—Gross earnings for Aug., $22,465.38; expenses, $14,498.61; net earnings, $7,966.77; deductions, $2,441.75; net income, $5,525.02; for Sept., gross earnings, $24,937.83; expenses, $14,663; net earnings, $10,274.83; deductions, $2,363.05; net income, $7,911.78; for Oct., gross earnings, $19,339.01; expenses, $13,811.54; net earnings, $5,527.47; deductions, $2,463.63; net income, $3,063.84. Aggregate gross earnings for 10 months ended Oct. 31, $202,721.11; expenses, $140,149.87; net earnings, $62,571.24; deductions, $24,-082.76; net income, $38,488.48.

Montreal St. Ry.—Passenger earnings for Oct., $336,765.13; miscellaneous earnings, $17,241.82; total earnings, $354,-006.95; operating expenses, $174,734.97; net earnings, $179,271.98; taxes, $4,000; city percentage on earnings, $12,251.20; interest on bonds and loans, $14,329.61; rent leased lines, $498.67; total charges, $31,079.48; surplus, $148,192.50; expenses per cent. of earnings, 49.36; against, $312,432.94 passenger earnings; $16,-175.18 miscellaneous earnings; $328,-608.12 total earnings; $165,424.02 operating expenses; $163,184.10 net earnings; $2,700 taxes; $11,266.42 city percentage on earnings; $15,769.43 interest on bonds and loans; $444.43 rent leased lines; $30,180.28 total charges; $133,003.82 surplus; 50.34 expenses per cent. of earnings for Oct., 1908.

Quebec Ry. Light & Power Co.—Early in November it was announced from Montreal that a $10,000,000 merger had been negotiated to include the Quebec Ry. Light & Power Co., Jacques Cartier Power Co., Quebec Gas Co., Frontenac Gas Co., Canadian Electric Co., and several smaller concerns, and that the Montreal directors would be W. G. Ross, Managing Director of the Montreal St. Ry. and President of the Quebec Ry. Light & Power Co., Hon. R. Mackay, R. Forget and J. M. Greenshields. On Nov. 15 we were advised that nothing definite had ben done about the merger up to that date, but that as the Quebec Ry. Light & Power Co. had to make large expenditures, application would be made to Parliament for power to issue debenture stock, and no doubt the merger would take place as soon as the various interests in Quebec got together on a fair basis and a holding company charter was applied for. On Nov. 23 it was announced that the Quebec Ry. Light, Heat & Power Co. had been incorporated.

St. Thomas Street Ry.—Receipts for Oct., $1,122.63, against $1,218.64 for Oct., 1908. The number of passengers carried was 32,147, against 32,724 in Oct., 1908.

Winnipeg Electric Ry.—Gross earnings for Sept., $218,000; expenses, $109,000; net earnings, $109,000; against $174,500 gross earnings; $84,500 expenses; $90,000 net earnings for Sept., 1908. Aggregate gross earnings for nine months ended Sept. 30, $1,840,800; net earnings, $921,600, against $1,528,300 gross and $764,800 net for same period 1908.

Electric Railway Notes.

The Port Arthur and Fort William Electric Ry. added two pay-as-you-enter cars to its rolling stock, Nov. 2.

The Edmonton Radial Ry. has ordered six double truck semi-convertible pay-as-you-enter cars from the Ottawa Car Co.

The Montreal and Southern Counties Ry. has received three 40 ft. centre aisle interurban cars from the Ottawa Car Co.

A charge against the Chatham, Wallaceburg and Lake Erie Electric Ry. for employing alien labor was adjourned sine die at Chatham, Ont., Nov. 11.

The Quebec Ry. Light and Power Co. has ordered two double broom sweepers, two wing plows, six 18 ft. closed cars and two 60 ft. interurban cars from the Ottawa Car Co.

The Nelson St. Ry. Co., Nelson, B.C., has ordered two complete equipments, each including four 40 h.p. motors with double end controllers from Allis-Chalmers-Bullock, Ltd., Montreal.

C. E. A. Carr, heretofore Manager Quebec Gas Co., has been appointed Assistant General Manager Quebec Ry. Light and Power Co., and will be given charge of the Operating Department.

The Nipissing Central Ry. has purchased a locomotive to haul ballast trains, and it is expected that it will be used to haul passenger cars pending the installation of the electric plant.

By the breaking away of a flat car from a train, and its subsequent collision with a passenger car on the B.C. Electric Ry., near Lake View station, Vancouver, Nov. 10, 14 persons were killed and seven injured, one of whom has since died.

The Hull, Que., Electric Co. is asking the Hull city council for an exemption of taxation for a further 15 years. The present agreement expires in 1910, and the council proposes to assess the company's property at $60,000.

A. F. Townsend, Manager Cape Breton Electric Co., Sydney, N.S., is reported to have resigned, and to have been appointed to another position with Stone and Webster, of Boston, Mass., who control the Cape Breton Electric Co.

An action has been entered against the Ottawa Electric Ry., which will probably decide the size of a parcel which a passenger is allowed to take on a car without having to pay extra. D. Rotkin claims to have been put off a car for refusing to pay for a large parcel, and is suing for $500 damages.

The Mount McKay and Kakabeka Falls Ry. is reported to have purchased a combined passenger and smoking car, with seating capacity of 70, and having both gasolene and electric motor equipment, capable of hauling three cars. It has also acquired three 12-yard dump cars for hauling gravel.

The Ontario laws authorize the taking of a vote as to the operation of street cars in any city having ap opulation of 50,000. A deputation representing the citizens' committee of London asked the Government to declare that that city had the required population, but the Premier declined. A special census will probably be taken.

The action brought by the city council of Winnipeg against the Winnipeg Electric Ry., which has been dragging on for the past three years, has been argued before the courts, and the judges reserved judgment. The case arises out of the claim of the city that the company is not entitled to bring electrical power into the city which has been generated outside the city limits without first obtaining the consent of the city. The company has a power plant outside the city, and the city council has a power plant under construction on the Winnipeg River.

C. E. A. Carr, who has been appointed Assistant General Manager of Quebec Ry., Light and Power Co., Quebec, was born at Thornton, Ont., Nov. 8, 1870. He was educated at Barrie and Toronto, and entered the City Engineer's office, Toronto, in 1888, where he remained until 1892, since when he has been consecutively to 1894 secretary to General Manager Toronto Ry.; with Montreal St. Ry., and Cleveland Electric Ry., Cleveland, O.; during this period the two first named railways were changed from horse to electric traction; 1895 to 1905, General Manager, Secretary and Treasurer London St. Ry., London, Ont., directly in charge of the conversion from horse to electric traction, and from 1898 to 1900 was also General Manager and Secretary Montreal Park and Island Ry., spending alternate weeks in London and Montreal, until the latter was acquired by the Montreal St. Ry.; 1905 to 1908, Manager Helena Light and Ry. Co., Helena, Montana, in charge of construction and operation, and from Apr., 1908, Managing Director Quebec Gas Co.

The Public Service Commission of New York State, which has been considering the question of compulsory electrification of railways passing through the Adirondacks forest preserve, as a means of fire prevention in the latter, has rejected this remedy on account of its prohibitive cost. The additional cost of operation by electricity was estimated to be $1,156,470 a year more than the present cost of operation by steam locomotives, for the New York Central lines alone, that figure being reduced by only $100,000 if all the power were generated by water. This great expense is due to the very unfavorable conditions for electric service, the traffic consisting of a few heavy trains over comparatively long distances, whereas economical electrical operation requires a fairly uniform traffic composed of a large number of small trains at small intervals, as in the suburban service of large cities.

St. John Ry.—Negotiations are reported to be in progress for the acquirement of a right of way between St. John and Milledgeville, N.B., 2¾ miles. Several surveys are stated to have been made, the most practicable one leaving Main St., at the corner of Elm St., passing through the latter, alongside the rifle range to Milledgeville. It is also stated that the company intends laying out a number of amusement places at this point.

Parry Sound Marine Depot, Etc.

The Department of Marine's depot at Parry Sound, Ont., was established in 1905. The large increase in traffic in the Great Lakes and Georgian Bay, and in tonnage and size of vessels, rendered it imperative that an adequate lighthouse and buoy service be maintained in these waters necessitating a closer supervision and more frequent inspection of the aids to navigation in this vicinity, than had obtained heretofore. The work of attending to the lighthouse and buoy service in this district had continued to increase with a corresponding increase in the aids to navigation, and it was evident that before long steps would have to be taken to devise some means for the proper handling of this important service, so that every facility possible might be afforded vessels navigating these northern waters, in the way of a safe and well lighted route. The introduction of the large signal buoys, and the method of charging the same, necessitated the provision of proper facilities for their maintenance. Previously, the gas for the purpose of charging these buoys was manufactured in the Montreal-Kingston division of the service, and compressed into storeholders which were shipped by rail to Depot Harbor, where they were received by the contractor who charged the buoys, placed them in position with his own tugs, looked after their maintenance during the season of navigation, and laid them up in the fall. This was the best possible arrangement with the facilities at hand, but it had its disadvantages, in-so-far as the service was at times handicapped in the matter of not having close at hand a suitable workshop and mechanic expert for repairing lanterns, etc., which might have been damaged by any cause, or otherwise in need of repair. In this case it was necessary to send the lanterns to one of the Department's depots on the St. Lawrence, which, however expeditiously the repairs were carried out, caused interruption to the buoy service at Parry Sound. It was thus evident that much time could be saved if a depot were established close at hand, which besides providing the necessary facilities for the manufacture of gas in the vicinity, would also afford facilities for a closer and more frequent inspection of the lights and buoys, and, therefore, improve the service generally.

DOMINION GOVERNMENT STEAMBOAT SIMCOE AT PARRY SOUND DEPOT WHARF.

Previously, the maintenance of the buoy service had been carried out by contract and had given satisfaction to the Department as far as it was possible under the circumstances, but it has been found in practice that where buoy contracts are not efficiently supervised, indifferent results are sometimes obtained.

Of the aids to navigation in the Upper Lakes, the only inspection possible was the annual inspection of the Superintendent of Lights for the Ontario Division. This division comprises all the lights from Montreal westward to the Northwest Provinces, and each station was visited annually by the Superintendent, on a steamer chartered by the Department of Marine for the purpose of delivering supplies to the light stations. The Department had no steamer of its own available for this work, and as the vessel was a chartered one the trip was usually made in the shortest possible time, many of the stations being visited through the night. It was difficult to make any satisfactory inspection under the circumstances, the main purpose being to supply the keeper with his annual supplies. In 1904, provision was made in the estimates for the purchase of property in Parry Sound for the establishment of the buoy depot in question. Negotiations were opened in this connection, and the Bobbin factory was purchased. Additional land has been secured since then, and the property now covers 6½ acres. The main building is 120 by 50 ft., and the boiler room is 35 by 35 ft. The old wharf measures 16 by 170 ft. which, together with the new wharf 40 by 250 ft., give all the accommodation necessary for the boats at the depot. There is a gas compressing plant in connection with the depot for the purpose of manufacturing gas for the

MARINE DEPARTMENT'S DEPOT, WHARF, ETC., PARRY SOUND, ONT.

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2 South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7 - Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81 62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97.96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106.10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum. Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-selected districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

THE CANADIAN RAILWAY ACCIDENT INSURANCE COMPANY, OTTAWA, CANADA
A PURELY CANADIAN COMPANY

JOHN EMO, General Manager — H. W. PEARSON, Secretary-Treasurer — D. MURPHY, President

AUTHORIZED CAPITAL - $500,000. SUBSCRIBED CAPITAL - $200,000.

Issues all classes of Accident and Sickness Insurance at lowest rates as is consistent with safety. Agents wanted in unrepresented districts. Railroad Employees and Collective Insurance a specialty.

compressed acetylene lights in the Parry Sound channel. There is also a lantern testing and repairing room. In addition to the buoys guarding the approaches to Parry Sound, the depot also cares for the acetylene beacon at Meaford, and the gas buoys at Lockerby rock and Surprise shoal. Several lights in the district have been changed from oil to acetylene, and this arrangement admits of grouping several lights under one keeper, and all the lights are supervised by the depot. Much lighthouse work in the way of installing lighthouse apparatus, has also been done by the depot; for instance, the new third order light at Lonely Island, and the lights at Collingwood, Meaford, and other places. A berth and dock have lately been completed, making the depot practically complete in every particular, and an establishment creditable to the Department. Up to this season, the buoy service was cared for by a chartered tug, with the aid of a derrick scow. The addition of the new C.G.S. Simcoe for this service, will dispense with the necessity of chartering a tug. The difficulty encountered by the Department in obtaining suitable boats for hire when necessary, and the large expenditures made for this purpose, influenced the Department to provide a steamer of its own, designed to fill the needs required, and which will be at its disposal when required at any time. It was evident that the only perfect and independent system could be obtained by the possession of such a boat. Besides delivering the annual supplies to the lightkeepers in the Ontario Division, and being available for the inspection work, when necessary, it is intended also to use this boat for the transportation of men and materials to isolated stations where repairs may be necessary, or new illuminating apparatus in the course of installation. Special care and attention were given to the designing of the boat, in order that she might meet the needs of the particular service for which she was intended. Detailed plans and specifications were prepared in the Department, and the vessel was built in England. Her principal dimensions are as follows:

Length	194′ 0″
Length b. p.	180′ 0″
Breadth moulded	35′ 0″
Depth moulded	17′ 6″
Depth to lower deck	10′ 6″
Upper deck to poop deck	7′ 6″
Poop deck to boat deck	7′ 6″
Load draft in fresh water	11′ 0″
Speed	12 knots
Coal, full supply	150 tons

She is classed 100 A1 at Lloyds Canadian Lake Service, with water ballast and double bottom fore and aft and full equipment to Board of Trade requirements and Canadian Steamboat Inspection Act. She is capable of being navigated through solid ice 12 ins. thick. She has straight stem, elliptical stern and seven water tight bulkheads, two steel masts, special consideration having been given to the forward one in view of the heavy derrick and gear fitted thereto. The derrick is capable of lifting 27 tons. The vessel has 70 ft. of clear deck forward. The great lifting power of the derrick and large deck space was designed for the lifting and storing of the large buoys in the service. She is electrically lighted throughout and fitted with one searchlight of 12,000 candle power. She carries 1 steam launch, 2 surf boats and 2 dinghys. She is propelled by twin screws driven by two sets of direct-acting triple expansion engines capable of driving her at a speed of 12 knots. High pressure cylinder 13½ ins., mean pressure cylinder 22 ins., low pressure cylinder 36 ins., stroke of piston 27 ins. She is equipped with two Babcock & Wilcox natural draft water tube marine boilers, the working pressure being 180 lbs. per square inch and tested by hydraulic pressure to 360 lbs. per square inch.

The U. S. Vessel Tonnage Tax.

The U.S. Department of Commerce and Labor has decided that vessels stopping at U.S. ports solely for bunker coal will not be liable for the new tonnage tax, and that this decision was to be effective from Nov. 4, and was to apply as well to Canadian as to other vessels.

The U.S. Department of Commerce through its Commissioner of Navigation advises that the tonnage tax falls impartially on U.S. vessels as well as on certain vessels entering from foreign ports. This renders an exact measure of retaliation by the Dominion Government undesirable. The Dominion Marine Association is working with the Lake Carriers Association and the Association of Passenger Lines in the U.S. with a view to having the Great Lakes excluded from the operation of the new law, which was passed by Congress largely with ocean tonnage in view, and chiefly with the repeal of British light dues in consideration. British tonnage preponderated on the ocean, and in the view of the Department of Commerce and Labor reciprocity was no longer desirable. Hence the new tax, falling on vessels entering from certain foreign ports, including Ontario. Having regard to comparative U.S. and British or Canadian tonnage entering U.S. ports from Ontario ports, the inclusion of the lakes in the law seems a manifest error.

Notices to Mariners

The Department of Marine has issued the following:

No. 99. Oct. 18. 264.—British Columbia, Vancouver Island, Stuart channel, Boat harbor, hydrographic information, buoys established.

No. 100. Oct. 20. 265.—British Columbia, Vancouver Island, south coast, Juan de Fuca Strait, Race rocks, change in fog alarm.

No. 101. Oct. 21. 266.—Quebec, River St. Lawrence below Quebec, St. Michel, buoys established. 267.—Quebec, River St. Lawrence, chart St. Nicholas to Quebec bridge issued. 268.—Quebec, River St. Lawrence, ship channel between Quebec and Montreal, types of gas buoys not to be given in future in the Canadian List of Lights. 269.—Quebec, River St. Lawrence, Yamachiche Bend, color of gas buoy light, Ile Deslauriers, character of gas buoy light.

No. 102. Oct. 22. 270.—Quebec, Gulf of St. Lawrence, entrance to Bonne Esperance harbor, Whale Island, beacon rebuilt. 271.—Newfoundland, Labrador, Belle Isle, north end, change in shape and color of lighthouse. 272.—Newfoundland, Strait of Belle Isle, Watts Point, beacon established.

No. 103. Oct. 26. 273.—Quebec, River St. Lawrence, Quebec, back range light destroyed by fire, temporary light.

No. 104. Oct. 30. 274.—Quebec, River St. Lawrence below Quebec, Morin shoal, gas and signal buoy replaced by gas buoy. 275.—Quebec, River St. Lawrence, Orleans channel, Orleans Island, intended improvement of St. Pierre range lights. 276.—Quebec, River St. Lawrence, Ste. Croix, light improved.

No. 105. Nov. 4. 277.—Ontario, Georgian Bay, south side, Vails Point shoal, gas and bell buoy established.

No. 106. Nov. 5. 278.—British Columbia, Active Pass, Mayne Island, Helen Point, change in fog bell. 279.—British Columbia, Chatham Sound, Malacca passage, Lawyer islands, new lighthouse tower. 280.—British Columbia, Queen Charlotte Islands, Hecate Strait, Skincuttle inlet, Copper islands, gas lighted beacon established, New England rock gas and whistling buoy withdrawn.

No. 107. Nov. 6. 281.—Ontario, Georgian Bay, Wingfield basin, dredged channel, buoys and beacons.

No. 108. Nov. 8. 282.—Nova Scotia, Cape Breton Island, east coast, Flint island, fog alarm established. 283.—Newfoundland, east coast, Catalina, Green island, change in fog alarm. 284.—England, west coast, Holyhead approach, South Stack light, alteration in character. 285.—Scotland, west coast, Skye, Neist point, lighthouse established.

No. 109. Nov. 10. 286.—Nova Scotia, west coast, Cape St. Mary, intended change in character of light postponed.

No. 110. Nov. 15. 287.—British Columbia, Vancouver Island, west coast, Quatsino Sound, Entrance Island, arc of visibility of light. 288.—British Columbia, Finlayson channel, Hiekish Narrows, rock located. 289.—British Columbia, Chatham Sound, chart of Prince Rupert harbor issued.

No. 111. Nov. 15. 290.—Ontario, Lake Ontario, west end, Burlington channel, intended fog alarm at front range lighthouse. 291.—United States of America, shoal water in upper Detroit River.

Lake Grain Shipments, 1909 Crop.

The following statement, prepared by F. E. Gibbs, Grain Inspector, Fort William, Ont., shows the bushels of grain shipped from the different elevators at Fort William and Port Arthur, of the 1909 crop, Sept. 1 to Oct. 31, inclusive, with the ports of destination.

Canadian Pacific Railway Company.

Issue of New Ordinary Capital Stock.

NOTICE is hereby given that, pursuant to Resolution passed at the Special General Meeeting of Shareholders on 7th October, 1908, an issue of $30,000,000 additional Ordinary Capital Stock of the Company, or 300,000 Shares of $100 each, has been ordered by the Board of Directors.

The Stock will be offered to the Shareholders of record at 3 p.m. on MONDAY, the 15th Day of November, 1909, at the price of $125 per share, being at a premium of $25 over and above the par value thereof on the basis of 20 per cent., or one share in five of their respective holdings.

The right to subscribe will expire at 3 p.m. on WEDNESDAY, January 5, 1910.

Payments will be received at the Bank of Montreal, London, New York, or Montreal, as follows:—

20% or $25 per share on subscription on or before January 5th, 1910.
20% or $25 per share on March 9th, 1910.
20% or $25 per share on May 9th, 1910.
20% or $25 per share on July 8th, 1910.
20% or $25 per share on Sept. 7th, 1910.

Interest at the rate of six per cent. per annum will be paid in July, 1910, from the due date of each instalment to June 30th, 1910, on instalments up to and including that of May 9th, 1910, which have been paid on or before due dates.

All shares of the issue on which instalments have been paid in full on the due dates will rank with the existing stock for the full dividend accruing for the half-year ending December 31st, 1910.

A circular containing the terms of subscription and payment, and enclosing warrants of subscriptions, will be mailed to the Shareholders on or about the 30th day of November, 1909.

By Order of the Board,
W. R. BAKER,
Secretary.

Dated at Montreal, 20th October, 1909.

NOTICE.—The Canadian Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act authorizing it to construct and operate a line of railway from a point on its Pheasant Hills Branch at or near Asquith, in the Province of Saskatchewan, in a northerly and northwesterly direction to a point in Township 38 or 39 Range 10, 11 or 12, a distance of about twenty miles, and for other purposes.

W. R. BAKER, Secretary.
ANDREW T. THOMPSON, Ottawa Agent.

Dated at Montreal, the 1st November, 1909.

G.T.P. Branch Lines Co.

NOTICE is hereby given that The Grand Trunk Pacific Branch Lines Company will apply to the Parliament of Canada, at its next session, for an Act amending the Act incorporating the Company, Chapter 99 of the Statutes of 1906, and authorizing the construction of the following additional lines of railway:—

(1) From a point on the Western Division of the Grand Trunk Pacific Railway in the vicinity of the town of Watrous, Sask., to a point at or near Calgary, Alta., or to a point on the line authorized to be constructed by the Company from a point on the said Western Division between the 111th and 113th degrees of longitude to Calgary, Alta.

(2) From a point on the proposed line mentioned in paragraph (1), within ranges 4, 5 or 6, west of the third meridian, thence in a southeasterly and easterly direction to a point at or near Regina, Sask.

(3) From a point on the proposed line mentioned in paragraph (1) within ranges 21, 22, 23 or 24, west of the third meridian, thence in a northerly or northeasterly direction to a point at or near the town of Biggar, Sask.

W. H. BIGGAR,
Solicitor for the Applicants.

Montreal, October 21st, 1909.

THE JAMES BAY AND EASTERN RAILWAY COMPANY.

Notice is hereby given that application will be made to the Parliament of Canada, at its next session, for an Act incorporating a company under the name of the James Bay and Eastern Railway Company, with power to construct and operate a line of railway running from some point on the authorized line of the Canadian Northern Ontario Railway near Lake Abitibi, thence in a generally easterly and southeasterly direction, passing south of Lake St. John, to a point at or near the mouth of the Saguenay River, with a branch from such line or location in the County of Chicoutimi to Ha Ha Bay on the Saguenay River, also fixing the amount of securities to be issued with respect to such line, and authorizing amalgamation with other companies, with other usual and customary powers.

GEO. F. MACDONNELL,
Solicitor for the applicants.

Toronto, Ontario, 27th October, 1909.

THE ONTARIO & OTTAWA RAILWAY COMPANY.

Notice is hereby given that application will be made to the Parliament of Canada at its next session for an Act incorporating a Company under the name of The Ontario and Ottawa Railway Company, with power to construct and operate lines of railway running from a point on the authorized line of the Canadian Northern Ontario Railway at or near Lake Couchiching, thence in a generally easterly direction to a point in the Township of Snowdon, in the County of Haliburton, and from a point at or near Bird's Creek or Bancroft, in the County of Hastings, thence in a generally easterly direction to or near Renfrew, thence crossing the Ottawa River and continuing in a generally southeasterly direction to a point at or near the City of Hull, or re-crossing the Ottawa River to a point at or near the City of Ottawa; also fixing the amount of securities issued with respect to such lines, and authorizing amalgamation with other Companies, empowering the Company to acquire the capital stock or securities of other Companies with which it may be authorized to amalgamate, and to consolidate the securities issued by such Companies, with other usual and customary powers in the premises.

GEORGE F. MACDONNELL,
Solicitor for the Applicants.

Toronto, Ontario, November 9, 1909.

NOTICE.

In conformance with the Patent Act, and particularly Section 38, with reference to Canadian Patent Number 108,262, granted to H. E. Brown, for improvements in Brakes, the public are hereby notified that the manufacture of the article protected under the said patent is being proceded with, and that enquiries for the supply of the same, for licenses to manufacture or other negotiations in regard to the Patent Rights may be made to the undersigned.

Marine Insurance Legislation.

A meeting held in Montreal recently was attended by a number of manufacturers and lumbermen and also by solicitors for various interests, including foreign unlicensed insurance companies, for the purpose of considering the pending Dominion Insurance Bill and organizing opposition. The action taken was to adopt unanimously a resolution prepared and moved by F. King, counsel Dominion Marine Association, as follows: "That in the opinion of this meeting the right of the individual to insure his risks in whatever quarter he desires should be recognized as a first principle in any legislation; that the prohibitions and penalties of the proposed bill should properly apply only to those companies, associations and individuals who solicit insurance or carry on through established agencies an insurance business in Canada; and that a committee consisting of the legal representatives present be appointed to prepare and present a case in support of these views to Parliament; and that a further committee of business men be appointed to arouse public opinion and enlist the assistance of the press, the Bankers' Association and other commercial bodies in opposition to the bill."

The pending bill adds to the existing prohibition a penalty on the inspector of the risk and on the adjuster of the loss. This apparently applies to marine risks. The section which imposes the tax upon the insured appears to apply only to fire risks and would not include marine policies. The matter is, however, not sufficiently clear and the Dominion Marine Association will continue to oppose the bill unless by an amendment it is made absolutely clear that marine interests are not affected.

H. and A. Allan, Ltd.

Since the retirement of J. and A. Allan of Glasgow, Scotland, from any active part in the affairs of the Allan Line, a general transfer of shares has taken place, so that practically the whole are held on this side of the Atlantic. The list is as follows:—Sir H. Montagu Allan, 15,727; H. A. Allan, 14,132; B. J. Allan, 14,580; A. A. Allan, 14,698; J. S. Park, 500; J. A. Spens and A. D. Wylie, one each. Following is a copy of the balance sheet for the recently closed financial year of the company, to which reference was made in our last issue:

CAPITAL AND LIABILITIES.

Capital issued	£	603,390
Debentures issued		550,000
Amount of loan from J. & A. Allan, general managers		440,096
Amount owing by the company to various creditors and on current and open accounts, suspense account, bills payable, etc.		146,021
Balance		103,789
Total		£1,846,296

ASSETS.

No good-will.		
Steamships		£1,757,390
Buildings, wharf property, fixed plant and machinery		31,161
Movable plant, stock of materials, stores, etc.		33,352
Cash in bank and in hand, and unexpired premiums of insurance paid for		24,393
Total		£1,846,296

During Aug. and Sept., 17 employes were killed, and five injured in the course of their work in connection with the navigation of Canadian waters. Of the fatalities, ten were due to drowning, four to falls, two to falling material and one to being caught between a boat and a wharf; while, of the other accidents, two were due to falls and one each to falling material, flying material and to machinery.

Wreck of the s. s. Hestia.

An enquiry has been held into the causes of the wreck of the Donaldson Line s.s. Hestia, on Old Proprietor Ledge in the Bay of Fundy on Oct. 25, before Capt. W. R. Lugar, with F. Nash and R. Jones as Assessors, the judgment being delivered Nov. 12, as follows:—The Court is of opinion that the causes which led up to the loss of the s.s. Hestia were the error of compass; neglect of soundings when in sight of Gannet Rock light; insufficient allowance made for set of ebb tide and strong wind; error of judgment on the part of the master in allowing the vessel to get the bearing of Gannet Rock light to the southward of west magnetic; the vessel was about 5½ miles from the Gannet Rock light when she stranded.

Atlantic and Pacific Ocean Marine.

Owing to the repairs to the C.P.R. s.s. Empress of Ireland requiring longer time that was anticipated, its sailing from Liverpool, Eng., on Dec. 3, has been cancelled, and arrangements made with the Allan Line, for the s.s. Hesperian to take its place.

In referring to the wreck of the Donaldson Line s.s. Hestia, the Daily Telegraph, London, Eng., recently stated that the disaster occurred in the Bay of Fundy, while the vessel was on a voyage from Glasgow to Quebec. And after all the British editorial tours through Canada too.

The British Board of Trade held an enquiry, Nov. 6, into the causes of the loss of the Allan Line s.s. Laurentian, off Newfoundland Sept. 6, and held that Capt. Imrie was at fault in having altered the course landward and continued at full speed during a fog. His certificate was suspended for three months.

The Dominion Government has renewed, for one year, the contract with the C.P.R. for the winter freight service between St. John, N.B., Halifax, N.S., and London, Eng., on the basis of $15,000 for 10 round trips. The company's steamships Lake Michigan, Mount Temple, Montreal and Montezuma will be utilized on this service.

The report, which has appeared recently in the daily press, that the Quebec Steamship Co. has purchased the Cunard Line s.s. Lucania, which was recently considerably damaged by fire at Liverpool, Eng., is incorrect. The vessel was sold to a firm of ship breakers and has been removed to Swansea, South Wales, to be broken up.

The estimates for the fiscal year ending Mar. 31, 1911, which have been laid before Parliament, provide $25,000 in aid of a steamship service between St. John, N.B., and Cuba. It is stated that a company is being organized in St. John to operate such a service, and that it will apply for the subsidy. The Elder Dempster Co., which is at present operating a service to Mexico will also apply.

A contract is reported to have been made between the Canadian Northern Ry. and the British Columbia Government for the estabuishment of several distinct steamship lines on the Pacific Ocean. It is stated that four vessels will be operated in the Japan and China trade, four on the Australia and New Zealand route, and other vessels will be placed on the northern coast route.

An investigation was held recently at Newcastle, Eng., into the causes of the stranding of the Thomson Line s.s. Cairncrag, which occurred on the Snorting rocks, Big Dover Island, on the Nova Scotia coast, in July. The court found that the vessel was not being navigated at too great a speed, but that the lead was not used with sufficient care and frequency, and the vessel was not navigated with proper and seamanlike care. The loss of the vessel was caused by the wrongful act and default of the master in setting too fine a course, improperly applying the local variations to that course, and subsequently navigating the vessel straight for the land, and neglecting to take proper soundings for the purpose of ascertaining her position. Having regard to the master's good character and length of service in one employ, the court did not deal with his certificate, but severely reprimanded him and ordered him to pay £5 towards the cost of the enquiry.

Maritime Provinces and Newfoundland.

The contract for the wharf, under construction at Leonardville, N.B., was let to T. P. Charleson, Ottawa, the price being $9,895.

The final accounts of the liquidator of the New Panther Steamship Co. were presented at a recent meeting of shareholders at St. John's, Nfld.

The Eastern Steamship Co.'s winter sailings between St. John, N.B., and Boston, Mass., commenced Nov. 10, two sailings each week being undertaken.

The port of Little Bras d'Or, N.S., has been declared to be a public harbor, comprising all the waters of Little Bras d'Or west of a line drawn from Alder Point to High Cape, off Aconi lighthouse, and east of a line drawn from Moore Point to Grove Point.

McKinnon Harbor, N.S., has been declared to be a public harbor. Its limits comprise all navigable waters, north or inside of lines drawn from the the extremity of McKinnon Point to Campbell Island lighthouse, thence to the west extremity of Round Island, and due north to the mainland.

Bowring Bros.' whaling steamship Terra Nova, which has been sold for the purpose of conveying the British expedition party under Commander Scott, to the Antarctic next year, sailed from St. John's, Nfld., towards the end of Oct., for London, Eng., where she will be equipped for the voyage.

The Judicial Committee of the Privy Council delivered judgment recently in London, Eng., in the case of the St. John Pilot Commissioners against the Cumberland Railway and Coal Co., by which the company's coal barges are declared not to be exempt from the payment of compulsory pilotage dues under the Pilotage Act. Judgment was entered in favor of the Commissioners for $735 and all costs.

The s.s. King Edward, which was wrecked some time ago at Anticosti, and later salved and taken to Levis, Que., was offered for sale by tender recently, on behalf of the underwriters. She is equipped with triple engines with cylinders 13, 22 and 36 ins. diar., by 27 ins. stroke, supplied with steam from one Scotch boiler, steam windlass and winches. Her dimensions are: length, 149 ft.; breadth, 24 ft.; depth, 11 ft.; 355 tons gross, built in 1902.

The appeal of the Senlac Steamship Co., St. John, N.B., was dismissed recently by the Judicial Committee of the Privy Council, in London, Eng. The appeal arose out of the litigation in connection with the collision between the company's s.s. Senlac and the s.s. Rosalind, July 1, 1907. The Nova Scotia Admiralty Court originally decided that both vessels were to blame and ordered that the cost of repairs of each vessel be divided. As the s.s. Rosalind sustained little, or no damage, the owners appealed against this decision and the Supreme Court of Canada decided in their favor, which decision has been upheld.

shipbuilding yards in Canada, it is learned that a proposal has been submitted to the Government, whereby a company will undertake to construct a dry dock and ship repair plant at St. John, N.B., and a dry dock and shipbuilding plant at Levis, Que., in return for a bonus of $250,000 a year for 50 years. Harland and Wolff, Belfast, Ireland, and MacArthur and Perks, Ltd., which has been incorporated in Canada, the principals residing in the United States and in England, are interested in the scheme. The former firm has built many of the principal trans-Atlantic vessels, and the latter firm is intimately connected with the Georgian Bay canal scheme. There is every probability that the scheme, on some such lines will go through, though it has been stated that the subsidy asked for is too large. Sir Robert W. Perks recently intimated that he would not seek re-election as a member of the British Parliament, owing to engagements he had undertaken in Canada.

Province of Quebec Marine

The work of removing gas buoys from the St. Lawrence channel was commenced between Montreal and Portneuf, Nov. 22.

The Richelieu and Ontario Navigation Co. is considering the building of a sister vessel to the recently constructed City of Rochester.

The hull of the Richelieu and Ontario Navigation Co.'s steamboat Prescott, which was recently destroyed by fire, at Montreal, has been raised from the river bed and taken to the guard pier for examination.

An order in council has been passed making regulations for the governance of the ferry across the St. Lawrence River, between Prescott, Ont., and Ogdensburg, N.Y., license for the operation of which has been granted for 10 years from Oct. 1.

Plans for a number of improvements in the Montreal harbor, to be spread over ten years, at a total cost of about $15,000,000, have been placed before the Minister of Marine, and it is stated that a bill founded on them will bep resented to Parliament at an early date.

The one-hundredth anniversary of steam navigation on the St. Lawrence River occurred Nov. 1. There was no celebration of the event, along the river, other than that the majority of vessels carried flags. The steamboat Accommodation, which operated between Montreal and Quebec in 1809, was the first steamboat entirely built and equipped on this continent.

The company which recently acquired the franchise for the operation of a ferry service between Quebec and Levis is reported to have placed contracts for the material for the construction of two pontoons during the winter. It is also stated that plans for summer boats had been completed, and that it was the intention to call for tenders for their construction at once, so that they might be ready for service next spring. Two winter boats will also be built next year in order to deal with the next winter's traffic.

Writs have been served on Capt. L. A. Demers, acting Wreck Commissioner; Capt. J. Bain and R. Bequet, pilot, at the instance of Pilot Pouliot, to prevent them from reopening the investigation into the grounding of the s.s. Georgtown in Sept. last. At the original investigation, Oct. 11, Pilot Pouliot acknowledged that he was in fault on account of defective eyesight, and surrendered his license as pilot, after 41 years service. This, it is claimed, was accepted by the court, and was considered a final disposition of the matter. On behalf of the Marine Department, it is contended that the Minister of Marine has full authority to reopen any trial, even after a judgment has been given. Counsel for the pilot protested against further proceedings, but the court ordered the issue of a warrant against Pouliot.

Ontario and the Great Lakes.

Forwarders, Ltd., Kingston, has purchased the steamboat Port Colborne, a description of which was given in our last issue.

The name of the steamboat Elsinore, no. 126507, registered at Owen Sound, has been changed by order in council to Runabout.

The Richelieu and Ontario Navigation Co. was fined $250 at Buffalo, N.Y., Nov. 11, for landing an alien in violation of the U.S. labor laws.

The Board of Railway Commissioners has authorized the C.P.R. to load and unload its car ferries, which operate betwent Port Burwell and Ashtabula, Ohio, on Sundays.

Capt. W. Muir, of Muir Bors., owners of the Port Dalhousie dry dock, died at St. Catharines, Nov. 12, aged 89. He came to Canada from Scotland in 1834, and was connected with lake navigation for over 60 years.

The Farrar Transportation Co.'s steamboat Collingwood, which was recently sunk in collision in the Detroit River, has been repaired and left Detroit on her first trip Nov. 9.

The Dominion Marine Association has asked the Dominion Government to provide appropriations to begin the work of removing the Green shoals, Ottawa River, and to continue the improvement of Telegraph channel, Bay of Quinte.

The Canada Atlantic Transit Co.'s steamboat Ottawa foundered off Passage Island, Nov. 16, during a storm, the captain and crew escaping with difficulty. The shifting of the cargo is stated to have been the chief cause of the disaster.

C. J. Smith, General Manager Richelieu and Ontario Navigation Co., stated Nov. 16 that the company had decided to order another vessel in Toronto. It will be similar to the Rapids King and Rapids Queen, but of the most modern type.

The C.P.R. steamboat Athabasca, which was recently taken to Collingwood for repairs after being damaged on Flower Pot Island, near Owen Sound, is to be lengthened 36 ft. during the winter. This will increase her passenger capacity 25% and her cargo capacity 20%.

The rules and regulations governing ports in Canada have been amended, by the addition of a clause, providing that the speed of steam vessels navigating the Canadian waters of the St. Clair River shall not exceed nine miles an hour. A similar regulation applying to U.S. waters has also been passed by the U.S. Government.

The Ottawa Forwarding Co.'s steamboat Welshman was destroyed by fire, Nov. 7, on the Ottawa River, near Lachute. The loss is estimated at $4,000.00. She was built at Ottawa in 1900, and was a screw driven steamer, with engine of 48 n.h.p. Her dimensions were: length, 105 ft.; breadth, 23 ft.; depth, 6 ft.; tonnage, 204 gross, 99 register.

An order in council has been passed making regulations for the governance of a ferry across the Detroit River, between Walkerville, Ont., and Detroit, Mich., providing for operation between 5.45 a.m. and 10.15 p.m., at intervals of not more than 30 minutes on week days and between 8 a.m. and 10.15 p.m. on Sundays. A license will be granted for 10 years from May 1, 1910.

The Dominion Marine Association has again asked the Dominion Government to introduce legislation for the inspection and licensing of gasolene launches carrying passengers for hire, so as to prevent the unfair competition and risk of life which is permitted by the Canada Shipping Act in not requiring these boats to comply with the statute in any way except in the matter of life preservers and fire.

levels of the great lakes, in feet above tidewater, for Oct., as follows:—Superior, 602.31; Michigan and Huron, 580.38; Erie, 571.79; Ontario, 245.84. It was anticipated that the levels would fall, during Nov., as follows:—Superior, 0.1 ft.; Michigan and Huron, 0.2 ft.; Erie, 0.3 ft.; Ontario, 0.3 ft. Compared with the average Oct. levels for the past ten years, Superior was 0.82 ft. below; Michigan and Huron, 0.43 ft. below; Erie, 0.33 ft. below; Ontario, 0.17 ft. above.

After conference with a committee of the Dominion Marine Association the Marine Department has decided to place the new light on the north east end of Michipicoten Island, where it will be of service to boats taking the northern channel past the island, whether bound up or down. It will be placed far enough east to be picked up by the boat up bound and far enough north to be seen by the down bound boat after passing the last preceding light on the north shore. Col. Anderson, Chief Engineer of the Department, made a special tour of the island to ascertain the best points available.

After considerable correspondence between the Dominion Marine Association and the Marine Department it has been arranged that men shall be added to the staff of employes, for thep urpose of taking lines from vessels at the head of the Galops canal, the head of the Rapide Plat, and the head and foot of the Cornwall canal, the other locks, in the opinion of the Department not requiring this assistance, and in some cases no money being available this year for the purpose of paying extra men. On the Welland, the existing arrangement, under which each vessel employs men to follow the boat through the canal on the bank, will be continued. At Sault Ste. Marie the difficulty was corrected some time ago.

The C.P.R. plans for its new bridge over the Kaministikwia River, just below Mission River Jct., Ont., as submitted to the Dominion Public Works Department have been protested against by the Dominion Marine Association, which contends that the bridge's position is bad, that it has a central pier and that its span is too short. The Association urges the erection of a double bascule or roller lift bridge, with a clear open passage of 200 ft. The plan for a bridge over the McKellar River is also criticised and a full 100 ft. is asked there. A correspondent advises us that a ludicrous situation developed at the G.T.P.R. bridge at West Fort William recently. After dark a vessel had to send her own crew on to the draw to operate it, and then could not get her crew back as they would have to stay to close the draw. The G.T.P.R. has agreed to put on a night shift of men, and is trying to rush the installation of electrical apparatus to operate the draw.

Manitoba, Saskatchewan and Alberta.

The construction work on the St. Andrews locks is practically complete, the majority of the camps having been closed down, and the men discharged. A few minor details remain to be completed, but with favorable weather, it is expected that these will be cleared up very shortly. The placing in position of the lock gates has been accomplished, and the machinery for their operation is being installed. It is stated that everything will be in perfect readiness for navigation purposes immediately the ice clears in the spring.

The possibility of creating a navigable waterway from Cedar Lake to either Lake Winnipeg or Lake Manitoba has been much discussed of late. If Lake Winnipeg were chosen, it is stated that the construction of a locking system would have to be undertaken, to overcome the Grand Rapids, while an alternative proposal has ben made to build a dam on the Saskatchewan River and thus render navigable a channel to Lake Winnipegosis, west of High Portage. By so doing, it is stated, that traffic could be opened between points on the Saskatchewan River between Prince Albert and Cedar Lake through Lakes Winnipegosis and Manitoba, and connections made with the C.P.R. near Poplar Point, to the south of Lake Manitoba. By the Lake Winnipeg route, traffic would pass through the St. Andrews locks to Winnipeg by water direct. Government engineers are reported to be examining the proposals, and a report will be made in the near future.

B.C. and Pacific Coast Marine.

J. Mayers has been appointed a member of the Pilotage Authority for the New Westminster district.

F. A. Pauline, Victoria, has been appointed Commissioner for the Pilotage District of Victoria and Esquimalt.

The C.P.R. s.s. Amur returned to Victoria from the Queen Charlotte Islands, Nov. 1, for repairs, having received some damage, through grounding at Skidegate.

The Columbia Trading Co., Victoria, has deposited with the Public Works Department, Ottawa, area plans, site and description of works proposed to be constructed in Alberni harbor.

It is reported that an arrangement has been made between the C.P.R. and the International Steamship Co., whereby the winter service between Victoria and Seattle will be operated by the former, and between Vancouver and Seattle, by the latter.

Mackenzie Bros. have completed the purchase of the British steamship Puri, negotiations for which have been in progress for some months. The vessel is at present lying at Bombay, India, and it is the intention of the new owners to have her brought to Vancouver by Feb., 1910.

The B.C. Public Works Department received sealed applications for a charter to operate a ferry over the Bulkley River, about ¼ mile above the mouth. The applicants are directed to state the size and kind of vessel it is proposed to use, the method of operation, and a list of the proposed tolls.

The G.T.P.R. has contracted in England for the construction of two vessels, to be named Prince Rupert and Prince George, for operation between Prince Rupert, Victoria, Vancouver and Seattle. They will be 300 ft. long by 41 ft. beam, and it is expected they will be placed in service in June, 1910.

The Tacoma, Wash., Chamber of Commerce recently discussed the question of establishing a steamboat service between that city and Vancouver. It was decided to make a proposition to the C.P.R. and should that company not consent to put on such a service, to lay the matter before another line, or incorporate a company for the purpose.

The G.T.P.R. has deposited plans at the Dominion Public Works Department for a wharf or dock to be reconstructed at Victoria, on lots 7 to 13 inclusive, and on the southerly portion of lot 14, block 70, having a frontage on Wharf St. of about 390 ft., together with foreshore and water lots in front of same, together with a description of the proposed works.

Foley, Welch and Stewart's steamboat Omineca ran on the rocks in the Skeena River, about 15 miles below Hazleton, Nov. 8, and is believed to be a total wreck. She was built at Victoria this year, and was a stern wheel paddle steamer, with engine of 17 n.h.p. Her dimensions were: length, 137.5 ft.; breadth, 31.4 ft.; depth, 5.4 ft.; 168 tons gross.

The Dominion Government, through the Department of Trade and Commerce has entered into a contract with the Grand Trunk Pacific Ry. Co., for a steamship service between Prince Rupert and Queen Charlotte Islands not less than two round trips each month, from Nov. to Mar. inclusive, and four round trips each month for the remainder of the year, calls being made at Port Simpson, Naas Bay, Stewart, Masset, Skidegate, Queen Charlotte City, Lockeport, Ikeda Bay, Jedway, Collinson Bay and Porcher Island. A subsidy of $200 will be paid for each round trip.

Steamer Cascade, Ltd., has been incorporated under the B.C. Companies Act, with a capital of $16,000, to purchase and take over as a going concern the steamboat Cascade and the freighting business carried on by P. Dougall and Leeming Bros., Ltd., Victoria, and with power to build, purchase or otherwise acquire and operate steam and other vessels. The steamboat Cascade was built at Vancouver in 1902, and is a screw-driven vessel with engine of 16 n.h.p. Her dimension are: length, 95 ft.; breadth, 22.6 ft.; depth, 7.6 ft.; tonnage, 119 gross, 81 register.

SAULT STE. MARIE CANALS TRAFFIC.
